"At a town-meeting of the inhabitants of Townshend, legally assembled at the Public Meeting-house in said town on Tuesday, January 5, 1773, at Eleven O'clock in the forenoon, James Hasley was chosen Moderator.

"*Voted*, to choose a committee of five men to consider the letter of Correspondence from the town of Boston, concerning the rights and privileges of this Province, and report such Resolves and measures as may be proper for the town to come into, respecting the same. Chosen for said committee, Capt. Daniel Adams, Deacon Jonathan Stow, Capt. Daniel Taylor, James Hosley and Jonathan Wallace.

"*Voted*, to adjourn this meeting till to-morrow at twelve of the clock to this place.

"Met at the adjournment on Wednesday, Jan. 6, 1773. The committee chosen by the town at a meeting on the 5th of said month to consider the present state of our public affairs, particularly as pointed out to us by the metropolis of this Province, reported as follows:

"1. That it is the opinion of this town that the Rights of the Colonists of this Province in particular, as men, as christians and as subjects, are justly stated in the pamphlet sent us from the town of Boston.

"2. It is our opinion that our rights and liberties do labor under divers infringements, particularly in respect to the way in which our money is taken from us, by which our governor is supported, and in the extensive power vested in the commissioners of the customs, and by a military power being employed to keep us in awe and so forth.

"3. *Resolved*, that if the prevailing report concerning the Judges of our Superior Court being supported any other way than by the free grants of the People be true, it is a very threatening and dangerous innovation, directly tending to corrupt the Streams of Justice.

"4. *Resolved*, that our natural and constitutional Rights, our civil and Religious liberties, were confirmed to us by our charter, purchased by our ancestors at the expense of much fatigue and blood, which renders the possession of them more dear to us, and the parting with them more grievous, and lays us under stronger obligations to defend them in all constitutional and scriptural ways.

"5. *Resolved*, that the following instructions be and are hereby given to our Representative (viz.) that he use his utmost influence to obtain a removal of our present burdens, and to defend our liberties from all further encroachments, and to enquire into the report concerning our Superior Judges being independent of the people, to have our unhappy circumstances represented in a true light to our Rightful Sovereign, and that the General Assembly recommend to the people of this Province to set apart a day, they, the Assembly, shall think fit to name, for Humiliation and Prayer, that we may in a united Public manner spread our grievances before the King of Kings.

"6. *Resolved*, that the town of Boston have shown a true spirit of patriotism and a tender concern for the welfare of the Province, and that our emere thanks are due to them for their spirited endeavors to dis-

cover the danger of our situation, and to lead us in the way of seeking redress.

"7. *Resolved*, that a committee of five suitable men be chosen to correspond from time to time, as occasion may require, with the town of Boston and any other towns that have or shall, from a sense of our difficulties, come into such a method of correspondence and communication.

"The above Report being read several times and debated upon, and put to vote to see if the town would accept of the same, passed in the affirmative.

"The committee, chosen to correspond from time to time with the town of Boston and other towns, is as follows (viz.): Daniel Adams, Deacon Jonathan Stow, Capt. Daniel Adams, James Hosley and Samuel Manning,

"*Voted*, that the town clerk transmit an authentic copy of the foregoing proceedings of this town-meeting to the committee of correspondence of the town of Boston. DANIEL ADAMS, Town Clerk."

From the foregoing extract from the town records may be learned what the sentiments of the people of this town were in regard to the attitude of Great Britain towards her Colonies. They considered that the course of the mother country was oppressive and unjust and that their rights had been violated.

In 1774, after having received another letter from Boston, and having also heard from other towns, by letters, concerning the tax on tea, a town-meeting was called January 11, 1775, when the following was recorded:

"The town, taking into consideration certain intelligence received from the committee of correspondence in Boston, together with their request for intelligence and advice from the several towns in this Province, passed the following resolves (viz.):

"Being informed of the late proceedings of our fellow-countrymen in Philadelphia, relative to the East India Company being allowed to send large quantities of tea into these Colonies, subject to the payment of a duty upon its being landed, we do agree with them and readily adopt their sentiments upon this affair.

"*Resolved*, that we have always been uneasy with the plan laid down by the British Ministry for raising revenue in America, and that the present situation of our public affairs, particularly in respect to a late act of Parliament in favor of the East India Company, requires our attention, and therefore further

"*Resolved*, that we stand forth in the cause of liberty in union with other towns, and in gratitude to the spirited, patriotic town of Boston in particular.

"*Resolved*, that we earnestly advise that no tea be imported into this or any other American Colony so long as it is subject to a duty, payable upon its being landed here.

"*Resolved*, that we are sorry for the unhappy disagreement between this and the mother country, and we earnestly wish to see harmony restored.

"*Voted*, that the preceding resolves be recorded, and a copy of the same attested by the town clerk be transmitted to the committee of correspondence of the town of Boston. DANIEL ADAMS, Town Clerk."

It thus appears that His Majesty's subjects in the Province of Massachusetts, while deliberating on the injustice and wrongs which had been inflicted on them, were not entirely without hope that their rights might be respected and "harmony restored." An armed resistance as yet had not been agreed upon by the Colonies.

The first public meeting of the people in Massachusetts, except in Faneuil Hall, was a Provincial Congress, holden at Concord, October 11, 1774, which adjourned to Cambridge, and of which John Hancock was president. At a town-meeting, "Oct. 3, 1774, Jonathan Stow was chosen to appear in behalf of the town of Townshend to join the provincial con-

gress to be holden at Concord on the 11th of Oct. Inst."

In 1775 Captain Daniel Taylor was chosen to attend a Provincial Congress at Cambridge, and soon after Israel Hobart was chosen to succeed him. This congress enacted that at least one-fourth of all the militia should be enrolled as minute-men, who should be prepared to march at a minute's warning, on any emergency. This was a decisive step, which shows the grit of the Revolutionary fathers. Some of the members of this congress, from different towns, gave their time and expenses; others were paid wholly or in part by *subscription*.

The town voted to indemnify the constables for refusing to pay over the money which had been assessed by the Province, into the hands of Harrison Gray. The people were exceedingly aroused at this time. These were the defiant measures that brought on the war and started the King's troops *en route* for Concord, on the memorable 19th day of April, 1775.

Boston at that time was suffering under the vengeance of Parliament, for throwing over the tea and for being the head and front of disloyalty. There were many poor in that town out of employment, who had a scanty allowance of supply for their tables. To them the inland towns extended the hand of charity and relief. At a town-meeting, January 2, 1775, "Voted and chose a committee of five men to forward the donations for Boston and Charlestown. Chose for said committee, Mr. Israel Hobart, Capt. Benjamin Brooks, Lieut. Zachariah Emery and Mr. John Conant." Probably each man of this committee took a well-packed sled-load of provisions to their suffering friends at the tide-water. There is no other record concerning this transaction, as the warrants for calling town-meetings were not always recorded at that time.

At a town-meeting, June 19, 1775, "Voted to purchase 50 Hogsheads of salt for a town stock. Deacon Richard Wyer chosen to go to Salem to purchase said salt, and ordered him to take his directions from the Select Men, who are to give security in the name of the town for the same."

It thus appears that the town was preparing for the fight which was about to commence—the opening scene of the Revolution. So far as the actual means of gaining a living were concerned, the people of that time were comparatively independent. They took the wool from the sheep, cleansed, spun and wove it, ready to be made into clothing, which they wove in their hand-loom. Lighter fabrics were made from their flax, spun by a foot-wheel, the thread being graded by running between the thumb and forefinger of the operative. They ground their own grain into flour for their bread, produced vegetables and meat plentifully for their tables, and laid the reek maple under contribution for their sugar supply. The virgin soil yielded abundantly in payment of the toil of the husbandman. Luxury was a word not to

be found in their vocabulary; and *tea* they would not use after it was subject to a duty. Salt they could not produce, but they exercised great prudence in sending to the coast in season for an abundant supply. For the expense of getting it, a separate tax was assessed on all the polls and estates in town.

The alarm to the minute-men was given on the 19th of April, 1775, by the firing of a cannon on the hill where the meeting-house stood, about noon. Without doubt, quite a number of Paul Revere's tested their horsemanship in warning the patriots of the approach of the "ministerial troops." Ephraim Warren was plowing on his farm, a little to the south-east of Townsend Harbor, when the alarm was given. He immediately detached his team from the plow, and running to his house, called, "Mollie" (he married Mary Parker, of Chelmsford); "the regulars are coming and I am going; give me my gun." And he quickly mounted his horse and started towards the coast. He arrived at Concord early in the evening, only in season to see some dead bodies and a few wounded British soldiers, who had been left by their comrades in their hasty flight. The resistance to the British troops at Concord, and the manner in which the yeomanry of the Province hurried them back to their ships, makes a thrilling episode in American history.

"Muster Roll of Capt. James Hosley's company of minute-men, belonging to Col. William Prescott's regiment, who marched from Townsend April last to Cambridge in defence of the colony against the ministerial troops:

"James Hosley, Capt.; Richard Wyer, 1st Lieut.; James Locke, 2d Lieut.; Peter Butterfield, Sergt.; Benjamin Ball, Sergt.; Lemuel Maynard, Corpl.; Ephraim Brown, Corpl.; Nath'l. Bagley, Drummer; Ebenezer Ball, Daniel Holt, James Sloan, William Kendall, Daniel Conant, Asa Heald, Joseph Rumrill, Oliver Proctor, Daniel Clark, Richard Warren, Israel Richardson, Robert Waugh, Elijah Wyman, Eleazer Butterfield, Benjamin Hobart, John Brown, Daniel Emery, Ephraim Shedd, Zachariah Emery, Joseph Baldwin, William Clark, David Graham, Thomas Eaton, Ebenezer Ball, Jr., Joseph Shattuck, Thomas Webster, Jr., Levi Whitney, Noah Farrar, Josiah Richardson, Jonathan Patt, Isaac Kibler, James Rumrill, Jr., Jonas Farmer, Daniel Sherwin, Eleazer Butterfield, Jr., Isaac Boynton, Ephraim Brown, John Clark, Jedediah Jewett, Dudley Kemp, Abel Richardson, John Manning, John Emery, Thomas Wyman, Henry Dunster."

These men were paid for their services by order of the General Court in December, 1775, and they were in the field most of them twenty-one days. The action of the Townsend militia was nearly as prompt as that of the minute-men.

"A Roll of the travel and service of Capt. Samuel Douglas, of Townsend in the county of Middlesex, and belonging to Col. James Prescott's Regiment, and also of the men under his command, who, in consequence of the alarm made on the 19th of April, 1775, marched from home for ye defence of this Colony against the ministerial troops, and continued in the service till called back to take care of the Tories in sd Townsend.

"Samuel Douglas, Captain; James Hildreth, Drummer; Oliver Hildreth, Jona. Hildreth, Ephraim Adams, Abijah Hildreth, Joel Davis, Isaac Holden, Abner Adams, Abner Brooks, Benjamin Wilson, Benjamin Brooks, Abel Porter, Daniel Campbell, Samuel Scripture, Robert Campbell, Benjamin Adams, Joseph Giles, Andrew Searles, Jonathan Goss."

These men were in the service five days, and on the 22d of March, 1776, the General Court ordered them to be paid. Captain Douglas received £17s. 1d. and the men 12s. 9d. 2^{gr}. each.

These two rolls were copied from the "Lexington Alarm Rolls," vol. xii, pp. 115, 42, in the State archives. The captains of these companies made oath before Israel Hobart, Esq., that they were correct in regard to travel, term of service and the days of the month on which the service was rendered, from which it appears that Townsend had seventy-three men who quickly responded to the "alarm" on that memorable 19th of April.

The title of the roll of Captain Douglas' company is instructive in regard to the feeling here among the people at the commencement of the Revolution; for it appears that this company "was called back to take care of the Tories in sd Townsend." Most of the Townsend men who did not favor the cause of independence were near neighbors of Douglas and his soldiers. It appears from the records that Townsend had quite a number of men who were loyal to the King, some of whom left the Province. Both of these rolls designate the British soldiers as "ministerial troops" instead of His Majesty's troops, which rather indicates that the colonists considered that the King had bad advisers, and that the British ministry might perhaps be induced, in using deliberation and reason, and guided by wisdom, to consider and *reconsider* some of the acts that bore so heavily upon them.

The assembling of the soldiers around Boston in 1775 was a great advantage to the colonists, as it showed them the need of arms, blankets and other munitions of war. The acquaintance there formed, the discussions of future operations against their enemies and the necessity of well-concerted action, all strengthened their determination to be free. A large portion of the soldiers from all parts of the State who responded to the alarm re-enlisted and served more or less during the war with different captains and in companies from different towns.

The summer of 1775 was extremely hot and dry, much more so than any since the settlement of the town; there were small crops of corn and potatoes, and on dry land failed entirely; of hay not over half a crop was raised. There was also much sickness in town; many families suffering from the diseases of dysentery and fevers, which in many cases were long and severe. The number of deaths in town was unusually large. Add to this the absence of so many heads of families in the army, and the keen anxiety concerning the affairs of the Province, and we can have some idea of the depressed condition, the trials and struggles of this first year of the war.

The exact number of men from Townsend in the battle of Bunker Hill is not known; thirty-five of them were in Captain Henry Farwell's company, made up principally from Groton and Townsend soldiers. Oliver Stevens, in Captain Wyman's company, was wounded and died in prison. Archibald McIntosh, of Townsend, was killed in this action.

As near as can be ascertained, there were between thirty and thirty-five men constantly in the army

from this town until the British evacuated Boston in March, 1776. One great mistake in the war was the short term of enlistments, just as it was in the War of the Rebellion. About as soon as some of the recruits began to be worth anything to the government their term of service expired and they were mustered out.

In 1776 Oliver Prescott, of Groton, was appointed brigadier-general, and in that capacity he organized the militia of Middlesex County into eight companies constituting a regiment of drafted soldiers under fifty years of age.

Company No. 8, in this regiment, was commanded by Captain Thomas Warren, of Townsend. There were sixty men in this company, thirteen of whom belonged to Townsend, and their names are as follows:

Thomas Warren, captain; Samuel Maynard, corporal; Robert Waugh, corporal; William Manning, Joel Davis, Samuel Wyman, Jonathan Bowers, David Holt, William Clark, Asa Merrell, Hinchman Warren, Ephraim Warren, Timothy Warren.

It will be easily understood that, under the severe pressure of a harassing war, when all resources were heavily drawn upon to furnish arms, ammunition, clothes and provisions for the army, to supply funds for the payment of the soldiers and to meet other expenses incident to the state of public affairs, money among the people was not only exceedingly scarce, but that, in consequence of the successive drafts for soldiers, laborers were in great demand, and their services commanded exorbitant prices. The result of this was that prices of all commodities, and articles of consumption, rose in proportion. This was a peculiar state of affairs. Every kind of goods was held at a high price, although no one had money to buy with. The General Court passed an act dividing the State into districts, and ordered that a committee should be chosen in each district to fix upon the prices of labor and provisions. This plan operated unequally, and was given up, as the people would not submit to it.

At this time the people began to feel the heavily-pressing burdens of the war, and began to devise means to equalize the same among themselves. At the March meeting, 1777, the town "voted to choose a committee of five men to estimate all the past services done in the war by men of this town; Thomas Warren, James Hosley, Daniel Adams, Richard Wyer and Levi Whitney were chosen for said committee." The report of this committee is spread on the town records, and the sums awarded to the soldiers are certainly small. The expense was made into a tax "on the several inhabitants of this town, and that the polls pay one-half of said rate."

In addition to all other embarrassments under which the patriotic citizens were laboring, was the discouraging influence of about a dozen men in this town who were Tories. These men, for more than two years, had clandestinely opposed all measures which tended to resist the authority of Great Britain.

They were intelligent, most of them, and lived on Nissequassick Hill, and during the time that the soldiers were absent—after the alarm of the 19th of April—they were offensively outspoken and disagreeable. It was during this year that it became necessary for every man to show his colors, as public opinion demanded every able-bodied citizen to give his individual support to the American cause, or be exposed to public indignation, to prosecutions before a special court of the Sessions of the Peace, to imprisonment, or to a coat of tar and feathers. Occasionally they were obliged to uncover their heads, and, in presence of the assembled majesty of the town, to promise greater love for the American cause and a strict conformity to the popular will.

The selectmen reported the names of persons who were suspected of unfriendly feelings towards the patriots, and who were considered dangerous. There were eight of them, viz.: Isaac Wallace, William Wallace, David Holden, Jonathan Wallace, Ebenezer Giles, Joshua Smith, Reuben Tucker and Seth Johnson. Jonathan Wallace and Ebenezer Giles were excused after a rigid examination. There were others besides these men, some of whom, when the excitement was at its height, precipitantly left the town. The most prominent Townsend man who was loyal to the Crown and British ministry was Joseph Adams, a physician. He came to this town from Lincoln, married Miss Lovy Lawrence, of Lincoln, December 19, 1774. He owned a farm in Townsend and one in Pepperell, both of which, after the close of the war, were sold under the confiscation act by James Locke, who was appointed agent by the Judge of Probate. A committee was appointed to settle with his creditors, consisting of Rev. Samuel Dix, Captain Joseph Adams and others. He left early in the struggle and went to England, and died at Liscard, Cornwall, February 3, 1803.

At the close of the war there was considerable pressure on the part of the absentees, or runaway Tories, from all parts of the country, for the privilege of returning to the places that were once their homes. To this the patriots never consented. On the 17th of April, 1783, the town of Boston sent a letter concerning these absentees, and a copy of the proceedings of a meeting at Faneuil Hall, directed,—“To the committee of Correspondence, &c., the Selectmen of the Town or Plantation of Townsend, to be communicated to the Town or Plantation.” The tone of this meeting had the regular Faneuil Hall ring to it. The preamble to their action set forth the case of the absentees in their true light at considerable length, stating the duty of each town to practice their rights. One resolution only was passed which covered the whole subject:

“RESOLVED, That this Town will at all times (as they have done), to the utmost of their Power, Oppose every Enemy to the just Rights and Liberties of Mankind: And that after so wicked a conspiracy against those Rights and Liberties, by certain Ingrates, most of them Natives

of these States, and who have been Refugees and declared Traitors to their Country, it is the opinion of this Town, that they ought never to be suffered to return, but be excluded from having Lot or Portion among us.”

Townsend, at a town-meeting on the 12th of May following, voted not to allow the return of the absentees, and that the selectmen communicate the vote of the town to the town of Boston. All the towns on the coast, as well as Boston, had more interest in the return of these Tories than the inland towns, for more of them belonged in these towns.

On the 30th of April, 1775, General Gage made a proposal “that those persons in the country who inclined to move into Boston with their effects might have liberty to do so without molestation.” To this the Provincial Congress assented, and officers were appointed to grant permits, and a large number of Loyalists availed themselves to seek the shelter of the British guns. There are good reasons for supposing that two or more of the Townsend Tories took advantage of this chance of escape, for their names, as far as is known, never appeared afterward on any records of the town.

All along through the war there were repeated calls upon the town for soldiers. Sometimes a few left at a time and joined companies in other towns. William Kendall, third sergeant, Joseph Putney and Jedediah Jewett, of Townsend, were in Captain Jonathan Davis' company, of Harvard. Perhaps the most critical period in the war was the state of affairs on the Hudson River, when Burgoyne was marching for Albany with his army. The General Court ordered thither a portion of the troops from several counties, June 27, 1777. In some parts of the State volunteers enlisted, and marched to the assistance of General Gates and General Arnold, who at that time was the bravest of the brave. The following is a roll of one of these volunteer companies:

“STATE OF MASSACHUSETTS. Capt. James Hosley's Muster Roll of Volunteers, who turned out of the towns of Townsend, Pepperell and Ashby, and marched with him to the assistance of Major-General Gates, agreeable to a Resolve of the General Court of said State, upon September 23d, 1777, in the Regiment whereof Jonathan Reed is Colonel. James Hosley, Capt.; Asa Kendall, Lieut.; Nathl. Sartell, Lieut.; Daniel Adams, Clerk; Lemuel Patts, Sergt.; Thomas Shattuck, Sergt.; Asa Shedd, Sergt.; Benjamin Whitney, Sergt.; Abram Clark, Lieut.; Abner Adams, Sergt.; Nathl. Bailey, Sergt.; David Heyward, Sergt.; Elijah Wyman, Sergt.; Benj. Adams, Corp.; Jedediah Jewett, Corp.; Joseph Lawrence, Corp.; John Boynton; William Stevens, Corp.; Thomas Fisk, Corp.; Samuel Stone, Corp.; Abel Richardson, Corp.; William Prescott, Esq., formerly Colonel; Henry Wood, Esq., formerly Major; Samuel Stone, Major in the Militia. Privates, James Campbell, John Emery, John Eaton, Isaac Farrar, James Giles, Jonas Farmer, James Green, James Hildreth, Benjamin Ball, Joshua Hosley, Samuel Henshaw, Abel Hildreth, Benj. Hudson, Daniel Jewell, Asa Kendall, Jr., David Locke, Thomas Lawrence, Joseph Baldwin, Abner Brooks, Abraham Boynton, Sampson Bowers, Jonas Baldwin, Daniel Butterfield, Isaac Blood, Daniel Clark, John Locke, John Manning, John Stevens, Richard Stevens, Samuel Seward, Nathl. Sartell, Jr., Daniel Sherwin, Jr., William Tarbell, Samuel Wright, Jr., Joseph Walker, Jacob Wright, Timothy Warren, Pomp Phillis, John Emerson, Nathan Lovejoy, Timothy Hodgman.”

These volunteers were in the service one month and fifteen days, and the pay of the privates was £3

15s., that of the officers being about sixty per cent. more than that of the men. This was one of the most efficient military companies that went to the war from this part of Middlesex County. Colonel Prescott, the hero of Bunker Hill, and two of his subordinate officers carried their guns and served in the ranks of this corps, which, on the 17th of October, 1777, assisted in the surrender of the haughty Burgoyne at Saratoga.

During the year 1778 town-meetings followed in rapid succession; the fourth one, on May 11th, was called "to see if the town will come into some method that will be effectual to raise the men called for of said town, for the public service, by the resolves of the General Court, April 20, 1778." At this meeting voted to give £130 to each of the Continental men and £80 to each of the militiamen. It must be kept in remembrance that when the war commenced, the enthusiasm of the people was at its height, and the pay was comparatively good; after this period it became necessary to resort to some regular system for keeping our quota full. Besides this, the seat of war was so much farther from home than at first that there was more dread to enlist. Townsend had two militia companies, organized about 1774, known as the "North Company" and the "South Company." These companies are called the "training-bands" in the records. The men of the town were enrolled from sixteen to sixty-five years of age, in these two companies, the dividing line between the two being the old county road. Whenever a call was made for troops from this town, these soldiers would meet and equalize the number of men each company was obliged to furnish. Generally the soldiers from this town, in the first part of the war, received bounties, but some went for less bounty than was offered by the town at that time. In some instances members of these two companies cast lots among themselves to see who should go. The man upon whom the lot fell had to shoulder his musket and march, or hire a substitute. The number of men who could afford to hire a substitute was limited. One fact is worthy of record: Townsend sent no man to the war except its own sons and citizens.

The following list of names is the only roll to be found in the records of the town of Townsend. Names of the six months' men in the continental service for 1780—travel, 220 miles:

"Eleazer Butterfield, William Stacey, Isaac Spalding, John Sherwin, Peter Adams, Jonathan Wheelock, Benjamin Hill, Timothy Shattuck, E. J. Weatherloo."

In June, 1779, a town-meeting was called, with this article in the warrant: "To see what the town will give to the men for the nine months' continental service, rather than proceed to a draught." On this article "voted to offer each soldier of our quota of nine months' men, 1000 dollars, or ninety bushels of rye."

During the last years of the war the depreciation of the currency deranged all business transactions and caused much excitement. The mother country had

flooded the States with counterfeit scrip, so that eventually paper money became entirely valueless. One dollar in specie varied in value from \$4.50, in 1778, to \$166, in 1781, compared with Continental scrip. In July, 1781, the town voted to raise £40,000 to defray the charges of the war, and £6000 to make up the salary of Rev. Samuel Dix.

The writer is aware that this dim abstract of the part which Townsend took in this great struggle for constitutional freedom does not do justice either to the subject or to the men who engaged in it. They were poor, they had "foes within" in the heartless gang of Tories with whom they had to contend, they fought against great odds, and nothing but a consciousness of the rectitude of their course gave them success. Looking back over these scenes, they rise up before the mind like things coming from dream-land.

" 'Tis like a dream when one awakes,
This vision of the scenes of old;
'Tis like the moon when morning breaks,
'Tis like a tale round watch-fires told."

THE SHAYS REBELLION.—At the close of the Revolution the country was in a demoralized condition. Nearly all the available wealth of the people, at the commencement of the war, had been expended to feed, clothe and pay the soldiers. There was much dissatisfaction among those who had served in the army at being paid off in worthless currency. The increase of the indebtedness of the towns and individuals, the scarcity of money of any value, the decay of business, numerous law-suits, and a want of confidence in the government, particularly in regard to financial matters, generated a depressed state of feeling, which caused great anxiety among the people. This state of feeling, in some degree, was co-extensive with the Commonwealth. People began to express great disapprobation of the manner in which the government was administered, and a revolt, in the western part of the State, was freely discussed, as early as 1782. In the town of Northampton the insurgents were rather numerous, having a disappointed and disaffected clergyman by the name of Ely for a leader, who understood all the arts of a demagogue. In 1783 a mob assembled in Springfield, resolving itself into a general convention. Proceeding to the court-house, on the appearance of the judges and sheriff, they opposed their entrance into the building. A riot was prevented by the timely intervention of the most influential citizens there present.

For the next three years "the distressed state of affairs" as expressed in Townsend records, continued. In 1786 a convention of insurgents, according to Holland's "Western Massachusetts," assembled at Leicester, when thirty-seven towns were represented, which, without any interruption, freely discussed the propriety of obstructing the sitting of the General Court at Boston, the closing of the County Courts by force, law abuses and other subjects.

In the counties of Middlesex, Bristol and Berkshire similar conventions were held, and votes and resolves passed. On September 5, 1786, a mob prevented the session of the court at Worcester. The voters in the towns of Pepperell, Shirley, Groton and Townsend were about equally divided on this subject. The town of Concord, where the court was then in session, was much excited, dreading the arrival of the rebels against the State authorities. A majority of that town was in sympathy with the insurgents. A committee chosen by the town of Concord addressed the following letter to most of the towns in this county, and Townsend among the number:

"To the Town of Townsend:

"GENTLEMEN: Alarmed at the threatening aspect of our public affairs, this town has this day held a meeting and declared unanimously their utter disapprobation of the disorderly proceedings of a number of persons in the Counties of Hampshire and Worcester, in preventing the action of the courts. And apprehending the like may be attempted in this County, and probably be attended with very dangerous consequences, we have thought it advisable to endeavor, in conjunction with as many of the neighboring towns as we can give reasonable information to, by lenient measures to dissuade from such rash conduct as may involve the state in anarchy and confusion, and the depehated horrors of civil war. We conceive the present uneasiness of the people to be not altogether groundless; and although many designing men, enemies of the present government, may wish and actually are fomenting uneasiness among the people, yet we are fully persuaded that the views of by far the greater part are to obtain redress of what they conceive to be real grievances. And since the method they have taken cannot fail of meeting the hearty disapprobation of every friend of peace and good order, we cannot but hope, from what we know of the strenuous exertions which have been made by the towns around us, and in which those disorders above mentioned now exist, to purchase at the expense of blood our independence, and the great unanimity with which they have established our present government; and from what we know of the real grounds of their complaints; were lenient measures used and a number of towns united to endeavor, by every rational argument, to dissuade those who may seem refractory from measures which tend immediately to destroy the fair fabric of our government, and to join in legal and constitutional measures to obtain redress of what may be found real grievances, they would be attended with happy effects.

"We have therefore chosen a committee to act in concert with the neighboring towns, for the purpose of mediating between opposing parties, should they meet. And we cannot but hope our united endeavors to support the dignity of government and prevent the effusion of blood will meet with general approbation, and be attended with happy results.

"If the above should meet with your approbation, we request you to choose some person to meet a committee of this town, chosen for that purpose, at the house of Captain Oliver Brown, innholder in Concord, on Monday evening or Tuesday morning next, that we may confer together, and adopt measures which may be thought best calculated for the attainment of the end above proposed.

"We are, gentlemen, with great esteem and friendship, your humble servants.

"JOSEPH HOSMER,

"in behalf of the town's committee.

"Concord, Sept. 9, 1786."

Townsend during this period was in a state of great perplexity, judging from the records of many town-meetings. In May, 1786, a warrant was posted calling a town-meeting on the 5th of June following, when a committee of five men was chosen "to draft public grievances," consisting of David Spafford, Jonathan Wallace, Daniel Adams, Benjamin Ball and Thomas Seaver. The first and last-named man on this committee were disaffected men; the other three were opposed to the insurrection. At the same

meeting chose the same men as a committee to confer with other towns, and then adjourned to the 26th of the same month. Met at the adjournment and adjourned for two weeks. At this adjourned meeting the town "chose two men to attend a convention (of insurgents) to be holden in Concord on the twenty-third of August."

There is no record of anything like a response to the letter sent to Townsend by the committee of the town of Concord. It seemed to be the first purpose of the insurgents to suppress the Courts of Sessions until some action should be taken to stay the flood of executions which wasted their property and made their homes desolate. On the 12th of September, 1786, three days after the date of the letter from Concord, three companies of insurgents marched into Concord, and forcibly stopped the court then in session. The "head-centre" of the insurrection in Middlesex County was Job Shattuck, of Groton, assisted by Sylvanus and Nathan Smith, of Shirley, and Peter Butterfield, of Townsend, all of whom had been officers in the War for American Independence. Shattuck served in the French War, and all of these men were well qualified to be conspicuous in such a cause.

Meeting with no resistance in stopping the court at Concord, their deportment was insolent and offensive in the extreme towards the judges, the members of the bar and every one not disposed to be in sympathy with them. The court being about to be holden at Cambridge, the Governor ordered the militia to be in readiness to march to that place, and at this juncture, when an effort to stop the court so near the capital of the State had succeeded, without any further delay or chance for the insurgents to rally their forces, "warrants were issued for apprehending the head men of the insurgents of Middlesex, and for imprisoning them without bail or mainprise." A company of horse was ordered from Boston to assist the sheriff in the capture of Shattuck and his officers, which, on its arrival at Concord, was reinforced by a party of mounted men from Groton, under Colonel Henry Woods. This force succeeded in capturing two prisoners—Oliver Parker and Benjamin Page, but failed to find Shattuck during the day, as he had taken alarm and escaped. "Under this disappointment, at midnight, in the midst of a violent snow-storm, the whole party were ordered on to Shattuck's house, in Groton, where they did not arrive till late in the morning. A search was immediately commenced, and judicious pursuit discovered him to a party of a few persons led by Colonel Woods himself. Shattuck obstinately resisted, and was not taken till he had received several wounds, which he returned without much injury."

The following list of the Townsend insurgents has been preserved among the papers on file with the town records. It is worthy of notice that about one-fourth of the persons whose names are in this list were young men in their minority. Fourteen of them

had the suffix of Jr. to their names. Abraham Butterfield, the son of Peter, was less than seventeen years old, and some of them were under sixteen years of age. Four of these men held commissions during the Revolution, and most of them were respectable and useful citizens, misguided though they were:

"Peter Butterfield, Asa Beall, Samuel Stevens, Jonas Warren, Jacob Beechler, Benja. Spaulding, Jr., Andrew Searle, Jr., Daniel Clark, Simon Richardson, John Emery, Ephraim Lambson, Jonathan Pierce, Asa Stevens, Isaac Lewis, Andrew Searles, Jedediah Jewett, Elijah Dodge, Jesse Baldwin, Nathaniel Bailey, Jr., Zachery Hildreth, Aaron Proctor, Philip Warren, Isaac Green, Isaac Giles, Solomon Sherwin, Azariah P. Sherwin, Peter Adams, Joseph Rumrill, Jonathan Sanderson, Thomas Seaver, Josiah Burge, Jr., Moses Burge, Abijah Monroe, Abel Keys, Elnathan Spalding, Josiah Richardson, Levi Whitney, Benj. Wallace, Moses Warren, Isaac Farrar, Jr., Stephen Warren, Jonas Ball, Nathan Conant, Jr., Isaac Wallis, Jr., Reuben Gaschett, Benjamin Dix, William Stevens, Jr., David Wallace, James Ball, Asa Whitney, Isaac Wallis, Joseph Baldwin, Jr., Phineas Baldwin, David Spafford (3d), Solomon Peirce, John Conant, Benja. Wood, Nathan Carlton, Samuel Searles, David Spafford, Ebenezer Ball, Jr., Abraham Ball, James Sloan, Richard Warner, John Waugh, Jr., Joel Davis, Jeremiah Ball, Charles Richards, Jesse Maynard, Nathl. Bowers, Josiah Rice, Abraham Butterfield, John Campbell, Jr., Jonas Campbell, John Colburn, John Graham, Benja. Brooks, Jr., Thad. Spaulding, Abijah Hildreth, Abel Green, Isaac Spalding, William Wallace, John Giles, Aaron Scott.

About thirty of the young men, whose names appear in the foregoing list, marched to Concord under Lieutenant Peter Butterfield and were present at the time the court was stopped.

A strict search, in and around Townsend, was made for Butterfield by the *posse comitatus* under Colonel Woods, when Shattuck was taken, but he eluded his pursuers. There was after that time quite an effort made to capture him. During a part of the following winter he secreted himself in a cabin masked with evergreens, on the hill northwesterly from his house, in plain sight of the same, where he was apprised of approaching danger by his wife. His house stood about three-fourths of a mile northerly from the harbor, on the west side of the road leading to Brookline, along the easterly base of Nissequassick Hill. At length his retreat was discovered, and his pursuers followed his track on the snow until nearly night, when, getting into a secluded place in a thicket, in the dusk of the evening, they lost sight of his track and abandoned further pursuit. After he was satisfied that his enemies had departed, he took a direct course for the house of one of his friends, who immediately took him over the line into New Hampshire. His exertions to escape flooded him with perspiration, so that waiting in a frosty atmosphere to be sure that the officers had gone, he took a violent cold, which induced rheumatism, from which he suffered during the remainder of his life. He never was arrested by the officers, and there has been found no certificate from any magistrate, showing that he took the oath of allegiance, although the same file of papers in which these names were found, contains the certificates of different magistrates, before whom sixty of these men took that oath. He was a man of excellent moral character, very industrious and had many friends.

Daniel Shays, from whom the outbreak takes its

name, was born in Hopkinton, 1747. After the rebellion was crushed he fled to Vermont, and afterwards removed to Sparta, New York, where he died Sept. 29, 1825. He was a pensioner of the United States, having been a captain in the Revolutionary War.

Perhaps there never was so much smoke and so little fire, or so small a show of talent or brains in any insurrection as in the Shays' Rebellion. The insurgents appeared to dread a collision with the troops during the whole time they were in arms against the government. All the losses in the rebellion were three killed and one hundred and fifty taken prisoners—all Shays' men. In 1787 certain laws were altered, which made every thing satisfactory to the entire voting population of the Commonwealth.

EDUCATIONAL HISTORY.—The settlers of Townsend, in common with the citizens of all the towns in this Commonwealth, displayed much sagacity in matters concerning their future welfare. As early as 1734 the proprietors' records contained the following:

"*Voted*, that Jasher Wyman, Lieut. Daniel Taylor and Nathaniel Richardson be a committee to take effectual care that there be no Strip or Waste made of Timber, or Timber cutt, or Pines boxed, or Candlewood picked up for tarr upon y^e undivided Land, and to sue and Prosecute any persons whom they shall find Guilty of said offences. Also to prosecute any persons who have been Guilty thereof, or take satisfaction therefor for y^e use of y^e proprietors."

In connection with these precautionary measures, one interesting fact may be learned from this extract, and that is, the importance that was attached to the value of the "candlewood," or resinous pitch pine, scattered on the undivided land. Families, at that time, were generally large and almost every one of them constituted a school by itself. Around the capacious fire-places, common in those days, sat the sons and daughters, in order according to their age and advancement, while the father or mother acted as teacher. The Bible, and particularly the New Testament, was one of the principal books used. Their cabin walls and the shining faces of youth and beauty within were illumined through the long winter evenings by the pine-knot light; and no one can say that this training of the mind, in their rude domiciles, was not sufficient to furnish the town with amiable women and honorable and capable men. Every opportunity for intellectual improvement, within their limited means, was then turned to their advantage, and a complete exemplification of the maxim "where there is a will there is a way," has come down to us in their example.

The first record of any effort for a public school was in 1744, when the town "voted to raise twenty pounds, old tenor, for the support of a school, and chose two men as a committee to provide a school-master: John Conant chosen first, Josiah Robbins second." The record further states where the school should be kept at different dwelling-houses, in different parts of the town—the north school at the house of Benjamin Brooks, the school at the middle of the

town at Joseph Baldwin's, and the south school at Daniel Taylor's. One man, without doubt, taught the school at these three places. There is no record to show the name of the first teacher in Townsend. From 1745 to 1750 the town raised twenty pounds, old tenor, for the support of schools, which were kept at several different places. In 1749 the town "voted to raise £10 lawful money to support a school," and designated three places at which it should be kept, one of which was "at the new school-house in the middle of the town." The foundation of this house may still be seen, on the east side of the old discontinued road, nearly opposite to the spot where the first meeting-house stood. There is no record of the time when this house was built, but probably it was during 1747.

From 1754 to 1766 the town, each year, appropriated £8, lawful money, for the support of a school and decided where it should be kept. In 1753 the records show that there was a "school on the south side of the river," but when it was built, or its size, is not known; neither can the precise spot where it stood be pointed out. At that time the largest part of the inhabitants of Townsend lived in the east part of the town, within three miles of the east line thereof, so that a school on Nissequasick Hill, one at the middle of the town, and one just south of the harbor would accommodate the people in the best possible manner.

In 1783, beginning to realize that they had thrown off the British yoke, and feeling the spirit of independence stirring within them, the people, at a town-meeting in May, chose a committee of nine "to divide the town into squadrons for convenience for schooling." This committee divided the town into seven parts, for school purposes, and designated the location of the several houses. Not many of the places where these school-houses stood have houses on them at present. There is nothing of importance on record in regard to educational affairs from the time these squadrons were made until the population of the town had increased so that larger houses were required. In 1796 voted to choose a man in each school squadron for a School Committee. Chose Samuel Stone, Jonathan Wallace, Life Baldwin, Jacob Blodgett, Ephraim Lampson, John Sherwin and Daniel Adams, Esq., for said committee." This first School Committee chosen in Townsend was made up of men of prominence in the districts to which they belonged. What they lacked in the higher branches of mathematics, as taught in our high school, and on which much time is lost by pupils who never expect to be teachers or professors, they made up in square common-sense general information and integrity of character.

Soon after the Baptist meeting-house at West Townsend was erected, the subject of establishing a seminary for young ladies at that village began to be discussed. The idea was suggested by Mr. Levi Warren, who, at that time, was the most influential man in that section of the town. In 1835 between thirty and forty gentlemen of the Baptist faith, a part of

whom did not belong to Townsend, contributed towards purchasing the land and erecting the building known as "the seminary." No sum was subscribed less than twenty-five dollars, which was called a share, and most of the subscribers took one share, while others gave according to their interest in education and the prosperity of the village. The largest contributor was Mr. Levi Warren, who subscribed for nineteen shares. The building was finished in April, 1836, and the institution was inaugurated under highly favorable circumstances, which more than met the expectations of its patrons and founders. March 13, 1839, the owners received an act of incorporation from the General Court under the name of the "Townsend West Village Female Seminary." The lady who was principal when the seminary commenced, remained in office only about a year, when she married and left town. Another principal succeeded her until the fall term, 1839, when the trustees engaged the services of Miss Ruth Robinson, a person of excellent judgment and ample scholastic attainments. Associated with the principal were six teachers of experience in the natural sciences, mathematics, intellectual and moral philosophy, the ornamental branches and music. This board of instruction was selected with much care by a board of trustees from different New England States. It was a Baptist institution, but enjoyed the confidence of all denominations. The Baptists of the Eastern States and some from New York sent their daughters to West Townsend for an education at this seminary, which for more than twenty years was very popular. In almost every State in the Union may be found one or more who have been teachers, principals of high schools and seminaries, besides wives of professional men, who remembered with pleasure the pleasant days of their youth passed at this, their *Alma Mater*. In 1844 a more lucrative position was offered Miss Robinson, when she resigned her office. Miss Hannah P. Dodge, a native of Littleton and a graduate of this seminary in 1843, succeeded as principal. She remained in office until November, 1853, when, at her own solicitation, she was dismissed, partly on account of ill health. The building was commodious, well arranged and its recitation rooms richly carpeted. The Lesbian Society, a literary association of the pupils, was a success, belonging to which was a judiciously selected library, a large part of which was presented by Messrs. Levi and Charles Warren and their Baptist friends in Boston.

In every particular it had no peer in America except, perhaps, in Miss Willard's Female Seminary, at Troy, New York. But after a successful existence of about twenty-five years—after it had shone brilliantly among the constellations of the literary galaxy of its time—in an evil hour, it finally sunk, never to rise again from beneath the horizon of financial mismanagement which enshrouded its exit. Thus the civilizing influence, which to a great extent built up

West Townsend, which gave a fresh impetus to our public schools and made Townsend an objective-point as a seat of learning and refinement, was irretrievably lost. The building passed into the hands of the mortgagee and it is now used for the graded schools at West Townsend.

After the seminary had been in operation for four or five years the Congregationalists and others at the centre of the town, observing the good influence emanating from that institution, and that the Baptist Church was much better filled than at previous times, took the idea of an academy at Townsend Centre. First and foremost in this enterprise was the Rev. Mr. Stowell, the orthodox minister. Accordingly, from the people of the town, and from the members of the Congregational society in particular, a sufficient sum of money, in addition to the quantity of lumber and building materials given by others interested, was subscribed to erect a suitable building. Capt. Elnathan Davis gave the timber for the frame, delivered on the ground where the building was to stand. The traders at the Centre gave the nails, lime and hardware, and the academy was built by a mutual effort by which no one felt the least impoverished. It was finished in the summer of 1841, and opened the following September with a respectable number of students. It stood on the north side of Main Street, nearly opposite to where the bank now stands, in what is now the stable-yard of Walter Fessenden & Son. It was not so expensive a structure as the seminary, but it was a substantial, well-arranged, two-story building, with a tower and bell surmounting it. For five or six years consecutively this academy received a good share of patronage, and during the autumn months a large number of scholars gathered within its walls.

Mr. Noahdiah Dickinson was the first preceptor, a graduate of Amherst College, a good scholar, and of very gentlemanly deportment. While Mr. Stowell remained in town he took much interest in this school, and he assisted Mr. Dickinson, when the services of an additional teacher were needed, in a manner very acceptable to the students.

Jonathan C. Shattuck, a graduate from Dartmouth in 1842, had charge of this academy for some time. The difficulty of supporting two institutions of similar character in so small a town soon became apparent; besides, three of the towns joining Townsend had each an academy, in addition to New Ipswich Academy—all seeking patronage. After Mr. Stowell and Mr. Dickinson left this town, the interest in the Academy began to decrease, until finally, in 1851, the old district school-house, situated at the northeast corner of the Common, was much too small to accommodate the scholars, and what was District No. 1 bought this academy-building and moved it on the ground nearly north of the Methodist meeting-house, and fitted it up for the accommodation of two schools. It was used for a public school-house until January

5, 1870, when it was burned, as was supposed, by an incendiary. There have been four other school-houses burned in this town—two in what was called Potunek District (No. 8), and two in the Harbor District. About 1830 a school-house was burned which stood about one-fourth of a mile southerly from the bridge over the river at Townsend Harbor, in the angle of land made by the divergence of the Shirley and South Row roads; and in 1872 another school-house, situated on the west side of said Shirley road, nearer the Harbor, was destroyed by fire by the careless deposit of ashes.

The school laws of the Commonwealth are altered so often, and there is such an effort made to hurry along the scholars from one grade of school to the next higher, and everything about the schools is so much run in grooves, that it is doubtful if our scholars leave the schools now with any better mental or moral equipment to enter the battle of life than those did, long ago, when Miss Rebecca Warren, Seth Davis, Miss Mary Palmer, John K. Palmer, Samuel Adams and Miss Polly Giles were the teachers.

CEMETERIES.—Generally, the cemetery of the New England Puritans was situated next to their house of worship, so that the shadow of their sacred temples might fall upon the graves, which, being in plain view, on each returning Sabbath might forcibly remind them of their mortality. The situation of the first meeting-house in Townsend, on "Mount Grace," as it is called in some of the old deeds, made it impracticable to conform to this custom, on account of the rocky and ledgy nature of the land. It is not known where the people of this town buried their dead for the first fifteen years after there was a settlement here.

In 1742 the town "voted to accept of an acre of land from Mr. William Clark, for a burial place." It is probable that this "God's acre" was given to the town a considerable length of time before this vote was passed. There must have been some burials in Townsend before this time, and considering the nearness of this spot to their meeting-house, this was undoubtedly the first place selected for the interment of the dead. The graves first made here are marked by rough slabs of slate, minus any inscriptions, and the first stones on which are any records date back no further than 1745.

In 1741, "Voted to choose a committee of three men to clear up the burying-place, and dispose of the timber for the best advantage of the town. Chose for this committee, Nathaniel Richardson, Joseph Baldwin and Josiah Robbins." In 1747 the town evinced a deeper interest in this cemetery, and "Voted to fence the burying-ground with a stone wall four feet and four inches high." Mr. William Clark, the giver, was the owner of a large amount of land in this town. His name appears on the list of the seventy-two persons who were present at Concord on May 19, 1720, when he subscribed for a "Lott in

y^e North Town," but did not pay for it at that time. He was a shoemaker, owned slaves, came from Concord to this town, and settled on the south side of the river, at the base of the hill, on the South Row road, leading from the first meeting-house, where one Isaac Spaulding afterward lived. A slate grave-stone, now in a good state of preservation, was erected to his memory, situated near the centre of this burial-place, from which it appears that he died in 1756, aged seventy-seven years.

About 1816 the people began to talk about a new cemetery, the acre given by Mr. Clark being nearly full; besides there are no avenues in this acre, and the graves are so close together and the headstones so numerous that the small part of it farthest from the road, which is not used for burials, is not easily approached by a funeral *cortege*. In 1818 the town voted to buy the land now used for a cemetery at the centre of the town, then owned by Rev. David Palmer, Deacon Daniel Adams and Richard Warner, Esq., each of whom had an angle of land needed to make the ground eligible, both in distance from the meeting-house and quadrangular in form, and this cemetery was inaugurated this year.

In 1854 the town chose a committee, consisting of the selectmen, to buy land at the east of their new burial-place, in order to enlarge the same. The east line of the land, bought in 1818, commenced near the site of the receiving-tomb; thence southerly in a line nearly parallel with the west line of the cemetery. This committee bought about six acres of land of Richard Warner, at the east of this line, enclosed it with a picket fence, and took up the east line fence of the original plot. This burial-place has broad avenues, the natural surface of the ground has been properly graded, the lots are kept clear from grass or weeds, and it contains many substantial specimens of monumental art.

In 1836 Mr. Levi Warren set apart a tract of land for a cemetery, on the south side of the road from West Townsend to Ashby. Two or three bodies were buried here; but, for good reasons, he altered his mind about the location, and had the bodies moved, in 1838, at his own expense, to the village cemetery, now at the north of the river, and then gave the town a deed of the land. For the few years past this cemetery has been kept in a neat and orderly manner, and there are some expensive monuments here.

MECHANICAL INDUSTRIES.—The first mill in Townsend was built at the Harbor by John Stevens and John Patt, by mutual agreement in writing, each binding himself, his heirs and executors, to the other, his heirs and executors, "to furnish one-half of the labor, timber, stone and iron necessary for the erection of said mill for sawing boards; and to keep the same in repair for twenty years." This agreement, drawn in a neat, bold hand, worded in a scholarly manner, and legally binding on both parties, is now in possession of the Ball family, which was connected

by marriage with the Stevens family. The signatures of these men and that of the two witnesses to the instrument would be particularly noticeable for good penmanship in a collection of autographs. John Patt owned the land on the north side of the river, and John Stevens on the south side, where the mill was built, which stood about twenty rods easterly of the location of the bridge at the Harbor. This was executed in January, 1733, and the mill was built before the 30th of the following November. A dam, suitable in height, was thrown across the river at or near where the stone dam now stands, which stopped the water much farther up the river than was agreeable to the engineering of these two men. A meeting of the proprietors was called in August of that year, when it was voted to allow Ephraim Sawtell "an equivalent for such land as may be flowed by the raising of the dam." A grist-mill was soon put in this building. This mill was sold by the builders a few years after it was built, including the privilege and a certain amount of land, to John Conant, who was the owner and occupant for a long time.

About 1768 a mill stood on the south side of the river at West Townsend, near the west side of the stone bridge at that village, which was known, in its day, as "the Hubbard mill," but whether William Hobart or Israel Hobart built it is unknown, as it was burned about 1790. In 1790 Hezekiah Richardson made the canal leading easterly from this stone bridge to the spot where the leather-board mill now stands, and made a mill for sawing and grinding at that locality. Here has been a saw and grist-mill, a wool carding and clothier's mill, a stocking factory, a machine shop and a leather-board mill, the last being the present business. James Giles had a saw-mill where the A. M. Adams kit-mill was burned as early as 1780, and before that time Major Samuel Stone, of Ashby, built a mill on Willard's Stream, in the fork of the two roads leading to Ashby. Afterwards this mill was owned by Eben Butler, from whom, in 1819, Benjamin Barrett and son bought this property. They demolished the old mill, made a stone dam and the second mill at this place. Quite recently a mill three stories in height, and rather capacious, was built here; and in 1871 another stone dam, farther up the stream, was made for reservoir purposes, by which the privilege was much enhanced in value, and within a year an engine was put in this mill to secure power any day in the year. All kinds of lumber and coopering stock are made here and the property is owned and occupied by Clarence Stickney.

In 1817 Daniel Giles erected a mill on the spot where the grain elevator now is at Townsend Centre. This mill has not passed through many hands, but it has been enlarged and improved at different times. Adams & Powers were the next owners, and now the property belongs to Union S. Adams. For the last half-century this saw and grist-mill, in connection with the coopering business, and on account of

its central location in relation to a market for flour, grain and meal, has done the most business of any mill in town. Soon after Daniel Giles sold this property he built a steam mill on the west side of the Brookline road, about half a mile northerly from the Common, where the furniture factory now stands. This mill was not long in operation before it was burned, and he lost heavily by the fire. The citizens of the town and his friends, with much sympathy for the loser, contributed liberally to his relief, so that he rebuilt on the same spot and continued his business, using steam-power, in company with a partner until his death, in 1858, when Mr. Edwin A. Larkin went on with the mill in making coopering stock. In 1874 the furniture factory, now owned and operated by William P. Taylor and others, was put up here where the Giles and Larkin mill stood, that mill having been taken down. This establishment is operated by steam-power, employing ten or fifteen workmen and turns out about thirty thousand dollars' worth of goods annually.

In 1867 a large two-story and basement factory for the manufacture of coopering stock of all kinds, operated by steam, was built at the centre of the town by Walter Fessenden & Son. This mill gave employment to about thirty workmen. The building, motive-power, machinery and every facility for the manufacture of this stock was first-class. Except the usual summer vacation of four or five weeks, it was kept running during the year. In August, 1874, this mill was burned, the fire being undoubtedly the work of an incendiary. This large structure was, at that time, full of combustible goods made from seasoned pine lumber. There was no wind; the evening was dark, during which the fire which raged furiously when the roof fell in, sent a gleaming and hissing sheet of flame upward into the sky which was visible for a long distance around. Had the fire happened when the wind blew, or any time except when the mill-yard and surrounding roofs were wet, the central village would have been reduced to ashes. The owners soon cleared away the *débris* and commenced re-building, and on the 4th of the following February another building, similar in every particular, and equally expensive, commenced running on the same location. This second mill of the Fessendens was also burned June 22, 1884.

In 1800 Benjamin Pierce started a tannery near the first little brook crossing the road leading from the depot at West Townsend to the post-office in that village. It stood on the north side of the road. Several proprietors followed him in the business, among whom were George Hartwell, Levi Stearns (about 1826), Alexander Lewis (about 1828) and Abram S. French, 1831.

In 1827 Curtis Stevens had a tannery on the spot where Stickney's mill now stands, which he operated for seven or eight years. He ground the bark in the mill, and his vats were on the north side of it.

In 1789 Captain Timothy Fessenden was engaged in the tanning business on land now owned by Harriet Read, near the north end of the dam across the Squannicook, at the Harbor. John and Samuel Billings, of Lunenburg, were interested in this property, but whether as owners, mortgagees, or otherwise, is unknown. John Jewett followed Fessenden in this business until about 1808, when Oliver Read bought the place and worked at the same trade until about 1827.

John Orr, in 1854, erected quite a large two-story and attic building near the railroad track at West Townsend Depot for a tannery, which was operated by steam-power. He employed five or six workmen in the trade until 1858, when the property went into the hands of a firm doing business under the name of Freeman & Avery. These men increased the business, constantly employing fifteen or twenty operatives. The firm shipped a large amount of goods into the market, but the owners were not first-class financiers and did not succeed according to their expectations.

In 1864 George Taft bought this establishment, retaining the foreman and some of the workmen under the firm which preceded him, and he went on with the business. The building and finished stock contained in it were burned in 1868, but in due time Mr. Taft built another structure of about the same dimensions, on the same site, which remained about three years, when that also was burned. Since that time the ruins of this factory have remained undisturbed. Within the last forty years this branch of industry has been concentrated into a few places and is carried on by combined capital and rich firms, with whom competition is next to impossible.

In 1833 Abram S. French built a morocco factory on the brook running northeasterly from Bayberry Hill, near its confluence with the river, and near where James Giles built his saw-mill described in this chapter. He erected a dam on this brook which kept back sufficient water to operate a fulling-mill during the largest part of the year. This establishment was in successful operation for twenty years, employing constantly ten or twelve workmen; and considering the length of time the business was prosecuted, it must have been a source of wealth to the proprietor.

From 1800 to 1840 many families in this town manufactured woolen goods—using the hand-loom—for their own clothing. A tailoress would be in attendance with these families once a year, and cut the cloth and make these woolen goods into clothing for their members. So with boots and shoes. The farmers sent their hides—marked so as to be recognized—to the tanners, where they were made into leather. A boot and shoemaker would go around to each house and make these goods—sufficient for a year's stock for the family.

Nathan Carlton had a wool-carding and cloth-coloring and dressing-mill at the Harbor as early as 1790. His mill stood on the north side of the river, just above

the bridge, and he took water from the Harbor Pond for his power. In 1821 Paul Gerrish took possession of this property and engaged quite extensively in the same trade with good success. This gentleman was one of the most prominent citizens of the town. He was a justice of the peace and one of the selectmen for a number of years. He represented Townsend in the Legislature in 1832, was an accurate town officer and an exemplary man. Died September 15, 1847, at Townsend.

About 1807 Jonathan Richardson came into possession and ownership of the saw and grist-mill erected by Hezekiah Richardson & Sons, which stood a few rods easterly of the present leather-board factory. Connected with this building was an ell, or wing, which contained a wool-carding machine owned by Captain Josiah G. Heald, who continued in the clothier's trade here for more than twenty-five years. He was a much respected citizen, represented Townsend in the General Court in 1839, died at Mason Village, N. H., June 15, 1849.

Soon after the close of the Revolution the Warrens, and others, were engaged in the manufacture of potash, and this industry was followed in a profitable manner until about 1820, when wood became more valuable for other purposes.

Previous to the beginning of the present century the principal branch of industry of the town, from which was derived the greatest amount of money, was the manufacture of beef, pork and rum barrels, and, in fact, this trade continued until nearly 1830, when casks began to be made from sawed pine staves. These casks were drawn to Boston market by ox-teams, usually about four days being spent making the journey.

In 1787 Peter Manning commenced making saddles at the Harbor, his house and shop both being in the building where Charles Emery resides. This was in the days when equestrianism was practiced by both sexes, when pleasure wagons were unknown and the "one-horse shay" had not been introduced. A saddler was almost as indispensable in every town as a minister. He is represented as a very polite man, a skillful mechanic, and a good singer; but he rebelled against the practice of alternate reading and singing the lines of the hymn, which was the custom in public service on the Sabbath, and it was through his influence that fashion was laid aside. At that time Townsend Harbor was the only collection of houses in town which could be called a village. It had a tavern, the large, old house (now standing) at or near the south end of the dam at the river, kept by John Conant, a very popular landlord; a saw and grist-mill, a blacksmith shop, a clothier (1790), a tanner, a trader (Life Baldwin in 1788), who occupied the building now painted red, for a store, which stands on the north side of the road, nearly opposite of the spot where the first mill stood. This was the first store in Townsend, and its proprietor at that time,

Mr. Baldwin, was a man of good influence, was town clerk 1793, and one of the selectmen 1793 and 1794.

About 1830, Beriah Blood and Reuben Farrar came from Concord to the Harbor and bought the Conant mill. Soon after they moved a large barn, standing near by on the south side of the river, and set it up in their mill-yard, near the side of the road, and converted it into a foundry. Quite a sum of money was invested in the building and stock in trade. Albert S. Page commenced the business, which afterwards was in possession of several different men and different firms. At one time the establishment turned out a large quantity of goods. The Wards, two brothers there for a while, were experienced workmen and gave character to their goods. There always appeared to be a lack of capital in the hands of the owners of this foundry to prosecute the business in a successful manner. In 1851 it was burned, while the Wood brothers (the railroad contractors) were the owners.

Soon after the old meeting-house was moved on to the Common (1804), a blacksmith, a tinsmith and a hatter set up their several trades near each other, just west of the Goss Bridge, at the centre of the town; but a large number of hatters were in Townsend twenty years after that date, scattered throughout the town in almost every farmer's house, where their wives and daughters braided thousands of dollars' worth of palm-leaf hats every year for more than twenty-five years after this industry was introduced here. David P. Livermore, a trader at the Harbor, introduced this business into Townsend, and he and John Snow, at the centre, put the leaf into the hands of the braiders, who received their pay for braiding in goods. The wives, in many families, earned enough to buy the groceries and store goods for their households through the year. The business waned about 1850, but between that year and 1860 Daniel Adams, a trader at Townsend Centre, had made and sold annually between twelve and fifteen thousand dozen of palm-leaf hats, a large part of which went to the Southern States and were worn by colored people, concerning whom President Lincoln issued a proclamation.

It is remarkable how soon a few years will sweep into oblivion the dates and events which were once of thrilling interest to the whole community. Not all the dates could be given in this chapter which are desirable. A friend when laid in the ground has the time of his departure indented on the faithful marble that perpetuates his memory, but no monument is ever erected on the spot once cheered by happy industry, where a mill has rotted down or been swept out of existence by fire or flood; neither is there any record of the event, and, unless the searcher after the date can obtain an interview with some intelligent mother who recollects that "it was the same year that my Mary was born," he can scarcely, with certainty, fix the date.

Anson D. Fessenden, Albert L. Fessenden, Union S. Adams and Clarence Stickney are the only persons, each operating separately, who are now extensively engaged in the coopering business in this town. They ship a good many thousand dollars' worth of packages to market annually, and they employ in all parts of this business about seventy-five workmen.

E. W. Seaver & Co. are tub and pail-makers in a factory at Joslynnville, built in 1849, and occupied since that time by — Potter, A. M. White, Lawrence Brothers and Charles Lawrence before the present firm took possession. The motive-power here is both steam and water, and the mill has first-class machinery. The firm employs about eighteen men through the year in this trade, which produces about thirty thousand dollars' worth of goods annually.

"Spaulding Brothers," Jonas and Isaac W. Spaulding, are leather-board manufacturers. They have two large mills, one at the Harbor and one at West Townsend. The mill at the Harbor they built with much expense; the main building at West Townsend is the same that has been used for different industries for a long time. This is a bulky business, producing many tons of goods each month.

THE REBELLION OF 1861-65.—The great wrong of firing upon the national flag, and plotting treason against the government, must be held in everlasting remembrance, to the disgrace of the Southern leaders in the slave-holders' rebellion; but let no reader, for a moment, suppose that the South *alone* was responsible for this civil feud which sundered the ties of consanguinity and drenched the land with fraternal blood; which entailed an enormous debt on the nation, and swept away from their homes and into the grave nearly half a million of men, on both sides, who have fought their last battle.

It is hardly necessary to state here that Massachusetts extended a vigorous and unqualified support to the government in its effort to preserve the Union by military force. The report of the adjutant-general of this State, in 1866, shows that this Commonwealth was represented in the army and navy, in the different terms of service during the war, by one hundred and fifty-nine thousand one hundred and fifteen (159,115) men; and that with the exception of twelve small towns, every town and city in the State had furnished a surplus over all the demands from the War Department, which amounted in the aggregate to fifteen thousand one hundred and seventy-eight (15,178) men, of which the town of Townsend furnished thirty-three (33) men.

As on the 19th of April, 1775, the Middlesex County men were the first to yield their lives in the Revolution, so on the 19th of April, 1861, just eighty-five years afterward, men from the same towns, belonging to the Sixth Massachusetts Regiment, were the first to give their lives for their country, in the mob fight at Baltimore, on which occasion three men were killed and thirty wounded.

In common with all the towns and municipalities of the State, Townsend was aroused to a great excitement by the treacherous shots, April 12, 1861, aimed at Fort Sumter. On the 20th of April a town-warrant was posted at the usual places, in Townsend, calling a town-meeting on the 27th day of said April, which contained the following article:

"To see if the town will take any measures to facilitate the enrollment or enlistment of volunteers, whose services shall be tendered to the Governor of the Commonwealth, or through him to the President of the United States.

"On this article voted and chose a committee of five citizens to report to the town a plan for its action. Chose for said committee, Henry Seeva, Walter Fessenden, Daniel L. Brown, Nathaniel F. Cummings and Samuel S. Haynes, who submitted the following preamble and resolutions, which were accepted and adopted by a unanimous vote of the town:

"Whereas, a portion of the states of this confederacy are now in open rebellion against the government, and whereas the President of these United States has called upon the Loyal States for a military force sufficient to suppress the rebellion and maintain the laws of the land,

"Now, therefore, we, the citizens of Townsend in town-meeting assembled, hereby declare our undying love for liberty, and our sacred regard for the Constitution as submitted to us by its founders.

"Resolved, that we tender to the Government our sympathy, and, if necessity requires, our lives and property.

"Resolved, that our foreign-born citizens, for the promptness with which they have rallied to the support of this their adopted country, have laid us, the native-born citizens, under everlasting obligations, and that our gratitude for their support and sympathy should be appropriately, cheerfully and promptly acknowledged.

"Voted, that Walter Fessenden, Daniel S. Brown, Nathaniel F. Cummings, James N. Tucker and Alfred M. Adams be a committee to take immediate measures for the enrollment of a company of able-bodied men, whose services shall forthwith be tendered to the government.

"Voted, to provide for the families of those who may need assistance during their actual service."

The gentlemen of this committee, and other men of wealth and influence, appealed to the patriotism of the citizens, assuring them that the families of married men should be cared for in case they should volunteer to fill the quota of the town. It appears that the seceding States had been making preparations for a fight for some time, while the North, with the exception of a few regiments of volunteer militia in Massachusetts, and one or two other States, was unprepared for either an offensive or defensive war.

The President called for seventy-five thousand men, April 15, 1861, and the next day the Old Sixth Massachusetts Regiment, with General Butler, left for Boston, *en route* for Washington. June 19th following, seven Townsend men were enlisted and joined this regiment, viz.: Henry J. Parker, Frederick A. Jones, Robert F. Webb, John Quigg, Ramson C. Watson, George N. Spaulding, Daniel Sidelinger. These men enlisted for three months, and were mustered out at expiration of term, but most of them re-enlisted and served in various regiments.

"The Old Sixth," which had a skirmish in Baltimore with Butler as commander, was reorganized in October, 1861, under the name of the Twenty-sixth Massachusetts Regiment, and sailed from Boston directly for Ship Island. Mustered out August 26, 1865. Townsend had thirty-two men in Company G, in this regiment, whose names are as follows: Loren

Hesley, George A. Adams, Charles W. Dix, James Willard, Ally B. Brown, Elijah T. Bates, Charles H. Brown, Warren B. Clark, Franklin F. Cross, William Davis, Russell O. Houghton, Alvah Richardson, Charles Willard, James A. Sanborn, Frederick A. Jones, Samuel W. Griffith, Merriek S. Gilson, Charles R. Shattuck, William Hunt, Charles L. Spaulding, Myron F. Going, Charles J. Hapgood, Charles L. Hall, Charles H. Martin, Aaron S. Petts, Ai H. Spaulding, Andrew H. Sloan, Frank Stevens, Francis W. Wood, Ramson C. Watson, Lysander P. Taylor and John Shattuck.

This regiment took part in the engagements at Winchester, Cedar Creek and Fisher's Hill in the Nineteenth Army Corps.

July 1, 1862, the President called for 300,000 men for three years, considering the reverses in the Shenandoah Valley and the imminent danger of a successful attempt to take Washington. Under this call twenty-five men of this town volunteered for service, and joined the Thirty-third Massachusetts Regiment of Volunteers, Company E. The names of these men are as follows: George W. Bennett, Abijah W. Blood, James Buckley, George E. Clark, Thomas Dahymple, Lewis Gonnier, Andrew D. Heselton, James King, Clarence W. Sylvester, Charles E. Marshall, Dominick May, Waldo T. Tower, Jonah Parker, Henry J. Parker, Charles W. Parker, Simcon K. Richards, Sylvester T. Wheeler, Charles W. Wetherbee, Jefferson Whitcomb, Evander W. Wright, Franklin S. Wright, Andrew L. Woodard, William H. Wright, Lewis T. Wright, Abram Clark and Oliver B. Osborn.

This regiment took part in the battles of Fredericksburg, Chancellorsville, Beverly Ford, Gettysburg, Lookout Mountain, Missionary Ridge and the several battles of Sherman's grand army. It used up two stands of colors, which were so torn and mutilated by wear and bullets that they would scarcely hang together. They were sent home and deposited in the State-House with other mementos of the conflict, and a third stand of colors was sent to the regiment, on which were inscribed the names of the twenty-two battles in which it was engaged.

Five Townsend men re-enlisted in the Sixth Regiment Massachusetts Volunteers in August, 1862, for nine months, and they were under Captain George F. Shattuck, of Groton. The names of these men are Richard Pierce, Albert D. Turner, Manson Withington, Charles W. Hildreth and Charles A. Wright.

On the 1st day of August, 1862, the President called for 300,000 nine months' men. War-meetings during that month were frequently held at the town hall to devise means to fill the quota of the town. At one of these meetings Anson D. Fessenden was selected to recruit a company, if possible; if not, as many as he could. He enlisted forty Townsend men, and about the same number of recruits were enlisted in the town of Shirley and the neighboring towns. Mr.

Fessenden was chosen first lieutenant of this company, which made a part of the Fifty-third Regiment Massachusetts Volunteers, which served in the Department of the Gulf, Nineteenth Army Corps, John W. Kimball, of Fitchburg, colonel. This regiment was in the battle of Port Hudson, and in other battles and skirmishes during the spring and summer of 1863. The following are the names of the Townsend men: Anson D. Fessenden, promoted to captain September 2, 1863, John Q. Adams, Isaac Allen, Wallis S. Arlin, John B. Blood, Daniel Brogan, John A. Brown, William Bush, Charles S. Champney, Edmund O. Day, Andrew Foster, Adams S. Graham, Harlan F. Green, John Haynes, John P. Hildreth, Webster Hoffses, Leander C. Jeffs, Dennison S. Kimball, Francis A. Laws, William Ordway, Henry C. Nichols, Levi T. Parker, Shubell B. Pierce, Hiram F. Richards, John Richards, Edson A. Richardson, Dennis J. Shehan, George A. Sherwin, Alden W. Smith, Benjamin B. Spaulding, Augustus G. Stickney, William E. Sylvester, Levi Wares, Alson S. Warren, William H. Woodward and Thomas H. Warren.

The following are the names of Townsend men who enlisted at different times and served in various regiments: Patrick Murray, Charles C. Cobleigh, Henry O. Adams, James E. Brooks, Amos Pierce, Boyd Todd, Edward Potter, Lorenzo Bruce, James A. Willard, George Spalding, William H. Lewis, Alden Adams, Leonard O. Bruce, William T. Barrett, William T. Adams, Charles Seales, Julius C. Eastman, Henry H. Hesley, Joseph O. Hildreth, Oliver E. Hazard (colored), Horace Hazard (colored), Nahum G. Hazard (colored), John J. Hennessey (colored), William A. Champney, Edwin Adams, Thomas H. Welsh, Robert Webb, Daniel T. Goodwin, George F. French, Horace E. Lawrence.

The following is a list of the names of the men who enlisted in August, 1864, for one year, and were mustered in on the 25th of the same month. They are described in the records as belonging to the "Twenty-fourth Massachusetts Regiment Unattached Heavy Artillery." They were stationed at Fort Delaware and near the city of Washington: Vernal Barber, John A. Brown, William Coombs, George H. Ellis, Jonas L. Jennerson, Benjamin F. King, Augustus Lovejoy, Newell F. Putnam, Nathaniel A. Ripley, Benj. B. Spalding, Amos Webber, Elbridge A. Wright.

A roll of the men who enlisted July 7, 1864, for 100 days, and proceeded to Washington and performed guard duty at Arlington Heights. The men are represented in the record as belonging to Company B, Sixth Regiment Massachusetts Volunteers. No casualties happened to these men during their absence: Charles Adams, Joseph Barter, James Brogan, Rufus T. Brown, George H. Green, Samuel K. Gilson, George S. Graham, Charles W. Hildreth, James C. Moody, Ai Richards, Charles Spaulding, Marshall D. Spaulding, Henry Sturtevant, William R. Wright, John B. Spaulding.

The foregoing rolls contain the names of all the Townsend men, as far as known, who volunteered to assist in suppressing the Rebellion. Only one Townsend man (Horace Hazard) was drafted. No mention of the substitutes has been made, as they were mere merchandise, used for a time to shield the men who chose to purchase them rather than to take the risks of war upon their own shoulders.

The town records, during the time the Rebellion was in progress, were not kept with the greatest accuracy; but, as near as can be ascertained from all sources, Townsend sent to the field troops enlisted for three months, one hundred days, nine months and three years, or for the war, including substitutes, 270 men, of whom 161 were voters in this town at the time of their enlistment. Twelve Townsend men were killed in action and twenty-one lost their lives by starvation in rebel prisons, disease and the casualties of war. It has been a source of pleasure to the writer that, during the entire labor of examining muster-rolls, discharge-papers, diaries, adjutant-general's reports and town records, that the word "deserted" has never been found written or printed opposite the name of any Townsend man.

The services of the women of the town, acting in concert with the Sanitary Commission, are not to be overlooked. During the war, from the time our soldiers were first encamped within the borders of the State, until they returned home at the expiration of their term of service, they were remembered by this class of patient toilers. The sessions of the Ladies' Benevolent Society were many, which were devoted to industrious efforts in making quilts, clothing, lint and cushions for broken limbs. The busy hands of the home-circle, similarly employed, should also be mentioned. The goods thus made, together with condiments, provisions, stimulants and delicacies, purchased at considerable expense, suitable for those who were suffering in the hospitals, were at different dates carefully packed, filling many barrels and boxes and forwarded in a cause where philanthropy was at a premium. Among the ladies who were active in this womanly sympathy, the names of Mrs. Mary Bertram, Mrs. Ralph Ball, Mrs. Jonas Spaulding, Jr., Mrs. Noah Ball and others might be mentioned. Their efforts awakened gladness in many hearts, and will be held in grateful remembrance.

"War is honorable

In those who do their native rights maintain;

In those whose swords an iron barrier are

Between the lawless spoiler and the weak."

LAWYERS, PHYSICIANS AND COLLEGE GRADUATES.

Walter Hastings, born in Chelmsford, 1778; Harvard College, 1799; admitted to the bar, 1803; was a colonel at Fort Warren in the war with England, 1812; died in Townsend, June 6, 1831.

Aaron Keyes, born in Westford, 1791; read law with John Abbott, of Westford; was admitted to the bar in 1822; came to Townsend the same year and

opened an office; was in practice here for twenty years; died at Townsend, November 28, 1842.

John Preston was a lawyer in practice in Townsend for two or three years, about 1830; Harvard College, 1823; removed to New Ipswich, New Hampshire; died March 5, 1867.

Frederick A. Worcester, born in Hollis, New Hampshire, January 28, 1807; Harvard College, 1831; came to Townsend and opened an office in 1836; remained in practice here during his life; died March 3, 1888.

Charles F. Worcester, born in Townsend, February 25, 1859; Dartmouth College, 1884; has an office in Townsend and one in Ayer; resides in Townsend.

The first physician in Townsend, Doctor Joseph Adams, came from Lincoln about 1774; was a loyalist, fled to England and died there, February 3, 1803; property confiscated.

Dr. Samuel Hosley was an assistant surgeon in the Continental Army until the close of the war, and commenced the practice of medicine here at its close; born in Townsend in 1758.

Dr. Isaac Mullikin originated in Bradford; came to Townsend about 1780; was a justice of the peace and town clerk several years.

Dr. Samuel Lovejoy, born in Milton, New Hampshire, 1775; came to Townsend, in 1802; was in practice here more than thirty years,—the last man that traveled on horse-back with saddle-bags; died 1851.

Dr. Moses Kidder came from Billerica; was surgeon at Fort Warren, 1813; came to Townsend, 1822; moved to Lowell about 1835; died there.

Dr. John Bertram was born at Petersborough, New Hampshire, 1794; Dartmouth College Medical Department, 1825; came to Townsend 1827; died December 15, 1846, at Townsend.

Dr. Ebenezer P. Hills, born in Newbury, 1804; Bowdoin College Medical Department, 1825; came to Townsend Harbor, 1825; remained at that village about twenty years; died in Shirley, 1854.

Dr. John Heard was born in Maine about 1810; took the degree of Bachelor of Medicine from Dartmouth College, 1838; came to Townsend, 1852; left town 1861.

Dr. Augustus G. Stiekney, born in Antrim, New Hampshire, 1807; Berkshire Medical College, Pittsfield, 1833; came to West Townsend, 1834; member of Massachusetts Medical Society, 1844; died at West Townsend, August 23, 1862.

Dr. Royal B. Boynton, born in Pepperell, February 7, 1826; Medical College, Woodstock, Vermont, 1852; commenced practice in Townsend, 1853; was in practice at Mason Village, N. H., for a few years; returned to Townsend in 1865, and remained here ever since.

Dr. Edward J. Donnell, born in Lyndeborough, New Hampshire in 1835; Dartmouth Medical College, 1865; came to West Townsend, 1870; removed to Stockton, Kansas, 1876; member of New Hampshire Medical Society.

Dr. Charles J. Towne, born in Stoddard, New Hampshire, 1840; College of Physicians and Surgeons in the City of New York, 1865; came to Townsend, 1867; removed to the town of Essex, 1881.

Dr. Luther G. Chandler, son of George S. and Elizabeth (Thurston) Chandler, born in Nashua, New Hampshire, December 12, 1844; graduated from Portland (Maine) High School, 1863; Harvard College Medical Department, 1871; came to Townsend June, 1878; is now in practice here.

Dr. Albert J. Atwood, son of George M. and Jane (Hall) Atwood, born in England, county of Kent, March 30, 1859; graduated from Cleveland Homoeopathic Hospital College 1885; came to Townsend September, 1885; is now in practice here.

COLLEGE GRADUATES.

John Hubbard, Dartmouth College, 1785; Abraham Butterfield, Dartmouth College, 1796; Daniel Adams, Dartmouth College, 1797; Joseph Walker, Bowdoin College, 1818; William Farmer, Harvard College, 1819; John Stevens, Middlebury College, 1821; Joel Giles, Harvard College, 1829; John Graham, Amherst College, 1829; John Giles, Harvard College, 1831; Charles Brooks, Yale College, 1853; Warren Brooks, Harvard College, 1859; Mark Davis, Dartmouth College, 1859; Charles Theodore Haynes, Amherst College, 1862; John Milton Proctor, Dartmouth College, 1863; Randall Spaulding, Yale College, 1870; Eliel Shumway Ball, Dartmouth College, 1871; Wayland Spaulding, Yale College, 1871; Charles Frederick Worcester, Dartmouth College, 1884; Edward James Sartelle, Harvard College, 1885; George Elliott Wright, Harvard College, 1889; Wilhe E. Smith, Williams College, 1890; Charles Spaulding, Williams College, 1890.

POST-OFFICE.—One hundred years ago there was not much written communication among the people living a considerable distance from each other. Most all the letters written in Northern New England were sent by the market-men and teamsters to a general post-office in Boston, and most of them were advertised in the *Boston Gazette*, a newspaper duly authorized for that purpose. There were some subscribers to that paper in Townsend at that time. In 1777, among the letters advertised in a copy of that paper, is one for a man in Lyndeborough, N. H., one for Colonel William Prescott, of Pepperell, and one for "Mary Reed, of Townsend."

In 1791 a man by the name of Balch was a courier between Keene and Boston, traveling on horseback. His route was through Townsend, and he was an expressman, in a small way, for two or three years.

The Boston and Keene stages began to run in 1806, making three trips a week at first, but soon the horses were more frequently changed and the entire distance was made daily, and the passengers dined at Townsend, which town is about equidistant from these two places.

The monotony of the long summer days in these rural towns was very pleasantly broken by the noisy axle-trees of these vehicles; and the busy toilers in the roadside fields would pause in their labors to catch a view of these messengers of civilization as they moved briskly along. The stage-drivers of that time were a jolly set of fellows, always pleasant and accommodating. Their hardships in occasionally encountering the deep snow-drifts on the hills and the pinching northwest winds, which January sweeps

over the Townsend plains, were quite severe. After the railroads were made some of these drivers were placed upon the cars as conductors, but they always appeared out of their element, and as though they greatly preferred the excitement afforded by their pet animals rather than the unnatural snort of the iron horse.

The following is a list of the postmasters at Townsend Centre and the date of their appointments:

Moses Warren, July 1, 1808; John W. Loring, July 1, 1811; William A. Bancroft, February 17, 1817; Aaron Keyes, August 23, 1826; office discontinued, October 29, 1834; re-established, April 11, 1835; Joseph Adams, Jr., April 11, 1835; Thomas Farrar, July 20, 1839; Walter Fessenden, November 12, 1846; John Brooks, September 15, 1849; George A. Wood, September 13, 1851; Charles Osgood, August 12, 1852; William T. Taylor, April 12, 1861; Edwin A. Larkin, September 27, 1866; Charles Osgood, August 5, 1868; William P. Taylor, April 8, 1869; Charles Osgood, July 22, 1885; Walter D. Osgood, May 21, 1886; Henry B. Hildreth, October 22, 1889.

The following is a list of the postmasters at Townsend Harbor, and the time of their appointments:

James S. Walton, —————, David B. Livermore, July 31, 1832; Paul Gerrish, February 23, 1835; Ebenezer P. Hills, April 17, 1839; Charles Gerrish, February 23, 1842; Charles Emery, February 8, 1843; Oliver Whitcomb, January 3, 1850; Charles Emery, September 15, 1855.

The following is a list of the postmasters at West Townsend and the dates of their appointments:

Silas Bruce, July 20, 1819; Augustus G. Stickney, June 25, 1855; Albert Howe, April 22, 1861; Augustus G. Stickney, July 17, 1862; Albert Howe, October 1, 1862; John E. Dickerman, August 30, 1881; Richard McElligott, September 15, 1885.

There was a mail-route established between Lowell and Worcester in 1832, which gave the Harbor a post-office at that early date. The post-office at Townsend Centre was discontinued in 1834, because the returns to the department were not made as promptly as was required, so that all mail matter for Townsend, from October, 1834, to April 11, 1835, came to Townsend Harbor.

THE PUBLIC LIBRARY.—

"The past but lives in words; a thousand ages
Were blank, if books had not evok'd their ghosts,
And kept the pale, unloathed shadows to warn us
From fleshless lips."

In 1858 a book agent canvassed this town for the sale of a set of books to make up an agricultural library and obtained the names of some more than one hundred subscribers who paid three dollars each and became mutually interested in the enterprise. A farmers' club was talked about, but never organized. A committee was chosen to select the books from a long catalogue. Most of the volumes selected were well worthy the attention of the farmer, but a part of them, like Peter Pindar's razors, "were made to sell." The volumes were read considerably for a year or two, when it began to be discussed how to have more books and those treating on different subjects. In the winter of 1861 a levee was given at the town-hall expressly in the interest of the library, at which some over a hundred dollars were made after paying all

expenses. During the next ten years two or three gatherings of this kind were held, the object of which was to raise money with which to buy books for the library. The proprietors of the two stores situated on the borders of the town's Common (Mr. Osgood more than the other), for the space of ten or more years, had the care of this little library, and they dealt out the books twice a week for a little or no compensation, except room rent, on account of the trade or custom which it brought them. At that time each person having the benefit of this library was taxed fifty cents a year to help pay for a place to keep it in and to pay for the services of a librarian. The number of readers increased and nearly every time when books were to be bought a good degree of judgment was exercised in selecting standard literature from the best authors.

In 1873 the shareholders and patrons of the library had an article inserted in the town warrant to see if the town would take it off their hands and make it a free library to be supported by the town. The town voted to accept it as a town institution and appropriated one hundred dollars annually for its support for several years, and later one hundred and fifty dollars have been appropriated—this year (1890) one hundred and seventy-five dollars were appropriated. These funds have been used in the purchase of books by a committee and for the payment of the librarian. It is open for the delivery of books about two hours each day four days in each week. The influence of this institution has been excellent in creating and fostering a taste for reading and observation, and in giving to our youth pleasant thoughts and profitable culture. There are over two thousand volumes in this library, which is properly catalogued and under the care of Miss Kate L. Larkin, the efficient librarian.

In 1875 the town inaugurated a Fire Department containing the modern appliances in this direction. It consisted of hose and hose-carriages, a hand fire-engine, an Amoskeag steam fire-engine and the houses to contain them—in all at an expense of over \$16,000. Since the organization of this department considerable property has escaped "the devouring element" on account of the presence of these machines in the hands of stalwart, active men.

North Star Lodge of the Independent Order of Odd-Fellows was instituted in Townsend in 1866, and David Cram, N.G., Albert Howe, V.G., and Frederick Stevens, Secretary, were inducted into office. Presumably, from the social and charitable nature of this institution, in a quiet way it has done some good and caused the burdens of life in many instances easier to be borne.

The Townsend Bank was chartered in 1851. At the organization of the grantees, in September of that year, John M. Hollingsworth, of Groton, was elected president and Edward Ordway cashier. The next month Mr. Hollingsworth resigned the office of president and Walter Fessenden, of Townsend, was chosen

to fill the office, which he held until his death, January 28, 1884. For over thirty years Mr. Fessenden and Mr. Ordway attended to the business of this bank in a very satisfactory manner, both to the stockholders and every one doing business with them. Soon after the death of Walter Fessenden Mr. Ordway resigned, whereupon the directors made unanimous choice of Albert L. Fessenden president, and Henry A. Hill cashier, who hold these offices at the present time.

The capital stock is one hundred thousand dollars. It was changed to a National Bank in April, 1865. There have been two or three attempts to burglarize this bank, none of which were successful. It is fairly patronized and it does a quiet, paying business.

TOWN OFFICES.—

"And Absalom said moreover, Oh that I were made a judge in the land, that every man which hath any suit or cause, might come unto me, and I would do him justice."

It thus appears that there were office-seekers away back in the time of this good-looking young man, whose death caused his father so many tears.

In colonial times the justices of the peace were commissioned in the name of the King, and the office was considered as one of marked distinction. Upon the adoption of the State Constitution the appointing power vested in the Governor, yet the duties and prerogatives of the office remained the same as before, and the peculiar dignity continued to attend those holding the office. In later years appointments have been more freely given, and the number of persons qualified for the position, both by education and a knowledge of legal forms and proceedings, is so numerous that the magistrates of the present time, surrounded by men of equal influence and eminence, do not enjoy the distinction that once attended the position. The commissions of these men conferred authority for seven years, but they were almost invariably renewed and continued. John Stevens, Israel Hobart and Daniel Adams obtained the office by the favor of the royal Governors.

In the following list of Townsend men, who have been and are now magistrates, the names of the eight men and all of the list now among the living are printed in *italics*. Two of them, however, are not at present residents of Townsend:

John Stevens, Israel Hobart, Daniel Adams, James Locke, Isaac Muliken, Josiah Richardson, Samuel Brooks, Anton Warren, Walter Hastings, Shobal C. Allen, Richard Warner, Aaron Keyes, Levi Sherwin, Hiram Walcott, Joel Adams, John Farwell, George Green, Samuel Jenkins, Ebenezer Rawson, Daniel Giles, Ezra Blood, John Bertram, Henry Seavey, Daniel L. Brown, Levi Stearns, Noah Ball, Frederick A. Worcester, Hartwell Graham, *Whampr B. Sackett*, Albert Howe, *Norton C. Bouthelle*, *Solomon J. Stearns*, *Edward J. Sackett*, James N. Tucker, Ephraim S. Wilder, *Stillman Haynes*, George Taft, *Samuel S. Haynes*, *Charles F. Worcester*, *Royal B. Bagnalon*.

The following is a list of the names of those who held the principal offices in Townsend, from the incorporation of the town until 1891 inclusive.

It will be observed that Townsend omitted to send a representative to the General Court many times during the first fifty years after the acquisition of our

national independence. Probably this may be accounted for from the fact that each town, for the most of that time, paid its own representative, and the neglect was regarded as economy. A lawsuit (*James Locke vs. the inhabitants of the town of Townsend*) was commenced in 1786, concerning a bill which James Locke brought against the town for services as a representative. The town considered the charge in his account excessive, and refused to pay it, which, after the usual delays of the law, was finally compromised and adjusted.

Townsend has guarded her interests invariably with a jealous eye, and maintained her legal rights, "asking for nothing but what was right, and submitting to nothing that was wrong."

The records for 1732 are lost, so that it is impossible to give the officers for that year. Samuel Manning was town clerk, as appears from a part of the record, for that year. There is not much doubt but that the town had the same officers in 1732 as in 1733:

1733. Moderator, Joseph Stevens; Clerk, Samuel Manning. Selectmen—Joseph Stevens, Joseph Baldwin, Samuel Manning.
1734. Moderator, Jasher Wyman; Clerk, Samuel Manning. Selectmen—Joseph Stevens, Joseph Baldwin, Samuel Manning.
1735. Moderator, Jasher Wyman; Clerk, Samuel Manning. Selectmen—John Stevens, Jasher Wyman, Daniel Taylor, Jeremiah Ball, Samuel Manning.
1736. Moderator, Samuel Manning; Clerk, John Stevens. Selectmen—John Stevens, Jasher Wyman, Daniel Taylor.
1737. Moderator, Daniel Taylor; Clerk, Samuel Manning. Selectmen—Samuel Manning, John Stevens, William Clark, Amos Whitney, Jacob Baldwin.
1738. Moderator, Jasher Wyman; Clerk, Samuel Manning. Selectmen—Daniel Taylor, James Hosley, Amos Whitney, Isaac Spaulding, Samuel Manning.
1739. Moderator, Nathaniel Richardson; Clerk, Samuel Manning. Selectmen—Samuel Manning, Daniel Taylor, Jasher Wyman, Ephraim Brown, Amos Whitney.
1740. Moderator, Ephraim Brown; Clerk, Samuel Manning. Selectmen—John Stevens, Daniel Taylor, Amos Whitney.
1741. Moderator, Daniel Taylor; Clerk, Samuel Manning. Selectmen—William Fletcher, John Stevens, Nathaniel Richardson.
1742. Moderator, John Stevens; Clerk, Samuel Manning. Selectmen—Samuel Manning, John Stevens, Daniel Taylor, Ephraim Brown, William Fletcher.
1743. Moderator, Daniel Taylor; Clerk, Samuel Manning. Selectmen—Samuel Manning, John Stevens, Benjamin Brooks, Ephraim Brown, Daniel Taylor.
1744. Moderator, Daniel Taylor; Clerk, Samuel Manning. Selectmen—Samuel Manning, Benjamin Brooks, Nathaniel Richardson, Josiah Robbins, Daniel Taylor.
1745. Moderator, John Stevens; Clerk, Samuel Manning. Selectmen—John Stevens, Benjamin Brooks, Nathaniel Richardson, John Conant, Amos Whitney.
1746. Moderator, John Stevens; Clerk, John Stevens. Selectmen—John Stevens, Benjamin Brooks, Nathaniel Richardson.
1747. Moderator, John Stevens; Clerk, John Stevens. Selectmen—John Stevens, Benjamin Brooks, Jeremiah Ball, Isaac Spaulding, John Wallis.
1748. Moderator, Nathaniel Richardson; Clerk, Samuel Manning. Selectmen—John Stevens, Jonathan Hubbard, Amos Whitney.
1749. Moderator, Jonathan Hubbard; Clerk, Samuel Manning. Selectmen—John Stevens, Jonathan Hubbard, Amos Whitney.
1750. Moderator, Jonathan Hubbard; Clerk, Samuel Manning. Selectmen—John Stevens, Jonathan Wallis, Amos Whitney.
1751. Moderator, Daniel Taylor; Clerk, Samuel Manning. Selectmen—Samuel Manning, Benjamin Brooks, Amos Whitney.
1752. Moderator, Daniel Taylor; Clerk, Samuel Manning. Selectmen—Samuel Manning, Amos Whitney, Jonathan Hubbard.
1753. Moderator, Jonathan Hubbard; Clerk, Samuel Manning. Se-

- lectmen—John Stevens, Jonathan Hubbard, Benjamin Brooks, Amos Whitney, Isaac Spaulding.
1754. Moderator, John Stevens; Clerk, Samuel Manning. Selectmen—John Conant, Daniel Adams, Zachariah Emery.
1755. Moderator, Daniel Taylor; Clerk, Samuel Manning. Selectmen—Samuel Manning, Daniel Adams, John Conant, Zachariah Emery, Ephraim Brown.
1756. Moderator, Jonathan Hubbard; Clerk, Samuel Manning. Selectmen—Jonathan Hubbard, Amos Whitney, Daniel Adams, Zachariah Emery, Samuel Manning.
1757. Moderator, Jonathan Hubbard; Clerk, Daniel Adams. Selectmen—Jonathan Hubbard, Amos Whitney, Daniel Adams, Ebenezer Wyman, William Stevens.
1758. Moderator, Jonathan Hubbard; Clerk, Daniel Adams. Selectmen—Jonathan Hubbard, Daniel Adams, Amos Whitney, Daniel Taylor, Benjamin Brooks.
1759. Moderator, Benjamin Brooks; Clerk, Daniel Adams. Selectmen—Benjamin Brooks, Amos Whitney, Isaac Spaulding, Daniel Adams, Ephraim Heald.
1760. Moderator, Daniel Taylor; Clerk, Daniel Adams. Selectmen—Daniel Adams, Amos Whitney, Daniel Taylor, Ephraim Heald, Isaac Spaulding.
1761. Moderator, Daniel Taylor; Clerk, Daniel Adams. Selectmen—Daniel Adams, Daniel Taylor, Zachariah Emery, Isaac Farrar, Ephraim Heald.
1762. Moderator, Daniel Taylor; Clerk, Daniel Adams. Selectmen—Amos Whitney, Oliver Hildreth, Jonathan Wallis, Daniel Taylor, Daniel Adams.
1763. Moderator, Daniel Taylor; Clerk, Daniel Adams. Selectmen—Daniel Adams, Isaac Spaulding, Daniel Taylor, Benjamin Brooks, Zachariah Emery.
1764. Moderator, Daniel Taylor; Clerk, Daniel Adams. Selectmen—Daniel Adams, Amos Whitney, Ephraim Heald, Thomas Warren, Jonathan Wallis.
1765. Moderator, Daniel Taylor; Clerk, Daniel Adams. Selectmen—Daniel Adams, Daniel Taylor, Ephraim Heald, Ephraim Brown, William Clark.
1766. Moderator, Daniel Taylor; Clerk, Daniel Adams. Selectmen—Daniel Adams, Ephraim Heald, Benjamin Brooks, James Hosley, Jonathan Wallis.
1767. Moderator, Ephraim Heald; Clerk, Daniel Adams. Selectmen—Daniel Adams, Ephraim Heald, Thomas Warren, Isaac Farrar, Jonathan Wallis.
1768. Moderator, Ephraim Heald; Clerk, Daniel Adams. Selectmen—Daniel Adams, Ephraim Heald, Jonathan Wallis, Benjamin Brooks, Amos Heald.
1769. Moderator, Samuel Manning; Clerk, Samuel Manning. Selectmen—Samuel Manning, Amos Heald, Isaac Farrar, Jonathan Patts, Daniel Sherwin.
1770. Moderator, Amos Heald; Clerk, Daniel Adams. Selectmen—Daniel Adams, Amos Heald, Isaac Farrar, Thomas Warren, John Conant.
1771. Moderator, James Hosley; Clerk, Daniel Adams. Selectmen—Daniel Adams, James Hosley, John Conant, Benjamin Spaulding, Samuel Douglas.
1772. Moderator, Jonathan Wallis; Clerk, Daniel Adams. Selectmen—Daniel Adams, Isaac Farrar, Samuel Douglas, Zachariah Emery, James Hosley.
1773. Moderator, James Hosley; Clerk, Daniel Adams. Selectmen—Daniel Adams, James Hosley, Zachariah Emery, Benjamin Brooks, Jonathan Wallis.
1774. Moderator, Daniel Taylor; Clerk, Daniel Adams. Selectmen—Daniel Adams, Daniel Taylor, Richard Wyer, Jonathan Wallis, Benjamin Brooks.
1775. Moderator, James Hosley; Clerk, James Hosley. Selectmen—James Hosley, Isaac Farrar, Thomas Warren, Daniel Emery, Richard Wyer.
- Representative in the Provincial Congress, Israel Hobart.
1776. Moderator, Daniel Adams; Clerk, James Hosley. Selectmen—James Hosley, Isaac Farrar, Daniel Emery, Richard Wyer, Zachariah Emery.
- Representative in the Provincial Congress, Israel Hobart.
1777. Moderator, Daniel Adams; Clerk, James Hosley. Selectmen—James Hosley, Richard Wyer, Levi Whitney, Zachariah Emery, Thomas Warren.
- Representative, James Locke.

1778. Moderator, Daniel Adams; Clerk, James Hosley. Selectmen—James Hosley, Richard Wyer, Thomas Warren, Benjamin Spaulding, Elijah Wyman. Representative, James Locke.
1779. Moderator, Daniel Adams; Clerk, James Hosley. Selectmen—Thomas Warren, Benjamin Spaulding, Samuel Maynard, Daniel Adams, Jr., Elijah Wyman. Sent no Representative.
1780. Moderator, Daniel Adams; Clerk, James Hosley. Selectmen—Thomas Warren, Richard Wyer, Isaac Farrar, Daniel Adams, Jr., Benjamin Spaulding. Representative, James Locke.
1781. Moderator, Daniel Adams; Clerk, James Hosley. Selectmen—Thomas Warren, Richard Wyer, Benjamin Spaulding, Lemuel Petts, Daniel Adams, Jr. Representative, Thomas Warren.
1782. Moderator, Isaac Farrar; Clerk, Benjamin Ball. Selectmen—Benjamin Ball, Daniel Adams, Jr., Lemuel Petts, Daniel Sherwin, James Giles. Representative, James Locke.
1783. Moderator, Daniel Adams; Clerk, Benjamin Ball. Selectmen—Benjamin Ball, Daniel Adams, Jr., Benjamin Spaulding, Thomas Seaver, Elijah Wyman.
1784. Moderator, William Hobart; Clerk, Benjamin Ball. Selectmen—Benjamin Ball, Daniel Adams, Jr., Benjamin Spaulding, Thomas Seaver, Lemuel Petts. Representative, William Hobart.
1785. Moderator, Daniel Adams; Clerk, Benjamin Ball. Selectmen—Benjamin Ball, Thomas Seaver, Thomas Warren.
1786. Moderator, Daniel Adams; Clerk, Benjamin Ball. Selectmen—Benjamin Ball, Thomas Warren, Benjamin Spaulding.
1787. Moderator, Daniel Adams; Clerk, Daniel Adams, Jr. Selectmen—Daniel Adams, Jr., Lemuel Petts, Benjamin Spaulding, Jacob Blodget, Abner Adams. Representative, Daniel Adams.
1788. Moderator, David Spafford; Clerk, Daniel Adams, Jr. Selectmen—Benjamin Ball, Benjamin Spaulding, David Spafford, Jr., Thomas Warren, Thomas Seaver. Representative, Daniel Adams.
1789. Moderator, Daniel Adams; Clerk, Benjamin Ball. Selectmen—Benjamin Ball, Benjamin Spaulding, David Spafford, Jr., Daniel Adams, Jr., John Campbell. Representative, Daniel Adams.
1790. Moderator, Daniel Adams; Clerk, Daniel Adams, Jr. Selectmen—Daniel Adams, Jr., Benjamin Spaulding, John Campbell, Richard Wyer, Lemuel Petts. Representative, Daniel Adams.
1791. Moderator, Daniel Adams; Clerk, Daniel Adams, Jr. Selectmen—Daniel Adams, Jr., Benjamin Spaulding, Nathan Conant, John Campbell, John Emery.
1792. Moderator, Daniel Adams; Clerk, Daniel Adams, Jr. Selectmen—Daniel Adams, Jr., Lemuel Petts, Jonathan Wallis, John Campbell, Nathan Conant. Representative, Jonathan Wallis.
1793. Moderator, Daniel Adams; Clerk, Life Baldwin. Selectmen—Life Baldwin, Daniel Adams, Jr., John Campbell, Jonathan Wallace, Zachariah Hildreth. Representative, Jonathan Wallace.
1794. Moderator, Wadlen Stone; Clerk, Wadlen Stone. Selectmen—Life Baldwin, John Campbell, Jonathan Wallis, Abner Adams, Thomas Seaver. Sent no Representative.
1795. Moderator, Wadlen Stone; Clerk, Jacob Blodget. Selectmen—Jacob Blodget, Abner Adams, John Emery, Samuel Stone, Nathan Seales. Sent no Representative.
1796. Moderator, Daniel Adams; Clerk, Jacob Blodget. Selectmen—Daniel Adams, Jacob Blodget, Abner Adams, John Emery, Samuel Stone. Representative, Daniel Adams.
1797. Moderator, John Campbell; Clerk, Daniel Adams. Selectmen—Daniel Adams, Jacob Blodget, Abner Adams, Samuel Stone, Josiah Richardson. Representative, Daniel Adams.
1798. Moderator, Jonathan Wallis; Clerk, Isaac Mullikin. Selectmen—Walter Mullikin, Jacob Blodget, Abner Adams, Josiah Richardson, Samuel Brooks. Sent no Representative.
1799. Moderator, John Campbell; Clerk, Isaac Mullikin. Selectmen—Isaac Mullikin, Abner Adams, Josiah Richardson, John Emery, Samuel Brooks. Representative, John Campbell.
1800. Moderator, Daniel Adams; Clerk, Daniel Adams. Selectmen—Daniel Adams, Abner Adams, Josiah Richardson, Samuel Brooks, John Emery. Representative, John Campbell.
1801. Moderator, Caleb Sylvester; Clerk, Daniel Adams. Selectmen—Daniel Adams, Josiah Richardson, Joseph Adams, Abner Adams, Caleb Sylvester. Representative, John Campbell.
1802. Moderator, Caleb Sylvester; Clerk, Isaac Mullikin. Selectmen—Isaac Mullikin, John Campbell, Jonathan Keep, Samuel Stone, Daniel Conant. Sent no Representative.
1803. Moderator, John Campbell; Clerk, Daniel Adams. Selectmen—Daniel Adams, Abner Adams, John Campbell, Josiah Richardson, Jacob Blodget. Sent no Representative.
1804. Moderator, John Campbell; Clerk, Daniel Adams. Selectmen—Daniel Adams, John Campbell, Jacob Blodget, Benmanuel Pratt, Shubal C. Allen. Sent no Representative.
1805. Moderator, Caleb Sylvester; Clerk, Josiah Richardson. Selectmen—Josiah Richardson, John Emery, Daniel Conant, Ebenezer Stone, Richard Warner. Representative, John Campbell.
1806. Moderator, Daniel Adams; Clerk, Josiah Richardson. Selectmen—Josiah Richardson, John Emery, Daniel Conant, Ebenezer Stone, Richard Warner. Representative, John Campbell.
1807. Moderator, Daniel Conant; Clerk, Josiah Richardson. Selectmen—Josiah Richardson, John Emery, Daniel Conant, Ebenezer Stone, Richard Warner. Representative, Abner Adams.
1808. Moderator, Daniel Adams; Clerk, Josiah Richardson. Selectmen—Josiah Richardson, Ebenezer Stone, Aaron Warren, Samuel Brooks, Nathaniel Cummings. Representative, Abner Adams.
1809. Moderator, John Emery; Clerk, Josiah Richardson. Selectmen—Josiah Richardson, Aaron Warren, Samuel Brooks, Nathaniel Cummings, Noah Ball. Sent no Representative.
1810. Moderator, Aaron Warren; Clerk, Josiah Richardson. Selectmen—Josiah Richardson, Aaron Warren, Samuel Brooks, Nathaniel Cummings, William Archibald. Representative, Abner Adams.
1811. Moderator, Aaron Warren; Clerk, Samuel Brooks. Selectmen—Samuel Brooks, Richard Warner, Aaron Warren, Nathaniel Cummings, William Archibald. Representative, Samuel Brooks.
1812. Moderator, Aaron Warren; Clerk, Samuel Brooks. Selectmen—Samuel Brooks, Richard Warner, Aaron Warren, Nathaniel Cummings, William Archibald. Representative, Samuel Brooks.
1813. Moderator, Aaron Warren; Clerk, Samuel Brooks. Selectmen—Samuel Brooks, Aaron Warren, Nathaniel Cummings, William Archibald, Joseph Adams. Representative, Samuel Brooks.
1814. Moderator, Aaron Warren; Clerk, Samuel Brooks. Selectmen—Samuel Brooks, Aaron Warren, William Archibald, Joseph Adams, Elijah Going. Representative, Samuel Brooks.
1815. Moderator, Aaron Warren; Clerk, Samuel Brooks. Selectmen—Samuel Brooks, Joseph Adams, Elijah Going, Nathaniel Cummings, Isaac Sanders. Representative, Samuel Brooks.
1816. Moderator, Josiah Richardson; Clerk, Nathaniel Cummings. Selectmen—Nathaniel Cummings, John Richardson, Isaac Sanders, Zela Bartlett, Solomon Jewett. Representative, Samuel Brooks.
1817. Moderator, Aaron Warren; Clerk, Nathaniel Cummings. Selectmen—Nathaniel Cummings, Josiah Richardson, Isaac Sanders, Benmanuel Pratt, Joel Adams. Representative, Samuel Brooks.

1818. Moderator, Aaron Warren; Clerk, Nathaniel Cummings. Selectmen—Nathaniel Cummings, Samuel Brooks, Aaron Warren. Sent no Representative.
1819. Moderator, Aaron Warren; Clerk, Nathaniel Cummings. Selectmen—Nathaniel Cummings, Samuel Brooks, Aaron Warren. Representative, Aaron Warren.
1820. Moderator, Aaron Warren; Clerk, Nathaniel Cummings. Selectmen—Nathaniel Cummings, Samuel Brooks, Isaac Turner. Representative, Aaron Warren.
1821. Moderator, Aaron Warren; Clerk, Aaron Warren. Selectmen—Aaron Warren, Samuel Stone, Jr., John Shipley. Representative, Aaron Warren.
1822. Moderator, Nathaniel Cummings; Clerk, Aaron Warren. Selectmen—Aaron Warren, Samuel Stone, Jr., Daniel Giles. Sent no Representative.
1823. Moderator, Aaron Keyes; Clerk, Aaron Warren. Selectmen—Aaron Warren, Samuel Stone, Jr., Daniel Giles. Representative, Aaron Warren.
1824. Moderator, William A. Bancroft; Clerk, Aaron Warren. Selectmen—Aaron Warren, Joel Adams, Joel Spaulding. Representative, Aaron Warren.
1825. Moderator, Joel Adams; Clerk, Joel Adams. Selectmen—Joel Adams, Joel Spaulding, Josiah G. Heald. Sent no Representative.
1826. Moderator, Aaron Warren; Clerk, Aaron Warren. Selectmen—Aaron Warren, Josiah G. Heald, Samuel Brooks, Aaron Keyes, William Pratt. Representative, Aaron Warren.
1827. Moderator, Solomon Jewett, Jr.; Clerk, Aaron Warren. Selectmen—Aaron Warren, Samuel Stone, Jr., William Pratt, Joel Spaulding, Aaron Keyes. Representative, Aaron Warren.
1828. Moderator, Jacob S. Hyner; Clerk, Aaron Warren. Selectmen—Aaron Warren, William Pratt, Josiah G. Heald, Paul Gerrish, Aaron Keyes. Representative, Aaron Warren.
1829. Moderator, Solomon Jewett, Jr.; Clerk, Aaron Warren. Selectmen—Aaron Warren, William Pratt, Paul Gerrish, Aaron Keyes, Richard W. Pierce. Representative, Aaron Warren.
1830. Moderator, Solomon Jewett, Jr.; Clerk, Aaron Warren. Selectmen—Paul Gerrish, Aaron Keyes, Richard W. Pierce, Solomon Jewett, Jr., Benjamin Barrett, Jr. Representative, Aaron Warren.
1831. Moderator, Solomon Jewett, Jr.; Clerk, Solomon Jewett, Jr. Selectmen—Solomon Jewett, Jr., Richard W. Pierce, Benjamin Barrett, Jr., Josiah G. Heald, Isaac Spaulding. Sent no Representative.
1832. Moderator, Aaron Keyes; Clerk, Solomon Jewett, Jr. Selectmen—Solomon Jewett, Jr., Richard W. Pierce, Benjamin Barrett, Jr., Joel Emery, Levi Sherwin. Representative, Paul Gerrish.
1833. Moderator, Joel Adams. Clerk, David Palmer. Selectmen—Solomon Jewett, Jr., Richard W. Pierce, Benjamin Barrett, Jr., Levi Ball, Abraham Seaver. Representative, David Palmer.
1834. Moderator, Henry Seeva; Clerk, Paul Gerrish. Selectmen—Paul Gerrish, Joel Emery, William Pratt. Representatives, David Palmer and Elnathan Davis.
1835. Moderator, Joseph Steele; Clerk, Paul Gerrish. Selectmen—Paul Gerrish, William Pratt, Benjamin Barrett, Jr. Representatives, Joel Emery and David Palmer.
1836. Moderator, Samuel Adams. Clerk, David Palmer. Selectmen—Quincy Sylvester, Luther Adams, Daniel Adams. Representatives, Joel Emery and Samuel Adams.
1837. Moderator, Samuel Adams; Clerk, David Palmer. Selectmen—Joel Adams, Levi Ball, Elnathan Davis. Representative, Joel Emery.
1838. Moderator, Henry Seeva; Clerk, David Palmer. Selectmen—William Pratt, Benjamin Barrett, Jr., Paul Gerrish. Representative, Josiah G. Heald.
1839. Moderator, Ezra Blood; Clerk, Samuel Adams. Selectmen—Joel Adams, Joel Emery, Luther Adams. Representative, Luther Adams.
1840. Moderator, Henry Seeva; Clerk, John Bertram. Selectmen—Joel Emery, Richard W. Pierce, William Pratt. Representative, Daniel Giles.
1841. Moderator, Henry Seeva; Clerk, John Bertram. Selectmen—Henry Seeva, Ebenezer Rawson, Henry A. Woods. Sent no Representative.
1842. Moderator, Henry Seeva; Clerk, John Bertram. Selectmen—Henry Seeva, Henry A. Woods, Luther Adams. Representative, Henry Seeva.
1843. Moderator, Ezra Blood; Clerk, Daniel Giles. Selectmen—Paul Gerrish, Luther Adams, Daniel Adams. Representative, Henry Seeva.
1844. Moderator, Ezra Blood; Clerk, Daniel Giles. Selectmen—Paul Gerrish, Daniel Adams, Luther Adams. Sent no Representative.
1845. Moderator, Samuel Adams; Clerk, Daniel Giles. Selectmen—John Seales, Levi Stearns, Ebenezer Rawson. Sent no Representative.
1846. Moderator, Daniel Adams; Clerk, Daniel Giles. Selectmen—John Seales, Joseph Adams, John Hart. Representative, Levi Warren.
1847. Moderator, Ezra Blood, Jr.; Clerk, Joseph Adams. Selectmen—Joseph Adams, Levi Stearns, John Hart. Representative, Joel Kendall.
1848. Moderator, Ezra Blood, Jr.; Clerk, Joseph Adams. Selectmen—Joseph Adams, Levi Stearns, Joel Emery. Representative, Joel Emery.
1849. Moderator, Ezra Blood, Jr.; Clerk, Joseph Adams. Selectmen—Joel Emery, Luther Adams, Ezra Blood, Jr. Representative, Samuel Hart.
1850. Moderator, Ezra Blood; Clerk, Joseph Adams. Selectmen—Joseph Adams, John Seales, Zimri Sherwin. Representative, Henry A. Gerry.
1851. Moderator, Charles Powers; Clerk, Henry A. Gerry. Selectmen—Charles Powers, Aaron Pressey, Joel Emery. Representative, Samuel S. Haynes.
1852. Moderator, Levi Sherwin; Clerk, Quincy A. Sylvester. Selectmen—Quincy A. Sylvester, Levi Sherwin, Nathaniel F. Cummings. Sent no Representative.
1853. Moderator, Abram S. French; Clerk, Quincy A. Sylvester. Selectmen—Daniel Adams, Nathaniel F. Cummings, Charles B. Barrett. Sent no Representative.
1854. Moderator, Samuel Adams; Clerk, Daniel Adams. Selectmen—Joseph Adams, Levi Stearns, Charles B. Barrett. Representative, Benjamin E. Wetherbee.
1855. Moderator, Ezra Blood; Clerk, Rector T. Bartlett. Selectmen—Nathaniel F. Cummings, Ezra Blood, James E. Adams. Representative, Frederick A. Worcester.
1856. Moderator, Eliab Going; Clerk, Rector T. Bartlett. Selectmen—Nathaniel F. Cummings, Daniel Adams, Alexander Crag. Representative, Luther Adams.
1857. Moderator, Eliab Going; Clerk, Rector T. Bartlett. Selectmen—Henry Seeva, Albert Howe, Benjamin E. Wetherbee. Representative, Frederick A. Worcester, of Townsend.²
1858. Moderator, Ezra Blood; Clerk, Daniel Adams. Selectmen—Joseph Adams, William H. Lewis, Zimri Sherwin. Representative, Noah Ball, of Townsend.
1859. Moderator, Ezra Blood; Clerk, Daniel Adams. Selectmen—John Seales, Jr., John Whitcomb, Jonathan Pierce. Representative, Alexander Crag, of Townsend.
1860. Moderator, Christopher Gates; Clerk, Daniel Adams. Selectmen—John Seales, Jr., Alexander Crag, Benjamin F. Lewis. Representative, Joseph Foster, of Ashby.
1861. Moderator, Ezra Blood; Clerk, Ezra Blood. Selectmen—Nathaniel F. Cummings, Alexander Crag, Benjamin F. Lewis. Representative, Abram S. French, of Townsend.

² Townsend and Ashby constituted District No. 27, this year.

¹ In 1827, "Voted that the town will abolish the custom of receiving a treat from their representative when chosen." Townsend commenced early in the temperance cause. Aaron Warren, this year, instead of furnishing the liquors, presented an expensive pall on burying cloth to the town. This might have been intended as a symbol of public opinion which was preparing to bury His Majesty, King Alcohol.

1862. Moderator, Edwin A. Larkin; Clerk, Noah Wallace. Selectmen—Nathaniel F. Cummings, Alexander Craig, Benjamin F. Lewis. Representative, Abram S. French, of Townsend.
1863. Moderator, Samuel S. Haynes; Clerk, Daniel Adams. Selectmen—Nathaniel F. Cummings, Oliver H. Pratt, Charles H. Warren. Representative, Paul Gates, of Ashby.
1864. Moderator, Stillman Haynes; Clerk, Daniel Adams. Selectmen—Nathaniel F. Cummings, James N. Tucker, Newton C. Boutell. Representative, Anson D. Fessenden, of Townsend.
1865. Moderator, Stillman Haynes; Clerk, Daniel Adams. Selectmen—Oliver Proctor, Stillman Haynes, Abel G. Stearns. Representative, George L. Hitchcock, of Ashby.
1866. Moderator, Samuel S. Haynes; Clerk, Daniel Adams. Selectmen—Abel G. Stearns, Noah Ball, Edwin A. Larkin. Representative, Noah Wallace, of Townsend.
1867. Moderator, Christopher Gates; Clerk, Daniel Adams. Selectmen—Abel G. Stearns, Benjamin F. Lewis, Edward A. Larkin. Representative, Jonathan Pierce, of Townsend.¹
1868. Moderator, Christopher Gates; Clerk, Daniel Adams. Selectmen—Abel G. Stearns, Edwin A. Larkin, Jonathan Pierce. Representative, A. A. Plympton, of Shirley.
1869. Moderator, Christopher Gates; Clerk, Daniel Adams. Selectmen—Abel G. Stearns, Charles Osgood, Benjamin Brown. Representative, Samuel R. Damon, of Ashby.
1870. Moderator, Christopher Gates; Clerk, Daniel Adams. Selectmen—Abel G. Stearns, Charles Osgood, Benjamin Brown. Representative, Benjamin F. Lewis, of Townsend.
1871. Moderator, Ithamar B. Sawtelle; Clerk, Christopher Gates. Selectmen—Abel G. Stearns, Benjamin Brown, Joshua S. Page. Representative, Alvin Lawton, of Shirley.
1872. Moderator, Ithamar B. Sawtelle; Clerk, Christopher Gates. Selectmen—Abel G. Stearns, Benjamin Brown, Joshua S. Page. Representative, Samuel S. Haynes, of Townsend.
1873. Moderator, Ithamar B. Sawtelle; Clerk, Christopher Gates. Selectmen—Abel G. Stearns, Benjamin Brown, Joshua S. Page. Representative, Alonzo A. Carr, of Ashby.
1874. Moderator, Albert L. Fessenden; Clerk, Christopher Gates. Selectmen—Charles Osgood, Eliot Moore, Ephraim S. Wilder. Representative, Edwin A. Spaulding, of Townsend.
1875. Moderator, Albert L. Fessenden; Clerk, Christopher Gates. Selectmen—Charles Osgood, Ephraim S. Wilder, George A. Upton. Representative, Samuel Langley, of Shirley.
1876. Moderator, Ithamar B. Sawtelle; Clerk, Christopher Gates. Selectmen—Ephraim S. Wilder, Abel G. Stearns, Eugene R. Kilbourn. Representative, Alfred M. Adams, of Townsend.²
1877. Moderator, Ithamar B. Sawtelle; Clerk, Christopher Gates. Selectmen—Abel G. Stearns, Benjamin Brown, Benjamin Heneey.
1878. Moderator, Ithamar B. Sawtelle; Clerk, William P. Taylor; Selectmen—Abel G. Stearns, Benjamin Brown, Edwin A. Spaulding.
1879. Moderator, Albert L. Fessenden; Clerk, William P. Taylor. Selectmen—Abel G. Stearns, Benjamin Brown, A. K. Tyler.
1880. Moderator, Albert L. Fessenden; Clerk, William P. Taylor. Selectmen—Abel G. Stearns, Benjamin Brown, A. K. Tyler. Representative, John E. Dickerman.
1881. Moderator, Albert L. Fessenden; Clerk, William P. Taylor. Selectmen—Abel G. Stearns, A. K. Tyler, Benjamin Brown.
1882. Moderator, Albert L. Fessenden; Clerk, William P. Taylor. Selectmen—Abel G. Stearns, A. K. Tyler, Benjamin Brown.
1883. Moderator, Albert L. Fessenden; Clerk, William P. Taylor. Selectmen—Abel G. Stearns, A. K. Tyler, George H. Baldwin.
1884. Moderator, Albert L. Fessenden; Clerk, William P. Taylor. Selectmen—Abel G. Stearns, A. K. Tyler, Benjamin Brown. Representative, John W. Eastman.
1885. Moderator, Albert L. Fessenden; Clerk, E. A. Blood. Selectmen—Abel G. Stearns, A. K. Tyler, George H. Baldwin.
1886. Moderator, Ithamar B. Sawtelle; Clerk, E. A. Blood. Selectmen—Clarence Stickney, Eugene R. Kilbourn, Oliver Proctor.

Representative, William P. Taylor.

1887. Moderator, Ithamar B. Sawtelle; Clerk, E. A. Blood. Selectmen—Clarence Stickney, Eugene R. Kilbourn, Oliver Proctor.
1888. Moderator, Edward J. Sartelle; Clerk, E. A. Blood. Selectmen—Eugene R. Kilbourn, Abel G. Stearns, A. K. Tyler.
1889. Moderator, Edward J. Sartelle; Clerk, E. A. Blood. Selectmen—Abel G. Stearns, A. K. Tyler, Ransom B. Adams. Representative, Charles F. Worcester.
1890. Moderator, Edward J. Sartelle; Clerk, E. A. Blood. Selectmen—Asa K. Tyler, Ransom B. Adams, Everett W. Seaver.

The valuation of the town is about \$1,000,000.

APPROPRIATIONS FOR 1890.

For the support of schools	\$3000

For repairs on school-houses	200
For the purchase of school-books	200
For the public library	175
For carrying children to school	150
For the village improvement society	115
	\$9440

FINALE.—The space in this work given to Townsend is so limited that notices of many prominent individuals must be omitted; and yet it may be stated that this town has produced several men who have had a good influence on their contemporaries. Her sons have filled the learned professions outside of New England as well as in this Commonwealth; and her daughters, leaving the West Townsend Female Seminary, wherever located, have been welcomed as teachers in that field of womanly labor. Miss Myra Proctor spent the best years of her life as a missionary in Turkey. In connection with her labors she translated "Cutter's Physiology," and other English literature, into the Turkish language, and gathered around her many friends in that far-off land, over which the crescent has been the symbol for many centuries. Henry Price, an Englishman, was an adopted citizen of Townsend for seventeen years. In 1764 and 1765 he represented Townsend in the Provincial Legislature, in which he served on two important committees. He was the founder of duly constituted Masonry in America, died in Townsend (1780), and was buried here. In 1888, more than one hundred years after his death, the Grand Lodge of Masons of Massachusetts erected a plain but strikingly beautiful and appropriate monument at his grave, which was dedicated by that body June 21st of that year. Among the Townsend men who have been actors in the theatre of merchandise, the name of Asa Whitney is prominent. He was an engineer and a manufacturer of car-wheels in Philadelphia. It was through his advice that the rails on our roads are laid fifty-six and one-half inches apart. He was very rich and he gave liberally.

Townsend has been represented in the State Senate by three of its citizens. John Hubbard, once a popular professor of Dartmouth College, was a musician and an author. More than eighty years ago "Hub-

¹ 1866. Townsend, Ashby and Shirley constituted a representative district. Middlesex County was entitled to forty-one of the two hundred and forty members of the House of Representatives.

² In 1876, Ayer, Ashby, Shirley and Townsend constituted one representative district.

A. M. Adams

Capt. A. Craig

bard's Anthems" were in use in all the New England churches. Daniel Adams was the author of a series of school-books, which were in use throughout the Eastern States for more than half a century. The list of the deserving might be extended, but it must be left to larger space and an abler pen.

"Long live the good town, giving out year by year
Recruits to true manhood and womanhood dear;
Brave boys, modest maidens, in beauty sent forth
The living epistles and proof of its worth."

BIOGRAPHICAL.

ALFRED M. ADAMS.

Alfred Mark Adams, son of Noah and Levina P. (Cowden) Adams, was born in Townsend October 2, 1835. He was of the fifth generation from Joseph Adams, who came from England about 1685 and settled in Cambridge, in that part thereof which is now Arlington. While he was at school he was always free from trouble either with his teachers or school-fellows. He was noted for his politeness towards his superiors. At the age of fifteen years he entered New Ipswich Academy, where he remained nearly three years, when he left that institution and joined a class at Westfield Academy, where he continued his studies for about two years. On leaving this academy he went to Boston and was a clerk in a wholesale carpet-store for more than a year. The firm of Adams & Powers was dissolved by the death of Mr. Powers in 1856. On the 1st of January, 1857, the surviving partner and father of Alfred M. Adams bought out the interest of the widow and that of Charles E. Powers, the only heir. Mr. Noah Adams, being out of health and feeling the pressure of business, was very anxious to have his son return from Boston and assist him; and he made so liberal an offer to him that he complied with his father's wishes. In December, 1859, Mr. Noah Adams died. Soon after his decease Alfred M. Adams bought the interest of his mother, brother and sister in the estate and continued in the coopering, lumbering and grinding Western corn business until August 27, 1884, when he died. He married Eliza A. (Sylvester) Everett November 21, 1869. Union S. Adams, his only son and heir, has continued the business since the decease of his father, and he has a large and increasing trade in all the branches of industry above enumerated.

As a successful manufacturer and manager of an extensive business, the record of A. M. Adams will not appear to disadvantage when viewed in connection with the efforts of men of larger experience and equally favorable surroundings. He made many improvements in his mill and extended the business, particularly in the grain elevator department. His life exemplified the exception rather than the rule in the descent of property. Generally when a young

man, not knowing how to earn money, has a large property left to him, he loses it almost as easily as he obtained it; and then, perhaps, he will make an effort to learn the value of money by earning some himself. This gentleman kept as much property as he inherited and added largely to that amount. Mr. Adams was a prominent member of the Republican party, and as such he represented the Thirty-fifth Middlesex District in the General Court in 1877. He was strongly attached to the Masonic fraternity, and he was buried with the honors of that ancient institution, a large number of the order being in attendance at his obsequies.

ALEXANDER CRAIG.

Alexander Craig, son of James and Nancy (McBride) Craig, was born in Mason, New Hampshire, January 18, 1815. The family of which he was a member moved to Townsend when he was a small boy, and lived on a farm at the south part of the town, where he worked with his father during his minority. He attended the district schools regularly at the time when both sexes were in attendance during the winter months, until they arrived at the stature of manhood and womanhood, and by dint of perseverance he obtained an education suitable for a business life, all of which, except in early childhood, was passed in Townsend. On his arrival at majority he commenced work for himself, at a time when "from sun to sun" was the length of a day's work, and when the pay for the labor which he performed was about one-fourth as much as it is at the present time. The amount of money for his first year's work, over and above his expenses, he lost by loaning it and taking a note from a man supposed by every one to be solvent. This experience so sharpened his observation that always afterward his funds were safely invested. After accumulating a limited sum of money he commenced trading in neat stock, and for a short time he was in the butchering business at West Townsend, in which he was both popular and successful. In a certain degree, every transaction which he made increased his wealth. For several years, between 1840 and 1850 and until the completion of the Peterborough and Shirley Railroad, he kept a livery-stable at West Townsend. He contracted for furnishing several thousand ties for this railroad, and in carrying out this agreement he employed about twenty men in cutting, hewing and teaming them. He also furnished most of the telegraph poles on this line of road from Greenville to Ayer. From 1850 to the time of his death he traded in most everything in which there was money to be made, including cattle, horses, wood, lumber and farms. He would buy farms, cut off the wood and timber, and then sell the freehold on the best terms he could, as the value to him was in the wood and timber. He had good judgment in all his traffic and people knew it. If he bought anything at an auction, before touching it,

perhaps, some one would give him a profit on it and take it off his hands. He was a man of conviction, was straightforward, energetic, pushing, and always at the front of everything which he undertook. He was one of the selectmen 1856, 1860, 1861, 1862, and he represented District No. 27 (Ashby and Townsend) in the General Court in 1859. He never married, but always had a home of his own, which Miss Mary Ann Craig, an unmarried sister, happily shared with him all along up to the three-score and ten point of life; and in the distribution of his large estate by his will, this sister was kindly and liberally remembered. He died January 11, 1886.

CHARLES POWERS.¹

Charles Powers, son of William and Pamela (Wright) Powers, was born in Pepperell September 6, 1809.

He was a descendant, in the sixth generation, from Walter Power, an Englishman, born in 1639, and who came to this country (landing at Salem) in 1654. Walter Power was married in 1660 to Triad, daughter of Deacon Ralph and Thanksford Sheppard, at Malden. Two daughters and seven sons were the fruit of this marriage. Walter Power, in 1694, bought of certain Indians one fourth part of the township of Nashoba (now Littleton) and settled there.

The name Power in the next generation was spelled Powers, and it has retained that orthography since that time. The subject of this sketch grew up to manhood under the influence of a home where work was the rule and not the exception. He attended the public schools at the time when the first principles of an education were mastered and not hurried through to gain a higher grade, and the education which he acquired was a better equipment for the battle of life than in many instances is taken from our colleges.

During his minority he earned some money, with which he purchased the farm which his father had rented, and gave a deed of it to his mother. After he became of age he purchased a few horses, and engaged in the teaming business, and removed to the adjoining town of Townsend, which was upon the great highway between Boston and the large towns of northern Middlesex County and New Hampshire. This was at a time before any railroads were built, and the business became large and lucrative, requiring a large number of horses.

Soon after removing to Townsend he, with Mr. Noah Adams, purchased the mill property at Townsend Centre, and a co-partnership was formed under the firm-name of "Adams & Powers," which became well known throughout and beyond Middlesex County for more than twenty years. This firm did an extensive business in lumbering, coopering stock, grist and flouring mill work. Mr. Powers became the presiding

genius of this firm. The buying of large timber lots was done altogether on his judgment. After several years of devotion to business he purchased interests in manufacturing enterprises, railroads and banking establishments. For a few years he was a sheriff of Middlesex County. He never was an office-seeker, having a natural distaste for politics. He occasionally acted as moderator at meetings of the town, and served as chairman of the Board of Selectmen in 1851. If there was any money to be raised, either for charitable, political or religious purposes, he would solicit moderately among his friends for the amount needed, and would always make up the deficit from his own pocket. He contributed largely towards the sum necessary to purchase the old First Parish Meeting-house, and presented it to the Methodist Episcopal Society of Townsend. He was the patron of the Methodists, and is gratefully remembered by that denomination. In private life his character was of singular charm. He was a man of large physique, was warm-hearted and affectionate, most faithful in his friendships, and delighting in liberal hospitality, and unwearied in his efforts to make everybody about him happy.

His probity was a tower of strength to himself, and to all who dealt with him. What was right and honest was the very law of his being. His judgment was sound and conservative. He was a Christian and belonged to the whole church of Christ, and because he loved every branch of the church, he loved not his own communion less. In the bestowal of his charities and benevolent contributions he was governed, not by occasional impulses, produced by appeals to his emotional nature, but by calm, settled, religious principles. He was one of the few but increasing number who gave by system annually as God gave him the means, and known only to the Great Head of the church are the amounts of his benefactions. As a friend to young men commencing business or a course of education, there are a number living to-day, and filling honorable positions in the community, who can bear testimony to his unstinted but generous aid. The manner of his death was like the seal of Heaven on a good man's life. On the 7th of October, 1856, having spent the greater part of the day in the city of Boston, and having returned to his home in Townsend, seemingly in best health and spirits, when all at once, feeling a faintness coming over him, he exclaimed, "I believe I shall faint away;" these were his last words on earth, and after uttering them he immediately expired. At the time of his death he had lived forty-seven years, one month and one day. He left a widow, Sarah (Brooks) Powers, and a son, Charles Edward Powers, both of whom are among the living.

ABRAM S. FRENCH.

Abram Stickney French, son of Abram and Elizabeth (Kidder) French, was born in Boston March 5,

¹By Charles L. Powers.

Charles Powers

Abram S. French

Charles Emery

R B Boynton

1809. He made one or two voyages to the West Indies as a cabin-boy, but not being pleased with a maritime life he was sent to New Ipswich Academy, where he acquired a good education. He preferred a business life rather than to pursue a course of studies with the view to enter upon one of the learned professions. In 1830 he engaged in the morocco-tanning business at West Townsend, in a building which stood opposite to the residence of A. M. Wilson. In 1833 he built a morocco-factory on a brook running northeasterly from Bayberry Hill, near its junction with Squamicook River. This establishment was in successful operation until 1853, employing constantly ten or twelve workmen; and from the fact of a continuation of twenty years in the trade, the presumption is that the business was a source of wealth to the proprietor. Leaving Townsend in 1853, he went to Lockport, N. Y., and stocked a tannery, where he carried on business successfully with a partner, to whom he sold his interest in the business in 1858, and removed to Wellsville, N. Y., and built an extensive tannery, and pursued that branch of industry for several years, doing a large and profitable business. Partially losing his health, and seeing a good chance to sell out, he disposed of this factory and its stock in trade and retired from business in 1864. The price of everything was inflated by the paper currency, caused by the war, so that leather—like all other property—was worth more than double when he sold, compared with its value when he built the tannery, and consequently the sale was a good stroke of financial policy. He married Lois P. Richardson, daughter of Jonathan Richardson, October 2, 1831. She was born in Townsend July 16, 1812. Although they have an abundance of wealth and friends, they have been greatly bereaved by the loss of four of their six children—a son in the Rebellion, two daughters, each about twenty years of age, and a daughter in childhood. The account of this family may be of interest to the future genealogist looking after persons by the name of French.

Children: Mary Elizabeth, born October 26, 1832, died September 30, 1834; Mary Elizabeth, born March 30, 1834, died February 6, 1859; George Frederick, born September 1, 1836, died November 24, 1861; Ann Maria, born August 2, 1838, died August 26, 1851; Abram Arthur, born March 4, 1844; Martha Ellen, born November 4, 1846.

Mr. French has always been fond of books, which, during the days of bad health, have been a source of pleasure to him. He has a retentive memory, is well posted on historical matters and possesses a large amount of miscellaneous information. He gives liberally to the poor, and enjoys life at his advanced age in a remarkable manner. He is a member of the Republican party, and in 1861–62 he represented the Twenty-seventh District (Ashby and Townsend) in the General Court.

CHARLES EMERY.

The name of Emery is said to be of Norman origin. Those of the name were in England in 1066, and engaged in the battle of Hastings under William the Conqueror. In 1635 John Emery and his son John, and Anthony his brother, embarked in the ship "James," Captain Cooper, and landed in Boston June 3d of that year. John settled in Newbury, and he died there November 3, 1685, aged eighty-five. He was a carpenter, and it was from him that the subject of this sketch is descended. Zacheriah Emery, the great-grandfather, came to Townsend about 1739, and, December 2d, he married Esther Stevens, of Townsend. He was a leading man in town and church affairs, was one of the selectmen eight years, from 1754 to 1778. He was at the battle of Bunker Hill in Captain Hosley's company. He owned a large tract of land, situated about two miles south from where the meeting-house stood, on the Lunenburg road, leading through South Row. This estate has remained in the Emery family to the present time, Charles Emery and his sister being the sole heirs. About 150 acres of this tract remain in a perfectly wild state, and the sound of the woodman's ax has never reverberated among the huge and mossy trunks of this primeval forest. John Emery, the grandfather, was a prominent townsman; was in Captain Henry Farwell's company at the battle of Bunker Hill; married Ruth Sanderson, of Lunenburg; was one of the selectmen seven years, from 1795 to 1809. Joel Emery, the father, was a soldier in the War of 1812, stationed at Fort Warren. He served on the Board of Selectmen six years, from 1832 to 1852, and he represented Townsend in the General Court in 1835, 1836, 1837 and 1839.

CHARLES EMERY, son of Joel and Mary (Sylvester) Emery, was born in Townsend December 3, 1819. He married, July 2, 1846, Amanda M. Walcott. She was born in Lowell September 24, 1828. Children: twins, a son and a daughter, born October 9, 1862. The daughter died in infancy; the son, Charles H. Emery, died October 17, 1879. The death of this son, a promising youth of seventeen, was a great bereavement to these parents. He was their only child. Mr. Emery, soon after he arrived at majority, opened a store at Townsend Harbor, in the same building which he now occupies as a store. In 1848 the failure of the contractors to build the Peterborough and Shirley Railroad ruined him financially, as he had a large amount of goods trusted to their boarding-house keepers and laborers, who received little or nothing for their services and consequently could not pay their bills. Not losing his courage, he served as a clerk for a firm in Boston for a short time, but he soon returned to Townsend Harbor and commenced business at the store where he is now in trade, where he paid all his debts and has had a profitable trade ever since. He has often been urged to accept some of the town offices, but he has always declined a nomi-

ination. With the exception of about five years, from 1850 to 1855, he has been postmaster at Townsend Harbor since 1843, a term of over forty years. He is a genial gentleman and has as few enemies as any Townsend man. Since last winter (1890) his usual good health has failed so much that in July of this year he sold out his stock in trade and retired from business.

ROYAL B. BOYNTON.

Royal Bullard Boynton, son of Isaac and Sybil (Lawrence) Boynton, was born in Pepperell February 7, 1826. He is descended from John Boynton, who, in 1638, came from Yorkshire, England, and settled in the old town of Rowley. On his maternal side he is a descendant of John Lawrence, who first settled in Lexington; afterwards removed to Groton. He was one of the original proprietors of Townsend. While not at school or teaching school the subject of this sketch worked on his father's farm until he arrived at majority. The whole dream and hope of his boyhood was to become a physician, and he was at his books while his neighbors' boys were at their games and amusements. In 1847 he was at Ludlow Academy, Vermont. In 1848 he was connected with Pepperell Academy, both as pupil and assistant teacher in mathematics. During the winter of 1848-49 he was at Groton Academy, studying Greek and geometry, with a view of entering college two years in advance, and while he was there his eyes failed by an attack of amaurosis to such an extent that in the following spring for about six weeks he was totally blind. Recovering partially from this difficulty, but not so much as to enable him to pursue his studies, he went to Lowell and entered the office of Knowls, a noted mechanical and operative dentist, and attended to the mechanical part of that business for about two months during the following summer. He was after that a student in the office of Dr. Nehemiah Cutter, who gave him a certificate of two years' study of medicine. He graduated from Woodstock Medical College (Woodstock, Vt.) in 1852, in a large class, of which he and five others stood in the front rank in scholarship. He commenced the practice of medicine in Pepperell soon after his graduation. In 1855 he moved to Townsend Centre, and was in practice at that village until 1862, when he removed to Mason Village, N. H., and remained there until 1865, when he removed to West Townsend, where he is now in practice. He is a skillful physician and surgeon and has an extensive practice. He is decidedly a self-made man, and his success in his profession is attributable as much to his interest in his studies at the fireside in his father's house as to any other source. He keeps thoroughly posted in the literature of his profession, and he has the same yearning for advancement, sometimes called ambition, which he felt in early life. His office patients come from all directions, and, besides taking many long rides to

visit the sick, he occasionally travels by rail, sometimes a long distance, to attend to those who wish for his professional services. November 12, 1863, he married Jose H. Taft, of Mason Village, N. H.

CHAPTER XLIII.

LEXINGTON.

BY REV. C. A. STABLES.

TOPOGRAPHY AND SCENERY.

THIS town lies west-northwest of Boston, the central village being about eleven miles distant from that city and connected with it by the Western Division of the Boston and Maine Railroad. It contains nineteen square miles of territory, or upwards of 20,000 acres. The boundaries of the town are quite irregular, and its length from north to south considerably greater than its breadth from east to west. It lies between the towns of Winchester, Woburn and Burlington on the east, and Lincoln and Waltham on the west, and between Arlington and Belmont on the south and Bedford on the north. The central village is situated chiefly in a plain, probably in geologic eras the bottom of a shallow lake, from which rise on all sides, excepting the northeast and southeast, hills having an elevation of from fifty to one hundred and fifty feet. The site is nearly two hundred and fifty feet above tide-water in Boston harbor and ninety feet above Concord River, six miles distant toward the northwest. The surface of the town is broken by ranges of hills running generally from northeast to southwest, and by many isolated elevations of considerable height. Of the latter, Concord, Davis, Fiske and Loring Hills, lying southwest and northwest of the village, and Merriam, Hancock Heights, Mason, Mount Independence and Mount Ephraim, lying east and south of the village, are illustrations. These hills are generally covered with wood and are of a rocky and precipitous character, especially the eastern slope; but some are used as pastures and afford extensive and beautiful views of the surrounding country from their summits. Embosomed among these hills are extensive peat swamps, many of which have been reclaimed and brought under cultivation. They form a striking feature of the landscape in some portions of the town and produce enormous crops under generous fertilization. On one of these meadows the owner gathered recently, at a single mowing, over four tons of hay from an acre, by actual weight, when put in the barn. The second harvest not unfrequently affords half the quantity of the first.

The general elevation of the surface of Lexington prevents the accumulation of stagnant water within its borders. It contains no pond of more than one or two acres in extent, excepting that near the east village, made by flooding the great meadows to furnish

a water supply for the Arlington reservoir. The town is virtually the water-shed of the southern part of Middlesex County between the Charles and the Mystic Rivers. Considerable streams take their rise in the town and run in different directions. Among these, Vine Brook, one of the largest, rises half a mile west of the village and pursues a northeasterly course into the town of Burlington, affording several mill privileges and emptying into the Shawshine River. The North Brook, rising in the same locality, flows directly north into the town of Bedford, where it unites with the same river. Half a mile southeast of the village the Munroe Brook, having its source in a copious spring of pure cold water, flows southeasterly into Arlington, where it forms the chief supply for the town water-works, furnishing, by actual measurement, 200,000 gallons daily. A mile west of the village Hobbs' Brook has its source and runs in a southerly direction along the borders of Lincoln, in a deep valley, and pursuing its course under the eastern slope of Mount Tabor, empties into the Charles River in Waltham. Other brooks in the southerly portion of the town flow in the same direction, pouring their waters, through various channels, into the Mystic or the Charles. Thus we may say, in general, that the surface of the town slopes to the north and to the south, the local water-shed being in the vicinity of the central village, from which streams flow in these opposite directions. This absence of stagnant water and the good drainage afforded by these brooks, together with the general elevation of the surface, give the atmosphere great purity and cause the town to be one of the most healthful in the State. There are few tracts of level ground within its limits, excepting the plain in which the central village is situated and one of considerable extent lying eastwardly on the borders of Vine Brook, and containing the old race-course.

Having a great variety of surface, with extensive tracts of forest and meadow land and bold, rocky hills, the scenery of Lexington is attractive and delightful. In every direction the drives are inviting, winding around wood-covered hills, along rich valleys, past comfortable and spacious dwellings, with broad and beautiful landscapes continually opening before the traveler. In many parts of the town Wachusett Mountain is seen rising in graceful outline on the western horizon thirty miles distant. Farther to the north the Grand Monadnock lifts its giant form in solitary grandeur, and around it are gathered the lofty Peterboro' hills, all distinctly visible on a clear day. But the most extensive and fascinating view is obtained from Hancock Heights, where, at an elevation of 150 feet above the village, the eye sweeps the unbroken line of the horizon on a radius of thirty or forty miles. A vast extent of gardens, fields, orchards and forests lies outspread before you, dotted over with flourishing villages, while through an opening between Crescent Hill and Arlington Heights

are seen the spires and domes of Boston and Cambridge. The city of Woburn lies farther towards the north, with Stoneham and Reading beyond, while still farther north are Burlington and Bedford. Turning towards the west, we have a wide sweep of woods and fields backed by mountains, and in the south a charming view over Waltham and Newton, with the Blue Hill of Milton in the distance. From hills around East Lexington, and from elevations on the Cary farm, the views, though much less extensive, are hardly less striking and beautiful.

Lexington is, almost exclusively, an agricultural town, and contains many large and valuable farms. Among these the most noted is the Hayes estate of 400 acres, with its lordly stone mansion, its noble groves of pine and oak, its well-kept lawns and gardens, its extensive collection of plants, shrubs and trees, and its broad fields and meadows around the farm buildings at the foot of Hancock Heights. Few places in the vicinity of Boston present so many and so varied attractions,—a surface so diversified by hill, valley and plain, such enormous masses of rock, grand old forests, a natural pond on the highest point of land and an unfailing brook winding along its southern border. Its late owner, Hon. Francis B. Hayes, laid out these extensive grounds with fine taste and adorned them with rare shrubs and trees. It is a place delightful to visit, especially when its thousands of rhododendrons are in bloom, and the air is fragrant with the choicest roses, azaleas and lilies of the garden and conservatory.

In the northern part of the town are many extensive and well-tilled farms. Among these we may notice the Bowman farm, now owned by Mr. F. O. Vaile; the Hammon Reed place, now owned by Mr. Stimpson; the Wetherbee farm, the John P. Reed farm and the Henry Simonds farm, all large and productive, with spacious dwellings, fine barns and out-buildings, and having the appearance of comfort and prosperity. In the western and southern portions of the town we notice the Berry farm, recently purchased by Mr. Hartley, who is adding extensive and costly improvements; the Cary farm, owned by Miss Alice B. Cary, and occupied by her mother, the late Maria Hastings Cary, many years as a summer home, and by her ancestors for many generations, one of the most valuable and beautiful of Lexington farms; the old Phinney place, now owned by Mr. Webster Smith, long the residence of the Phinney family; the Wellington farm, where, for a hundred and fifty years, the ancestors of Mr. Cornelius Wellington, the present owner, have lived—a place which, for beauty of location, fine lawn and garden, noble trees, well-tilled fields and broad views over a charming country, can hardly be excelled by any other in this portion of the county; the old Matthew Bridge farm, now owned by Mr. Goldthwaite, with its large extent of fertile meadows, probably the most productive farm in town, upon the improvement of which much

money has been expended by successive proprietors; and the Estabrook and Blodgett farm, now owned by Mr. Severns. Upon the main road, a mile south of the village, the farm and grounds of Mr. James S. Munroe deservedly attract much attention for their beauty and productiveness. The broad meadows, the natural groves of oak upon rounded knolls, the extensive lawn carefully kept, the hills bounding it upon the west, planted with many varieties of trees, make it a delightful place, and peculiarly dear to its owner as the home of several generations of his family. In the eastern quarter are the valuable farms of Mr. Haskell Reed, Charles Putnam and the late George Munroe, pleasant for situation and under careful tillage, while farther north, near the Burlington line, is the well-known Gibbs farm, recently bought by Mr. Moody and now undergoing extensive improvements. In the same neighborhood the Willard place bears evidence of skillful and profitable farming, with its well-managed dairy and its enormous brood of 2000 chickens. In addition to the large farms already mentioned are many smaller and hardly less valuable estates belonging to merchants and business men of Boston who have made here pleasant homes for their families. Among these are those of Colonel William A. Tower, near the east village, on a commanding height overlooking a wide sweep of wooded and cultivated land dotted with farm-houses and animated by peaceful scenes of country life; the new and spacious house of Mr. C. C. Goodwin, with its many acres of bright, velvety lawn skillfully graded and adorned with trees and shrubs; the stately mansions of Mr. Matthew H. Merriam and Mr. B. F. Brown, on Hancock Street, with extensive grounds showing the care of many years in fine orchards, gardens and noble trees; and the unique and beautiful house of Mr. George O. Whiting, occupying a pleasant site at the corner of Hancock and Adams Streets, and having a delightful view from the broad piazza and the spacious rooms over a vast extent of country backed by Wachusett, Monadnock and the Peterboro' hills in the western horizon. The home of Dr. R. M. Lawrence, on the southern slope of Loring Hill, half a mile southwest of the village, is a noteworthy place. On a broad avenue winding up from Waltham Street through the native forest, sheltered on the north by a heavy growth of oak and pine, amid huge masses of granite rock, and having a fine outlook to the southwest upon the hills and farms of Lincoln, it forms a picture of seclusion and comfort peculiarly attractive to a refined and cultivated mind. Many other pleasant homes might be named, for Lexington abounds in such, especially among those recently erected on Bloomfield and Oakland Streets; but enough has been written to show that the old town has fine farms, noble mansions, beautiful scenery and much to please and interest the traveler.

CHAPTER XLIV.

LEXINGTON—(Continued)

CIVIL HISTORY.

THE early history of Lexington is identified with that of Cambridge, of whose extensive territory it formed a part for nearly three-quarters of a century. The original purpose of the settlement of Cambridge in 1631 was to form there a fortified town for the defence of other settlements and for the capital of the Colony. For this purpose, it was laid out to contain only about a thousand acres, and was enclosed by a trench and a palisade of logs. This purpose, however, was soon abandoned in favor of Boston as a more eligible location. The limited territory of Cambridge, or "Newtowne," as it was called, was rapidly taken up by settlers, and complaint was soon made of the lack of room for further growth. The leading men of the place were uneasy and discontented in their straitened quarters, and began to consider the question of removal to a location more favorable for expansion. To allay this discontent, in 1635 the General Court granted to the proprietors of "Newtowne" all territory lying between Charlestown and Woburn on the east and Watertown on the west, extending eight miles from their meeting-house in a northerly direction. This grant includes the greater part of what is now Arlington and Lexington. The eight-mile line ran from east to west, between what is now Burlington and Weston. Its location is still pointed out across the meadows, just in the rear of the old burying-ground in Lexington, and many of the ancient deeds are bounded on it. Thus a large portion of the territory of this town became the property of Cambridge. But this extensive grant did not wholly allay the uneasiness, and in 1642 the General Court again extended the boundaries of the town to include all the territory as far as Concord and Merrimac Rivers not otherwise disposed of. In this way Cambridge obtained possession of the land lying between the grants to Watertown and Concord on the west and Charlestown and Woburn on the east, and extending from the Charles to the Merrimac Rivers, besides that portion of territory south of the Charles, now included in Brighton and Newton. Thus the whole length of her domain must have been at least thirty miles, with an average width of not more than four or five miles.

After this great accession was made to her territory, Cambridge began to parcel out the land among her wealthy and prominent people. Extensive tracts were granted to them, from time to time, on condition that they should clear the forest, erect houses and make permanent settlements thereon. Thus John Bridge obtained a grant of 600 acres, which he chose in different tracts where the land appeared best

fitted for farming purposes, and settled his four sons upon them. The Winships, the Whittemores, the Stones, the Bowmans, the Cutlers, the Fiskes and many more Cambridge families took up lands in this outlying territory, cleared away the forest and made farms for their children, while still retaining, probably, their homes in the village of Cambridge. Thus these new clearings and settlements were called "Cambridge Farms." The people living here were spoken of as "The Farmers." These names were applied to the district and to the people for a long period, not only in common speech, but in the official documents of the Colony. At what time the first settlements were made at the farms it is difficult to determine. We find that a grant of 600 acres was made to Richard Herlarkenden in 1635, at Vine Brook, in the Shawshine country. From the description given of it there is no doubt but this tract covered the greater part of the site of Lexington village. It lay on both sides of Vine Brook, midway between Cambridge and Concord. Richard Herlarkenden was living at that time in England, of which country he was probably a native. A brother, Roger, was a prominent and much respected citizen of Cambridge. The conditions of the grant were, that he should cause a clearing to be made and erect a house thereon, within a given time, and in the following season come over and occupy it himself. He failed to come, and the grant was transferred to his brother, who took possession of it and began the work which the terms of the grant required. But he died in 1637, and five years later, viz., in 1642, Herbert Pelham, the first treasurer of Harvard College, came into possession of it. At that time there was a house on the tract, and a considerable clearing had been made, as we learn from the records describing the property. As the settlement at Concord, six miles beyond, was begun in 1636, no doubt the road leading to that place from Cambridge had been laid out and was much traveled. This road was substantially that now represented by Main and Monument Streets, and not unlikely the Pelham house was opened as a place of public entertainment. Thus it is probable that the first house erected in Lexington village was built about 1640. It stood on the eastern side of the Concord road, and not far from the site of the old Buckman tavern, now known as the Merriam house. Herbert Pelham bequeathed this large estate to his son Edward, and it was retained by him until 1693, when he sold it in three different parcels, of 200 acres each, to Benj. Muzzey, Joseph Estabrook and John Poulter. Up to that time the Pelham house appears to have been the only one on the land now occupied by the central village. It was held as one great farm, and either cultivated or rented by the Pelhams. In ancient deeds it is spoken of as "Mr. Pelham's Manor," or "Mr. Pelham's farm." No doubt it was owing to the fact that the site of the village was held by a single wealthy family for more than half a century from the

first settlement, that there was no growth in the centre, while the outlying districts were steadily increasing in population. The Munroes had taken up their abode in the eastern part of the town and given the neighborhood the name "Scotland" (which it still retains), in honor of the land of their birth. The Winships, the Reeds, the Whittemores, the Bowmans, the Browns had settled in the southeastern quarter; the Wellingtons, the Smiths, the Hastingses, the Chandlers, the Stones, the Bridges in the southwestern; the Fiskes, the Reeds, the Tidds, the Simonds, the Cutlers in the northern, making altogether a population of nearly 200 persons within the bounds of Cambridge Farms, while in the centre district there was no more than a single family. But after the breaking up of "Mr. Pelham's Manor" new farms were laid out and new buildings erected.

As early as 1682 the farmers began to agitate the question of a separate parish organization. At this date they numbered no more than thirty families, with about 180 persons. Attendance on the Sunday worship at Cambridge was a great burden, involving a journey of from six to eight miles each way, over roads that were mere cart-paths cut through the woods. In the autumn and winter the long ride on horseback must have been a serious exposure, which only the strongest were able to endure. The farmers were naturally anxious to have the ministrations of religion brought within the reach of all, and especially to have their children reared under its restraining and elevating influence. But Cambridge resisted the granting of the petition, and it was defeated. Again, in 1684, their request was renewed, with a similar result. But seven years later, in December, 1691, after a third appeal to the General Court, they succeeded in obtaining an act of incorporation for the precinct of Cambridge Farms, with boundaries nearly identical with those of Lexington at the present time. In the April following (1692) the first meeting was held for parish organization, and from this date the records of the parish have been carefully kept and preserved.

THE PARISH OF CAMBRIDGE FARMS.—We enter now upon the history of Cambridge Farms while a parish of the original town, which it continued to be until 1713, a period of twenty-two years. The first business transacted by the new parish was to choose a minister and build a meeting-house. Benjamin Estabrook was employed to preach for one year from May 1, 1692, for forty pounds, of which twenty pounds was to be paid in money and twenty pounds in produce at money price. This arrangement was continued from year to year until October 21, 1696, when he was ordained and settled as the minister of the parish, and a church organization was formed. Thus for more than four years he preached here without ordination, and before he could administer the rites of baptism and the Lord's Supper. At his ordination Judge Samuel Sewell, of the old South Church

in Boston, was present with the pastor, Rev. Mr. Willard, as a delegate, and in his wonderful diary, which he kept for sixty years, we find the following entry regarding this event:

"Oct. 21st, 1696. A church is gathered at Cambridge North Farms, no relations made, but a covenant signed and voted by ten brethren, dismissed from the churches of Cambridge, Watertown, Woburn, Concord for the work. Being declared to be a church, they chose Mr. Benjamin Estabrook their pastor, who had made a good sermon from Jer. 3: 15. Mr. Estabrook, the father, managed this, having prayed excellently. Mr. Willard gave the charge; Mr. Fox the Right hand of Fellowship. Sung part of 11th psalm from the 9th verse to the end, O God, our Thoughts. Mr. Stone and Mr. Fiske thanked me for my assistance there. Cambridge was sent to, though had no teaching officer; they sent Elder Clark, Hastings, Remington."

Thus the church was duly established and a minister settled; but in the following year, July, 1697, Mr. Estabrook died, to the great disappointment and sorrow of the people, by whom he was universally esteemed. He was the son of Rev. Joseph Estabrook, minister of Concord, and a graduate of Harvard College in the class of 1690. In 1693 his father purchased of Edward Pelham 200 acres of land on the southeasterly side of Vine Brook, beginning at the county road (now Main Street), and extending far out towards the Scotland District. The parish erected a house for their pastor on that part of this purchase where Mr. William Plumer's house now stands. It is believed that some portion of the Estabrook house was incorporated with the present structure and remains to this day. This house was given him by the parish and much of the tract bought of Pelham remained in the Estabrook family for several generations. Captain Joseph Estabrook, the minister's brother, lived on that portion of it near the railroad crossing, and Estabrook Hill, just beyond, doubtless takes its name from the family.

The first tax-bill of the parish was made in 1692 for the payment of the minister's salary, and contains fifty-four names—probably, for the most part, names of heads of families. Of these seven have the name Stone, four Tidd, three Munroe, three Merriam, two Cutler, two Winship, two Smith, two Bridge and two Fiske. Of the twenty-seven different names, fifteen are represented in the town to-day by their descendants, or those bearing the same names.

THE FIRST MEETING-HOUSE.—The subscription for building the first meeting-house was made in 1691, and contains forty-one names with the amount of £62. Nothing is found upon the records showing the dimensions of this house or its appearance, excepting that it contained two galleries, one on either side. The body of the house was furnished with benches for seats, and divided by a central aisle; on one side were the men, on the other the women. Some of the more prominent men of the town were allowed to build seats for their wives in the rear of the benches and against the wall, and a seat was provided for the minister's wife; these appear to have been raised a step above the floor, but there is no mention of pews; Mistress William Reed, however, is allowed to have

"a sette" built for her use. Subsequently, in 1700, two upper galleries were added to the meeting-house to accommodate the increasing number of worshippers. In view of the fact that there were two tiers of galleries, one above the other, on each side, we may conclude that this house must have been of considerable height, whatever were its other dimensions. It stood at the junction of Bedford and Monument Streets, near the site of the stone watering-trough, and, with various repairs upon interior and exterior remained until it was torn down, to give place to a more imposing structure in 1713, twenty-two years after its erection.

REV. JOHN HANCOCK, THE SECOND MINISTER.—We enter now upon the long and prosperous pastorate of Rev. John Hancock, the second minister of the parish, the son of Deacon Nathaniel Hancock, "Cordwainer," of Cambridge. He was a graduate of Harvard in the class of 1689, and devoted a number of years to teaching the grammar school of his native town. During this time he prepared himself for the work of the ministry,⁸ and began preaching here November 7, 1697, four months after the death of Mr. Estabrook, but was not ordained and settled until the following year, November 2, 1698. He was to receive £80 as a settlement and the same salary as his predecessor, viz.: £45 for the first three years, with a quarterly collection in the church for his benefit, and afterwards £56 without the collection. This remained his salary for a long period, with the addition of twenty cords of wood delivered at his door annually from the ministerial land. The ministerial land had been purchased from the Cambridge proprietors in 1693 by a parish subscription, and embraced a large tract southwest of the village, lying on both sides of the Concord road. It partially included the lands now owned by Mr. George W. Robinson, Mr. M. K. Gilmore, Mr. William Ham, on the north side, and the tract known as the Blaisdell farm, on the south side, extending across the meadow up the northern slope of Loring Hill to the estate of Dr. R. M. Lawrence. The land was held by the parish for a long period. Some portions of it were cleared for pasture and meadow, and rented annually to different persons and the income used to defray parish expenses. The timber for the school-house and the belfry was taken from it and the wood to supply the minister; sometimes, also, the wood for the schools. From time to time large quantities of wood and timber were sold from it, and the proceeds put into a fund, the income of which was to be used for paying the minister's salary. Ultimately the whole tract was disposed of and the money received for it funded for this object. Such was the origin of the Ministerial Fund, which, for many years, was allowed to accumulate until the interest was adequate for the support of the minister. The fund has been carefully invested and managed down to the present day. For the last forty years the income has been divided between the three churches of the town

in existence when the original division was made, and by act of the Legislature no change can be made in the division without the unanimous consent of the people of these three churches.

THE INCORPORATION OF LEXINGTON.—At what time the agitation for a town organization began we are unable to determine. But in 1712 the inhabitants of the parish of Cambridge Farms petitioned the General Court for an act of incorporation as a town. Their petition was not opposed by Cambridge, and on March 20, 1713, the act was passed and the parish became a town under the name of Lexington, with boundaries corresponding to those of the parish. It was stipulated in the act that the new town should bear an equitable portion of the expense of keeping the Great Bridge in repair over the Charles River at Cambridge, a provision which caused endless trouble and bickering in subsequent years. So onerous did this obligation become that the town petitioned the General Court for a grant of unoccupied land to help them bear the burden, and accordingly, in 1734, a thousand acres was donated for this purpose in what is now the town of Ashburham. It was known as "the Bridge Farm," and rented for a small sum annually, until 1757, when it was sold for £225, the purchaser having twelve years in which to pay for it. Ultimately the town was relieved of the expense altogether, and the charge laid upon the county.

The name Lexington appears to have been adopted as a compliment to Lord Lexington, an English nobleman and diplomatist of some prominence at that time. From the most reliable statistics obtainable, the entire population, when Lexington was incorporated, did not exceed 150. There were few, if any, wealthy people among them, and the support of "a learned orthodox minister," added to the support of schools, and other town expenses, must have entailed a heavy burden of taxation from the start.

LEXINGTON COMMON, A NEW MEETING-HOUSE AND THE FIRST SCHOOL-HOUSE.—Before becoming a town, in 1711, the people of Cambridge Farms had purchased an acre and a half of land in the rear of the meeting-house for a Common. It was bought of "Nibour Muzzy" (Benjamin) for £16, raised by subscription. Subsequently, in 1722, an additional acre was bought to enlarge its area for £25, from Mr. Muzzy and his son John. These purchases comprise the triangular plat of land lying between Elm Avenue on the north, Hancock Street on the east, and Monument Street on the west, known and forever memorable as "Lexington Common." In the next month after obtaining the act of incorporation, at a town-meeting duly called, the town voted to build a new meeting-house. It was to be fifty feet in length, forty in width and twenty in height. Afterwards the height was increased to twenty-eight feet by vote of the town, on condition that individuals should bear the extra expense. It was planned and built accordingly, with three tiers of windows and two tiers

of galleries, but without a bell-tower or steeple, and cost, when finished, about £500. It was located near the first meeting-house, on the southern point of the Common, with the front door facing down Main Street, and with doors in each end toward Monument and Hancock Streets. No provision was made for warming it, and with three outside doors opening directly into the audience-room, it seems impossible that the people could have sat there on cushionless seats and uncarpeted floors in winter through two services of two hours each, without great suffering. The exterior of this building is familiar in the pictures of the battle of Lexington—a plain, barn-like structure, of the usual Puritan type of architecture in that period. The interior was arranged with a central aisle extending from the front door to the pulpit, and parallel side aisles connected by aisles in front and rear. Against the walls, on the four sides of the house, pews were built by individuals who bought the spaces for them from the town, and in the body of the house long benches, were placed, reaching from the central to the side aisles. On one hand were the men, on the other the women, while children were placed on the rear benches, "where they might be inspected." The permanent seating of the people on these benches was a difficult matter. It was assigned to a committee chosen by the town, who were instructed to have regard "for age, for property, and for but one head to a family." Thus, the old people were given the front seats, and the wealthy people were next behind them. That there might be no mistake in regard to age, the people were directed to bring in their ages to the committee by a given time. As to property, they were rated from the assessor's lists. When there was a re-seating of the meeting-house, the committee charged with this important duty was instructed "not to degrade any man, and only have regard to real estate." Of course, in the pews owned by individuals, there was no seating by the committee, the members of the family sitting together in such order as they pleased. But on the benches, which were for those who had no pews, the seats were assigned in this curious manner. In this house the first gallery was occupied, probably, by the poorer and humbler people, while the second gallery was set apart for the colored folks and also for the town's stock of powder. The bell was not placed upon the meeting-house, but upon some kind of a structure built for the purpose, and when it fell one day while being rung, a bell-tower was built against the eastern end of the school-house, and it was hung there. Such was the second meeting-house built in 1713-14. The town clerk has left this record: "Oct. 17, 1711, was the first Sabbath day we mette in the new meeting-house." With occasional repairs, it was used for Sunday worship and for town-meetings during a period of eighty years. Around it the British soldiers poured in the early morning of the 19th of April, 1775, when they formed just behind it and

fired the fatal volleys which drew the first blood of the Revolution. Here, after they had raised their brutal shout of triumph and marched on towards Concord, the bodies of the dead were brought and laid upon the floor, and here a touching service was held, when they were borne away and placed in a common grave in the village burying-ground. In the afternoon of that eventful day, when the retreating army had gained the protection of Earl Percy's cannon, a shot was fired which passed into the meeting-house just above the front door, and out through the pulpit window, lodging in the Common. But these thrilling associations did not avail to preserve the ancient structure from dilapidation and decay, and, after standing for more than three-fourths of a century, it was torn down in 1791, to give place to a more commodious and comfortable structure. Thus perished the second meeting-house, which had been the centre of so much of the town-life, and was associated with an event of world-wide renown.

This meeting-house had hardly been completed and opened for use, when the town voted, in November, 1711, "to erect a school-house." The building was a humble structure, "28 ft. in length by 20 ft. in width, and 8 or nine feet stud." It was placed upon the Common facing the Concord road, on a gentle knoll afterwards known as "school-house hill," where the old monument now stands. Subsequently a well was dug near it and provided with a curb and sweep, "for the use of the school and the town's people on Sabbath days to drink at." This house remained until 1761, after undergoing frequent repairs, when it was torn down and a still smaller one erected on the same site, which lasted until 1797, when it was sold and removed to give place to the monument. During this period of more than eighty years, here was the only school-house in the town. It was used for the grammar school, and also occasionally for town-meetings, especially when the weather was too cold for comfort in the meeting-house; sometimes, however, adjournment was made from the meeting-house to the Buckman tavern, where other means than fires were provided for warming up.

The first school established by the town was on the completion of the school-house in 1716, when Captain Joseph Estabrook was employed as teacher at a salary of £3 per month. He continued in the school for several years apparently for this compensation, but teaching at first only five months in the year. It was not, however, a free school, since each pupil was obliged "to pay two pence per week for reading and three pence per week for righting and siphering." Nor was it open to girls even at this charge. Apparently it was maintained solely for the education of boys during more than thirty years, since in 1747 we find a vote recorded admitting "girls" to the grammar school. The tuition was raised to "four pence" per week, with two feet of wood from each scholar to keep up the fire. In addition to the grammar school, how-

ever, female, or "dame schools," were established nearly at the same time in different parts of the town. These were kept in private houses, in rooms rented for the purpose, and were free to all. But those families living in remote districts complained that their children were deprived of the advantages afforded by the grammar school, and, to give universal satisfaction, it was decided to make it "a moving school." Accordingly a vote was taken annually to see if the town would have a moving school or a stationary school. Sometimes it is called "a running school," and is kept a month in each of the five quarters of the town, going around twice during the year. At other times it remains two months in each locality and goes round but once. This policy of determining, year by year, whether the grammar school should be maintained at the central village, or migrate from one part of the town to another, seems to have been continued till near the beginning of this century, when school-houses were built in the outskirts and permanent schools established in each district.

Among the teachers employed here for longer or shorter periods were several collegians from Harvard, who thus earned in part the means of paying their college expenses. And others, after graduation, came here to prepare for the ministry under the direction of the pastor of the church, and, in addition to their theological studies, taught the grammar school. Some names of young men so employed are found upon our records who afterwards became distinguished preachers, scholars and theologians. Among these may be mentioned Jonathan Bowman, Abiel Abbot, Peter Whitney, John Pipon, Pitt Clark, Benjamin Green and many others. For two years or more Rev. John Hancock, sometimes called "Sir Hancock" on the records, was the teacher and fitted young men for college in the Lexington Grammar School. In 1729 his son, Ebenezer, took charge of the school, and in 1734 was ordained as colleague pastor with his father, but continued to be teacher for some time afterwards. Occasionally the grammar school was discontinued, no appropriation being made for its support, and in two instances the town was presented to the General Court for not complying with the law in failing to maintain it. But the "dame schools" in the different quarters of the town appear to have been steadily kept up. Considering how small the population was at this time, and how little wealth the people possessed, and also that during a portion of the time the salaries of two ministers had to be provided for, the support of the schools must have added materially to their burdens and shows a creditable interest in the education of their children. Some of the votes passed regarding the school are curious and worthy of notice. Thus, in 1742, it was voted to take up "a contribution for the school-master by reason of his giving so unusually dear for his board." This was largely due to the depreciation of the currency. The school was to be dismissed on all public occasions, and if the time

was not made up, so much was to be taken out of the teacher's salary. Rev. Timothy Harrington teaches the school in 1718, and in his contract with the town it is specified that "lecture days, half a day at funerals, at raisings, at ordinations in the neighborhood and training days to be respected as holidays." "Agreed with John Muzzy to board the school-master for £1 15s. per week and with Deacon Stone to find him in candles at 5d. per pound." In 1750 Rev. Mr. Hancock's salary is fixed at £55 lawful money, instead of £416, old tenor, showing a depreciation of almost 8 for 1. In 1751 Nathan Robbins teaches the school, and is allowed "half a day a week to preach anywhere."

But let us turn from the schools to notice the action of the town regarding other matters. All persons were required to attend the Sabbath worship unless excused for good and sufficient reasons. In 1720, when Will Chamberlain was complained of for non-attendance, he made the plea that he had no suitable clothes. Whereupon the selectmen ordered that he be furnished with a full suit "forthwith," and the bill for each article appears accordingly upon the records, amounting to about £2. But Will appears to have still continued remiss in church attendance, and finally he is taken before a justice at Cambridge and convicted of violating the law regarding this matter, reprimanded and ordered to conduct himself in future as became a citizen of a Christian state. Then follow the charges for transporting the obdurate offender to and from the court, and for boarding him while awaiting his trial. Whether poor Will was finally brought under the ministrations of religion or not, we are unable to determine. Ultimately he became a public charge, and in 1735 was gathered to his fathers, as we learn from a bill of "16s. 9d. for drink at Chamberlain's funeral." This is the only instance of legal coercion to bring people to church found upon our records. The experiment was costly and not encouraging. But it is by no means the only instance of a charge for "entertainment" furnished at the funerals of paupers for the selectmen and others. Thus, in 1728, it required "seven quarts and one gill of rum" to celebrate the obsequies at the funeral of a Mrs. Paul. Two years later "12s. is allowed Mr. Muzzy for rum for father Paul, and at his funeral." And again, in 1747, the selectmen expend "£1 for drink at old Johnson's funeral." On all occasions where the town was a party, such as letting jobs of work, or selling public property, or raising public buildings, liquor was provided for the people at the public charge. Thus, when "the old Cushing" of the meeting-house pulpit and "the glass-iron" were sold at auction 10s. were used to treat the people and stimulate the bidding. At the funeral of widow Mead's child "6 prs. of gloves and some rum and sugar" are provided. Also, in 1767, paid "3s. 10d. for liquor used at the renting of the town's land." And when "our Reverend and Beloved pastor" (Rev.

John Hancock) died, £200 O. T. was voted for the funeral. The charges amounted to £219, including six rings for the hearers, 500 bricks for the grave, gloves and weeds for relatives and friends, and a generous amount of eating and drinking at the taverns. The selectmen seldom met for the transaction of business without some "entertainment" being provided for them, the cost of which, during the year, amounted to several pounds.

One of the old customs which demands notice, but which has happily long since disappeared, was that of warning people to leave the town who might become a public charge or who were objectionable for other reasons. After being officially notified to leave, they were compelled to go, or subjected to imprisonment. Many instances of this kind are found upon our records, some of which are very curious. Thus, in 1723, 1s. 6d. is paid "for running Daniel Ruff out of town." In 1724 four persons are warned to leave at the same time, one of which bears the honored name of John Parker, "who came from Billerica last year." In 1738 all "the Irish" are to be warned out of town," consisting of five families. It would not be easy at this time to enforce such a resolve, even if it could be carried in town-meeting, since that nationality now forms, probably, one-fourth of the whole population. People warned out, however, were permitted to remain if able to give bonds securing the town against liability for their support. Probably the warning was not always enforced and was often given only as a precautionary measure. To this circumstance may be due the fact that the Lexington minute-men were provided with a brave captain on the 19th of April, 1775, and that the town furnished Massachusetts, in the following century, with an excellent and popular Governor, since it is said that the ancestors of both were once warned out lest they might become a public charge.

Stocks were built on the Common, near the meeting-house, in 1713, as a terror to Sabbath-breakers, profane swearers and other evil-doers. Nor need we suppose that they remained without occupants, from time to time, as another pair appears to have been demanded for the preservation of order, and duly added a few years afterwards.

The care of the boys, especially on Sabbath days, seems to have received much attention. Thus it was voted that "the two hind seats in the lower gallery, front and side, are appointed for the boys under sixteen years to sitt in on Sabbath days, and a tything man to sitt near them each Sabbath, and to take turns; and if any above sixteen be disorderly, they shall be ordered into said seats." "That the tything men be desired to attend Sabbath noons to keep the boys in order in the meeting-house." And that "if they find any playing on the Lord's day, they shall inform their parents, and if they play afterwards, call their names" in meeting. In 1741 six men are chosen to inspect the children at intermission on

Sabbath day; and subsequently, "two elderly men to tarry in the meeting-house on the Sabbath in the intermission season, one below and one above, to see that there be no disorder there." And in 1757 a committee is chosen by the town "to draw up a paper to regulate the people coming down-stairs after service from the galleries and give it to the minister to read, and that they should put something in the paper to regulate the people Sabbath-day noons." In 1734 it was voted that "no writing of a worldly or secular concernment be set up, or allowed on the meeting-house on Sabbath day for time to come." The tythingmen were provided with long poles with which to thump the heads of disorderly boys or impious sleepers; nor is it surprising that there should have been such in the Lexington meeting-house, when we are told that the minister once prayed for an hour, and that his sermons sometimes extended to two hours! It is no wonder, therefore, that when Governor Hancock presented the church with a Bible on condition that it be read in the service (it had not been read up to that time as a part of the service), one of the deacons arose and said that if it was to increase the length of the service, he apprehended the people would not want it. Parson Clarke, however, promised that it should not, and so from that time, 1793, the Bible was read in the Sunday worship.

As already stated, the first and the second meeting-houses had no bell-tower or steeple. But "a Turriott" was built for the bell, probably a belfry standing by itself on the Common. This, however, fell down in 1733, and a new one was built against the east end of the school-house, where the bell was afterward hung. A bell appears to have been given the parish by the town of Cambridge when the first meeting-house was built, and was in use until 1761. At a town-meeting in June of that year, Isaac Stone presented the town with a new bell, which was "to be for the town's use forever." He received the thanks of the town, through the moderator, for the generous gift, and it was immediately voted to build a new belfry, on what is known as Belfry Hill, and hang it there. Accordingly it was erected, probably on the highest point of land, an elevation of thirty or forty feet above the Common, and as many rods from the meeting-house. But it was not long permitted to remain there and send out its summons to the Sabbath worship. The hill belonged to Mr. John Munroe, and he demanded rent from the town for the eighteen feet square of rock on which it stood. This the town stubbornly refused to pay, and so, after two years of bickering, the structure was moved down the hill and left on the west side of the Concord road. But this location awakened bitter opposition, and the belfry was secretly moved across the road to the Common, where, after a spirited town-meeting to decide where it should stand, it was finally located near the meeting-house by a committee appointed for the purpose. This bell weighed 163 pounds, as we are

told by the records. Of course, it was a small affair, compared with those now used, weighing five or six times as much; probably its note was sharp and shrill, but it was the bell that rung out the first notes of American Independence, summoning the minutemen to the Common, to resist the invaders, on the 19th of April, 1775. Were it in our possession to-day, Lexington would hardly part with it for its weight in gold. What became of it no man knoweth. The tongue was found many years since in a blacksmith shop, and is now in Cary library; but the bell itself is probably gone past recovery. How little the fathers valued objects so intimately associated with the birth of the nation, but which their descendants to-day regard with the deepest interest! The old bell is indeed lost; but the old belfry in which it hung remains with us to this day. It was bought by John Parker, after the church of 1793 was built, and removed to the Parker homestead, in the southwestern part of the town, where it did duty for a long period as a carpenter-shop, and where it still stands. The bell given to the parish by Cambridge was retained by the town long after that given by Isaac Stone had been hung in the new belfry. It was finally sold, in May, 1775, for six pounds, probably to provide means for buying powder and ball to put the town in a proper state of defence. The bell that rung out the alarm on the 19th of April, with mended tongue, did duty for forty years in the belfry, when it gave place, in 1801, to a new one, weighing 800 pounds, and costing \$333.33. But there were some extra charges for hanging it, as we learn from the selectmen's accounts, of \$9.86, allowed "Rufus Merriam for nine meals of victuals, 27½ mugs of toddy and ten mugs of punch supplied the committee when raising the bell." And immediately following, "ten mugs of toddy when letting the poor and the bell," besides "\$1.41 for sundries supplied the selectmen by Dudley when Champney was married." The "letting the poor and the bell" refers, no doubt, to the custom of putting the keeping of the poor, and the ringing of the bell for the year, up at public auction, when they were struck off to the lowest bidder. Punch and toddy were supplied to bring people together, and in the excitement following their use obtain the best possible bids for the town. Why the selectmen should have treated "when Champney was married" it is difficult to understand. But while great shrewdness was shown in managing the auction to the town's advantage, what shall we say of the charge for "one gallon of brandy and one pound of loaf sugar delivered to the selectmen and used at Mrs. Fessenden's funeral!" Surely, municipal junketing is not a modern invention. It prevailed in Lexington a century ago, though, happily, the custom here long since disappeared.

The ministry of Rev. John Hancock extended from 1697 to 1752, a period of fifty-five years. Soon after his settlement, in 1698, he bought of Benjamin Muzzy

a tract of land of twenty-five acres lying on both sides of the road leading to Bedford. It extended from the Common, northerly on what is now Hancock Street, to the land of David and Joseph Tidd, and was bounded westerly on the eight mile line. Here he built an humble cottage of four or five rooms, probably in 1699, to which he soon brought his wife Elizabeth, daughter of Rev. Thomas Clark, of Chelmsford. And here their five children,—John, Thomas, Ebenezer, Elizabeth and Lucy,—were born and grew up to manhood and womanhood. The eldest, John, graduated at Harvard and became minister of Braintree (now Quincy), where his son, John, President of the Continental Congress and the first Governor of Massachusetts, was born. Ebenezer also graduated at Harvard and became the colleague of his father over the Lexington Church, dying here in 1740, after a brief ministry of six years. Thomas was apprenticed to a bookbinder in Boston, where he became a prosperous merchant and ship-owner, accumulating a large property and attaining political distinction. He bought the Beacon Hill estate and erected the famous Hancock mansion there in 1734. Having no children of his own, he adopted his nephew, John, and at his death left him heir to the principal part of his vast estate. No doubt the possession of this wealth did much to give young John Hancock the great prominence which he had in the events of the Revolution and the subsequent history of the State. The daughters of the second minister, Elizabeth and Lucy, married clergymen,—the former, Jonathan Bowman, minister of Dorchester, and the latter, Nicholas Bowes, the first minister of Bedford. Thus, in the one-story, gambrel-roof house of Rev. John Hancock, the second minister of Lexington, which was twenty-four feet in length by eighteen in width, were born five children who lived to exert a great influence upon the future of the State and Nation. Mr. Hancock's salary appears never to have exceeded £60 a year; but on this small income, with the products of the farm, he managed to support his large family respectably and give his children an education that fitted them for positions of usefulness. There are evidences, however, that it was a hard struggle to make both ends meet in the humble parsonage. Mr. Hancock repeatedly asked for an increase of salary, but it was uniformly voted down in town-meeting, though in a few instances something was added to make up the depreciation in the currency. But the people were not unmindful of their pastor's faithful labors, and in 1728 they "voted £85 to purchase a servant for Mr. Hancock," no doubt to relieve him from the hard work of the farm after his boys had grown to manhood and enable him to live in a style more becoming the dignity of so worthy a family. Evidently he was a man of great influence in the town and in the neighboring churches. A rigid disciplinarian, ruling with an authority that was seldom questioned, and preaching the terrors of the law not less than the mercies of the Gos-

pel. An unquestioning believer in the rigid doctrines and observances of the Puritan churches, he brought the great majority of his people up to the same standard in the discharge of their religious duties. In the long record of his ministry he has preserved their confessions of evil doing "made in open meeting," insisting upon them as an indispensable requisite "to the enjoyment of gospel privileges" both for themselves and their children. There could be no admission to the Lord's table and no baptism of their children until their impurity, dishonesty and intemperance had been confessed before the congregation and the forgiveness of God implored. A large number of these confessions are found in the church records. They show how absolute the minister's authority must have been, or how dull were the sensibilities of the people, that he could draw out such revelations in open meeting and make them a matter of public record. For more than half a century he held this stern rule over the town, and there is no evidence that it was ever seriously opposed. He labored faithfully to the last for what he believed to be the interests of true religion and the salvation of the people. A strong, stern, wise and good man, who served God according to the best of his knowledge and ability, and through his descendants has been the means of largely moulding and guiding the affairs of the State and Nation.

But let us return to the story of the Hancock house. It remains in substantially the same condition to-day as when built nearly two hundred years ago, and its subsequent history is most interesting. After Thomas Hancock had become a rich and prosperous merchant in Boston, he built an addition to the humble cottage, in which he was born, for the greater comfort of his father and mother in their old age. This was two stories in height and contained four large, pleasant rooms. In the declining years of his parents, he seems to have taken their support into his own hands and pieced out the meagre salary by adding whatever they needed in food, clothing and money to maintain a style of living befitting so noted a family. The whole estate was conveyed to him and he advanced whatever things were required for their comfort and a generous hospitality. Here they passed their remaining days, "Sir Hancock" dying in 1752, and Madame Hancock in 1760. The old minister was succeeded, in 1755, by a young man destined to hold the pastorate almost as long and to attain an influence in the town and State far more decided and enduring. Jonas Clarke was a native of Newton, and graduated at Harvard in 1752. After completing his studies he was ordained over the church in Lexington, November 5, 1755, where he remained until his death, in November, 1805, in the active service of the ministry. The town agreed to pay him a salary of £80 a year, furnish him with 20 cords of wood, delivered at his door, annually, and £130 as a settlement. In 1757 he married Lucy,

daughter of Rev. Nicholas Bowes, of Bedford, and granddaughter of his predecessor, Rev. John Hancock. They began their married life in the old parsonage with Madam Hancock, and after her death in 1760, Mr. Clarke bought the estate of Thomas, her son. Here their twelve children, six sons and six daughters, were born and grew up to manhood and womanhood. Here the parents lived until their death, and two unmarried daughters until their decease in 1843. Thus, for nearly a century, the house was occupied by the Clarke family, and, for half a century before them, by the Hancock family. It was a prolific hive of ministers, no less than twenty-five having been born there, or descended from those who were, or were in some way connected with it. Four of Mr. Clarke's daughters married clergymen—one, Dr. Henry Ware Hollis, Professor of Divinity at Harvard; another Dr. William Harris, president of Columbia College; another, Dr. Thaddeus Fiske, of West Cambridge, and another, the Rev. Benjamin Green, of West Medway; from these have descended some of the most distinguished men in the various professions, in literature, in teaching, and in scientific pursuits which our country has produced.

Jonas Clarke was an ardent patriot, and took an active part in the measures of resistance to British aggression adopted by the town. In the old parsonage of his grandfather, occupied by Mr. Clarke, young John Hancock had passed much of his boyhood after the death of his father, the honored minister of Braintree. Mrs. Clarke being his cousin, it naturally followed that he often visited there and became intimate with the family. Samuel Adams, the leader of the patriot cause in Massachusetts, was an intimate friend of Hancock's and often accompanied him on his visits to Lexington. Thus it happened that the parsonage became the rallying-point of many prominent patriots in this vicinity. Here they gathered for consultation, and here many of their plans were formed and important letters and papers written. We have glimpses of these matters in the manuscript diaries of Mr. Clarke, of which he left five volumes, each covering about ten years of his ministry. Two of these have been lost, but the remaining volumes are still in existence, carefully preserved by his grandson, Dr. Henry Clarke, of Boston. They contain brief entries for each day in the year, kept on interleaved almanacs, and covering the period from 1755 to 1805, and containing notices of the weather, of his visitors, of what he was doing and of important occurrences in the town and in the country. They contain a vast amount of information regarding the customs and occupations of the people, and especially of what transpired from day to day in the parsonage. It was the home of a wide and generous hospitality. The most cultivated people of New England, college presidents and professors, statesmen, politicians and ministers, found genial companion-

ship at Mr. Clarke's fireside. Here came John Hancock and Samuel Adams from Concord, after the adjournment of the Second Provincial Congress, which had been in session there. And here they were sleeping when aroused by Paul Revere at an early hour on the morning of the ever-memorable 19th of April, 1775, with the intelligence that a battalion of British soldiers were marching for Lexington to arrest them. From the windows of the house Mr. Clarke witnessed the encounter of the soldiers with the minute-men on the Common, where six of his parishioners fell before the murderous fire of the British, and the first blood of the Revolution was shed. These are some of the associations connected with this venerable house which endear it to all patriotic hearts. It remains substantially as it was a hundred and fifty years ago, a most interesting memorial of the characters and events belonging to the birth of a mighty nation. Long may it be spared to repeat its story of noble devotion to freedom and the most sacred interests of man!

Mr. Clarke was regarded by his people with great respect and affection. He was looked up to as their leader, not only in spiritual matters, but in political and municipal affairs. He served frequently on town committees and drew up important papers relating to the pending difficulties with the mother country, and giving instructions to the town's representative in the General Court. He was among the foremost advocates of resistance to the oppressive measures of the British Government, and inspired a lofty enthusiasm in his parishioners. When convinced that there was no hope of obtaining justice from Parliament or the crown, he was outspoken and firm in advocating national independence. With such a leader, strong, bold, enthusiastic in devotion to freedom, it is no wonder that the people of Lexington were resolute and unflinching in their opposition to the encroachments of tyranny, and that here was offered the first sacrifice on the altar of American liberty.

Mr. Clarke cultivated his farm by the help of his sons, and drew from it a considerable portion of the support of his large family. He was a diligent worker, both in the fields and in his study. Rev. William Ware, his grandson, states that during his ministry of fifty years, he wrote 2200 sermons, and we may be sure that they were not brief ones; an hour or an hour and a half in length was not unusual. Two of these discourses, with prayers and songs of similar proportions, occupied four or five hours of the Sabbath. Laboring on the farm, catechising the children of the schools, making long journeys to ordain young men in the ministry who had grown up under his guidance, writing elaborate arguments for the right of the people to self-government, collecting food and fuel for "their distressed brethren in Boston," working on the fortifications in the harbor with his parishioners, sending off reinforcements to the army from the young men of the town after exhortation

and prayer in the church, serving as a delegate in the convention which formed the Constitution of the State, and preparing two sermons a week for the edification of his people—such was the busy life of this noble man through his long pastorate. When his life closed, in November, 1805, his ministry and that of his predecessor had covered a hundred and five years of the history of the town and church, a period reaching from the accession of Queen Anne to the English throne to the presidency of Thomas Jefferson over the United States.

CHAPTER XLV.

LEXINGTON—(Continued).

MILITARY HISTORY.

THE military spirit in Lexington was strikingly manifest in all the Colonial wars, though the early history is so interwoven with that of Cambridge as to make it difficult to separate one from the other. We find, however, that men from Cambridge Farms were engaged in the Indian Wars at the close of the seventeenth and beginning of the eighteenth centuries, and also in those fierce and bloody conflicts between France and England for supremacy on the American continent. In the capture of Louisburg, in 1745, that great victory in which Massachusetts troops bore so honorable a part, the men of Lexington were represented. And during the desperate struggle extending from 1755 to 1763, Lexington had its full quota continually in the service. Thirty-two men, in 1757, marched to the relief of Fort William Henry, a number fully equal to one-third of all the able-bodied men of the town. And in 1756 and 1759, the number from Lexington in the field was nearly as large. Among the names most prominent on the rolls are the Munroes, the Merriams, the Blodgetts and the Bridges, all of whom were found on the battle-fields of this terrible war. These war worn veterans were first and foremost in organizing and training the minute-men of the Revolution. The hard discipline of that long struggle gave us officers and men of intrepidity and skill in the conflict with the best troops of Great Britain. The firmness and heroism with which Captain Parker's little company faced the regulars on Lexington Common was due largely to the men in his ranks who had seen service in the campaigns of the French and Indian War. At the close of this war, the whole population probably did not exceed 600, and yet Lexington furnished nearly one hundred men for the service whose names are given upon the rolls, and among these were fourteen Munroes.

LEXINGTON IN THE WAR OF THE REVOLUTION.

—In the events preceding the opening of the conflict the town was prompt and decided in its action. The Stamp Act was passed and sent over in the summer of 1765. Its execution met with strenuous opposition wherever attempted. Those who offered the stamps for sale did so at the peril of their lives. A town-meeting was called, and a strong protest against the measure was drawn up and passed unanimously. It was an invasion of their rights as free-born Englishmen to tax them without their consent and without representation in Parliament. Two years later the town voted to concur with the non-importation act of Boston, and declared that those who persisted in using British goods should be regarded as public enemies and treated accordingly. When the cargo of tea, sent over by the East India Company, arrived it was resolved "not to use any tea or snuff, nor keep them, nor suffer them to be used in our families till the duties are taken off." In January, 1773, a Committee of Correspondence was chosen to keep the town informed of what other towns were doing, and of measures proposed for the public safety. In response to the action of Boston they wrote, "We trust in God that we shall be ready to sacrifice our estates and everything dear in life, yea, and life itself, in support of the Common Cause." Nor was their confidence in the patriotism of their fellow-citizens misplaced. In the hour of trial it proved to be all that they had promised. The first convention to organize resistance to British oppression assembled at Concord August 30, 1774. It was composed of delegates from all the towns of Middlesex County, who solemnly pledged themselves to lay down their lives, if need be, "in support of the laws and liberties of their country." Such was the spirit animating the people when the great struggle was coming on, and which impelled them to offer themselves and all that they possessed on the altar of American independence. In their instructions to their representative in the General Court (Deacon Stone), the town requires him to use his utmost influence that nothing be done there under the council appointed by the Governor or "in conformity with the late acts of parliament." At meetings held in November and December, 1774, the town voted "to provide a suitable quantity of flints, to bring up two pieces of cannon from Watertown and mount them, and provide bayonets for the training soldiers and a pair of drums." Thus Lexington was preparing for the appeal to arms in support of the people's rights. The resolutions passed in town-meeting were backed by bayonets and cannon and men trained to use them.

In the first Provincial Congress, which met after adjournment at Concord October 11, 1774, it was determined that companies of minute men should be organized and drilled for action. Lexington was one of the first towns to respond to this order. A company, numbering 120, was immediately enrolled, which included all the able-bodied men of the town.

John Parker, then forty-six years of age, who, it is believed, had seen service in the French and Indian war, was chosen captain. And for five months before the beginning of hostilities he was diligently drilling his men and preparing them to render efficient service. Not less than twenty-five or thirty were war-worn veterans, who gave steadiness and confidence to the others. Affairs were now rapidly drifting towards a collision with the British Government. The people were thoroughly aroused to the dangers besetting their liberties, and determined to resist further aggressions to the bitter end.

Such was the state of affairs at the adjournment of the second Provincial Congress, April 15, 1775. John Hancock, the president, and Samuel Adams, delegates from Boston, returned from the session to Lexington, and remained for a few days at the old parsonage with the family of Rev. Mr. Clarke. It was no longer safe for them to stay in Boston. An order had been sent to General Gage to have them arrested and brought to England for trial, and a second order directing that they should be arrested and hung in Boston, to strike terror to the hearts of Massachusetts rebels. On the afternoon of the 18th came rumors that some movement was about being made by General Gage into the country, and it was naturally supposed that the object must be the arrest of Hancock and Adams and the destruction of the public stores at Concord. A number of British officers had been seen riding through the town, as it was surmised, to reconnoitre the country and prepare the way for the expedition. People were everywhere on the alert, eagerly watching and listening for tokens of the intended movement. For the protection of the distinguished visitors at the parsonage, a guard of eight men, under Sergeant William Munroe, of Captain Parker's company, was placed around the house. This was early in the evening. Many of the minute-men were in the village waiting for news at the taverns and eagerly discussing these reports. In the meantime the lantern had been hung out from the steeple of the Old North Church, and Paul Revere was riding furiously towards Lexington with the intelligence that the regulars were surely on the march. He reached the old parsonage soon after midnight, but was denied entrance by Sergeant Munroe. Hancock, recognizing his voice, threw up the window and bade him come in. The news brought by Revere caused an immediate alarm to be rung from the belfry on the Common calling out Captain Parker's company. Men were sent down the road towards Boston to learn whether the red-coats were really coming, and Hancock and Adams were piloted by Sergeant Munroe to the house of James Reed, in Woburn, about two miles distant; while Revere rode on towards Concord to give the alarm there and secure the stores from destruction. The minute-men assembled on the ringing of the bell, many coming from their homes from one to three miles away. But, after

forming on the Common, the report came back that it was a false alarm, as nothing could be seen of the British. Accordingly, after waiting for some time, Captain Parker dismissed his men, as the night was cool, but bade them remain within sound of the bell, to respond to a second alarm, should the report of the British march prove true. This was about half-past two in the morning. The men remained in the vicinity of the Common, sheltered in the taverns or in the homes of their friends. Two hours passed quickly away, and at half-past four the sharp notes of the bell were again heard calling them together. There was not a moment to be lost. The regulars were not half a mile away. Sergeant Munroe had just returned from his trip to Woburn to conceal Hancock and Adams, and he quickly formed the company on the Common, the right resting on Bedford Road, and the line extending towards the Concord Road. Here were drawn up about seventy men, somewhere from six to ten rods in the rear of the meeting-house. They had on their ordinary clothes, worn in the work of the farm, of different colors and patterns, and their arms were the old fowling pieces used for generations in hunting the game of the woods. What was their purpose in forming there in battle array? They knew that a battalion of thoroughly disciplined and equipped soldiers, numbering not less than 600 men, were marching towards them. Could they, for a moment, think of resisting the King's troops, under the command of the King's officers, executing the purpose of the royal governor? How foolhardy such an idea must have seemed to thoughtful men. Probably they felt that the time had come to defend their homes and their rights. They were to make good in brave deeds the resolves of the town-meeting and the counsels of their beloved pastor. It was vain to expect to stop the advance of this well-disciplined force with a mere handful of yeomanry; but they would stand up for the cause in which they believed, and die, if need be, to save their homes from pillage, and protect their wives and children. "Stand your ground; don't fire unless fired upon," were the words of their brave captain. "But if they mean to have a war, let it begin here." Calm, firm, resolute was the spirit of the little band drawn up there in the early morning to receive the shock of battle.

The British, hearing the drum and alarm bell when a quarter of a mile from the Common, came rushing on under the lead of Major Pitcairn, riding a little in advance. They formed just behind the meeting-house, ten rods in front of the minute-men. In rough words Pitcairn commanded them to disperse. "Lay down your arms and disperse, ye rebels," which, being unheeded, he drew his pistol and fired, at the same time commanding his men to fire. The first shot harmed no one, and, the minute men still standing their ground, the command was repeated. The second shot brought six brave men to the ground, killed or mortally wounded. Several shots were re-

turned before the command was given to retreat and others were fired from behind stone walls and from the door of the Buckman tavern. One wounded man, Jonas Parker, was despatched by a British bayonet while attempting to reload his gun, and one was killed after leaving the Common. It was an unprovoked attack, and it opened a breach which could never be healed.

In his report to General Gage, Pitcairn asserts that he was wantonly fired upon before giving the command to his troops, and that one of his men was wounded. But this was certainly a mistake. Each party was anxious to lay the responsibility of the first firing upon the other; so great was this desire on the part of some of the minute-men that they even testified there was no firing whatever by Captain Parker's men. In the excitement of the moment it is not surprising that very different impressions should have been made upon different minds. But that Pitcairn fired himself and commanded his men to fire before a shot from the minute men, and that the British fire was returned before Parker's men left the Common, we have the positive testimony of many witnesses. The assertion that "no forcible resistance" was offered to the British until they reached Concord has no valid foundation. Pitcairn asserts that such resistance *was* made here, and those who made it have sworn to the fact.

After raising a brutal shout of triumph and firing a volley over the fallen patriots, the British marched on for Concord, where they arrived about nine o'clock in the morning. Captain Parker soon gathered his men together and followed in pursuit to the borders of Lincoln. During the British retreat in the afternoon, they joined the minute-men of other towns and rendered good service in driving the flying foe back to Boston.

In the western part of the town, a mile and a half from the Common, on a steep hill well fitted for the purpose, the British officers attempted to rally their men and make a stand against their pursuers. A sharp fight ensued, in which they were driven in great disorder from the position to Fiske Hill, a higher elevation nearer the village. Here the fight was renewed, with the same result, Major Pitcairn being dismounted in the conflict and his horse, with all his accoutrements, captured. His elegant pistols, one of which he fired when the command was given in the morning on the Common, thus fell into the hands of the minute men. Subsequently they were given to General Putnam and worn by him during the war; recently they have been donated to the town by his great-grandniece, and are now preserved among the precious mementos of this day in the public library.

After the brief struggle on Fiske Hill, no further effort was made to stay the retreat until the disorderly and flying foe had reached the protection of Earl Percy's reinforcements, half a mile below the Common, on the road to Boston. The proud and tri-

umphant battalion that raised the shout of victory on the Common in the morning were driven past that spot in the afternoon in a confused mass, their ranks sadly thinned and their spirits broken by six miles of a retreating fight.

Among the incidents of the day in Lexington was the encounter of young Hayward, of Acton, with a British soldier at a house near Fiske Hill, a mile west of the Common. On the retreat the soldier had entered the house for plunder and been left behind by his comrades. Hayward, following in the pursuit, stopped at the well in the yard to drink, just as the soldier came out of the door; raising his gun, the soldier said: "You are a dead man." "So are you," Hayward replied. Both fired at the same instant, and both fell, the soldier killed and Hayward mortally wounded.

When the retreating host gained the covert of Percy's succoring army they were utterly exhausted. The day was warm and they had been marching since ten o'clock of the night before, almost without halting, and without food, save what they had stolen from the houses along the road. It was now one o'clock in the afternoon. They had been on the road at least sixteen hours, and marched not less than twenty-five or thirty miles, a portion of the way fighting and running as they went. Their provision-train, sent out from Boston in the morning, had been captured at West Cambridge. It is evident that, with the minute-men pouring in upon the line of their retreat from a dozen different towns and assailing them at every point, their capture or total destruction was inevitable. A few hours more would surely have completed the work and seen the end of this proud battalion sent to strike terror into the hearts of the Middlesex patriots. Percy's reinforcements saved the expedition from overwhelming disaster. Planting his two field pieces on heights commanding the village and covering the line of retreat, while he threw out columns to enclose the exhausted men of Colonel Smith's command, he was able to avert the great disaster. At the old Munroe tavern he established himself for two or three hours, while the wounded were cared for and the men rested and helped themselves to such food and plunder as they could find in the neighboring houses. Much wanton destruction of property took place in that vicinity. Several buildings were burned and such valuables stolen as could be easily carried away. Cattle were killed, and one inoffensive old man who had mixed their drinks at the tavern bar was shot while attempting to escape from the house. Some of their wounded were left in houses along the way to be cared for by the people whom they had so cruelly wronged.

After a rest of two hours the British march was resumed, the minute-men still pursuing the retreating foe and taking advantage of every favorable point to annoy and distress them. A running fight continued all the way to Charlestown where the beaten army

found protection and safety under the guns of the British ships. Thus ended this memorable day, the opening scene of the war. Capt. Parker's company lost ten killed and nine wounded, more than one-fifth of their number, and the loss to the town in the destruction of property was estimated at £1761.

At the gathering of troops in Cambridge to shut the British army up in Boston, Capt. Parker was on duty with his minute-men, and also on the 17th and 18th of June, during and after the battle of Bunker Hill, when an attack was momentarily expected on that place. Capt. John Parker was an ardent patriot and a brave soldier. Had he lived, no doubt he would have taken a prominent part in leading our armies. But he was in feeble health at the time of the Lexington battle, and the excitement and responsibility of that day hastened his decline. In September following he passed away, in the prime of his years, sincerely mourned by his fellow-soldiers and townsmen. His grave was made in the old cemetery of the village near the spot where his fallen heroes were laid, but not until more than a century had passed away was a memorial erected to mark the spot. In 1884 the town caused an appropriate and substantial monument to be placed there "in grateful remembrance" of one whose name is associated with the proudest day of Lexington's history.

Nor did the interest of the town in the success of our arms end with the first events of the war. It continued unabated until the victory was won and independence secured. Contributions of men and supplies to our armies were large and constant. The rolls, though very imperfect, show that up to 1779 Lexington men had taken part in seventeen campaigns. These include the siege of Boston, the expedition against Canada, the campaign at Ticonderoga, of Bennington, of Burgoyne's capture, of White Plains, of the Jerseys and of Rhode Island. In 1780 there enlisted thirty men from Lexington to serve for three years, or during the war. When we remember that the whole population at this time did not exceed seven hundred, it is obvious that a very large proportion of all those capable of bearing arms must have been in the field. Several hundred cords of wood, cut on the ministerial land, were delivered at the camp on Winter Hill while Washington was besieging Boston. Meat and clothing were sent to our distressed men while serving on distant campaigns, and bounties were liberally paid by the town to keep the ranks full. When the currency had so depreciated as to be nearly worthless, these bounties were paid in cattle: five three years old for three years' service; five two years old for two years, and five one year old for one year. In nearly all the famous battles of the war the men of Lexington were engaged. At Monmouth two George and Edmund Munroe, were killed. There was no shirking of their burdens by the town, and to their credit be it recorded that not less than ten negroes, some of whom were slaves, enlisted in the ser-

vice, and some of them served through the whole war.

The anniversary of the Lexington battle has been observed with fitting services annually. In the year following it, Rev. Jonas Clarke preached a sermon which was published and, in an appendix, he has left a graphic account of the scene on Lexington Common which is undoubtedly accurate and reliable in every particular. Through the period of 115 years the anniversary has been commemorated by the ringing of bells and firing of cannon; by services of prayer and song, and patriotic addresses. Two years after the great event, in 1777, the town chose a committee to take steps towards the erection of a monument to those who were slain, but nothing was accomplished until twelve years later, when, on petition of the town to the Legislature, an appropriation for the purpose was made, and the state and town united in erecting a simple memorial on the Common near the spot where the heroes fell. The monument was completed on the 4th of July, 1799, and was one of the first raised to commemorate the events of the Revolution.

On the sixteenth anniversary of the battle, in 1835, the occasion was observed by removing the remains of those who were killed from the old cemetery to a stone vault built in the rear of the monument. Their bones were reverently gathered up and placed in a mahogany sarcophagus, which was borne to the church by the survivors of the battle, where, after prayers and songs, an eloquent oration was pronounced by Edward Everett, then in the zenith of his power. The remains were then borne to their final resting-place under the monument, by the comrades who had seen them fall, and volleys from the military companies fired over the tomb. Lexington has always delighted to honor the memory of the first martyrs to liberty who perished on her soil. And since the organization of the Historical Society, in 1886, the event has been observed annually by a union religious service on the Sunday evening preceding the 19th of April, and on the day itself by gathering the children of the schools in the town hall, where patriotic songs are sung and recitations given. The town has cheerfully and generously appropriated money to carry out these observances.

At the close of the War of the Revolution, the population of Lexington was estimated at about 800. In the first census taken by the Government, 1790, it was found to be 940, and in that of 1800, it had only increased to 1006. On the incorporation of Lincoln, in 1751, a slice of her territory had been cut off to form the new town, containing about a hundred inhabitants. The growth was somewhat retarded by this spoliation, but it has always been slow. During the War of Independence, she lost heavily of her able-bodied men, and, after it was over, the fever of Western immigration soon began to rage, carrying away many of her most vigorous and enterprising

sons. The census of this year, 1890, shows a population of three thousand, two hundred, which is not a large increase from that of 1800; but, if moderate, it has been of a substantial and permanent character. The assessors' valuation of property in 1800 amounted to \$250,000; that of this year will probably exceed \$3,500,000, showing a high average of wealth to each individual—few towns or cities of Middlesex County probably have a higher average—and showing an increase of wealth *per capita* from \$125 to \$1000, or 800 per cent., while the increase of population has been but 300 per cent. in these ninety years.

In the formation of the State constitution, Lexington took an active interest through Rev. Mr. Clarke, her delegate in the convention. It was not altogether satisfactory to him, and when submitted to the town for approval, he proposed several amendments, which were unanimously adopted. He thought the rights of the people were not sufficiently guarded by that instrument, and also that Protestantism should be recognized as the religion of the State. Happily, his fears proved groundless, and all semblance of a State religion ultimately disappeared from the laws of the Commonwealth.

THE WAR OF 1812 with Great Britain was unpopular in New England, and especially in Massachusetts, where it was generally regarded as a needless one. And the fact that peace was made without even mentioning the matter which caused it, would seem to prove that it was wholly unnecessary. Party spirit ran high. Lexington was strongly opposed to the policy of the administration, but she did not fail to support the Government. Bounties were readily granted for soldiers, and an earnest purpose was manifested to bear her portion of the burdens and sacrifices of the war. Patriotism was stronger than party spirit, and the sons of the men who fought the battles of the Revolution were not wanting in the valor of their fathers. So it proved also half a century later in the great Rebellion.

WAR OF THE REBELLION.—The record of the town in that long and desperate conflict is a most creditable one. The old heroic spirit was here which in the earlier struggle dared all things for freedom and right. The town expended nearly \$30,000 in furnishing men for the army and in supporting their families. Every call of the President was promptly answered from the first to the last. Lexington's quota was always full, and at the close of the war she had nine more men in the field than were required of her. During the war 244 men were enlisted from this town in the army and navy, of whom twenty were killed in battle, or died from wounds, or from disease contracted in the service. Lexington men may be traced in all the great battles and marches, doing their duty nobly, bearing the hardships and sacrifices of war patiently and heroically. Some of them, alas! learned what it was to face the horrors of Southern prisons and die in South-

ern hospitals. But wherever the fortunes of war carried them, the town had no cause to be ashamed of the men who represented her in the field. They made a brave and worthy record, and every patriotic heart delights to do them honor. Truly the record of 1775 is not dishonored by that of 1861, and the sires might well be proud of the sons.

Nor was the devotion of Lexington to the cause of the Union confined to the men in the field, or the men at home who faithfully supported them. The women of the town were just as earnest and as self-sacrificing, so far as it lay in their power. They toiled nobly to supply clothing and comfort for the sick and wounded in the hospitals. Efficient organizations existed in the churches for aiding the men in the field, and many boxes of stockings and mittens and underclothing were sent from the town to cheer their brothers on picket duty, on weary marches and in the trenches of besieged towns where they were pressing on to victory. After every great battle they promptly gathered, bringing their stores to alleviate the awful suffering and do all that could be done to save the precious lives of the wounded men. Some left their peaceful homes and went into the hospitals bearing light and comfort and making those dreary places brighter by their gentle ministries. Truly the heroism in that tremendous contest was not all on the side of the men in the service; the hardships and suffering were not all on the long marches or in malarial camps, or the terrible scenes of Southern prisons. The wives, mothers and sisters at home had things to bear that were quite as trying, and they bore them just as bravely and cheerfully. They did their part with equal fidelity and enthusiasm. All honor to the brave men who faced death in so many forms for union and freedom; all honor likewise to the noble women who bore the awful anxieties and losses of the war so patiently and toiled so faithfully to sustain their husbands, sons and brothers in the field. Lexington had her full share of both. She opened the bloody drama of freedom in 1775, and she did her part in the final scene of 1861.

Since the war a Grand Army Post, the George G. Meade, No. 119, has been organized in the town, now numbering forty veterans. A Women's Relief Corps is connected with it numbering fifty. Both organizations are well maintained and are in an efficient and flourishing condition. In addition to all which is done by the State for soldiers' families needing assistance, the Relief Corps watches over them and sees that they are properly attended in sickness and that nothing required for their comfort is lacking. The object of the corps is not only to give aid in time of need, but sympathy and counsel in the time of trouble, that no man's family who served his country in that awful crisis shall be neglected. These organizations command the hearty respect of the people of the town and anything necessary for their work is cheerfully contributed. The Grand Army Post annually observes

Decoration Day with appropriate ceremonies. The graves of their fallen comrades in the cemetery, of which there are nearly twenty, are visited, baskets of flowers and wreaths of ivy placed upon them, while the old flag, in defence of which they died, is waved over their resting-place, and a band of music plays solemn dirges in honor of their memory. In no portion of the State are the names of our country's dead heroes more fondly cherished or gratefully remembered. When the new town-hall was erected, in 1874, the late Mrs. Maria Hastings Cary, a native of Lexington, residing in Brooklyn, N. Y., gave the princely sum of \$20,000 towards it on condition that a room should be provided in it for Cary Library and a Memorial Hall. Accordingly it was so planned and built. Two marble tablets were inserted in the walls of Memorial Hall—one inscribed with the names of the minute-men who fell on the 19th of April, 1775, and the other with the names of those who perished in the War of the Rebellion. Four marble statues of life-size, were also placed there by the contributions of the citizens commemorative of the men of the Revolution and the soldiers of the Rebellion; that of John Hancock and Samuel Adams, representing the foremost patriots of the earlier conflict, together with a typical minute-man of Captain Parker's company, and that of a typical infantry soldier standing on guard in the latter conflict. All are statues of artistic merit and fittingly represent the characteristic men of these great epochs of our history.

In the main hall of the town building there is also a large picture, by Henry Sandham, of the battle of Lexington. It represents the scene on the Common in the early morning as the dawn is breaking and at the moment when the firing occurred. On the left is the old Buckman tavern, the rendezvous of the minute-men, the smoke rising from the chimney and a candle dimly burning in the chamber; on the right stands the ancient meeting-house, and between them are drawn up the British troops, with Major Pitcairn upon his splendid charger, turning in his saddle and giving the command to fire. In the foreground are the broken ranks of the patriots, some returning the fire, some stooping over their fallen comrades, some standing their ground to reload their pieces and some turning to leave the field. The whole force and spirit of the picture are thrown into the faces and positions of the minute-men. The resolute, determined purpose of resistance speaks in every face and form. Their appearance is full of life and valor, well representing the spirit of the people at that time. While the dull, apathetic, mechanical appearance of the British soldiers in their splendid equipments forms a striking contrast and fittingly expresses the idea that they had no heart for the bloody business. There are also touches of beauty in the picture. The morning light breaking on the gable of the meeting-house and flushing the clouds with the coming glory, the wreaths of smoke rising over the British line from the firing, the

pale, innocent face of a mere stripling who has fallen and whose head is held up by an old man bending over him, serve to give a softened beauty and pathos to the scene, which veils something of its horror and invests it with a marvelous fascination. While strongly realistic, depicting much of the actual scene, it is also instinct with the spirit of the time.

In the centennial year of the battle, the occasion was observed in Lexington by elaborate and fitting ceremonies. Many of the highest civil and military officials of the State and National Governments, including President Grant and members of his Cabinet, were present. A vast multitude, numbering it is thought from 50,000 to 75,000, persons from the neighboring cities and towns, and from distant portions of our country, including men distinguished in every walk of life, crowded the streets and public grounds, to visit places of historical interest. The services consisted in the unveiling of the statues in Memorial Hall, an oration by Hon. Richard H. Dana, and a banquet followed by a ball in the evening. A tree was planted on the Common by President Grant in commemoration of his visit. The day was cold and blustering, snow covered the ground and much suffering was caused by the crowded condition of the town and the impossibility of providing transportation on the cars for so vast a multitude, or food for their hunger and shelter from the cold. These things detracted much from the enjoyment of the people and the success of the celebration. The town, through its various committees had made systematic arrangements for the observance of the day, and no money or labor were spared to pay fitting honor to the occasion. More than \$9000 was expended by the town for this purpose. Lexington has never grudged any money needed for patriotic objects or to perpetuate the memory of historic incidents within her borders. In 1884 the sum of \$1500 was expended under the direction of a committee appointed by the town in marking places of interest in her history. These included tablets on the Hancock-Clarke house, the Buckman and Munroe taverns, the home of Jonathan Harrington, the last survivor of the battle, and several others; a huge boulder was placed on the Common to indicate the line of the minute-men; an appropriate and beautiful monument, on the site of the first three meeting-houses; a large granite block cut in pyramidal form and standing on a heavy base, over the grave of Captain John Parker; a unique stone cannon, on the spot where Earl Percy planted one of his field-pieces to cover the British retreat; a granite slab at the foot of the hill in the western part of the town, where Lieutenant-Colonel Smith attempted to rally his fleeing troops; also a similar one at the well where young Haywood and the British soldier shot each other; and one in the wall on Main Street near the Munroe tavern, to indicate the position of another field-piece and the locality where several buildings were burned by the retreating soldiers. These mem-

orials have added much to the satisfaction of those visiting the town for historic study, and they serve also to preserve a knowledge of many incidents and places in danger of being forgotten by future generations.

In keeping with the marking of historic spots was the improvement of the Common two years later. The old dilapidated fence of stone posts with wooden rails between was removed and a wide gravel walk made around the entire area. The unsightly town scales were taken from the southern point of the Common and put in a more convenient but less conspicuous place. Several hundred cubic yards of gravel were excavated and carried away and the space filled in with loam. It was then plowed, re-graded, enriched with fertilizer and seeded and a few additional trees set in vacant places. Thus the Common was made into a beautiful lawn, and it has been carefully kept as such ever since. It is now an attractive and delightful spot, surrounded with grand old trees and containing three historic monuments. Hundreds of pilgrims from every State in the Union visit it annually, and are pleased to find a spot "sacred to liberty and the rights of mankind" (in the words upon the old monument) so faithfully watched over and cared for by the people who possess it. For these improvements the town has expended nearly \$2000, and an annual appropriation is made to keep the place bright and clean where the martyrs died. These facts show that the patriotic spirit still burns brightly in the hearts of the Lexington people and that a generous appreciation of brave men and noble deeds exists among them.

CHAPTER XLVI.

LEXINGTON—(Continued).

EDUCATION—SCHOOLS AND LIBRARIES.

WE have seen that the earliest public school in Lexington was established by vote of the town in 1715. This was a grammar school, probably for boys only, and kept in the school-house erected that year on the Common. It was not altogether free, but a small charge was made each pupil according to the studies he pursued, and in addition to this he was sometimes obliged to furnish two feet of wood annually for the fire. Women schools, or "Dame Schools," as they were called, were established about the same time in different parts of the town, kept in private houses, and free to girls and the younger children. There were as many as five or six of these schools located in places where they would best accommodate the young children. In the years when the Grammar School was moved from one quarter of the town to another, every two months, it took the place of the Dame Schools, at least for a portion of the school year.

This policy seems to have been continued for three-quarters of a century, or until 1795, when three school-houses were erected, one in the north, one in the east and one in the southwest parts of the town, and permanent schools established in them. At this time \$333 was appropriated annually for education. The number of children of school age probably exceeded 150, showing that no more than \$2.50 per scholar was expended. In 1804 three additional school-houses were erected, including a new one on the Common, making the third on that site, and more liberal appropriations began to be made for the support of schools. Evidently not much supervision had been exercised over the schools up to the beginning of this century. The minister was accustomed to visit them once or twice in the year, as we learn from the diary of Rev. Jonas Clarke, but it was for the purpose of hearing the children recite the Catechism and of giving some moral and religious instruction. In the year 1800 the town voted that teachers must bring certificates of their qualifications, and the selectmen were instructed to visit the schools and see that they were properly taught and governed. The first committee chosen to have a general oversight of them appears to have been in 1821. But the appropriation for schools did not reach \$1000 until nine years later, in 1830. From this period there has been a gradual increase in the expenditure for public education. The school buildings have been much improved and seven of the schools are now graded. In 1851 a High School was established to furnish a thorough English course of study for graduates of the grammar schools and to prepare pupils for college. At the present time there are twelve schools in the town, including the High School, with thirteen teachers, besides a teacher of music and of sewing. Of these, four are ungraded schools, in the outlying districts; two are in the east village, a grammar and a primary; and five are in the centre village, viz., one grammar, two sub-grammar and two primary schools. The average number in all the schools during 1889 was 401, of which 60 were in the High School under a principal and assistant. The appropriation for schools the last year was \$11,500, giving \$28 for each scholar, which is certainly a generous expenditure and exceeded by few towns in the State. The management of the schools is under the control of a committee of three persons, one of whom is chosen annually to serve three years; and a superintendent who is also principal of the High School, and who receives additional compensation for this service.

A committee appointed by the town is now considering the question of a new school edifice for the central village. It is proposed to erect a building of six or eight rooms upon an ample lot, containing all modern improvements in heating, ventilation and drainage, and accommodations for some of the outlying schools, should the town decide to consolidate them by providing transportation for the scholars.

There is a demand on the part of the people for spacious, comfortable and convenient school-rooms, and there is no disposition to withhold any appropriation needed to secure them, and to make the means of public education as excellent as possible.

An academy was established in Lexington in 1822 for a higher education than the public schools afforded. Under the instruction of the late Caleb Stetson it attained a creditable standing among similar institutions, and drew scholars from other towns and States. It was founded by a number of the town's people, who erected a building for its use on a lot fronting the Common at the northeast corner. It was an incorporated institution, and maintained a school here with varying success for a number of years, but was finally abandoned. Having no endowment, the charge for tuition was the only means of its support, and the income proved inadequate to maintain it in an efficient condition. In 1839, when the State of Massachusetts took the first steps towards establishing normal schools, the use of the academy building was offered to the Board of Education for that purpose and gladly accepted. It was fitted up and put in a condition to accommodate the Normal School and also an experimental school, where the Normal scholars could receive practical instruction in teaching. The town paid these expenses and donated the use of the building without charge to the State. The school was opened in July, 1839, under the charge of Rev. Cyrus Pierce with but three pupils. The number gradually increased, and the school became eminently successful during the five years that it remained in Lexington. Such was the humble beginning of the first Normal School in America. In 1844 it was decided to place the school upon a more permanent basis and give it better accommodations. The location was opened to competitive bids, and Lexington was distanced by her more wealthy neighbors. It was secured by Newton, and transferred to that place during this year. Subsequently it was removed to Framingham, where it still remains, and has become one of the most efficient and popular of our Normal Schools. The old academy building has undergone many changes since it was abandoned for school purposes. For the last twenty years it has been used by the Hancock Congregational Society as a meeting-house, by whom it was purchased and fitted up for purposes of worship on the organization of that society. It must always be an object of peculiar interest to the historian as the place where, half a century ago, the experiment of Normal Schools was first made—an experiment from which have come the most beneficial and splendid results. May it long be preserved from the hand of the destroyer as a memorial of an event which has been fruitful in blessings to our country!

A young ladies' seminary was established here by the late Dr. Dio Lewis. For this purpose he purchased the Lexington House in 1864, a spacious ho-

tel, and fitted it up for a boarding and day-school. His devotion to the physical training and development of the pupils, in connection with their studies and the favorable location for health, made the institution widely popular. Nearly 150 pupils were enrolled in the school during the third year after his occupancy of the Lexington House. But in the vacation following, and just before the opening of the fall term of 1867, the house took fire and was entirely consumed, involving a heavy loss of property and of school advantages to the town. It has never been rebuilt, and the school was broken up by the misfortune.

Lexington had several libraries before the present public library was founded. A library appears to have been connected with the First Parish sixty or seventy years ago. During the early pastorate of Rev. Charles Briggs, while town and parish were one, the juvenile library was established, designed especially to provide good reading for the children and young people. Appropriations were sometimes made by the town for the purchase of new books. This library was kept in the front vestibule of the meeting-house, and on Sundays between services was opened for returning and giving out books. It was well maintained, and afforded a valuable means of entertainment and improvement for young people before the organization of Sunday-schools. At the same time there was a village library belonging to an association formed for mutual improvement. By the payment of a small sum annually a person was entitled to the use of the books. And at a later period the Agricultural Library was established in connection with the Farmers' Club. This was devoted mainly to such books as were of value to the cultivators of the soil. Before any libraries existed in the town, the minister's books were freely loaned to his parishioners, as we learn from the MS. diary of Rev. Jonas Clarke, where a list of borrowers' names is carefully preserved. Among them are Baxter's works in four quarto volumes, presented to the Lexington church by the Hon. Samuel Holden, Governor of the Bank of England, in 1730, the donor of Holden Chapel to Harvard College. The volumes were to be loaned to the people and kept for the use of future generations. They are now to be seen in the public library; but probably are not often called for.

In 1868 Mrs. Maria Hastings Cary proposed to give \$1000 to Lexington to establish a free public library, on condition that a similar sum should be raised in money or in books for the same object. The offer was made as an expression of interest in her native town and in the hope of promoting the welfare of its people. It was specified in the gift that the selectmen, the School Committee and the settled ministers of the churches for the time being should constitute a board of trustees for the management and control of the library, and that the town should provide a place for it and necessary attendance and care. The proposition was gratefully accepted and the conditions com-

plied with, by the donation of the other libraries to this object and an appropriation of money by the town. Such was the origin of Cary Library, so named in honor of the original donor. The organization of the board of trustees was soon effected, the books purchased, the other libraries consolidated with it, a place rented for its use, and Cary Library opened to the people of the town. Three years later, in 1871, Mrs. Cary being pleased with the public appreciation and usefulness of the library, gave \$5000 towards a permanent endowment. When the new town-hall was erected a room was provided for the library by an additional gift from Mrs. Cary, as previously noticed, where it has remained to the present time. By her will she left the sum of \$5000 for its further endowment, which was received after her death. The town has made generous appropriations annually for its maintenance, and it has been gradually enlarged until it contains between 12,000 and 13,000 volumes. It is highly prized by the people and extensively used; more than 25,000 volumes have been drawn from it during the last year. From 500 to 800 new books are added annually. For the most part the library has been carefully selected, and is especially rich in works of history, biography and travel, and in books of reference. It is supplied with a variety of magazines and papers and the tables are occupied by interested readers, among whom there is a large proportion of young people and pupils of the public schools. The influence going out from Cary Library into every portion of the town is most encouraging and helpful. No institution among us is more popular, and none is more cheerfully supported. A branch library is maintained in the east village, where a room is open for drawing and returning books through an assistant librarian. It is also supplied with magazines and papers. By this means the library is made available to a much larger class of people and a comfortable reading-room provided for their leisure hours. A special appropriation is made annually for the support of the branch.

In 1887 a proposal was made to the town by Col. William A. Tower to erect a building for the library, costing from forty to fifty thousand dollars, on condition that a site should be provided by the town for that purpose. In his letter addressed to the selectmen announcing this generous gift, he named a location at the southeast corner of Main and Clark Streets as the one he desired, if it could be procured at a reasonable price. A town-meeting was called, and it was unanimously resolved to accept the proposition of Colonel Tower, and the sum of \$12,000 voted to purchase the site. A committee was also chosen to co-operate with him in procuring the site and erecting the building. After the passage of these votes, a letter was read from Miss Alice B. Cary, offering, on behalf of the heirs of the Cary estate, to give \$10,000 towards the purchase of a site that should be acceptable to Colonel Tower. This gener-

ous proposal was received with great enthusiasm, and the thanks of the town voted to Colonel Tower and the heirs of the Cary estate for their munificent proposals. Long and complicated negotiations now followed for the location named by Colonel Tower — the owners of the property holding it at a price that seemed unreasonable and exorbitant. A committee appointed by the town to make some changes in the organization of the Board of Trustees in the meantime appealed to the Legislature for an act of incorporation for the library and the privilege of taking the site under the right of eminent domain. The act was granted. This produced new and greater complications, and awakened strenuous opposition in the town to the act itself. Before the conditions named by Colonel Tower were complied with the time had expired to which his proposal was limited. He renewed it, making it a condition, however, that the act of incorporation should be accepted by the town. It was so accepted by a majority of nearly fifty votes. Finally an appeal to the Supreme Court, involving the constitutionality of the act, was made, and the decision just rendered pronounces it a violation of the original compact with Mrs. Cary, and, hence, unconstitutional. Thus an unfortunate division of opinion has deferred the erection of an elegant and substantial building for the library, and not unlikely lost it altogether. It is much to be regretted from every point of view.

CHAPTER XXVII.

LEXINGTON (Continued.)

ECCLIASTICAL AFFAIRS — CHURCHES, SUNDAY-SCHOOLS AND BENEVOLENT ORGANIZATIONS.

THE early history of the first church and its meeting-houses has been given in connection with the early history of the town, when ecclesiastical and municipal affairs were under the same government. As already stated, the first pastorate, that of Rev. Benjamin Estabrook, was a brief one, ending with his death, in July, 1697, less than one year after his ordination, though he had preached here for five years previous to his settlement. The ordination of John Hancock, as the second minister, took place on November 2, 1698, and he continued to be the pastor of the church until his death, December 5, 1752, a period, including the time that he preached here before ordination, of fifty-five years. In 1734 his son, Ebenezer Hancock, was ordained as his colleague, and continued to be his father's assistant until his death, in January, 1739. After the death of Rev. John Hancock, in 1752, an interregnum of three years occurred, during which various persons were heard as candidates, including Rev. Timothy Minot,

of Concord; Rev. Mr. Stearns, of Billerica; Rev. Aaron Putnam, who was invited to settle over the parish, but declined, and Rev. Jonas Clarke, of Newton, upon whom the town and church finally united by a vote of seventy to three, after a day of fasting and prayer. He was ordained on the 5th of November, 1755, and remained in active service until his death, November 15, 1805, thus entering upon the fifty-first year of his ministry. The first four pastors of the parish, therefore, were ordained to the ministry here and died in the service of the parish. Their mortal remains rest in the old cemetery with those of the people to whom they ministered. The tomb of Rev. Benjamin Estabrook is one of the oldest in the burial-ground, bearing the date of 1697, though no doubt there are many unmarked graves much older, since the place was used for burial purposes from the early settlement of the town. The other pastors have a common tomb, that of the Hancock-Clarke families, sealed up since 1844, when the body of the last of Mr. Clarke's children living here was placed in it.

After the close of the long pastorate of Rev. Mr. Clarke, the parish again gave two years to the hearing of candidates before another minister was settled. In May, 1807, a call was given to Rev. Henry Coleman, which he declined. Finally, after another trial of candidates, the church and congregation united in calling Rev. Avery Williams by a unanimous vote. He accepted, and was ordained as the fifth pastor on December 30, 1807, at a salary of \$600, with fifteen cords of wood annually, to be delivered at his door, and a settlement of \$1000. He was to be the minister of the parish for the remainder of his life. His predecessors had all been settled on the same condition, which was, indeed, the universal custom in the early history of New England. So, likewise, was the custom of giving a sum in addition to the salary, called "a settlement."

It is interesting to notice the charges made on the town records for Mr. Williams' ordination. Evidently it was quite an elaborate and hilarious affair. At this time there were as many as eleven taverns and stores licensed for the sale of spirituous liquors within the town, and they received a generous patronage, especially on such an occasion as the ordination of a new minister. First, the council met and rigidly examined the candidate. After he had shown his proficiency in the profound and difficult questions of theology, and that he had passed through a true religious experience and possessed a sound Christian character, the services of ordination were performed. Then ministers, deacons and messengers, with the most prominent members of the church and parish, repaired to the tavern of Amos Muzzy, Jr., where sumptuous provision was made for their entertainment. What this consisted of we are unable to tell, since only the aggregate charge of \$139.78 appears upon the records for the council dinner. The sum of

\$8 was paid "for spirits and luncheon for the singers," and "four mugs of toddy furnished the men who propped the meeting-house galleries for the ordination, and four mugs of toddy when letting the bell to be rung;" at the same time six mugs are provided for the selectmen when letting out the town's poor. It is not surprising, therefore, that three constables were required to keep order at the ordination, who were paid five dollars for their services, and that the meeting-house had to be cleaned at an additional expense after the ordination was over. A charge of \$2.33 for new strings for the bass viol, and \$14.75 for "moreen" for the pulpit windows completes the list of ordination expenses in the First Parish eighty years ago, when Rev. Mr. Williams was consecrated for his work. Surely, there has been a great advance in public sentiment and social custom since that time, when, on the most solemn occasion and for the most trifling work, spirituous liquors were required, that all things might be done properly. Mr. Williams' ministry appears to have been a harmonious and prosperous one. He was evidently a preacher of more than average ability, and very acceptable to his people. During his ministry increased attention was given to church-music, and a singing-school was maintained at the expense of the town for many years. In 1800 a sum of money was voted to supply "firewood and candles, to encourage the singers in keeping a school, in case they will engage to sit together in the meeting-house after they have learnt." And afterwards we find frequent charges for the repair of musical instruments and for keeping up musical instruction, showing that this part of public worship was much encouraged by the people.

Rev. Mr. Williams published two discourses in 1813 on the centennial of the incorporation of Lexington. They contain much valuable information regarding the early history of the settlement and the customs of the people. He gathered up many interesting facts which otherwise would have been forgotten, and he deserves grateful remembrance for the service thus rendered to historic knowledge. His health seems to have been feeble, and frequently he was unable to perform the duties of his office. On this account, probably, there was increasing uneasiness and dissatisfaction in the parish. But, being settled for life, the connection could not be easily dissolved. Finally, in August, 1815, the town voted to pay him \$615 to withdraw and bring the relation to an end. He consented, and, after a ministry of eight years, an amicable separation took place, and the parish again entered upon the experience of hearing new candidates for settlement.

The people appear to have been more difficult to please than ever, and not until February, 1819, could they unite on a new minister, when Rev. Charles Briggs was chosen by nearly a unanimous vote, and ordained in April following as the sixth minister of Lexington. Mr. Briggs was in feeble health much of

the time during his pastorate, and was occasionally obliged to give up his duties and travel for its improvement, but he continued in charge of the parish for sixteen years, when he asked to be dismissed. His request was granted, and in July, 1835, his relation with the parish came to an end. He had a peaceful and prosperous ministry. He gave much attention to the public schools, and was deeply interested in the welfare of the young, gathering a valuable library for their use. The Sunday-school was organized by him about the year 1830, but the precise date it is impossible to establish.

He appears to have been highly respected and esteemed by the town, and entrusted with important offices. The parish had been gradually changing its theological basis for some time before the settlement of Mr. Briggs, and during his ministry appears to have become distinctively Unitarian in faith and affiliation, though there is no record of any action to that effect. The old covenant was never formally disowned, but its use seems to have been silently abandoned. Rev. Jonas Clarke was probably what was called a "moderate Calvinist," though his daughter "Betty" often asserted that he was an Arminian, the name given to those of the old Congregational order who held advanced opinions regarding the extent of the atonement.

Rev. Avery Williams was evidently more conservative in his views; but after his dismissal from the ministry here the parish gave invitations to two candidates who held liberal opinions in theology, and after they declined, settled Rev. Mr. Briggs, which indicates that the parish had become decidedly liberal in faith. There is no evidence on the church records of any dissent from this position. It appears to have been accepted by all the people.

A year passed away before the next minister was chosen,—Rev. William Gray Swett, who was ordained July 13, 1836, as the seventh minister of Lexington. Up to this time there had been no separation between the town and parish, but they were one and the same. Mr. Swett was chosen to be the minister at a regular town-meeting, and his salary fixed at \$700 per annum. No mention is made of a sum for a settlement. He continued in the pastorate but two years, when, at his own request, he was dismissed and afterwards settled in Lynn, where he died in 1843. Mr. Swett was a warm-hearted, genial man, but of a somewhat eccentric character. He was apparently devoted to his work and made many friends in the parish, by whom he is pleasantly remembered. After the termination of Mr. Swett's ministry the parish continued without a settled pastor for six years, in the mean time engaging a temporary supply for the pulpit for a longer or shorter period. Among those employed were Rev. George M. Rice, Rev. William Knapp and Rev. S. B. Cruft. Other religious societies had been formed in the town and they claimed that there should be a division of the ministerial

fund. The members of these societies retained their connection with the First Parish as voters and sought to compel a distribution of it. A long and bitter controversy followed, producing much alienation between families and friends, and preventing the settlement of a minister. This unfortunate division and strife entered into town affairs and caused great trouble and confusion. Finally, through the patient and kindly offices of Rev. Samuel J. May, who was employed as the minister for a few months, a settlement of these difficulties was arranged by a division of the income of the fund among the existing churches, to be made annually. All parties assented to this arrangement, and the town gave Mr. May a vote of thanks for the service he had rendered, and recompensed him for the time and trouble which the settlement had caused him. In 1845 the parish was separated from the town and placed under an organization of its own, and all similar complications prevented for the future. Rev. Jason Whitman, of Portland, Me., was unanimously invited to settle over the parish at a salary of \$900, and the old meeting-house, which had long been in a dilapidated condition, was reconstructed at heavy expense and made pleasant and comfortable. Mr. Whitman accepted the invitation and was installed as the eighth minister on July 30, 1845. Unfortunately the destruction of the meeting-house by fire on the night before it was to be rededicated, December 17, 1846, involved the parish in new strife and led to long and vexatious suits to determine where the pecuniary responsibility belonged. Years passed away before these matters were finally settled.

Rev. Mr. Whitman entered upon his ministry under favorable auspices. The people were united in him. He was an able and interesting preacher and he gave himself to his work with hearty devotion. He was deeply interested in the cause of temperance and anti-slavery, and firm and fearless in their advocacy. The prospect of a long and useful ministry opened invitingly before him, and the church seemed to be entering upon a period of substantial prosperity. But in January, 1848, before completing the third year of his pastorate, he was suddenly removed by death, to the great disappointment and grief of his people. Mr. Whitman was the author of several biographical and controversial works, besides a volume of sermons and many addresses and magazine articles which he published. The new meeting-house, erected after the destruction of the previous one, was completed and dedicated soon after his death.

Following the ministry of Mr. Whitman came that of Rev. Fiske Barrett, who was ordained as the ninth pastor in September, 1849, but continued only about three years, when he resigned and left. Two years later, September, 1851, Rev. N. A. Staples was ordained as his successor—the tenth minister of the parish. He entered upon his duties with much enthusiasm and devotion. The people were heartily

united in his support, and his ministry, of a little more than two years, appears to have been prosperous and peaceful. In November, 1856, he resigned to accept an invitation to the pastorate of the Unitarian Church in Milwaukee. Here he remained until the beginning of the War of the Rebellion, when he was chosen chaplain of the Sixth Wisconsin Regiment, Col. Lysander Cutler's, and entered the service in the Army of the Potomac. The severe exposure of the field brought on a long sickness, which compelled him to withdraw from the army. He resumed his profession, and was settled over the Second Unitarian Society in Brooklyn, N. Y. But his health was never restored, and after a few months he was utterly prostrated and died February 5, 1864.

Rev. Leonard J. Livermore succeeded Mr. Staples, and was installed in October, 1857. During his ministry of nine years he was active and self-sacrificing in his work. He succeeded in paying off a heavy indebtedness which had hung over the parish like a mill-stone from the losses incurred in the burning of the old church. He labored earnestly for the prosperity of the public schools, and, during the war, for the aid of the soldiers in the field and the sick and wounded in the hospitals. A man of fine scholarly tastes, and gentle, loving spirit. In September, 1866, he resigned the pastorate and closed his connection with the parish at the beginning of the new year. Subsequently, Mr. Livermore was settled over the Unitarian Church in Danvers, where he remained for nearly twenty years, greatly beloved by his people. He died in Cambridge, after a long illness, in June, 1886.

Mr. Livermore was succeeded by Rev. Henry Westcott, who was installed June 26, 1867, the twelfth minister of the parish. During Mr. Westcott's ministry a spacious and pleasant chapel was added to the meeting-house, containing Sunday-school and library room, and a large parish parlor, for the accommodation of the sewing society and for other uses. In the basement a supper-room and kitchen were constructed for social occasions, and all arrangements made for the purposes of a working religious society. Mr. Westcott labored faithfully for the prosperity of the Sunday-school and the church. He was deeply interested in the organization of Cary Library, and was one of the committee appointed by the town to take the necessary steps for establishing and opening it to the public. During the fourteen years of his ministry he acted as one of the trustees, and devoted much time to the selection of books and the management of its affairs. To him and to Rev. Mr. Porter the town is deeply indebted for this valuable library. In June, 1881, Mr. Westcott resigned his pastorate, and shortly afterwards was installed as pastor of the Unitarian Church in Melrose. His pastorate there was a peaceful and prosperous one, but was suddenly terminated by his death July 14, 1883. His loss was sincerely mourned by his people,

who had become warmly attached to him in his brief ministry.

The present pastor, Rev. C. A. Staples, was installed October 31, 1881. During his ministry the meeting-house has been remodeled, newly carpeted and painted, the organ reconstructed, new furnaces put in and stone steps in front to replace wooden ones, at a total cost of more than \$5000. The meeting-house is now in thorough repair, and is a substantial and pleasant edifice. There are connected with the parish about 110 families, and the services of worship are fairly well attended. The Sunday-school contains twelve classes, numbering one hundred and twenty-six scholars, including a primary-class of eighteen, and two classes of young men and women. There is a temperance society connected with it of fifty-eight members, holding meetings once a month, and a Christian Union of young people for religious improvement and charitable work. The Ladies' Sewing Society has from twenty to thirty members engaged in working for destitute families and for children at home and abroad. The Lend-a-Hand Society of young ladies is engaged in work for hospitals and benevolent societies. There is also a Women's Branch of the Unitarian Auxiliary Society, numbering about thirty members, holding meetings monthly for mutual religious improvement and the collection of funds for missionary work. The young people's societies have supported a student in the Tuskegee, Ala., Normal School for three years, and have contributed to support an Indian school in Montana among the Crow Indians.

Such is the history, the present condition and work of the old First Parish of Lexington. Its present meeting-house, erected in 1847, is the fourth built since the organization of the parish in 1692. The audience-room contains two large tablets, one on either side of the pulpit, inscribed with appropriate passages of Scripture expressing the faith, hope and love of the Christian church. These were presented by the late Mrs. Maria Cary. It has also a beautiful marble font presented by Mrs. Margaret Hayes in memory of her husband, Hon. Francis B. Hayes, a member of the parish, who died in September, 1884. The old pulpit Bible, presented by Governor John Hancock, in 1793, is still carefully preserved, though no longer in use. There are a large number of communion vessels belonging to the church, the gifts of deceased members through the nearly two centuries of its existence. A portion of these was given to the church in East Lexington, an offshoot of the First Parish, and are now in possession of Follen Church in that village. They are simple memorials of men and women to whom the church was dear while they lived, and who left these tokens of their love and reverence for it after they had gone to the church above.

THE BAPTIST CHURCH was the earliest organized in the town after the First Parish. There appear to

have been some people of this persuasion here for fifty years before the formation of a church. They were connected with the Baptist Church in Cambridge, and attended worship there. In 1787 Thomas Green was the pastor. These people refused to pay a ministerial tax in Lexington, as appears from the town records, but it seems to have been exacted of them by the authorities. Probably this was after a law had been passed exempting those persons from the ministerial tax who brought certificates of their connection with some church other than that of the parish where they were living, and that they were paying there for the support of the institutions of religion. Such a provision was made for the relief of the Baptists, Quakers and other dissenters from "the standing order." The exaction of the tax by Lexington, therefore, was illegal, if the Baptists brought the proper certificates. However this may have been, the record states that Rev. Mr. Green made complaint of the injustice done to his Lexington parishioners, and an action was brought against the town to recover damages. The case was not allowed to come to trial; the authorities, probably, finding themselves in the wrong, a settlement was made with the Baptists in the following year (1788), and they were no longer compelled to pay for the support of a church in which they did not believe. Services of worship were probably held by them occasionally, and the rite of baptism by immersion was performed, but they were chiefly connected with the Baptists in Cambridge and Waltham up to 1830, when regular preaching was commenced in the town. In 1833 Rev. T. P. Ropes became the pastor, and in the same year a church was organized and a meeting-house erected on Main Street, a little south of Vine Brook, where, with extensive additions and repairs, it still remains. The site for the meeting-house was generously given to the society by Benjamin Muzzy. In 1835 Rev. O. A. Dodge was ordained and settled over the church, and under his ministry it was prosperous and many additions were made to its numbers. But after a ministry of five years he died in May, 1845, and was succeeded in the following year by Rev. O. M. Bowers, who remained in charge until February, 1846, when he resigned and left. Mr. Bowers is remembered as an ardent temperance advocate, and by his advanced opinions on the subject awakened much opposition. In the autumn of 1847 Rev. Ira Leland became the pastor, and continued in the service of the church for ten years. He was deeply interested in the public schools, and gave much attention to their welfare as chairman of the School Committee, and is remembered in the town as a devoted pastor and a useful citizen. After Mr. Leland left, in 1857, the society had no permanent pastor for many years, but the pulpit was supplied by various persons, for short periods of time, until Rev. Dr. Pryor came to live in the town, when he was employed as the preacher and pastor, though he was never settled

over the society. This arrangement continued for ten years, when he withdrew, owing to his declining health and the lack of success in the work. At this time the society had become very much reduced, and the idea of selling the meeting-house and abandoning the enterprise was seriously considered. Happily, through the protestations of one of the members—Mrs. Charles Tidd—the proposition was given up and the organization preserved for new growth and usefulness. Through Mrs. Tidd's influence, Rev. Russell H. Conwell was called to the pastorate, in the hope that he would revive the church from its languishing condition by his bold and aggressive spirit. The hope was speedily realized. He entered into his work with great enthusiasm, and his popular manners and style of preaching drew in numbers of new families and gave the society much additional financial strength. He began at once the remodeling and enlargement of the meeting-house. It was completely transformed without and within; a church parlor was added, a spire constructed in place of the old square tower and a bell procured; windows of colored glass were put in, and the handsome and commodious audience-room furnished with comfortable seats, and also a baptistery, making it substantially a new building. At the rededication a large congregation from the town and from sister churches in other places assembled to join in the services and express their hearty interest in the revival of the society's prosperity. Mr. Conwell's novel methods and style of preaching attracted large congregations, and his pulpit ministrations proved very acceptable to the people. In the two years of his ministry he certainly wrought a great change in the affairs and prospects of the society. At the end of this time he received a call to a Baptist Church in Philadelphia, which was accepted, and in that new and larger sphere his success appears to have been equally extraordinary. The church building and the revived prosperity of the society are due to his persistent labors and his executive ability—a monument to his zeal in the cause of denominational growth and up-building. Succeeding Mr. Conwell came Rev. Charles L. Rhoades, a man of marked ability and of sincere Christian conviction and faith. He toiled earnestly for the prosperity of the church, and made many devoted friends, both within and beyond the bounds of denominational lines. But the contrast between him and his predecessor was too great to secure the interest and appreciation of the people; and, after a ministry of about a year, he left to take charge of a church in West Acton. His withdrawal from the church produced some alienation and loss of members.

Rev. Wm. P. Bartlett followed him in a ministry of a single year, when he left for another field, finding it difficult to secure co-operation and harmony.

The present minister is Rev. Leonard B. Hatch, who was installed over the church in 1887. The society is now enjoying a good degree of harmony and pros-

perity. Many new families have been added to the congregation and new members to the church. A valuable organ has been purchased and placed in the audience-room beside the pulpit, adding much to the attractiveness of the service. An earnest, religious spirit pervades the church, and frequent prayer and conference meetings are held. A warm and hearty social life is also maintained. The number of families represented in the congregation is about seventy. There is a flourishing Christian Endeavor Society of sixty-two members connected with the church and a Sunday-school of 124 members with eleven teachers. The ladies' sewing society is large and active in good works. Thus the ministry of Mr. Hatch has been peaceful and prosperous.

THE SECOND CONGREGATIONAL SOCIETY.—The village of East Lexington and that portion of the town lying south and west of it, being remote from the First Parish meeting-house, naturally desired a place of worship more convenient of access. As early as 1833 they began to agitate the formation of a society in that village, and for this purpose they asked for one-half the income of the ministerial fund. The town refused to yield it and the demand was made and refused many times during the next ten years. Finally it was determined to try the experiment of establishing preaching in the east village. A hall was engaged for the purpose and a subscription opened to pay the expenses for one week. The first sermon was preached by Rev. Dr. Charles Follen, on April 5, 1835. The subscription was again circulated for means to supply another Sunday's preaching and again for a third; at the end of three weeks the people were so much encouraged that they made a subscription for six months and voted to employ Dr. Follen for that period. In this way the preaching was continued for a year, and after that from one year to another by a new subscription, Dr. Follen, Ralph Waldo Emerson and J. S. Dwight, being the ministers. In the mean time an organization was formed called "The Christian Association," for the maintenance of religious worship, and in 1839 a meeting-house was built costing about \$4000. Dr. Follen was chosen as their minister and was active in securing the means to erect the building and place the society upon a permanent basis. He was an able and fearless preacher, yet of a mild and gentle spirit. Driven from his native land for his devotion to liberal opinions in government and religion, he became an earnest advocate of the cause of the slave in this country and encountered great prejudice and opposition for that reason. But the people of East Lexington were heartily united in his support, and his influence in the village and town was steadily growing. Before the dedication of the new meeting-house Dr. Follen spent a few weeks in New York, where his wife was detained by sickness. On the night of January 5, 1849, while on his way home to attend the dedication, he was lost on the Sound by the burning of the

steamer "Lexington," that fearful disaster in which so many helpless people perished. It was a severe blow to the young society, by whom he was sincerely beloved. The event cast a deep gloom over the village and the town, and indeed over all this portion of the State, where many of the lost were well known. It was a long time before the society recovered from this calamity. No attempt was made to settle another minister during the next three or four years, but services of worship were maintained regularly by different ministers; among these were Revs. Mr. Burton, Charles Sewell and Samuel J. May, the latter at that time principal of the Normal School. After the division of the income of the ministerial fund among the four churches then existing in the town, "The Christian Association" organized as the Second Congregational Society, and proceeded to settle Rev. Thomas H. Dorr as their minister. His installation took place on the 2d of July, 1845, and he remained until August 1, 1849. Mr. Dorr labored earnestly for the prosperity of the society, but it was difficult to raise the sum required for current expenses, and he felt that his salary was too heavy a burden for the people, as well as an inadequate support for his family. Accordingly he resigned and left. In November of the same year William F. Bridge was ordained and settled as his successor, who also left after a ministry of two years. The pulpit was again supplied by a variety of preachers employed from Sunday to Sunday, until 1855, when Rev. E. P. Crufts became the stated supply. In 1860 Rev. Caleb Stetson took charge of the society and continued as their minister for three or four years, when Rev. William T. Stowe was employed.

THE FIRST UNIVERSALIST SOCIETY of Lexington was organized in the east village in the year 1845; but worship had been maintained for several years before this, and a meeting-house was erected as early as 1840. Rev. James M. Usher was the first minister, continuing about five years. He was succeeded by Revs. C. H. Webster, W. B. Randolph and J. A. Cooledge. The society, finding it difficult to raise the means for maintaining religious worship, was obliged to depend on a temporary supply of the pulpit, and finally united with the Second Congregational Society in the settlement of Rev. Mr. Stowe. A new organization was formed under the name of "The Church of the Redeemer;" the Universalist meeting-house was sold, extensive repairs were made upon the meeting-house of the Second Society, and both congregations united in worshipping there. These arrangements were finally consummated by an act of the Legislature in 1865, consolidating the societies. Under the ministry of Rev. Mr. Stowe the Church of the Redeemer was prosperous, and the attendance upon worship larger than ever before. Many new families were brought in, and there was a substantial increase of financial strength. In 1869 Rev. Mr. Stowe was called to the pastorate of the Unitarian Church in New Orleans, and the society reluctantly

accepted his resignation after a ministry of seven years. He was succeeded by Rev. W. C. Gannett, who was employed until 1873, when Rev. E. S. Elder was settled, who continued to minister to the society with acceptance until 1880. The relation was harmonious, and Mr. Elder won many friends outside his parish, and rendered good service to the public schools. He resigned to accept a call to the Unitarian Church in Franklin, N. H. After this the pulpit was supplied by various ministers, among whom were Rev. C. J. Staples, of Reading, and Rev. Mr. Gray, of Arlington, who held service in the afternoon. In Oct., 1885, W. H. Branigan, a student from the Divinity School of Cambridge, was called to the pastorate and ordained on the 15th of that month. He remained for two years, and was succeeded by Rev. Thomas Thompson, who came from Andover, N. H., and is still in charge. In 1886, by an act of the Legislature, the name of the organization was changed from the "Church of the Redeemer" to that of "Follen Church," in grateful remembrance of the noble Christian man who was the first minister. May it always bear that honored name, and prove by its good works and its earnest spirit a worthy monument to his memory!

HANCOCK CONGREGATIONAL CHURCH.—This church was organized May 20, 1868, with twenty-four members; fourteen families being represented in the congregation. The old Academy building was purchased by the church, remodeled and fitted up as a place of worship, making a neat and pleasant meeting-house. Mr. Edward G. Porter was employed to supply the pulpit during the summer. His ministrations proved so acceptable that in the autumn following he was invited to become the pastor, and on Oct. 1st was ordained and installed in that office. For the first four years the church received some pecuniary assistance in defraying the expenses of worship, but in the fifth year it became self-supporting. It has steadily grown in numbers, in financial strength, and in benevolent and missionary activity. The contributions of Hancock Church to various denominational organizations, outside of its own expenses, have been extremely liberal, and up to Jan. 1, 1899, amounted to \$6761.65, an average of more than \$300 per annum during the twenty-two years of its existence. The membership now numbers 169, and seventy families are included in the congregation. The system of weekly offerings has been in operation in the church for some time, and has proved very successful in raising funds for missionary and benevolent work. Connected with the church there are three ladies' societies engaged in home and foreign missionary enterprises. An active and flourishing Society of Christian Endeavor is also connected with it, having a membership of thirty-five. The Sunday-school contains sixteen classes, with a membership of 130 scholars. Many adult members of the congregation are connected with it as teachers or scholars. The

church is now about commencing to build a new meeting-house, having outgrown its present accommodations. A site has been purchased on Monument Street, opposite the Common, and a large subscription made towards the erection of a handsome and commodious edifice. The location is a prominent and beautiful one. It is designed to build of stone, and the structure will undoubtedly be a credit to the church and an ornament to the village. Hancock Church has been fortunate in retaining the same pastor through all the years of its history—Rev. E. G. Porter. He has faithfully ministered to its people now for nearly a quarter of a century, and has been the leader in all its enterprises. And not only in the work of the church, but also in all matters pertaining to the welfare and progress of the town, the schools, the Public Library, the Historical Society and other organizations for the improvement of society. In many ways he has proved a patriotic and valuable citizen. His relations with Hancock Church have been harmonious and his ministry successful.

CHURCH OF OUR REDEEMER.—The last of the Lexington churches to be organized was the Episcopal. There had been families of this faith in the town for some years before religious services were held. They worshipped with the other churches, or with the Episcopal Church in Arlington. But at length, after several accessions to their numbers from new families moving into town, it was thought advisable to begin services of worship. Accordingly the Town Hall was opened for that purpose, and the first service held there on April 8, 1883. The meetings were continued in the same place for a few Sundays, when, feeling much encouraged by their success, the congregation hired a hall on Main Street, near Vine Brook, and fitted it up for their use. After two years it was resolved to erect a house of worship; a lot was purchased at the corner of Merriam and Oakland Streets, and work commenced on the foundation in November, 1885. The building, a neat and attractive edifice handsomely furnished, was completed the following summer, and the first service held in it on the 24th of June, 1886. The cost of the building was about \$5000, including the site, and was paid for in full by the generous contributions of the people and their friends. It was formally dedicated by Bishop Paddock, June 16, 1887. The building is of wood, and has a seating capacity of about 150. The first organization as an Independent Mission was effected in April, 1884. Subsequently the members of the congregation organized as a corporation according to the laws of the state under the name of the "Parish of the Church of our Redeemer." This was effected on October 15, 1885, and the following officers were elected, viz.: Senior Warden, Robert M. Lawrence; Junior Warden, Albert Griffiths; Clerk, Alexander S. Clarke; Treasurer, George S. Jackson. The Rev. Wilford L. Robbins was ordained and installed as the first rector June 22, 1884. He remained in office

above three years, and resigned November 27, 1887, to accept an invitation to become the dean of the Episcopal Cathedral at Albany, N. Y. Mr. Robbins labored earnestly to build up the church, and was regarded as a man of rare gifts as a preacher and of fine culture.

The Rev. Gustavus G. Nicolls succeeded Mr. Robbins, and remained in charge until April 1, 1889, when he left. Since that time the church has been without a pastor but services of worship are maintained regularly, the pulpit being supplied from Sunday to Sunday by young men from the Episcopal Divinity School in Cambridge. Various organizations for charitable and social purposes are connected with the church, and a Sunday-school is maintained. The congregation is considerably enlarged during the summer and autumn months by transient residents in the town, many of whom are of that faith.

THE ROMAN CATHOLIC CHURCH.—The preaching of this faith appears to have been established in Lexington nearly twenty-five years ago, or about 1865. At first, services were held in private houses, by Father John Qualey, now of Woburn. The movement was organized as a mission annexed to the church in Arlington, and ministered to by the priest of that parish. When the Universalist meeting-house in East Lexington was sold, it was purchased for the use of the mission and worship was held there until the erection of a church building at the central village in 1876. The mission steadily grew in numbers and activity under successive priests, among whom was Fr. Harkins, now Bishop of Rhode Island, who was greatly respected and beloved by the people,—and Fr. Sheehan, his successor. In 1886 the mission was detached from the Arlington Parish and organized as a church under Fr. P. Kavanaugh, who was ordained and placed in charge that year, and who still ministers to this people. At the same time a mission in Bedford was organized and attached to the Lexington Parish, to which Fr. Kavanaugh, also ministers, holding services in both places each Sunday. The church edifice in Lexington is a large wooden structure, of Gothic architecture, substantially built, in the basement of which the services have been held. The audience-room above is now being finished and will be spacious and handsome, with a seating capacity of 700. The church building occupies a pleasant and prominent site on Monument Street, a little west of the Common, and has large grounds around it. Near it is a parsonage erected in 1885, and occupied by Fr. Kavanaugh. The church numbers about 160 families, and the congregation is undoubtedly the largest and the most regular in attendance of any in town. A temperance society is connected with it which holds its meetings on the first Sunday evening of each month. The church has been very active in various enterprises to raise money for the completion of its meeting-house, and its people have been most generous and successful in their efforts. They cherish

the expectation of being soon rewarded with an attractive and commodious place of worship.

CHAPTER XLVIII.

LEXINGTON—(Continued).

MISCELLANEOUS.

INDUSTRIES.—Lexington has always been chiefly engaged in agriculture. At the beginning it was known as The Farms, and it has remained almost exclusively a community of farmers until within the last twenty years, during which time a considerable addition has been made to the population of people engaged in business in Boston and other cities, who now make it their home. The products of the farms are chiefly hay, vegetables, fruit and milk. In the production of milk it stands among the highest, if not the highest in the United States, as shown by the census of 1880, when it reached a total of 721,000 gallons. A large quantity is sent from the railroad station in the central village to Boston. Some of this, however, is gathered in from the adjoining towns. But the number of men and teams engaged in collecting milk from the farms and retailing it to customers in Boston, Cambridge, Somerville, Woburn, Newton and Waltham, is very large. Indeed, it may be said to be the most prominent industry of the town. On some of the farms there are from twenty-five to fifty cows, kept for making milk. The extensive production of milk, of course, causes a large consumption of hay and grain, and much of this is brought into the town from other States. It is a branch of farming which continually enriches and improves the land, preparing it to yield more abundant crops of hay and vegetables. Considerable quantities of fertilizer are used, and the manure wagons are running half the year bringing the product of the city stables to increase the fertility of the fields. Lexington farms, on the whole, are well tilled, and rank among the most productive in Middlesex County. What profit is received from this industry in our town it is impossible to say. Few farmers keep accounts of receipts and expenditures in a manner which makes it easy to form any estimate of the balance. But it is not difficult to see that the profit is small and uncertain. The higher wages paid farm laborers, the large increase of taxes, the severe competition with the farms of the West and the vegetable gardens of the South, bear hard on the farmers of New England and reduce their profits to the minimum. Yet it is evident that the farmers are living in better style than ever before; their dwellings are more comfortable, their stock is better housed and cared for, their tools and vehicles

are more costly and convenient, their fields more productive and their life more enjoyable than that of the farmers of a hundred or even fifty years ago. This is especially true in the vicinity of cities and large towns. They may not be growing rich as rapidly as some others, but their condition is certainly improving, and their life probably has in it as much freedom and happiness as that of any class in the country.

There has never been much manufacturing in Lexington. No doubt this is due to the fact that it has very little water-power; none, indeed, that is permanent and reliable. In the early history of the town we find that saw-mills and grist-mills were built on Vine Brook and Munroe Brook, and for a long time were maintained there. A saw-mill was erected near East Lexington as early as 1650, probably by Edward Winship, who owned large tracts of land in that vicinity, a portion of which is still owned and occupied by his descendants. It must have been one of the earliest saw-mills erected in this part of the country. The privilege was occupied by a mill or a shop of some kind until quite recently, when the construction of the Arlington water-works rendered it no longer available. Other mills for simple mechanical work have been built in various parts of the town. Near the Burlington line, on Vine Brook, is a privilege used for a long period to run a grist and saw-mill; but all these have been abandoned, and now there is no mill in Lexington of any kind run by water-power. In the east village formerly an extensive business was carried on in the dressing of furs. Mr. Ambrose Morrill was engaged in it for about forty years, employing many people, and Mr. Eli Robbins carried on the same business for a time. The tanning of leather on a small scale was likewise established in that village, but was long since given up. None of these industries now remain in the town.

The principal manufacturing establishment in Lexington now is that of Mr. Matthew H. Merriam for making strip or ribbon trimmings. His manufactory is on Oakland Street, a one-story building, 200 feet in length, erected in 1882. The business was originally established in Charlestown in 1857, where it was conducted for more than twenty five years under the firm style of Merriam & Norton. After the death of Mr. Norton, in 1880, Mr. Merriam purchased his interest, and, erecting a convenient building for the purpose, removed the business to Lexington, which had previously been his home for some twelve years or more. The articles made at this establishment embrace a great variety of goods adapted for use in the manufacture of boots and shoes and articles of clothing, and are auxiliary to many other industries. They are made from fancy leather, morocco and textile fabrics of various kinds. The establishment is said to be the largest and best equipped of its kind in the country. Its goods find a

ready market not only throughout the United States, but also in foreign countries. The warehouse for the sale and distribution of these goods is located on High Street, Boston. From thirty to thirty-five hands are employed in this establishment at the present time. About half a million square feet of fine leather and morocco, and two hundred thousand yards of cotton cloth, including enameled cloth, silesia and fine cambric, are used in this manufactory annually, producing about eighteen million yards of goods. Mr. Merriam has associated with him in the management of the business his two sons, N. H. and E. P. Merriam. The work in the factory is light and pleasant, and many women and girls are employed who make excellent wages after learning to do it.

The Lexington Gear Works, belonging to Mr. George B. Grant, have been recently established in a building on Fletcher Street, erected for the purpose. This establishment manufactures all kinds of iron and brass gearing, from that having a diameter of an inch to that of six feet. The business requires a large amount of costly machinery and the best skilled labor. Mr. Grant is an educated and practical mechanic, and has built up an extensive business in Boston, where his works were originally established, and where the larger portion of them still remain. The plant in Lexington is now doing well, and he is receiving constant orders from many other departments of machinery business. He makes it a specialty, and the manufacture of gears is brought to a high state of perfection. It is designed to gradually enlarge the business by adding a foundry for the castings and other branches to make it more complete. It bids fair to bring considerable business to the town and add many skillful mechanics to the population.

The Lexington Grain-Mill of Mr. B. C. Whitcher is located near the central railroad station, and does a large business in preparing all kinds of grain and feed for market. This business has been established for several years, and has been steadily enlarged until an extensive trade has been built up in supplying the surrounding country. A steam mill was erected a few years since, and large quantities of grain are ground and retailed to the farmers of this and the adjoining towns.

Near the grain-mill is the lumber-yard of Mr. George E. Muzzy, where all kinds of lumber and building material are kept on sale. This business has been steadily growing, until it has become quite extensive and prosperous. It has stimulated building enterprises in the town, bringing the frames of houses and barns directly from the mills of Maine and New Hampshire, and rendering their erection more expeditious and economical. A large amount of building has been done in Lexington during the last few years, and Mr. Muzzy has been prompt and earnest in meeting the wants of builders. The outlook for continued and enlarging prosperity in his business appears most encouraging. He has recently associated with him as

a special partner Mr. J. W. Skillings, of Winchester, a man long engaged in the lumber trade, and bringing to the business valuable experience.

In the central village of Lexington there are three retail grocery-stores, two dry-goods and notion-stores, two tin and sheet-iron shops united with a general plumbing business, one dealing in furnaces and stoves, two meat-shops, also running peddling carts, one harness and hardware-store, one boot and shoe store, with a newsdealer's department, and one drug-store, two wheelwright-shops and two blacksmith-shops. These comprise the chief business establishments of the place. In East Lexington there are two retail stores, two blacksmith-shops, a meat market and a post-office. In the east village there is a population of several hundred. They are engaged in gathering up and retailing milk, in raising vegetables and fruits for the city markets, in the cultivation of plants and flowers, and in such industries as have been already mentioned. Several of the neighboring farms and residences are the country-seats of men doing business in Boston. The diversified and picturesque scenery of this section of the town makes it desirable for summer homes or for permanent residences.

THE HOTELS OF LEXINGTON.—Three-fourths of a century ago, when the travel was by stage-coaches and all transportation of freight by teams, the taverns of this town were numerous and well patronized. The principal thoroughfares were liberally planted with them, and elderly people call to mind no less than twelve, where good cheer was provided for man and beast. In all these, of course, spirituous liquors were sold, and also at the grocery-stores, numbering five or six. But the old taverns were obliged to pull down their signs and close their doors soon after the whistle of the locomotive was heard in our land.

Lexington now has but four places of public entertainment, viz.: the Willard House, in East Lexington, and the Russell House, the Massachusetts House and the Monument House in the centre village. Three of these, —the Willard, the Russell and the Massachusetts House —are chiefly patronized by summer visitors, of whom there are considerable numbers during the season. They are well kept, and families from the city often come here for a quiet country home many years in succession. People in feeble health, or exhausted by over-work, find the atmosphere pure and bracing, and a residence of a few weeks often proves wonderfully invigorating. To sickly children especially the Lexington air and life is stimulating and healthful. Thus the hotels are generally well patronized, and are sometimes filled to overflowing with guests. The Massachusetts House receives that name from the fact that it is the identical building erected by the State at Philadelphia for the accommodation of its officials and people at the Centennial. It was purchased of the State by Mr. Muzzy, taken down and brought to this place, where it was re-

erected and fitted up as a hotel. It remains, however, very much as it was originally, both without and within, and with an adjoining house affords pleasant rooms for many guests. If the old taverns have disappeared, so also have many of the old customs associated with them. Spirituous liquors are no longer sold under the protection of law in Lexington. A strong public sentiment is in favor of no license, and at the last municipal election it gave the emphatic majority of 200 votes.

LEXINGTON SAVINGS BANK.—This institution was incorporated in 1871. It began in a small way and has been steadily gaining in favor among all classes of people. The management from the start has been of the most economical and conservative character. Its officers have served the depositors for the most part without compensation. Mr. George W. Robinson, the president from the beginning, has devoted much time to its affairs and always declined to accept any compensation. The treasurer has been paid a small salary, but the whole cost of management for 1889 barely reached \$500, with 785 open accounts and deposits, including the guarantee fund of \$200,000. The institution has paid two and one-half per cent. semi-annual dividends for many years, besides steadily adding to the guarantee fund. The investments are chiefly in mortgages on real estate in this and neighboring towns. Many of the depositors are laboring men and girls at service in families. As a means of encouraging habits of industry and forethought, the savings bank has had a most salutary influence. In this way it has done much in helping laborers to buy land and make pleasant homes for themselves. A large proportion of the workingmen of the town possess such homes, and are sober, prosperous, respectable people. The savings bank occupies a room in the town building and is open on the afternoons of Wednesday and Saturday in each week.

WATER-WORKS.—Town water is supplied by the Lexington Water Company, a private enterprise, incorporated in 1881. About five miles of mains have been laid in the streets running through Main Street nearly to the Arlington line. The water is taken from wells in a meadow at the foot of Concord Hill, half a mile southwest of the central village. In addition to two large wells dug for the purpose, an artesian well has recently been drilled to the depth of 185 feet, of which 175 feet is in solid rock. This has a diameter of six inches and has been tested by forty-eight hours' consecutive pumping, which drew a large number of gallons per minute without exhausting the supply. From these wells the water is pumped into a stand-pipe having a capacity of upwards of 60,000 gallons, and standing at an elevation of 143 feet above the pumping station, and giving a pressure of sixty cubic feet per square inch at the town hall, half a mile distant. The town is supplied with fifty-one hydrants for fire purposes under contract with the company, at an annual cost of about \$1400. The water is taken

by about 250 consumers and 75,000 gallons are supplied daily. It has been pronounced by the State Board of Health to be of excellent quality, and stands near the top of their list for purity. The supply has been largely increased by the artesian well, and is now considered ample for the wants of the town for many years to come.

Closely related to a supply of pure water is a system of drainage. At present the drainage of the centre village is into Vine and North Brooks; but this is not sufficient or satisfactory. A competent committee has been appointed by the town to consider the subject carefully and report a system of drainage for consideration. This committee have had a thorough survey made and have examined different methods of disposing of sewage. The plans which seem most feasible are two: first, a system of disposing of it at some central point by means of purification through chemical agency; the other to make connection with the Mystic Valley sewerage system through Arlington. The first cost of the latter plan will be heavy, but in the end it may be the cheaper, for, when once completed, the annual expense of maintenance will be light; whereas the former method, though not very expensive at first, will require a considerable annual expenditure. The committee will be able soon to report the method, in their judgment, best fitted to meet the necessities of the case, and the town will be called upon to take final action upon this important matter. There is no doubt but an efficient system will be adopted and put in operation as speedily as possible. The subject is one of vital interest to a large proportion of the inhabitants.

THE GAS COMPANY.—This company was incorporated in 1874 with a capital of \$20,000, taken largely by citizens of the town. The gas is made from crude petroleum by the Henlow process. It gives a gas of great brilliancy and of about thirty candle-power against eighteen candle-power for coal gas. The consumption is small and only about one and a quarter million feet are manufactured annually. The company has laid four miles of mains on the principal streets and supplies the Town-Hall, the churches, the stores, the hotels, the railroad station and about 100 families, besides eighty-five street lamps. It has not been a financial success thus far, owing to the fact that the works were once destroyed by fire, and the mains at first laid were of wood, coated with asphaltum, which proved a failure and had to be replaced with iron pipe, causing a considerable additional expense. Experiments are now being made to manufacture a gas of less candle-power, which can be furnished at less cost to the consumer. The cost at present appears to be high, but owing to its greater illuminating power it is doubtful if the actual cost is more than coal-gas affording the same amount of light.

THE POST-OFFICE.—At first the centre post-office was kept in the Merriam house, on the east side of

the Common, or rather in a small room attached to the house and still standing. It remained there and in the store of the Merriams for a long period. The house being used as a tavern, and near to the meeting-house, made the place convenient for the people of the town. The post-office was open for an hour at noon on Sunday to accommodate people living away from the village. Afterwards Mr. John Davis was appointed postmaster, and he removed the office to his house on Main Street, opposite the railroad station. Here it remained for nearly twenty-five years, during which time Mr. Davis continued in charge. After his removal Mr. L. G. Babcock was appointed postmaster and has held the office up to the present time, now more than twenty-three years. Mr. Babcock was a soldier in the War of the Rebellion and saw hard service in the Western Army. He was severely wounded in the battle of Fort Donelson and remained all night on the field, his garments frozen to the ground in his own blood. His administration of the office has been satisfactory to the people, and in the political changes of these twenty years there has been no disposition to seek his removal. The office is now a third-class money-order office, and the business is steadily increasing. The number of pieces of mail matter received per month averages 15,000 through the year, and the number sent out amounts to 12,000 pieces.

THE LEXINGTON HISTORICAL SOCIETY.—This society was organized in March, 1886, for the purpose of awakening an interest in local history and preserving important matter relating thereto in danger of being lost and forgotten. It has a membership of men and women amounting now to more than 200. Regular meetings are held on the second Tuesday of the months of October, December, January, March and April, and special meetings as business may require, when papers are read by the members on subjects pertaining to the history of the town, and to families belonging to the town, with occasional papers of a broader scope. The admission fee is one dollar and the annual due fifty cents. The society has published a volume of its proceedings and of papers read by some of its members, making a book of 250 pages, with pictures of the first school-house of the town, of the second and third meeting-houses, of the old Munroe tavern, and of the old academy building. The papers contain much valuable information concerning some of the most prominent events and individuals connected with Lexington history. The large and striking picture of the battle of Lexington in the Town-Hall by Henry Sandham, costing \$4000, was purchased and hung there by the society, the money being raised by subscription through the solicitation of the members. Some valuable relics illustrating the life of our ancestors and the events of our history have been given to the society and are carefully preserved; books also and pamphlets that relate to important matters. The society has held memorial

services annually on the anniversary of the battle of Lexington, at which the children of the public schools were present and lessons of patriotism inculcated. On the hundredth anniversary of Washington's visit to Lexington, November 5, 1889, the occasion was observed by a banquet at the Russell House with appropriate songs and speeches. It was an evening of great interest and was heartily enjoyed by a large company. Thus the society has done and is doing an important work in stimulating the study of local history and preserving valuable knowledge and memorials of the past that were likely to be left behind and forgotten.

THE FIELD AND GARDEN CLUB.—This organization was formed for the purpose of improving the appearance of the town by cultivating a taste for well-kept side-walks, borders, yards and lawns; planting trees along the highways, and taking care of public grounds. It has a membership of fifty men and women, who pay an annual due for the objects of the society—one dollar for gentlemen and fifty cents for ladies. The members have accomplished a good deal in various directions for village improvement, securing appropriations from the town for concrete walks and street-crossings; caring for shade-trees along the roads, and inducing people to keep their grounds in order. The care of the Common has been given up to the club by the town and appropriations made annually to be expended by them in keeping it in the best possible condition. There has been a great change for the better in the appearance of the town in the last ten years, owing, no doubt, in part to the attention which has been called to these matters by the Field and Garden Club. The road-sides have been improved and much has been done in making concrete walks. A public taste has been fostered for adorning yards and grounds with flowering plants and shrubs, and this taste is constantly increasing, making the town more beautiful and attractive. The Field and Garden Club has also done a good work by contracting with nurseries for ornamental trees at wholesale rates and disposing of them to the people of the town at cost, thus encouraging the planting of trees by everybody. It has also secured favorable action from the town in regard to the location of side-walks, so as to leave a border for grass and trees between the walk and the road-bed, adding much to the beauty of the roads. In these and other ways this organization has proved a public benefit.

There are several social and secret societies in the town which appear to be in a fairly prosperous condition.

THE HURAM LODGE OF MASONS was formed more than a century ago and contained some of the leading men of the town. A hall was obtained and fitted up for their use in the old Munroe tavern, where their meetings were held. Owing to the death or removal of many of the members, the lodge became much weakened and was finally transferred to West Cam-

bridge, (now Arlington), where it is active and flourishing. Subsequently the **SIMON W. ROBINSON LODGE** of Masons was organized here and now numbers about sixty members. It appears to be well sustained and is the means of much usefulness in the community.

THE ANCIENT ORDER OF UNITED WORKMEN, Independence Lodge, No. 45, was chartered in September, 1882. This organization has a hall where the meetings are held, in Norris Block, and numbers forty-one members.

THE LEXINGTON YOUNG MEN'S CATHOLIC LYCEUM has been recently formed for intellectual and moral improvement. They have a hall in a new building lately erected on Main Street, and a membership of thirty. It promises to be an organization of great helpfulness to the members, and has the hearty co-operation of Father Kavanaugh, of the Catholic Church.

Besides these societies, there are two or three financial clubs among the young men, whose object is the saving and safe investment of their earnings. These organizations are carefully managed and have been eminently successful in their plans.

There are two book clubs, whose object is the taking of papers and magazines for the use of the members. A large number of the leading periodicals of this country and of England are subscribed for and passed from house to house each week, thus bringing within the reach of many families the best reading of the time. Women's clubs for mutual improvement, where books are read and discussed by the members, and lectures upon subjects of literary interest are given, form a striking feature of Lexington society. There are several of these organizations, and an elevating and refining influence goes out from them into many homes.

A male chorus, under the direction of a competent leader, has been maintained for several years, and many fine concerts have been given. The town contains a large amount of musical talent, both instrumental and vocal, and the male chorus has done much to develop it and cultivate an appreciation of good music in the community.

MUNICIPAL STATISTICS.—The assessor's valuation of Lexington for 1889 was \$3,193,000, and the amount of tax was \$42,000, making a rate of \$12.70 on a thousand. Total number of tax-payers was 1233, of whom 498 paid a poll-tax only. The number of dwelling-houses was 590. Number of horses, 549. Number of cows, 1248. Marriages registered during the year, 16; whole number of births, 50; whole number of deaths, 60.

The town holds some important trust funds for charitable objects. Besides that of Cary Library, already noticed, it has a cemetery fund amounting to nearly \$3000, for the perpetual care of burial lots in the town burying-grounds; the Bridge fund, founded by Samuel Bridge, amounting to \$4000, for the assist-

THE CARY HOMESTEAD,
LEXINGTON, MASSACHUSETTS

COL. WILLIAM MUNROE.

ance of deserving persons not in the alms house. Nearly one-half of this fund, however, came from the estate of Mrs. Elizabeth Gerry, daughter of the late Dr. Whitecomb, of this town; there being no relatives near enough to claim it, the State became the legal heir, but, on the petition of people of the town, it was turned over to Lexington, and given to the Bridge fund. The Gammell fund of \$500, bequeathed by the late Jonas Gammell, the income to be used for supplying additional comforts for the sick and aged at the alms-house. These funds are in charge of committees appointed for the purpose, and the income is used in accordance with the directions of the donors.

THE OLD FAMILIES OF LEXINGTON.—The Bridge family, long numerous, and very prominent, both in municipal and ecclesiastical affairs, is no longer represented by any male descendant of that name. The Bowman family, which, for several generations, occupied a leading position in society, and some of whose members long held the highest offices of the town, has become extinct, and the old homestead has long been in the possession of strangers. The Marrett family, descendants of President Dunster, of Harvard University, from which have sprung noted ministers, lawyers and statesmen, have no representative in Lexington to-day, and nothing but a cellar-hole now marks the place where they lived. The Hastings family has no one representing that name, long honored with the confidence of the people, though the old homestead is owned and occupied by Miss Alice B. Cary, daughter of Maria Hastings Cary, who did so much for the improvement of Lexington. The Tidd family was among the earliest settlers, and, for a long period, maintained an honorable position in the town, and rendered good service to the schools and churches, but it has wholly disappeared, and the house which they occupied for 200 years has fallen to decay. The Chandlers were formerly numerous and influential, both in political and military affairs, but only a very few persons bearing the name now remain among us. Thus, two and a half centuries have witnessed great changes; many families becoming extinct, and the descendants of others removing to the new States and cities of the West, spreading far and wide throughout the country.

Other families of the early inhabitants are still strongly rooted in the soil, though sending out shoots that have become vigorous and fruitful in distant places. Among these are the Munroes, the Cutlers, the Browns, the Reeds, the Harringtons, the Lockes, the Wellingtons, the Muzzys, the Parkers, the Fiskes, the Smiths and others who, in the two centuries and more of our history, have maintained their position in the town, and are still strong in numbers and vigorous in activity.

Many new families have come in during the last twenty-five years to make good the places of those who have disappeared, and the intellectual and moral

character of the people has suffered no deterioration by the infusion of new blood into Lexington society; on the contrary, the enterprise of its people, their interest in learning, their concern for the good name of the town, their devotion to its historic associations, their readiness to reach out the helping hand to those in distress, and their fidelity in the support of civil and religious institutions, were never more earnest and hearty than they are to-day. And we may confidently look forward to a future of permanent growth and substantial prosperity. The coming generations are sure to be imbued still more with the spirit of the fathers, and do no discredit to the old historic town.

BIOGRAPHICAL.

COLONEL WILLIAM MUNROE.

Colonel William Munroe was a direct descendant in the fourth generation from the emigrant, William Munroe, who settled in Lexington (then Cambridge Farms) about 1660, and who came to this country from England in 1652. The family was of Scotch origin, and, taking up an extensive tract of land in the eastern portion of the town, where for generations they resided, the district came to be known as Scotland, a name which it retains to this day. Colonel William was born in 1742, and received the name of his father, grandfather and great-grandfather, a name which has been perpetuated in the Lexington family down to the present time, a period of two hundred and thirty years, by men living within a mile of the original settler's home. Much of the land taken up by the first William still remains in the possession of his descendants, showing how firmly rooted the Munroes have been in Lexington soil. Colonel William was orderly sergeant of Captain Parker's company of minute-men. On the evening of the 18th of April, 1775, he was placed in command of a guard of eight men at the house of Parson Clarke to protect Hancock and Adams who were spending the night there. After the alarm of Paul Revere he conducted them to a place of safety about two miles distant and returned in season to form the line of minute-men on the Common before the British attack. He was actively engaged in the subsequent events of the war, at Cambridge on the 17th of June, in the siege of Boston and in the northern army which captured Burgoyne, where he was lieutenant in a Lexington company. After the conclusion of peace he became prominent in town affairs, occupying the position of selectman for nine years and representing Lexington in the Legislature for two years. He was appointed colonel in the Middlesex Militia, and marched his regiment in pursuit of the rebels during Shays' Insurrection. In 1822 Colonel Munroe personated Captain Parker in reacting the

battle of Lexington, forming the line of minute-men where he formed it on that eventful evening forty-seven years before, and using the words of Captain Parker to the men, which are now inscribed on the boulder placed on the spot where he stood.

Colonel Munroe kept the old Munroe tavern, long known and popular as a place of public entertainment. Here General Washington and his attendants were received in November, 1789, while the President was on his northern tour, and provided with a sumptuous dinner. The venerable house still remains in possession of his descendant, William A. Munroe, a grandson, and is little changed from its appearance a century and a half ago. It was used as a hospital by the retreating British army on the 19th of April, after coming within the lines of Percy's reinforcements, and before leaving it they piled up the furniture in the bar-room and set it on fire. Happily our men were able to extinguish the fire before much damage was done.

Colonel Munroe lived to the advanced age of eighty-five years, dying October 30, 1827, and leaving an honorable record of service to his native town and country.

HON. FRANCIS B. HAYES.

Mr. Hayes was a native of South Berwick, Maine, where he was born in 1819, when the State was still a district of Massachusetts. He was the son of Judge Hayes, of the York County Probate Court, a graduate of Dartmouth College and a lawyer of extensive practice in that portion of the State. The family of Judge Hayes consisted of twelve children, six sons and six daughters, all of whom lived to adult age. The mother was the daughter of Hon. John Lord, a family some of whose members were long connected with Dartmouth College. Thus Francis was born and grew up under conditions favorable to literary tastes and social refinement. He attended the academy in his native town, and completed his preparatory studies at Exeter, New Hampshire, entering Harvard at the early age of sixteen and graduating at twenty. He commenced the study of law in his father's office, and after completing the usual course was admitted to the Suffolk County bar of Boston. Here he acquired a reputation for industry and ability in his profession and secured an extensive and lucrative practice before reaching his thirtieth year. Being employed to investigate the affairs of an embarrassed railroad, he was so successful in unraveling its difficulties and placing it in a sound and prosperous condition that his reputation as a sagacious business man was established and he was much sought after in similar cases. Great confidence was placed in his judgment in railroad building and management. Large enterprises, involving the expenditure of many millions, were placed in his hands. He was wonderfully successful in the construction of new roads in the West, and in reorganizing those which had become

embarrassed and unremunerative through unwise management. Mr. Hayes became deeply interested in the colonization of Kansas with Free State men when that territory was organized and opened to settlement. He was an active worker in the organization known as the Emigrant Aid Society, which accomplished much in saving that State from the control of slaveholders, and consecrating it to freedom. In 1873 he was elected to the Lower House of the Legislature from Boston, and in the following year to the Upper House. He was instrumental in carrying through a bill for reducing the hours of labor in the factories and shops for women and children to ten hours per day, and other legislation to protect them in manufacturing establishments from overwork and abuse. Mr. Hayes was identified with the Republican party from its organization, and received the nomination for Congress in the caucus of the party for the Fifth District in the election of 1884. He would undoubtedly have been elected had not death snatched him away from the honors that seemed so near.

In his Lexington home Mr. Hayes took great delight and pride. He bought originally a few acres of the old Hancock-Clarke farm and gradually added to it by additional purchases until it became a magnificent estate of more than 400 acres. For twenty years he was buying piece after piece of adjoining land, laying out fields and pastures, planting gardens and orchards, and bringing together there every species of plant, shrub and tree fitted for the soil and climate. He showed fine taste, and he spared no expense in adorning the grounds with whatever is rare and beautiful in nature from every part of the world. Under his care and skill the place became a paradise of gardens, lawns and groves.

For several years and up to the time of his death Mr. Hayes was president of the Massachusetts Horticultural Society, and at its exhibitions his roses, rhododendrons and azaleas won many prizes and much well-deserved admiration.

During the last year of his life he was engaged in erecting a noble mansion built out of the field stone on his estate for his permanent residence in Lexington. This was nearly completed at the time of his death, and is undoubtedly one of the most tasteful and sumptuous dwellings in Massachusetts. His death occurred after a brief illness on the 21st of September, 1884, at the age of sixty-four years. In many ways he was a great benefactor to the town, not the least of which was in opening his extensive and beautiful grounds to the people, thus providing a public park for their instruction and enjoyment.

DAVID HARRINGTON.

The ancestor of the Harrington family in this country appears to have been Robert Harrington, who settled in Watertown about 1642. From his thirteen children have descended branches that are

"OAKMOUNT."
RESIDENCE OF THE LATE HON. FRANCIS B. HAYES.
LEXINGTON, MASSACHUSETTS

now scattered throughout New England and indeed throughout the United States. When his grandchildren or great-grandchildren, Robert and John, came to Lexington it was impossible to determine; but their names are found upon the town records as early as 1713. They were cousins, and from them have descended a large number of families in this and the adjoining towns. Indeed, the name on the town and church records of Lexington is one of the most numerous of all. Nor is it a name unknown to honorable events and notable characters in the history of the town. Eleven Harringtons were on the roll of Captain Parker's company of minutemen, and two of them, Jonathan and Caleb, were killed in the memorable encounter on the Common, April 19, 1775.

David, the subject of this notice and the son of Solomon, was born in this town January 2, 1790. He married, December 10, 1810, Elizabeth Francis, by whom he had two sons, Sylvester and Charles, and one daughter, Mary, who became the wife of Charles J. Adams, for a long time keeper of the House of Correction at East Cambridge.

"Uncle David," as he was familiarly called, learned the business of dressing furs under the direction and in the employ of Ambrose Morrill, who had an extensive establishment at East Lexington. He became an expert in the preparation of furs for market, and his services were highly prized by his employer. Here about thirty years of his life were passed, and when Mr. Morrill retired from business, "Uncle David" began the manufacture of peat in the Great Meadows, near the village. In the belief that wood in New England was being rapidly exhausted, and that a substitute for it must be found, peat was regarded as an important article for fuel. Accordingly great preparations were made for digging and preparing it for market, and much swamp land was bought up for this object. Happily people's fears proved groundless, and coal ultimately took the place, to a large extent, of both peat and wood. The manufacture of peat was a losing business, and the Great Meadows at East Lexington were finally abandoned to the town of Arlington, for their water-works supply. "Uncle David" and the other proprietors were thus driven out of the old swamp, where for a long period they had been producing this kind of fuel.

David Harrington was well known in Lexington, all through his life, as a man of sterling honesty, and was much respected by his friends and fellow-townsmen. He was gathered to his fathers in a ripe old age, and is still pleasantly remembered in the places that once knew him, but will soon know him no more forever.

CHAPTER XLIX.

STOW.

BY REV. GEORGE F. CLARK.

THE town of Stow is situated in the west part of Middlesex, and adjoins Worcester County. It is about twenty-five miles a little north of west from Boston, and nearly eight south of west from Concord. It was originally noted for two quite conspicuous hills, known as Pompsittacutt and Shabbukin, which are now respectively within the bounds of Maynard and Harvard. There are, however, within its borders, at the present time, four hills from which most charming views can be obtained, viz.: Spindle, Marble, Birch and Pilot Grove, all within about a mile of the centre; and the last, formerly called "Strong Water" Hill, lies northerly, and in close proximity to the centre meeting-house, and is crowned with a cluster of beautiful pines. There is a lesser hill at the southeasterly part of the town known as "Boone's" Hill, taking its name from the first settler who located near it. The principal stream of water is the Assabet River, rising in or near Westboro' and flows through the southerly part of the town, and joins the Sudbury River at Concord. Assabet Brook, sometimes on the old records called "Elizabeth," rises in the northwest part of the town, near the corners of Harvard and Roxboro', and flows southerly around the southern slope of Spindle Hill, thence northerly and easterly, and empties into the Assabet River, near the line of Maynard. Heath Hen Meadow Brook rises in the south part of Roxboro', flows southerly near to the northern slope of Pilot Grove Hill, thence northeasterly into Acton, forming a sort of ox-bow. What was formerly known as "Strong Water" Brook flowed from the northerly side of the little pond at the centre of the town towards South Acton. But many years ago Rev. Mr. Newell dug a trench on the southerly side of the pond and drained its waters into Assabet Brook. The only other natural pond is Boone's, near which the first settlement was made.

There are three villages in the town, viz.: The Centre; another about a mile easterly, called the Lower Village, where the first meeting-house was built; and Rock Bottom, at the southerly part of the town, near the border of Hudson, which is the largest of the three.

By the incorporation of Concord, Sudbury, Marlborough, Lancaster and Groton, there was left in 1660, surrounded by these towns and the Indian plantation of Nashoba, (now Littleton), quite a large tract of land called Pompsittacutt by the Indians. It extended from Sudbury on the east to what is now Lunenburg on the west, and from Groton on the north to Marlborough on the south.

It is now bounded north by Roxboro' and Acton,

east by Maynard and Sudbury, south by Hudson, and west by Bolton and Harvard. Its area is 11,021 acres; valuation in 1885, \$955,721. The population in 1880 was 1015. A few years ago it was reported to be the third town in the State relative to healthiness. The Marlborough Branch of the Fitchburg, and the Central Massachusetts Railroad pass through its southern border.

The earliest known settler upon the original territory was Matthew Boone, about 1660, near to Sudbury and Marlborough. He is said to have come from Charlestown. About the middle of February, 1676, he was killed by the Indians, as appears from an inventory of his property taken April 3, 1676. His wife's name was Ann. We have learned nothing more about him. About three years later John Kettell is supposed to have settled in the west part of the town, near Lancaster line, or "Nashaway," as it was originally called. He is believed to have previously resided at Gloucester. There is, however, some doubt as to his identity. There were two men of the same name who were contemporaneous, both of whom were "coopers," and by different writers both have been declared to be the settler at Pompsittacutt. The second of the name was from Charlestown. The evidence, on the whole, seems to favor the man from Gloucester as being the settler. The traditional story of his being killed by the Indians February 10, 1676, appears to have no foundation in point of fact. His wife and two daughters were taken prisoners with Mrs. Rowlandson at that time. While they were captives an Indian sent a letter to John Kettell saying, "Your wife and all your child is all well, and all them prisoners taken at Nashaway is all well." This shows that Kettell was living some time after he is said to have been slain. Furthermore, he died at Salem October 12, 1685, and the inventory of his property was taken November 10, 1685, wherein his farm "near Nashaway of 300 acres" is mentioned. His wife was Elizabeth Allen, of Salem, who married her second husband, Samuel Corning, in 1688.

There were "laid out unto the worshipful Maj^r Eleazer Lusher," in 1665, 500 acres of land at Pompsittacutt, west of Sudbury, and bounded northerly by what is now Acton. The same year 500 acres more were assigned to Capt. Daniel Gookin, bounded northerly by Nashoba, and southeasterly by what is now Acton. Some three years later, 150 acres were set apart to Richard Heldridge (Hildreth?), bounded northerly by Gookin's land, southeasterly by Acton. Probably about the same time some 200 acres were apportioned to John Aleocke, on or near Assabet River, doubtless just above Rock Bottom, which, June 6, 1671, was confirmed by the General Court to his orphan children. It is presumed that none of these persons ever settled upon their farms. There were doubtless others who had taken up land in this unincorporated territory previous to 1670.

INCORPORATION. The first direct action looking

to the incorporation of Pompsittacutt as a town is embodied in the following petition to the General Court, of John Hayward, George Hayward, John Hayward, Sr., Richard Heldridge, Jos. Lampson, John Law and others, of Concord. They say, "having observed a certaine tract of land environed with the bounds of Concord, Sudbury, Marlbury, Lancaster, Groaton and Nashoby, within which is certaine farmes . . . which we judge may be convenient to make a plantation, wee therefore yo^r petition^{rs} request the favour of this honoured Court to appoint some persons to set the bounds of townes and farmes, that thereby yo^r petition^{rs} may see what incourage^{mt} they may have to make farther addresses unto this honoured Court for accommodations for themselves, families being at the present much wanting therein." This petition had no date. But the General Court, on the 13th of October, 1669, appointed "Left. Wheeler, of Concord, Deacon John Haynes, of Sudbury, James Parker, of Groaton, John Moore, of Lancaster, & Wm. Kerby, of Marlborou," or any three of them, to view the premises mentioned, and "make report to this Court of the qualitey and quantity thereof, . . . whether it be capable (if the farmes belonged to it) to make a village." On the 12th of May, 1670, George Hayward, Joseph Wheeler, Thomas Wheeler, John Hayward, William Butterick, Sydrack Habgood, Stephen Hall, Joseph Newton, Edmund Wigley and Richard Heldridge, inhabitants of Concord, Chelmsford and Sudbury, sent a petition to the General Court relative to this territory. But it is so mutilated and defaced on the record-book that its full import cannot be stated. It seems to be desired that the land may be granted to them and assistance rendered, probably for the support of a minister, "that the neglect of God's laws may be prevented, & the Gospel of Jesus Christ be preached and encouraged." The committee appointed by the Court reported May 31, 1670, saying they had viewed the land petitioned for, "and find it, by estimation, as followeth, viz.: ten thousand acres of country's land, whereof five hundred acres of it is meadow, the greatest parte of it is very meane land, but wee judge there will be planting land enough to accommodate twenty families; also there is about four thousand acres more of lands that is taken up in farmes whereof about five hundred acres of it is meadow. There is also the Indian plantation of Nashoby, that doeth border on one side of this tract of land, that is exceeding well meadowed, and they doe make but little or no use of it." The Court then granted "y^e tract of land . . . unto George & John Hayward, Joseph Wheeler, Sydrack Habgood & the rest of the petitioners, wth others that shall joyne to it wth them to make a village, provided that the place be settled wth not lesse than ten families wth in three years, & that a pious, orthodox and able minister be mainteyned there." Capt. Daniel Gookin, Mr. Thomas Danforth and Mr. Joseph Cooke, or any two of them, were

appointed a committee to order and regulate the settling of the village, in all respects, until further orders. No immediate steps towards a settlement seem to have been taken; but as the Court required that ten families should be settled thereupon within three years, the committee in charge chose, December 4, 1672, another committee "to lay out in the most convenient places Twelve Lots, containing fifty acres of Land as neare together as may be." The petitioners and their associates were to cast lots for these homesteads, provided they should "be men of good and honest conversations and orthodox in religion . . . and Engage according to their ability to contribute towards the maintenance of a godly minister amongst them, and alsoe doe Settle upon, Build & Improve said Lots within two years from the beginning of May next," or their lands would be forfeited and assigned to others. These homestead lots were probably soon drawn. But some of those securing lots forfeited them by not complying with the conditions. The proprietors therefore make complaint to the committee in charge, who, April 30, 1675, order that all persons claiming any rights in the Plantation should meet at Cambridge, at the ordinary, on the 17th day of May, at eight o'clock, to make answer for their neglect; and if they did not appear at the time and place they were to be considered as utterly relinquishing their claims. What was done in May we do not know. But June 1, 1675, the committee issue further directions relative to the occupancy of these lots. The alarm caused by the breaking out of King Philip's War stayed further proceedings until the return of peace. How soon the inhabitants returned does not appear. We find no definite record of action until October 4, 1680, when Stephen Hall, Boaz Browne, Samuel Butterick, Ephraim Heldreth, John Butterick and Jonathan Prescott make an agreement with John Hayward, of Boston, who was equally interested with them in the plantation, that he should have a lot of land laid out and secured to him, where he should choose, with a full share of the first division of upland and meadow, he paying his full share of the ministerial charges, etc. From a document dated 1681 we learn that the following persons were owners of the twelve original lots drawn by the proprietors: No. 1 was for the minister; 2, Boaz Browne; 3, Gershom Heale; 4, John Butterick; 5, Ephraim Heldreth; 6, Thomas Stevens; 7, Stephen Hall; 8, Samuel Butterick; 9, Joseph Freeman; 10, Joseph Dawby; 11, Thomas Gates; 12, Sydrack Hapgood. All these except Thomas Stevens, Joseph Freeman, Thomas Gates and Sydrack Hapgood are believed to have come from Concord. Hapgood was killed by the Indians near Brookfield, August 2, 1675, in Philip's War.

These homestead lots were on the northerly and southerly sides of the old road laid out in 1646, between Lancaster and Sudbury, passing by where Francis W. Warren now lives, and over the river

beyond the almshouse. The most westerly of these farms was that of Thomas Gates, where Charles A. Whitney now resides, and two of them, belonging to Joseph Dawby and Sydrack Hapgood, were over the river near Sudbury. Besides those having the foundation lots, just named, the following persons had lots granted them at the dates given. Those in *italics* were from Concord: John Wetherby, December 18, 1779; Richard Whitney, Sr., June 3, 1680; *James Wheeler*, April 8, 1681; Moses Whitney, April 8, 1681; Henry Rand, January 13, 1682; *Isaac Heald*, January 13, 1682; *Israel Heald*, March 13, 1682; Benjamin Bosworth, August 7, 1682; Benjamin Crane, December 23, 1682; *Joseph Wheeler*, April 19, 1683; *Jabez Brown*, June 15, 1683; Richard Whitney, Jr., June 15, 1683; Jabez Utter, June 15, 1683; Thomas Stevens, Jr., June 17, 1684; *Boaz Brown, Jr.*, June 17, 1684; *Samuel Hall*, June 17, 1684; *Thomas Daby*, June 17, 1684; Mark Perkins, January 1, 1685; Richard Burke, Sr., March 1, 1685; Roger Willis, March 1, 1685; Thomas Williams, March 1, 1685; Stephen Randeil, March 10, 1686.

As the plantation increased in numbers, the inhabitants soon felt able to manage their own affairs; and the court's committee might have desired to be relieved, in some measure, from their supervisory duties, and hence, on the 11th of October, 1681, at the request of several of the proprietors and inhabitants, the committee appointed Thomas Stevens, Boaz Browne, Thomas Gates and Stephen Hall as overseers of the place, with the powers of selectmen, subject, however, to instructions from the court's committee. The following year the population had so increased that it was deemed advisable to have a record of the proceedings kept. And on the 24th of April, 1682, the committee appointed John Hayward, of Boston, scrivener, town clerk, to record all orders of the General Court and committee referring to the plantation; and all persons concerned were to bring to Mr. Hayward all orders and grants to be recorded. The committee also ordered, with the general consent of the inhabitants, that each one should contribute towards all public charges in proportion to the number of acres allotted them, and that no second division of lands should be made until forty lots had been settled upon, and no person was to have more than fifty acres of upland and fifteen of meadow. It was also ordered that as Mr. John Hayward had been at considerable expense in obtaining the grant of land, he should be abated the charges that would arise for the coming seven years, excepting those for the minister and the meeting-house, on condition that he keep the register of the town until further orders.

Prosperity seems to have attended the plantation, and the people became anxious to manage their own affairs, and take their place among the towns of the Colony, and that the clerk of the proprietors should be a resident of the plantation. Therefore they bring the matter before the court's committee,

who, on the 9th of April, 1683, chose Mr. Thomas Stevens clerk, and Mr. Hayward's record-book was to be delivered to him. The inhabitants were also directed to meet and choose five selectmen and a constable to order and manage their town affairs for the ensuing year.

The people were ready and abundantly willing to obey the order of the committee, and on the 19th of April they met and chose Sergeant Benjamin Bosworth, Thomas Stevens, Stephen Hall, Boaz Browne and Joseph Freeman, selectmen, and Thomas Gates, constable. As Thomas Stevens had been previously appointed town clerk, it was deemed unnecessary to choose another. Subsequently the selectmen appointed John Wetherby and Gershom Heald, tithingmen. The preliminary steps towards the organization of the town having been taken, and as the General Court was soon to assemble, it was decided to make immediate application to them, through the committee, for an act of incorporation. Early in May a consultation was held and a petition was prepared and forwarded to the prudential committee, and Benjamin Bosworth and Stephen Hall were empowered to present it. The document is quite long and refers to many matters. Among other things they say, "We are sensible enough of o' want of yo' wisdom to help advise us, & are sory y' anything of o' weeknesse should seem to discoridge you, and looking upon o'selves something to yong to be cast of . . . wee doe in all humility returne yo' Hono^r all possible thankfulness wee are able for all yo' care & time & paines bestowed upon us, . . . & whereas many things lye upon us & presseth us hard, by sundry Knotts y' remaine yett to bee untied, & many great Disburst^{mt}, . . . about settling an able & pious minister & other Church work relating thereto, making bridges & other unavoidable heavye secular matters y' will sorely pinch a poore people in soe yong a plantation where they can not yet raise competent, ordenary food & Rayn^{mt}, our prayer is that wee, yo' poore petitioners, might have accesse unto you for advise in some emergencies & y' yo' Hono^r will please still to patronize us so flarr as to bee a means by y' Hono^r Gen^l Court at their next sessions to free us from Country publick Charges & Rates a while Longer till wee becom more Tollerably able to doe o' duty therein, in o' measure as all other Towns in this jurisdiction are, & y' you will not please wholly to cast us of till you have alsoe procured for this plantation some suitable, comly English name."

The General Court, satisfied that the people could act for themselves, on the first day of the session, May 16, 1683, old style, or May 26th, new style, decreed that the place should become a town, and allowed the choice already made of selectmen and constable, etc., and gave the name of *Stow* to the new town, and freed the inhabitants from the country rates for the next three years. We have no record of any public celebration of the event by the people,

though they doubtless rejoiced that they were of age to act for themselves.

INDIANS.—There is no doubt that Indians frequented the territory of Pompasittacutt, and that some of them laid claim to lands within its bounds. Indian arrow-heads and hatchets have been found in different localities. Soon after the incorporation of the town it was decided to extinguish, if possible, all the Indian claims to land. Hence, December 26, 1683, the town "ordered yt Stephen Hall & Boaz Brown, who have Treated with Benn Bowhugh or Piphuh, Indian, in deferance to ye purchasing of all his Rights in lands, meadows, swamps lying within this plantation, and have agreed with him, are ordered and Impowered by ye Town to Ishue yt matter in ye Town's behalf. The purchase and other charges to bee defrayed by ye proprietors." It was further ordered "yt ye above^d Stephen Hall and Boaz Brown shall Indever to find out all those Indians yt pretend to any right of land in this plantation, & to treat with them" relative to the purchase of their rights. A rate of four pounds was made to pay Benn Bowhugh for his lands. In the following February a five-pound rate was made "to pay for y^e Lands purchased of James Speene, Ben Piphue and y^e rest y^e clame a right to lands in Pompasittacutt, . . . the whole purchase being Tenn pounds." March 6, 1703-04, a committee was appointed "to Defend our land purchased of Benn Bohow, Lying on y^e south side of y^e River . . . against any persons that may pretend to have rights in y^e lands." It does not appear what was the result, nor do we know what was the fate of "James Speene and Benn Bohugh." But, February 8, 1715-16, it was voted to sell "the Indian planting land" upon the river below Zebediah Wheeler's.

During King Philip's War the hills and swamps of Pompasittacutt were doubtless the rendezvous of his warriors when about to make a raid upon Sudbury or other neighboring places. Tradition—a very unreliable authority—says that the Indians held a consultation upon Pompasittacutt Hill, overlooking Concord and Sudbury, as to which of the towns they should attack. One of the chiefs said: "We no prosper if we go to Concord. The Great Spirit love that people. He tells us not to go. They have a great man there. He great pray." This was an allusion to Rev. Mr. Bulkley, the minister of the town, who seems to have been known to the Indians as a distinguished man, and they feared his influence with the "Great Spirit." Hence Concord was spared and Sudbury suffered.

ECCLESIASTICAL.—The first settlers of the town, like most of those who peopled the State, were pious men and women who believed in the abiding presence of an Almighty Ruler of the universe, to whom they were even more accountable than to the civil magistrate. Hence they deemed it all-important to provide for the stated worship of God, that their children might "enjoy the means of grace." We have seen

that it was required of those to whom land was allotted, that they should be of "good and honest conversations and orthodox in religion." Every precaution possible was taken to exclude from the settlement all who were heedless violators of the laws of God and man. Being thus of good repute, the inhabitants, as soon as the management of all matters came into their hands in a corporate capacity, began to look around for an able and pious minister of the Gospel. Doubtless there had been occasional preaching, perhaps by the Concord minister, before the town was incorporated. Be this as it may, on the 20th of June, about six weeks after they were made a town, a five-pounds tax was voted to defray the minister's charges for what had been already expended, and also for Mr. Green, who had "given some encouragement to be helpful to us on ye Lord's days as his occasions may pr mitt." The rate was to be paid a quarter part in money, and three-quarters in such corn or other grain or provisions that would be acceptable to Goodman Hall for what was past and for the future.

This "Mr. Green" was undoubtedly Percival Green (H. C. 1680), son of John and Ruth (Mitchelson) Green, of Cambridge. He preached for a time in Wells, Me., in 1683, but died July 10, 1684, aged twenty-five years. He was never ordained, and could have preached in town only a short time. Nearly two years elapse before any reference is made to another minister. A rate was made "June 5, 1685, to pay what ye town are indebted to Mr. Parris for his pains amongst us." He was not, probably, invited to settle, for on the 21st of August, following, it was voted that Mr. Parris should have fifteen shillings for every Lord's day he had preached, except the first three days, and a tax was made and ordered to be collected and forthwith paid to Mr. Parris, who probably soon after left town. This was Rev. Samuel Parris, who afterwards took a very conspicuous part in the Salem witchcraft delusion. In the latter part of 1685 Mr. James Minot (H. C. 1675) commenced preaching. He seems to have supplied for about one year. At first he was paid 12s. and 6d. per Sunday in money, and a contribution was to be taken up every Lord's day. It was voted in July, 1686, to pay him ten pounds per quarter, half money and half corn and other provisions, or all in money, if he would accept the same salary as he had been previously paid. Mr. Minot belonged to Concord. There were, at this time, only thirty-seven ratable polls or estates in town.

John Butterick and Gershom Heald were directed, November 7, 1686, to go to Lancaster "to discourse with Mr. William Woodrop, to give him a solemn invitation to come and dwell and settle with them, and to ascertain his terms," etc. Mr. Woodrop forthwith came and preached one Sunday. Negotiations were then opened with him, and he came into the meeting and promised "to dwell and settle in town, . . . judging ye call and unanemouse concurrence of

ye people to be a call from God." The town then voted to pay him forty pounds, half money and half corn and grain. A committee was chosen December 13, 1686, to report in writing what it was expedient to be done relative to the full settlement of Mr. Woodrop. The next day they report in favor of building with all speed a frame dwelling-house. They desired it to be of such a character that he could invite his wife to come from her English home and abide with him.¹ A few days later the selectmen were directed to make a written contract with Mr. Woodrop, to be signed by each party to prevent future mistakes—a very wise measure. But a sad disappointment awaited the people. About the middle of March following, Mr. Woodrop informed the town that his wife would not come to him, and hence he "concluded his call was to go to her!" Strong efforts were made to induce him to remain, but without success. He preached only a few weeks longer, and, about the 12th of July, he sailed for England, having relinquished all claims to the ministerial land.

Though disappointed at the turn of affairs, the inhabitants were not discouraged. On the 30th of May, 1687, a committee was chosen to go to Concord to induce, if possible, Mr. Minot, a former preacher, to accept a call. If he would not come, then they were to speak with Mr. Mitchel, at Cambridge, and if he refused they were to apply to young Mr. Whiting, of Billerica. But all these men declined. Soon, however, another candidate was found, and, August 8th, a rate was ordered to pay "Mr. Overton, minister," for three months. With the hope of securing him as a pastor, another attempt was soon made to build a parsonage, and have it completed in about three weeks. But as this was not done, Mr. Overton called the attention of the town to this fact. Hence, October 24, 1687, a committee was chosen to oversee the matter. Directions were given about the dimensions of the house, which was to be finished by the 1st of April, 1688. Two of the committee, from some cause, withdrew, and the other member was empowered to go on with the work. The house was erected, but either before or soon after Mr. Overton concluded to remove from town. Whence he came or whither he went is unknown. Yet these men of "good and honest conversations" still persisted in their search for a minister. In the process of a year or more a new candidate appears. His name was John Winborne. He was given a unanimous call, and had accepted it previous to August 19, 1689, for on that day a long agreement with him was concluded. The substance of it was that his salary should be forty pounds yearly, "ten pounds in money, ten pounds as money, and

¹ The house was to be "26 or 27 foote long (8 or 9 foote thereof to bee for ye chimnies), ye rooms left to bee 18 foote square at least, two fire-places to be below in ye chimney and one hearth in ye chamber, a lean-to to bee ye breadth of ye frame afore^d at ye chimney end of ye house, to be carried out at ye eyle 10 or 11 foot from ye chimney, with a Seller under ye said house."

twenty pounds in pay." He was to have all the lands allotted to the ministry, and the dwelling-house erected thereon, and other lands specified, while he should remain the minister "and live and Dye amongst them in ye work of ye ministry, except upon some special and unexpected and unavoidable providence of God." But after the expiration of five years, if he still remained, the lands and dwelling-house were to be confirmed to him and his heirs forever. If, however, he did not remain five years, the whole ministry lot, etc., was to revert to the town. If his wife should become a widow within five years she was to have the use of one end of the house for two years. Thus all things were arranged for his permanent residence in town. In about six years, however, some difficulties arose, say the records, "from himself and family which have been matter of great offence at home, besides ye noises and scandall abroad." A meeting was held June 24, 1695, and Mr. Winborne was summoned to attend, but he refused to do so, and is supposed to have soon left town. What was the trouble does not clearly appear. Though preaching for about six years, Mr. Winborne seems never to have been formally settled, nor was any church organized during his ministry. As he had remained more than five years after the terms of his settlement were concluded, he claimed the parsonage and ministry lot as his property. The town thought differently. Accordingly, December 14, 1696, a committee was chosen to demand a peaceable possession of the premises, and if this was denied they were to appeal to the courts. But bolding the fart, Mr. Winborne refused to surrender. A lawsuit followed, and it is believed Mr. Winborne won the case, as the town seems afterwards to have purchased the property.

Once more the pulpit is vacant, and no active measures seem to have been taken to procure a preacher until late in the autumn after Mr. Winborne left. Towards the end of December, after one or two ineffectual attempts to supply the pulpit, application was again made to Mr. Minot, of Concord, to be helpful to them on the Lord's day, but he declined. Mr. John Woodward (H. C. 1693), of Dedham, was soon engaged. Having preached one Sunday, a committee of the town, Jan. 27, 1695-96, made overtures to him to occupy the pulpit for some months, and were willing to give him at the rate of £35 per year, although they were in very straitened circumstances. It is supposed that Mr. Woodward supplied the pulpit during the winter. He was not anxious to remain long, but the people were unwilling to give him up. Therefore on the 13th of April, 1696, messengers were sent to Dedham to urge him to return. But in case he refused they were to ask Mr. Mors, of Dedham, to occupy the pulpit. Mr. Woodward declined to come back. July 11, 1696, Mr. Joseph Mors (H. C. 1695) was called to be their minister. He came and preached for some time, but gave no answer to the call. After waiting six months he was again invited

to settle, in consequence of the satisfaction he had generally given. This unanimous call did not meet with a favorable response.

Failing to secure the services of Mr. Mors, it was ascertained that a former preacher, Rev. Samuel Parris, was disengaged and might perhaps be glad to return to town. Accordingly, Nov. 29, 1697, he was unanimously requested to become helpful to them in preaching the word of God. It was decided to pay him £40 a year, if he would not take less. He is supposed to have wanted more. The people plead poverty, but are anxious to have him come, and therefore ask the General Court for help. In answer to this request the Court gave them £10 out of the public treasury towards the support of the ministry. This grant of money induced Mr. Parris to be "helpful," and his salary was fixed at £40 per year. But at the close of the year he desired an increase of pay. The town, however, did not agree to all his terms, and he doubtless left in the winter of 1698-69.

Another effort was then made to secure a resident minister. And for the third time they invite, March 27, 1699, Mr. Joseph Mors "to y^e worke of y^e ministry," but being elsewhere engaged he could not come.

It is a little uncertain at what time the next candidate for the vacant pulpit made his appearance. Most likely soon after the declination of Mr. Mors. At any rate under the date of July 24, 1689, it was "Voted and unanimously Conclnded to give Mr. John Eveleth an invitation & Call to y^e work of the ministry in this Towne." It was also decided that he should have the use of the parsonage and ministerial lands, if he should "settle in Towne & Cary on y^e work of y^e ministry & Live & Dye with ym, then he should have and enjoy a fifty-acre Lott; which shall be his & his heires forever." His salary was to be forty pounds per annum, twenty pounds every six months, half money and half corn and other provisions, and five pounds more in firewood. It is uncertain when Mr. Eveleth accepted the call. Probably not for a year or more, and yet he continued to supply the pulpit, and some meetings were held relative to his settlement. A committee was chosen May 13, 1700, to draw up a covenant or agreement between the town and Mr. Eveleth, which was subsequently signed by him and the following citizens:

"Thomas Stevens, Abraham Holman, Richard Whitney, Sen^r, Tho. Foster, Juno, Wetherby, Sen^r, Juno, Wetherby, jun^r, Isaac Gates, Stephen Randall, Nathaniel Gates, Jonathan Farr, Thomas Daby, Boaz Browne, Richard Burke, Henry Raul, Jabez Brown, Mark Perkins, Simon Gates, John Holmes, Thomas Whitney, Nathaniel Hapgood, Jonathan Foster, Richard Whitney, jun^r, Jacob Stevens, John Stevens Samuel Hall, L^o, Browne, Isaac Beadl, John Whiticour, Moses Whitney, Stephen Farr, John Gates, Ebenezer Whitney.

"In testimony of my Compliance with ye offers of ye inhabitants of Stow, in ye above written Covenant, & of my obligations to serve them as God shall enable me, I have here set my hand.

"JOHN EVELETH."

By this agreement, Mr. Eveleth was to have £40 a year in money and thirty cords of wood, and some

assistance in the way of work upon his buildings and land. Months go and come and no formal settlement of the minister takes place, though he still resides in town and occupies the pulpit. But on the 1st of September, 1702, it was voted to keep a general fast (Mr. Eveleth was to appoint the day with two of the neighboring elders), which was in reference to the installation of the minister. Joseph Daby, Thomas Daby, Boaz Browne, Edw. Browne and Israel Heald were appointed to provide for the installation in all respects. About this time it occurred to the people that if they had an additional tract of land they would be better able to meet public charges, and especially would be encouraged about settling a minister. Therefore they ask the General Court, Oct. 12, 1702, to grant them the Indian plantation of Nashoba (now Littleton), as they already had "but a pent-up small Tract of Land and vary Little meadow." The representatives said yes to the petition, but the Council voted no; so the project failed and the town wisely concluded to go forward without the help of the General Court. In 1753 the town had a lawsuit with Littleton, relative to the bounds in which they appear to have been beaten, at a cost of over £55. In reference to the "ordination," as it was called, the town voted, Nov. 9, 1702, to provide for it "by a free contribution and voluntary subscriptions," which was done. But at what time the pastor was inducted into office, or who took part in the interesting services, is unknown. The installation, however, is believed to have occurred about the 1st of December, 1702. Thus, after years of patient effort, a permanent preacher was secured. It is uncertain whether the church was organized at the time of the installation. Mr. Eveleth either kept no records, or they are lost. Rev. Mr. Gardner, the successor of Mr. Eveleth, writing in 1767, said the gathering of the church was three or four years after the call of Mr. Eveleth, and that the number of members was about eleven.

The pastor being settled and the church organized, there is not much to record for some time. About fifteen years after his settlement it was whispered around that the minister's conduct was not altogether becoming his position as a moral and religious teacher. Finally the advice of a council of ministers was sought. They gave some directions in the matter, but we know not their import. The trouble, however, seems not to have been allayed, and a meeting was held November 14, 1717, "to consider what steps to take in reference to Mr. Eveleth's mis-carriage of late amongst us." It was then voted "to stand to the 5th article in the minister's or counsel's result." A committee was chosen "to treat with Mr. Eveleth concerning the premises." Subsequently this committee were ordered to apply to some neighboring minister for advice "at this difficult time." Somewhat later a second council of ministers was called in reference to the pastor's "mis-carriage." This council met previous to January 6, 1717-18, and advised the

dissolution of the pastoral relations. Tradition says the "mis-carriage" of the minister was intemperance. He, however, whatever was the nature of his offence, reformed and became a useful man. The records of July 28, 1719, say: "Mr. John Eveleth, upon manifestation of repentance, was restored to church fellowship and communion." In 1719 he taught school in town. There was some trouble with him about the parsonage, etc., and he was notified not to make any improvement upon the land and to surrender up the house and barn. But he did not vacate the premises, as was desired, though he was offered sixty pounds if he would do so. The matter, however, seems finally to have been amicably settled. Mr. Eveleth was born February 18, 1669-70, and was the son of Joseph Eveleth, of Gloucester. He graduated at Harvard College in 1689, and was ordained at Manchester, October 1, 1693, and was dismissed from the society there in 1695. He was subsequently, for a time before coming to Stow, a preacher at Enfield, Conn. He married, December 2, 1692, Mary, daughter of Francis Bowman, of Cambridge. After leaving Stow he preached at Arundel, and other places in Maine. He was at Arundel about nine years. The people were unwilling to have him leave, "as he was not only their minister and school-master, but a good blacksmith and farmer, and the best fisherman in town." He died August 1, 1734, aged nearly sixty-five years, and was buried in Kittery, Me. His wife died at Stow, December 2, 1747, aged seventy-five. She probably did not live with him after he left town. After leaving Arundel he is said to have become an Episcopal minister at Kittery.

The town, being without a minister, chose a committee January 6, 1717-18, to procure a candidate. On the 17th of June following, Mr. John Gardner was called "to carry on the worke of the ministry." He was to have one hundred pounds in land as a settlement, and a yearly salary of seventy pounds for five years, and then seventy-five pounds, and then to add twenty shillings a year until it reached eighty pounds, which, thereafter, was to be his stated salary, to be paid in semi-annual installments. Mr. Gardner bought the ministerial lot for 150 pounds. All the preliminaries being arranged, preparations were made for the ordination, and on the 26th of November, 1718, the pastor-elect was inducted into office, but there is no record of the services. The church at that time "consisted of fifteen males and about the same number of females." Mr. Gardner says the ordaining council "advised us to covenant anew, the foundation covenant being lost." But this new covenant is lost to us, and no one can tell what has become of it. Most of the early covenants were not so much a statement of belief as a sort of bond of union between the members.

Mr. Gardner's ministry, on the whole, seems to have been peaceful and prosperous. During the latter part of his pastorate he was much enfeebled by

age and disease, so that he could not preach regularly. He was willing to have a colleague, and several candidates were heard, but for two or three years there was no unanimity of feeling or agreement upon a successor. At length, however, a candidate was chosen, and Mr. Gardner was able to take part in his ordination, but he died almost exactly three months from the day his colleague was settled, viz., January 10, 1775, in his eightieth year, and in the fifty-eighth of his pastorate.

Rev. John Gardner, son of John and Elizabeth Gardner, of Charlestown, was born July 22, 1696, and graduated from Harvard College in 1715. He was strongly opposed to the Whitfieldian movement about 1740. He is represented as being very stern in his demeanor, so that the children greatly feared him; yet he was "a gentleman of good intellectual abilities, . . . sound in his principles of religion . . . and very faithful in the discharge of his pastoral office." He married, April 14, 1720, Mary, the eldest daughter of Rev. Joseph Baxter, of Medfield, when she was only nineteen years old. She died December 30, 1784, in the eighty-fourth year of her age. During Mr. Gardner's ministry 209 persons joined the church, and 1346 were baptized.

The seating of the meeting-house seems at times to have occupied the attention of the town, and December 5, 1722, it was "voted that in seating the meeting-house there should be respect to age and to what persons paid towards building the house, and to the minister for the present year." Other similar votes were taken in the course of years. Even as late as May 14, 1790, a committee report where certain persons not owning pews should be seated as follows:

The fore seat below—Mr. John Randall, William Whitecomb, James Davidson, Bezeleel Hale, Benjamin Whitecomb, William Withington, Stephen How, Asa Warren, Zachariah Whitman, Oliver Gates, Francis Eveleth, Lisha Gates, John Eveleth, Thomas Wetherbee, Silas Randall, Benjamin Smith, Elizabeth Bailey, Mary Gates, Mary Hale, Elizabeth Hall, Deborah Gates, Sarah Conant, Martha Skinner, Sabel Whitney.

Second seat below—Jabez Brown, David Jewell, Elias Whitney, Samuel Goodnow, Frederick Walcutt, John Davidson, Daniel Conant, Abel Taylor, Benjamin Monroe, Joshua Brown, Joseph Wetherbee, Abner Ray, Josiah Witt.

Third seat front—Abraham Randall, Josiah Brown, Abijah Warren, Nathan Putnam, Thomas Whitman, Jubah Wetherbee, Josiah Randall, William Walcutt, Charles Hale, Samuel Hapgood, John Patch, Ephraim Wetherbee, Bezeleel Hale.

Fourth seat side—Jacob Whitney, James Hale, Hezekiah Hapgood, James Osborn, Oliver Gates, Jr., Jonathan Gates, Augustus Goodedge, George Davids in John Conant, Peter Conant, Asa Putnam, Rehobed Stow, Simeon Whitecomb, Abraham Whitecomb, Daniel Hooker, Oliver Marble, Hezekiah Whitecomb, Daniel Eveleth, Samuel Jewell, Israel Gates, Benjamin Brown, Isaac Whitecomb, Thomas Gates, Silas Goodedge, John Gates, Jr., Hezekiah Whitney, David Rand.

Fifth seat side—Samuel Osborn, William Maxwell, Isaac Brown, Ephraim Wheeler, Simon Fuller, Timothy Taylor, Samuel Withington, George Brown, Daniel Robbins, Phineas Taylor, Henry Goodedge, Henry Smith, Benjamin Clark.

Sixth seat side—John Witt, Isaac Conant, William Morse, Israel How, Ephraim Hale, Benjamin Withington, Ezekiel Gates, Josiah How, Daniel Hayward, Jr., Edmund Whitney, Silas Witt, Liah Goodnow.

Seventh seat side—Abraham Ray, Samuel Sargent, Jr., Isaac Taylor, George S. Pope, Jabez Brown, Jr., Luke Brown, Augustus Tower, Daniel How, John Brock, Amos Broder, David Osborn, Daniel

Brown, Caleb Gates, Thomas Burgess, William Brown, Thaddeus Goodnow, Gustin Taylor, Jonas Taylor, Silas Whitecomb, Darius Whitecomb, Jonathan Walcutt, Jacob Gates, Levi Stearns, Ephraim Taylor, Israel Taylor, Simeon Hayward, Abram Conant, Abel Brown, Charles Gates.

In May, 1773, it was voted that the women's seats in the body seats be cleared of the singers, but no "further provision of seats for the singers" was made.

Mr. Gardner having signified his willingness to receive a colleague, measures were taken to secure one.

But it was found very difficult to decide upon candidates. The town held two meetings within one week in October, 1773, relative to the matter, yet such was the excitement that nothing was done. Mr. John Marrett (Harvard College, 1763) was a favorite candidate with many; and November 29, 1773, the church, with only one dissenting voice, voted to give him a call. The town, however, December 20th, did not concur with the church, and voted not to hire preaching. But as the minister could not be settled without the votes of both parties, Mr. Marrett left and was subsequently settled at what is now Burlington. When Hancock and Adams left Lexington, on the morning of April 19, 1775, they were conducted to Mr. Marrett's boarding-house, and by him were guided to a place of safety near the Billerica line.

At their meeting March 4, 1774, the town concluded to have preaching again and chose a committee to attend to that matter. March 13th, Mr. Jonathan Newell preached his first sermon, as a candidate. Having preached six or eight Sundays, the church, on the 13th of June, invited him to settle, and on the 20th the town, by a very great majority, voted to concur with the church in the invitation to Mr. Newell to be the joint pastor with Mr. Gardner. He was to have 160 pounds as an encouragement to settle, and his yearly salary was to be fifty-three pounds, six shillings and eight pence during the life-time of Mr. Gardner. It was then to be increased to eighty pounds, to be paid to him annually while he should continue in the work of the ministry; but when he should be, by sickness or age, or otherwise, unable to supply the pulpit, then his salary should be only forty pounds annually so long as he should live in the ministry. Mr. Newell's acceptance of the call was read to the church September 11, 1774. On the 26th of the month the town voted to have "the proposed ordination of Mr. Newell observed as private as possible, agreeable to the vote of the church." Henry Gardner, Jonathan Wood and Deacon Samuel Gates were chosen to carry forward the ordination when they think proper, and to consult with Mr. Newell about the same. Colonel Jonathan Wood was requested to entertain the ordination council, and he was to be paid six pounds for so doing. The ordination took place on Tuesday October 11, 1774. Rev. Samuel Johnson, of Harvard, began with prayer; Rev. Samuel West, of Needham, preached the sermon. Rev. Mr. Gardner, of Stow, gave the charge; Rev. Mr. Swift, of Acton, gave the right hand of fellowship.

During the long ministry of Mr. Newell harmony and good will generally prevailed. On the one hundredth anniversary of the incorporation of the town he preached an occasional and interesting sermon, which was printed; yet it does not contain so much historical matter as we of this day should have desired. Fifty years from the date of his settlement he preached a sermon commemorative of that event, which was also printed. During his ministry at one time the dogs became somewhat troublesome at church, and a committee was chosen, April 4, 1796, to take care of the dogs that come to meeting on Sunday, and also to kill all "that come into the meeting-house on the Sabbath Day, if they can't keep them off without."

As the infirmities of age grew on apace, Mr. Newell, in June, 1828, proposed to relinquish one-half of his salary if the town would secure an assistant. This proposition was accepted on the 1st of September following. But three months later Mr. Newell, "on account of his declining health and increasing infirmities," asked the town "to immediately provide a preacher, agreeing to relinquish all further support as a minister." On the 22d of December, 1828, the town acceded to his request, and "voted that the inhabitants of the town and parish will hold in lasting remembrance and veneration the Rev. Mr. Newell, their pastor, for the deep interest which, during his long ministry among them, he has ever manifested in their behalf, collectively and individually; that in his late voluntary relinquishment of salary they recognize a fatherly and anxious concern that a colleague and successor may be selected and settled while he yet lives and can aid them by advice and example." A colleague was soon settled. After relinquishing the charge of the pulpit Mr. Newell lived nearly two years, dying on the morning of October 4, 1830, lacking but one week of fifty-six years from his ordination, at the age of almost eighty-one years.

Rev. Jonathan Newell was born at Needham, December 13, 1749, old style, or December 24th, new style. He fitted for college at Hatfield, and graduated from Harvard College in 1770. He studied theology with his pastor, Dr. West, of Needham, and commenced preaching in the autumn of 1773. We are told that he "was a man of a strong mind, of sound judgment, exceedingly well acquainted with human nature, benevolent and generous to the poor, almost to profuseness. He had a great deal of shrewdness and of wit. . . His passions were naturally very strong, but he kept them under control. . . His whole ministry was marked with consummate prudence." "His conduct was that of a gentleman to everybody. He was a very social companion and was universally beloved. He was remarkably fond of mechanical studies." He invented a machine for cutting nails, which proved a great success. "He was a large and well-proportioned man, and when fifty years old is said to have carried ninety-four bricks in a hod, at one time, to the top of his two-story house." At his request no

funeral sermon was preached, and none but the relatives followed the body to the grave. He married, November 24, 1774, Miss Sarah Fisk, of Watertown, and there was great rejoicing when he and his bride arrived in town; but in less than two years their joy was turned to mourning, for she "passed on" from earth September 14, 1776, aged about twenty-five years. The town greatly sorrowed at her departure. "Her singular good temper and courteous conduct endeared her to all." Mr. Newell remained a widower a little more than five years. Exactly seven years from the day of his ordination, or October 11, 1781, he married Miss Lucy Rogers, daughter of Rev. Daniel Rogers, of Littleton. She survived him more than fifteen years, and died May 26, 1846, aged ninety years. During Mr. Newell's ministry 140 persons were admitted to the church, about 1100 were baptized, and 337 couples were married by him.

Rev. John Langdon Sibley, having preached a few Sundays, was, on the 16th of February, 1829, invited to become the minister of the town. He was offered \$500 as a settlement and a yearly salary of \$600, with twelve cords of oak or walnut wood yearly. The call was accepted April 1, 1829, and he was ordained on the 14th of May following. The introductory prayer and the reading of the Scriptures were by Rev. Mr. Robinson; sermon, by Rev. Dr. Lowell, of Boston; ordaining prayer, by Rev. Dr. Ripley; charge, by Rev. Mr. Newell; right hand, by Rev. Mr. Emerson; address to society, by Rev. Dr. Harris; concluding prayer, by Rev. Mr. White. Dr. Lowell's sermon was printed. At the close of the services the council dined at the house of Francis Conant.

Mr. Sibley's ministry was of short duration. Soon after his ordination a Universalist Society was formed, and some persons holding Trinitarian views withdrew from his support. Religious convictions were forming anew. Seeing the drift of affairs, the pastor, on the 31st of March, 1831, sent in his resignation, but it was not accepted. The people still being divided in sentiment, he renewed his resignation in February, 1833, and it was accepted by the town March 18th, to take effect on the 1st of April. Rev. Mr. Sibley was born December 29, 1804, at Union, Me. He fitted for college at Phillips Exeter Academy, Exeter, N. H., and graduated from Harvard College in 1825. After leaving Stow he preached but little. He subsequently became assistant librarian of Harvard College, and afterwards librarian. He was the editor of the *Triennial Catalogue* for several years, and published three volumes of biographical sketches of the early graduates of his *alma mater*, and was a large benefactor of Phillips Exeter Academy. He married, May 20, 1866, Charlotte Augusta Langdon Cook, and died at Cambridge December 9, 1885.

He was the last minister settled and supported by the town. In the latter part of the year the First Parish was organized, embracing all who had not withdrawn from the old church, who were known as

Unitarians. But things were still in a somewhat unsettled condition, yet preaching was maintained for a considerable part of the time. Different ministers supplied the pulpit for some years, among whom was Rev. Seth Alden, Rev. Jonathan Farr, Rev. Matthew Harding, an Englishman, and probably some others whose names are unknown.

Rev. William Homans Kingsley was installed as pastor December 25, 1839. He continued in office until the last Sunday of March, 1846. He was born at East Bridgewater May 3, 1809. He had previously preached at Ipswich, Mass., and at Hubbardston. He subsequently preached at Mansfield and Mendon, and died at the latter place, September 7, 1851.

Rev. Reuben Bates (H. C., 1829) was installed June 18, 1846, and on account of ill health, closed his ministry October 3, 1859. He was born at Concord March 28, 1809, and had previously been settled at Ipswich, N. H., and Ashby, Mass. He died December 1, 1862. After his retirement various candidates supplied the pulpit until January 20, 1862, when Rev. George F. Clark was invited to become the pastor. The parochial year commenced March 1st. He was installed April 23d of that year, and closed his ministry on the 10th of March, 1867.

The subsequent pastors of the First Parish have been Revs. Frederick W. Webber, John F. Locke, David P. Muzzy, Thomas Weston and J. Sidney Moulton.

The first Sunday-school of the parish was organized during Mr. Sibley's ministry, June 6, 1830, and Jacob Caldwell, the preceptor of the academy, was chosen superintendent. About 125 children were connected with the school during the first year of its existence.

Universalists.—About 1830 a Universalist Society was formed and lived some twenty years, but never had a settled minister, and had preaching only a part of the time. They were granted the use of the meeting-house a portion of each year, according to the amount of money they paid.

Orthodox.—The Evangelical Church was organized May 11, 1839. It was composed of twenty-one members—six males and fifteen females. It was, indeed, an offshoot of the "Hillside Church," formed at Bolton in 1829. Rev. E. Porter Dyer was ordained pastor September 25, 1839. A chapel, for the use of the society, was built in 1840, and dedicated July 8th of that year. Rev. Mr. Dyer was dismissed January 29, 1846, and Rev. Theodore Cooke was ordained June 9, 1847. On the 1st of April, 1851, the place of worship was transferred from the centre of the town to Union Hall, in Rock Bottom Village. Several prominent members, however, withdrew in 1852, to help form a church at Assabet Village (now Maynard). This and other causes so weakened the society that it ceased to exist in the course of a year or two. The pastoral relations of Rev. Mr. Cooke were dissolved May 2, 1860. The chapel was sold some fifteen years later and removed from town.

Methodists.—The Methodist Church of Rock Bottom is the legitimate successor of the old Methodist Church of that part of Marlborough now Hudson, which was constituted in 1808 by Rev. Benjamin R. Hoyt, at the house of Phineas Sawyer, the pioneer Methodist of that village. It was composed of members from several towns. They built a meeting-house in 1827, which was subsequently known as the "Old Brick Church," where they worshiped until December 28, 1852, when the edifice was burned. A hall was then secured at Rock Bottom Village, where meetings were held. Thirteen of the Marlborough members soon after withdrew to form a new society. Those who remained decided to build a house of worship at Rock Bottom, and the corner-stone was laid July 4, 1853, and the house was dedicated November 30th of the same year, Rev. L. D. Barrows preaching the sermon. Rev. T. B. Treadwell was the first preacher in charge of the society during 1853 and 1854, Rev. G. F. Pool in 1855, Rev. William Pentecost in 1856-57, Rev. W. I. Lacount in 1858, 1859-60, Rev. J. W. Lewis in 1861-62, Rev. Albert Gould in 1863-64, Rev. J. W. Hambleton in 1865, 1866 and 1867, Rev. Augustine Caldwell in 1868-69, Rev. Burtis Judd in 1870-71, Rev. N. A. Soule in 1872, Rev. J. L. Locke in 1873-74, Rev. N. Bemis in 1875-76, Rev. G. R. Bent in 1877-78, Rev. William Full in 1879-80, Rev. W. E. Dwight in 1881-82, Rev. G. E. Sanderson in 1883, 1884-85, Rev. S. L. Rodgers in 1886-87, Rev. J. A. Day in 1888-89. In 1855 a parsonage-house was bought for \$600. In 1884 a new parsonage was built at a cost of about \$2200.

MEETING-HOUSES.—The first settlers were well aware of the importance of having a place of worship as an inducement for a minister to cast his lot among them. Hence they early took measures to erect a meeting-house where they and their children could regularly repair for public worship. Probably the first religious services were held in dwelling-houses, and, perhaps, in the summer season, in the open air, for "the groves were God's first temples." It is pretty evident, however, that the first meeting-house was built, though not finished, in 1685, two years after the incorporation of the town. It stood at the east end of the Common at the lower village. The following votes are the first records extant relative to the building. It was voted March 1, 1685-86, "yt Thomas Ward shall bee freed from any farther Charges in reference to ye finishing ye meeting-house erected in this town." A few days later, March 10th, it was voted "that ye selectmen doe, and are hereby impowred in ye behalfe of ye town, to agree & bargain with Samuel Hunt yt he finish ye meeting-house of this town to ye tuning of ye key, or at least to agree with him to doe soe much of ye s^d work yt may bee of presnt necessity." Here is the agreement in reference to finishing the house, between the selectmen and Mr. Hunt, dated March 22, 1685-86; "Samuel Hunt is to lay ye floors double in ye meeting-house,

make and hang two double doors, four windows each with three lights framed two feet and half in length with hansom munion to be despatched forthwith substantially and completely." He was to be paid for the work "ten bushels of Indian corne, good and merchantable, and to provide boards and nails." How "substantially and completely" the work was done we do not know, but evidently something more was needed. And as the following winter approached the people were reminded that the house was not sufficiently protected against the cold blasts of this rigorous climate. Therefore, "Att a meeting of ye inhabit^{rs} & Proprietors of this Town ye 5th of Octobr 1686, It was voted that ye publick meeting-house newly erected in this Towne shall bee forthwith filled betweene ye wall timb^{rs} and studs from ye cills to ye Jowle peices with clay and wood and lathes, to hold the crosse peices, and to hold up ye clay & yt ye same be plastered even with the studs & yt ye whole house shall be well & sufficiently every way round about und^r pinned, and it is agreed wth Jno Butterick and Ephraim Hildreth yt they doe arrange all ye said work to be done effectually, they providing materials." They were to receive three pounds, five shillings, or in corn "at common price as it commonly goes from man to man." The house must have been of very rude construction and of small dimensions, having only "four windows each with three lights." But it was probably the best the inhabitants could do in their poverty, and they were content for the time being, at least. At any rate it served their purpose for a few years. But as the town grew in numbers and wealth, a larger and more comfortable place of worship was desired. Accordingly, on the 6th of March, 1709-10, the town met "to conclude something about building a meeting-house," but there is no record of anything done. June 12, 1711, it was voted "that the meeting-house shall be built and set upon the little plaine on the norwest side of Strong Water Pond, on the right hand of the country road between Moses Whitney's and Capt. Stevens' house." This was where Mr. F. W. Warren's house now stands. There was, however, some dissatisfaction with the location, and March 29, 1712, Samuel Hall, Zebediah Wheeler, Deliverance Wheeler, John Wetherby and Thomas Brown were chosen a committee to decide upon some place to set the house. The house was to be "38 foot in length and 32 foot broad." We find no further action until January 12, 1712-13, when it was voted "to set the meeting-house on the right hand of the country road on the little knoll between Capt. [Stevens'] barn and the dam at Strong Water Brook." This was about seventy-five rods easterly of the first location in 1711.

The house was to be "40 foot long, 32 wide and 20 foot between joyns." April 7, 1713, Joseph Daby, Thomas Whitney, Sr., and Thomas Brown were chosen a committee to let out the building of the house, and were fully empowered to decide how it

should be finished inside and out, how the seats, doors, windows and stairs should be made, and other things "to set out the beutey of the house." February 1, 1713-14, it was ordered that pews be built in the new house "all round the body if persons desire liberty." The house was probably accepted and occupied about the 1st of May, 1714. It probably had a gallery. The old meeting-house was sold before March, 1719, and the money was used to purchase a "burying cloth." The old Common at the lower village, whereon the first meeting-house stood, was sold in 1809 to Rufus Hosmer and Jacob Soper, for \$100, on condition that it always remain a Common, never to be fenced or built upon. The new house cost about £250, besides some voluntary work upon it.

The second house, like the first, was not probably a very imposing edifice. Repairs were frequently made upon it; and in the course of years it was, by some, deemed unsuitable for religious purposes. Having been used about forty-six years, a movement was started for a new house, but nothing came of it. But April 6, 1752, it was voted "that the town will build a new meeting-house." A few weeks later it was voted "to sett the new meeting-house over the old cellar-place near Strong Water Brook, called Capt. Stevens' old cellar-place." The house was to be fifty feet long, forty feet wide and twenty-three feet between joints. The location of the house was subsequently reconsidered once and again, and finally, February 12, 1753, it was voted "to set the house on the north side of the county road where Shabbukin Road leads into said road." This was where the brick school-house now stands. The house is supposed to have been raised on the 27th of August, 1753. As the house approached completion the town decided, June 3, 1754, that "there shall be nineteen pews round the meeting-house, as they are in the old meeting-house, one of the nineteen exempted for the minister's pew." On the same day Mr. Samuel Gates, Mr. Jeremiah Wood, Mr. John Marble, Junr., were empowered to sell the pew ground and give title to the same. The committee were to "dignitise" the pews and sell the highest pews to the highest payers; but if the highest payer did not take the pew, then it was to be offered to the next highest payer, &c. If the pew ground was not sold by the 27th of the next January, the committee were directed to build the pews at the town's expense. On Jan. 17, 1755, all former votes relative to selling the pew ground were reconsidered, and the pews were to be sold for £100, lawful money, and whoever bought should take the spot for his seat. January 27, 1755, the pew ground was sold to the following persons:

East of Fore Door.—1, Capt. Hezekiah Hapgood; 2, Lieut. Joseph Daby; 3, Jeremiah Holmon. *West of Fore Door*.—1, Daniel Hapgood; 2, Joshua Whitney; 3, Samuel Gates. *East of Pulpit*.—1, Abraham Whitney; 2, Amos Gates; 3, John Marble, Junr. *West Door and Men's Stairs*.—John Whitman, Esq. *East Door and Women's Stairs*.—Amos Brown. *North of West Door*.—1, Capt. Phineas Gates; 2, Elisha Gates. *North of East Door*.—Samuel Sargent; 2, Widow Sarah Stevens. *Northeast Corner*.—Capt. Timothy Gibson. *Northwest Corner*.—Jonathan Wood. *Next to the Minister's Pew, West of the Pulpit*.—Stephen Gibson.

The whole sold for £91 14s. 10d. These pews were around the house, next to the walls. The space within was at first occupied by long benches, one side of the broad aisle being for the men, and the other for the women. Some of these benches were subsequently taken up, and pews built instead. The house had probably a double front-door, and also a door at each end, with a gallery on three sides of the building. The cost of the edifice was about £266. The old house was sold for £122, and the proceeds were appropriated for the support of the poor. The house was first used for religious worship in February, 1755, and the first communion service in it was on the 23d of March following.

In the course of a few years there appears to have been some irregularity in entering, or at least in leaving their seats after public worship. Hence the town took the matter in hand, and March 4, 1771, they "recommended that the fore seats below move out first after public service is over, and so successively till they are empty. That the people in the galleries, in leaving their seats, the fore seats clear first, and so in succession till the galleries are empty." This probably led to an orderly and decorous departure from the precincts.

As time wears on, buildings once new wear out, no matter to how good uses they are devoted. So, in 1822, a movement was made for a fourth meeting-house, but failed. In 1824 a committee report against repairing the old house and recommend that a new house be placed a little west of the old one. Another committee report in favor of a spot a little west of the Academy. This was not satisfactory to all, and, in January, 1825, the town voted to purchase land of Levi Warren, near Noah Gates' house. This vote was re-considered and another site was selected. In the course of a few months various other votes relative to the location, size and cost of the house were passed and re-considered. Finally the Gordian knot was cut December 9, 1826, by the town voting "to convey the old meeting-house and land connected, belonging to the town, to Moses Whitney, Esqr., and Augustus Tower, Esqr., and others, to their use, in consideration of their building a new house for public worship for the town, the surplus money arising from the sale of the pews to be paid into the town treasury." The house was to be completed within a year from the 1st day of January, 1827. The house was erected during the year 1827, on the site of the present meeting-house. It was dedicated on Monday, October 1, 1827. Rev. Dr. Thayer, of Lancaster, preached the sermon; Rev. Dr. Ripley, of Concord, offered the dedicatory prayer; and Rev. Mr. Allen, of Bolton, closed with prayer. October 22d the selectmen were authorized to employ some one to take charge of the meeting-house and to ring the bell on Sundays, at funerals, town-meetings, etc. The bell was presented to the town by Mrs. Abigail Eveleth, an aged lady, and it was tolled for the first time at

her funeral. This fourth house, built in 1827, was burned November 9, 1847. The books, clock, pulpit and communion service were saved. The First Parish erected the present house in 1848, on the site of the one burned, and it was dedicated August 30th of that year, Rev. Chandler Robbins, of Boston, preaching the sermon.

Parsonage.—On the 30th of Dec., 1870, Col. Elijah Hale purchased a house and two or three acres of land, costing about \$2000, and presented them to the First Parish, to be used as a parsonage.

Bell.—About the 1st of January, 1722, a small bell was presented to the town by a Mr. Jeskell, an Englishman, who resided at the lower village, and that year a turret was built to the meeting-house, to hang it in. No belfry or steeple was built on the house erected in 1754. The bell appears finally to have been sold in 1823.

EDUCATIONAL.—The first reference to schools, on the town-books, was made December 13, 1714, when Thomas Brown was chosen schoolmaster. We think, however, there must have been schools of some character at an earlier period than that, though perhaps not supported at public expense. Some of the settlers were probably men capable of giving instruction to the young and would doubtless do so gratuitously. It is not our province, however, to speculate upon this matter, but to record known facts. Thomas Brown probably taught one or two quarters. January 11, 1715-16, John Whitman was chosen schoolmaster for one quarter. The following May Thomas Brown was again chosen for six months, and in September of the same year Benjamin Drowet was chosen for one quarter, to teach youth to read and write, and he was to be paid five pounds, and to begin on the 29th of October. In May, 1717, John Gardner was paid £7 13s. 4d. for keeping school the previous winter. On January 17, 1718, Rev. John Eveleth was engaged to keep school for one quarter at £1 10s. per month. In March, 1720, Mr. Eveleth was paid £6 10s. for keeping school the previous year. October 24, 1721, it was voted that the school shall be kept "at ye Capt' house" for the rest of the half-year. This was probably Captain Stevens' house.

February 8, 1721-22, a rate of twenty pounds was made to pay the schoolmaster. December 5, 1722, it was voted to keep a writing-school for three months, and that the school should be kept one month each at Amos Brown's, John Taylor's and Jacob Brown's. December 2, 1723, it was ordered that the school be kept one month each at John Taylor's, Daniel Gates' and Zebediah Wheeler's. The next year it was to be kept at Phineas Rice's, Daniel Gates' and John Taylor's. The first vote to build a school-house was in January, 1731-32, and the following year three school-houses were voted up. September 24, 1733, it was ordered that the town be divided into three school quarters, and three men in each quarter were chosen to locate the houses. It was subsequently decided

that the houses should be twenty feet long, sixteen wide and seven feet from the top of sill to the top of the plate. A streak of poverty came over the town, so that on August 22, 1734, they petitioned the General Court for a grant of land to support the schools. They seem to have been indicted for not having a school. December 18, 1734, voted to so far accept the school-house lately built nearest the meeting-house, as to order the school to be kept in it for four months. The following February voted that every part of the town should have their part of schooling according to their pay, and should choose their own schoolmaster; that every school should be free, and that every quarter should build their own school-house by subscription, etc. October 9, 1749, a committee was chosen to answer for the town at the next Inferior Court. This had reference to a grammar-school, as one had not been kept according to law. A great innovation upon the established order of things occurred in March, 1750, when it was voted to provide a "School Dame," and that the school should be kept six months in the summer season, and forty pounds, old tenor, was granted for that purpose. In October of that year it was decided that the school should begin at "Shabican," and then at the east end, etc. It was voted not to keep a grammar-school in 1752, and in 1758 the town was indicted for not having one. The same year it was voted to build a school-house at the meeting-house—all within two miles were to help build the house, all outside of two miles were to have as much schooling as they were taxed for. The house was not probably built, for in March, 1763, a similar vote was passed, the limit being a mile and a half. The house was to be eighteen feet square exclusive of the chimney-place, seven feet stud; the inside to be well ceiled, the chimney of brick, the house underpinned and well glazed. March 3, 1766, forty pounds, lawful money, were raised to build three school-houses in the out divisions of the town, but they were not speedily built. In 1771 a committee was chosen to provide schools; this had previously been done, but sometimes the matter was intrusted to the selectmen. Six months of a man's and six months of a woman's school was provided for. April 19, 1779, a committee reported that the middle of the town should have twelve weeks and two days of schooling, east end thirteen weeks and one day, west end sixteen weeks, north end ten weeks and four days.

Forty-seven pounds, ten shillings, silver money, were appropriated to build a school-house near Silas Randall's. It was arranged in 1788 that every quarter should draw their own pay and keep their own schools for the future. The Legislature of 1789 ordered that the towns should be divided into school districts. The town had already five school-houses, and it was therefore divided into five districts. Liberty was given May 12, 1794, to the "Squadron" in the middle of the town to hang the town's bell on their

school-house, and to set a school-house at the east end of the meeting-house on the town's land, but not nearer than the white oak trees. The same year £300 were appropriated to build and repair school-houses. Rev. Mr. Newell, in March, 1795, gave the proprietors of the centre school-house the privilege of erecting a house on his land, southerly of the Great Road, so long as it was used for school purposes. In 1803 a committee was chosen to redistrict the town, and in 1811 there appear to have been eleven districts. For some years previous to this a School Committee had been chosen in each district to look after the schools. This year Rev. Mr. Newell and seven others were chosen to visit the schools at the opening and close of the same. A similar committee was chosen for two or three years following. In 1814 the south and southwest districts were united. In 1826 a law was enacted requiring all towns to choose a superintending school committee, and since then, with two exceptions, such a committee has been yearly chosen, the number varying from three to nine. In 1829 the town was divided into five districts. The prudential school committee, for many years, was chosen by the town, but in 1842 the several districts were allowed to choose their own committee. In 1869 the district system was abolished and the whole supervision of the schools devolved upon the superintending committee. Many of the towns, however, clung with great tenacity to the management of their own district affairs. Much of the time since the town assumed control of the schools a superintendent of schools has been chosen by the committee who has looked after their interests. Among the famous teachers of the past may be mentioned Mr. Francis Eveleth, son of Rev. John Eveleth, who for many years was a prominent instructor of the young, and died November 23, 1776, at the age of seventy-four years. Of late years probably no one has taken a higher rank as a teacher and disciplinarian than Mrs. Susan M. Lawrence, who for twenty-five years has been almost constantly employed in that capacity and is still employed.

Academy.—On the 13th of October, 1823, twenty-seven of the prominent inhabitants of the town met to consider what could be done to improve the educational advantages of the town, especially as related to greater privileges for their children than were then furnished by the public schools. The result of the conference was the formation of an association for the establishment of an academy, where the languages and the higher branches of English studies should be taught. Under the existing state of things it was a wise movement, and reflects great credit upon its projectors. A building spot was soon purchased and a contract for the erection thereon of a suitable edifice was made. The grounds were graded by voluntary labor, and the house was ready for occupancy the following spring. The services of dedication took place on the 31st of May, 1824. Rev. Mr.

Newell, the minister of the town, delivered a very appropriate address. The school was immediately opened under the direction of John M. Cheney (Harvard College, 1821) as preceptor. In order to give some degree of permanency to the institution, at the outset the proprietors gave their notes, with sureties, to the board of trustees chosen for that purpose, to an amount sufficient to pay the salary of a preceptor for five years. But these notes were never paid, for the very good reason that the school at once became self-supporting, and continued to be so for a considerable number of years. In fact, the school was a decided success. So popular was it that pupils came from many neighboring towns, as well as from New Hampshire, Rhode Island, Maryland, Louisiana and the Province of Canada. At one time, indeed, the school was so thronged that the proprietors kept their own children at home to accommodate students from abroad. In the process of years, however, the prosperity of the school began to wane. The necessity of a frequent change of teachers had a deleterious influence, and the increase of similar institutions in the neighborhood led to a considerable reduction in the number of pupils. Perhaps the improved condition of the common schools had its influence in rendering the school less popular than at first. So after a life of about twenty years it ceased to be.

High School.—Some years after the academy became defunct, the need of something to take its place was felt, and in 1851 the project of a high school was debated in town-meeting, but an adverse vote was given. But the town, April 19, 1852, appropriated over \$320 for the support of such a school, and for a few years it was sustained, perhaps somewhat reluctantly by many of the voters. In this state of affairs a public-spirited and wealthy citizen of the town, Col. Elijah Hale, came forward in 1871, and proposed to give the town \$5000 as a fund towards the support of a high school, on condition that the town also appropriate an equal sum for the same object, and should never abandon the school, but if they did so, the money was to revert to the donor or his heirs. Hon. John W. Brooks offered \$1000 and his father, Henry Brooks, \$100 in addition, and on the same terms. The town met on the 24th of May in that year to consider the propositions. They then voted with great unanimity "that the offer of Col. Elijah Hale, Henry Brooks, Esq., and Hon. John W. Brooks, of means for the creation and support of a High School be accepted on the part of the Town." It was then "voted, That the Town Treasurer give the Town's note for five thousand dollars with interest, payable semi-annually to the Trustees, and pay the interest to them as it shall become due." The trustees were to "give a bond in fifteen thousand dollars to be kept by the Town Treasurer, for the faithful performance of their trust, who shall keep the fund well invested, . . . and make annual report of the amount and condition of the fund to the

Town." "Voted, That the old Academy building and grounds be appropriated for the use of said School, and that it be under the care of the School Committee, and be put in order by them." Seven trustees were then elected by ballot, namely, Edwin Whitney, Theodore Cooke, A. C. Livermore, Charles W. Gleason, Francis W. Warren, Henry Gates and Micah Smith. Finally "Voted, That the thanks of the town be presented to Col. Elijah Hale, Henry Brooks, Esq., and to Hon. John W. Brooks, for their generous donations for the creation and support of a High School for the Town of Stow." The school was opened about the 1st of the following September, and is still in a flourishing condition.

MISCELLANEOUS.—The Rock Bottom Library Association was formed July 15, 1880, and has about 1000 volumes of books.

The publication of *The Stow Sentinel*, a weekly newspaper, was commenced May 19, 1883, and the first number contained a full report of the proceedings at the Bi-Centennial Celebration on the 16th of the same month.

GRADUATES FROM COLLEGE.—We here give the list of graduates, so far as we have learned. Very likely some may have escaped our notice. In regard to the name of Silas Randall, we are not quite sure he was a native, yet we have but little doubt. H. C. means Harvard College; D. C., Dartmouth College; T. C., Tufts College, and B. U., Brown University. The first three names are the sons of Rev. John Gardner, the second minister of the town.

Samuel Gardner, H. C., 1746; Henry Gardner, H. C., 1750; Francis Gardner, H. C., 1755; Jeremiah Barnard, H. C., 1773; Phineas Randall, H. C., 1792; Abraham Randall, H. C., 1798; John Randall, H. C., 1802; Silas Randall, B. U., 1804; Jonathan Newell, H. C., 1805; Augustus Cooledge, D. C., 1813; George Newell, H. C., 1823; Charles Newell Warren, H. C., 1834; Eben Smith Brooks, H. C., 1835; Jonathan Newell, H. C., 1838; Silas Webster Hale, H. C., 1867; Francis Eugene Whitney, H. C., 1872; Edward Prescott Reed, H. C., 1878; Charles Henry Murdock, T. C., 1888; George Frederick Murdock, T. C., 1888; Eugene Burr Lawrence, T. C., 1889. In addition to these we give the name of Galen Alonzo Clark, H. C., 1871, who was a resident of the town when he entered and while in college. Abraham Garland Randall Hale graduated from Harvard College Law School in 1871.

MILITARY AND WAR OPERATIONS.—Under the circumstances wherein they were placed, the early settlers of the town felt compelled to arm themselves, and thus be prepared to repel any attack that the Indians should make upon them, and also to provide some fortified place or places to which they could flee in case of any hostile invasion. Hence, on the 16th of May, 1698, it was "voted y^e selectmen are hereby empowered to make a rate for y^e repairing y^e Garrison about y^e ministry

house for ye securing ye same, every inhabitant having Liberty to worke out their rate, and if any shall neglect or refews to worke out their proportion they are to pay it unto ye selectmen theire due proportion, and in order to ye Carring out yes^d work ye foote Company are apoynted to meet or appeare next Munday." The ministry house, being doubtless the most cen'tral, was selected for the garrison. We are also informed that there was a fortified house towards the southerly part of the town, near the river, above Rock Bottom Village. And there might have been another towards the western end of the town. Doubtless, as soon as possible after the settlements were made one regular military company was organized, and then another, who met occasionally for drill, etc. We find allusions to these "military exercises" as early as 1706. Thomas Stevens was probably the first, or at least one of the first, commanders of the militia, for he is sometimes alluded to as if he were "Captain" *par excellence*. There are few records, however, relative to early military matters. For many years after 1693 the towns were required by law to keep a supply of powder, ammunition and other military stores, to be drawn upon in case of an emergency. These materials of war were sometimes kept in the loft of the meeting-house, and later a special building or "powder-house" of brick was erected for their safe keeping. As late as 1814 such a house was built, and we infer that it stood in the cemetery near the brick school-house, for the town, Oct. 22, 1849, authorized the selectmen to sell the "powder-house," and have it removed from the burying-ground.

As the population increased, two infantry companies were formed, one at the north, the other at the south part of the town. There was also a cavalry company, composed in part, we presume, of men from other towns, as was often the case. We find quite early an allusion to "Cornet" Joseph Daby, which designates him as a cavalry officer. These military companies continued down to quite a recent period, and, with other towns forming a regiment, were required to meet for an annual "muster," as it was called, when they were reviewed by the "staff officers," on which occasions the town was accustomed to bear some portion of the necessary expenses. So on the 18th of August, 1800, the town voted to find the soldiers at the Concord muster (27th and 28th of August), "four rations a man and 2 barrels of cyder." Forty dollars were appropriated to provide "for 56 men of the Troop and North Company, and a like proportion for the South Company, being 60 men." The days of total abstinence had not then arrived.

FRENCH AND INDIAN WAR.—During the French and Indian War, from 1755 to 1763, the town furnished soldiers for the army at Fort William Henry, Crown Point, Canada and Nova Scotia. Sometimes, when the soldiers were on the point of

leaving for the seat of war, religious services were held by the resident minister. Thus, on the 23d of June, 1755, Rev. Mr. Gardner preached "at the desire of Capt. William Pierce, being the day he began his march with his company for Albany, in the expedition against Crown Point." Samuel Preston was a captain in the army in 1756. In Capt. Pierce's company, Michael Law was sergeant, John Law was corporal, Jonathan Farr was drummer, and Nathan Whitney, Solomon Taylor, Josiah Wetherbee and Jonathan Pierce, of Stow, were privates. Ephraim Powers was sergeant in Capt. Preston's company, and Ezekiel Davis was in another company. May 22, 1758, Ensign Jabez Brown and others of Stow, whose names are unknown, started to join the army destined for Canada. And in April, 1760, others started for Crown Point. The following Stow soldiers went to Canada in 1760: Joshua Brown, Jonathan Farr, Phineas Fuller, Amos Gates, Simon Gates, Abraham Gates, Paul Graves, Solomon Savcas, (?), a servant of Mary Hapgood. None of the Stow men were killed in the army during this war, so far as we can learn, but the following are known to have died while in service or from diseases contracted in the camp, viz.: Capt. Ephraim Brown died Jan. 4, 1756, a few days after his return from the army; July 23, 1758, Ebenezer Gates died at Lake George; May 24, 1760, Abel Ray died at Shrewsbury, on his march to the army; Nov., 1760, Isaac Taylor died at Crown Point, and Nov. 23, 1761, Stephen Houghton died while returning from Crown Point. It is proper that these men should be remembered, as well as those of a later day who gave their lives in defence of their country.

ANTE-REVOLUTION.—The Stamp Act and other arbitrary measures of the government of England alarmed the people, and they came together October 21, 1765, to consider the state of affairs, and to choose a committee to give instructions to their representative, Henry Gardner, Esq., relative to the imposition of duties or taxes upon the Colonies by Parliament. The committee presented their instructions giving reasons why the taxes should not be imposed upon the Colonies, and recommended that their representative "should use the strictest care and the utmost firmness to prevent all unconstitutional draughts upon the public treasury." March 7, 1768, voted that the town will use their utmost endeavors to encourage economy, industry and manufactures within this Province, both by example and every other legal method; also that "the town will by every legal way and manner discourage the importation into this Province of any foreign superfluities, or any articles that at present may be avoided;" also to "use their utmost endeavor to encourage the manufacture of paper in this Province, and to this end the sd town will do everything proper towards supplying the paper mills at Milton with materials for carrying on said manufactures."

Henry Gardner, Esq., was chosen, September 22, 1768, to meet with others at Boston, and another committee was appointed to take the state of public affairs into consideration. As the arbitrary measures of England increased, the spirit of resistance seemed also to increase, and, January 25, 1773, the proceedings of the town of Boston on the 20th of November, relative to the situation of affairs, was approved, and Dr. Charles Whitman, Henry Gardner, Esq., Solomon Taylor, Captain Phineas Taylor, Captain Jonathan Hapgood, Samuel Gates and John Marble were directed to report at a future meeting "what may further be necessary to be done thereon." The committee, February 8, 1773, report a letter to the Committee of Correspondence at Boston, wherein they express their satisfaction "of the care and vigilance of the town of Boston to preserve our happy constitution from infringement and violation;" and they further say, "as we are solicitous of handing down to Posterity the Privileges, both civil and religious, obtained by our Ancestors at the Expense of their Lives and Fortunes, we shall at all times and on all proper Occasions endeavor to preserve the Constitution from Infringement, and obtain a Redress of Grievances where the same is violated in a loyal, manly and discreet way and manner." These were brave and noble words. They show the spirit that actuated the patriotic citizens of the town at a time "that tried men's souls." Such men seldom fail in their opposition to despotism. On the same day these men express their great concern that Parliament had assumed the power of legislation for the Colonies, and were collecting a revenue; also with uneasiness they notice the unreasonable extension of the power of the Courts of Vice-Admiralty, together with many other grievances.

A committee, consisting of Henry Gardner, Solomon Taylor, Samuel Gates, John Marble and Captain Taylor, was chosen "to correspond with the several towns within the Province respecting our rights and privileges as British subjects, men and Christians." Henry Gardner, the representative, was directed, September 26, 1774, to oppose the late acts of Parliament. January 16, 1775, it was "voted, that Henry Gardner, Esq., Lieut. David Jewell and Capt. Phineas Taylor be a committee to take effectual care that the association of the Continental Congress setting at Philadelphia in September last, and the agreements of the provincial Congress referring thereto, be carried into execution, according to the true intent and meaning thereof. Voted that this town will, on all occasions, use their influence, both publicly and privately, so far as they can consistent with the principles of our Constitution, to carry into execution the said association of the Continental Congress, and the resolves of the provincial Congress referring thereto, and will aid the committee aforesaid in all their endeavors therefor." Thus again they show their "manly and discreet"

determination to uphold their liberties. They also requested the assessors and the constables to pay the public moneys to Henry Gardner, Esq., who had been chosen treasurer by the Provincial Congress, and not to Harrison Gray, the royal treasurer, and that these officers should be held harmless at the town's expense, for so doing. This was an open act of defiance to the constituted authorities. But the time had come for such action.

REVOLUTION.—The raid upon Lexington and Concord aroused the patriotism of the people to the highest pitch. "Starting from their beds at midnight, from their firesides and from their fields, they took their own cause into their own hands." Without discipline and almost without orders, they rushed forth to meet the foe.

Anticipating the attempt to seize the military stores at Concord, a large quantity of them, with some cannon, were sent to Stow, and concealed in the woods northerly of the lower village, and not far from the residence of Henry Gardner. Some of the citizens were in the fight at Concord, and Daniel Conant was wounded. We are told that "the two military companies, under Captains Hapgood and Whitcomb, marched for Concord at noon, passed the North Bridge," where Davis and Hosmer had fallen earlier in the day, "and arrived at Cambridge at sunset." Nearly forty of Stow men were in the battle of Bunker Hill, where they did valiant service. And all through the war, at various places, the town was represented by its soldiers.

May 29, 1775, it was voted not to take any notice of Governor Gage's orders for representatives, but, instead, chose Henry Gardner to represent them in the Congress at Watertown. And not for a moment during the entire war did their patriotism flag. In every possible way they aided the patriot army.

It was voted, January 15, 1776, to give the men that delivered two tons of hay at Cambridge, for the army, £2 13s. 4d. July 1, 1776, while the question of independence was debated in Congress, the town voted, as their opinion, "that a government independent of Great Britain might be formed, if the Government of this Colony and the Continental Congress shall think such a measure expedient." And five days later it was voted to raise £6 6s. 8d. for each soldier that should go to Canada in the Continental service, to the number of twenty-four.

In May, 1777, it was decided to provide "ten good firearms to those persons who cannot get them for themselves." In November of the same year voted to hire one man more for three years' service or during the war. January 19, 1778, voted to pay "£550, being a part of the State's money which is their due to pay." Also, at the same time that the whole of the ammunition that was drawn out of the town stock at the Concord and Bunker Hill fights, and last summer, when men were drafted to go to Rhode Island be returned in again. January 23, 1778, a commit-

tee of eleven was chosen to consider the matter of a confederation and practical union between the States. The committee recommended that the confederation and union "take place as soon as convenient." They also urge the representatives to see that the army was provided with clothing, and faithful men see to it, that "they may not be so shamefully neglected," but what they may be willing to defend us from our cruel enemies, and that "this should be seen to before any other business is done." This shows how solicitous they were for the men in the army. March 26, 1778, they show their interest in the soldiers by voting to find clothing for them, and that the selectmen shall do something for the soldiers' families when needy. In May, 1778, £180 were raised to pay six men for the army. A few days later £100 were offered per man, for six, to go to Fishkill; three days later £60 bounty each to five men to go to the North River for eight months. August 2, 1779, chose two men to sit in convention at Concord on the first Wednesday of October; also a committee of seven was chosen to see that all the resolves of the said convention are strictly observed and put in execution. August 30th voted to apply to the Honorable Council to know what should be done with the prisoners that were in town. In September it was decided that some of the prisoners should be sworn, viz., "the Dutchmen and the Brittons and the Scotchmen." Where these prisoners came from is not stated. June 15, 1780, chose a committee to hire the eleven men called for, and soon after to hire thirteen men for three months' service. September, 1781, raised £40 to clothe the army and £106 for beef.

In 1782 £300 were raised to pay the three years' men in 1781. Thus all through the war the town failed not to do its duty to those who went forth in defence of human rights. Up to 1779 there had been in the army at different times 305 men, whose term of service was from three weeks to three years, at an expense of £3833 9s. 8d. Some of the men are counted two or three times, having enlisted for short terms of service. The exact number of different men is not known. After March, 1779, probably some fifty men or more were in the army at a cost of £500. This is a very liberal supply of men and money for a town of about 1000 inhabitants.

While it is believed that none of the Stow soldiers were killed on the battle-field during the Revolution, the following are known to have died in the country's service, viz.: John Gordon, of Captain Joshua Parker's company, died in camp at Cambridge June 19, 1775; Daniel Gates, of Captain Joshua Brown's company, died January 20, 1778; Ephraim Gates, of Captain Whipple's company, died March 19, 1778; Stephen Hale, of Captain Joshua Brown's company, died July 2, 1778; Benjamin Gates, of Captain Joshua Brown's company, died July 9, 1778. Others, we presume, were enfeebled for life by the exposures

to which they were subject, and subsequently were pensioned.

The question of adopting a State Constitution came up two or three times during the war, and the town, May 25, 1778, voted against the Constitution and form of government. May 20, 1779, voted, forty-three to seventeen, not to do anything about the Constitution or form of civil government. May 29, 1780, some slight alterations in several of the articles of the Constitution were suggested, and it seems to have been accepted by a vote varying from thirty-nine to fifty-five yeas, the nays not being given.

The first votes for Governor under the Constitution were given September 4, 1780, as follows: John Hancock, fifty-nine votes; James Bowdoin, five votes. Henry Gardner had twenty votes for Lieutenant-Governor.

It was voted May 15, 1786, that the guns given out in the war to those who had none should be returned or paid for. These, perhaps, were wanted for service in the "Shays' Rebellion." We do not learn that any of the Stowites joined Shays in his rash movement; yet we presume they felt dissatisfied with the state of affairs, for a committee was chosen, Aug. 21, 1786, to attend the convention at Concord on the 23d inst., to consult about grievances and find means of redress; and in May, 1787, Charles Whitman, the Representative, was instructed to exert himself to remove the party spirit and disunion that prevailed in the State, to remove the General Court from Boston, to lighten the taxes upon land, to raise money by duties and excise upon all imported articles, especially upon wines and distilled liquors, foreign and domestic, and the luxuries of dress, the proceeds to be used for the payment of foreign debts; that the State Constitution be maintained inviolate; that the salaries of the civil list be lowered; that a paper medium be opposed, as injurious to widows and orphans, and that distilled liquors pay the duty of distilling. Whether the Representative succeeded in accomplishing all this the deponent saith not.

WAR OF 1812-14.—We will pass now from the Revolution to the War of 1812-14. We find but little action of the town relative to the matter. The war was generally unpopular in the State, and no great zeal was manifested in most of the towns to furnish the men and the means of carrying it on. On the 22d of May, 1812, it was voted to pay each volunteer soldier two dollars down and three dollars when called into active service, and make up ten dollars per month with what the government pay them. In the following September a Committee of Safety was chosen. September 12, 1814, voted to make up the three soldiers that were detached twenty dollars per month with what the government pays them. March 6, 1815, the soldiers were to have sixteen dollars per month with what the United States pay. None of the Stow soldiers were killed in this war, and we know of none who died in service.

REBELLION WAR.—Immediately after the assault of the rebels upon Fort Sumter and the call of President Lincoln for volunteers to defend the attack upon the nation's life, some of the Stow boys, members of the "Davis Guards," of Acton, promptly responded to the President's proclamation, as did others at the beginning of the Revolution, and were in the famous Sixth Regiment when it passed through Baltimore on the 19th of April, 1861, just eighty-six years after the Concord fight. At once a call was issued by the selectmen for a legal town-meeting, which was held on the 27th of April, to take action in the great crisis that had arisen. It was then voted to appropriate \$1000 to uniform and equip those who would volunteer into the service of the country, and also to assist their families while absent. This action induced twenty-eight men to enroll themselves for duty. Early in the fall of 1861 an appeal, endorsed by the President, was made to the women of the loyal States to furnish hospital stores for the sick and wounded soldiers. In response, a public meeting of the citizens was held, October 22d, and a committee, consisting of R. W. Derby, A. W. Nelson and Augustus Rice, was chosen to obtain and forward contributions. Previous to this a sufficient amount of cloth had been purchased to make nearly one hundred garments, which the ladies had prepared for an emergency. Following the appeal for sanitary stores, the ladies in each school district collected a large amount of articles that were forwarded to the proper authorities. In July, 1862, the town voted a bounty of \$125 to the three years' men, and in August, \$100 to the nine months' men. There were frequent meetings during the war to encourage enlistments, and to uphold the nation's arm. The Stow men entered twenty-five different regiments, which made it difficult to look after and assist those who were in need.

April 4, 1864, it was voted to pay re-enlisted men a bounty of \$400. During that year eleven persons were bought to fill the town's quota, who were paid from \$325 to \$525. Quite large sums were subscribed by individuals for recruiting purposes, which were subsequently refunded by the town. There were 174 men in the army accredited to the town, who served for a longer or shorter time, including the nine months' and one hundred days' men. The record of these men was not so accurately kept as it should have been. Twenty-two more recruits were furnished by the town than were called for by the Government. Only once, we think, was it necessary to resort to a draft for a few men.

The whole amount of money expended by the town on account of the war was \$15,991.70, exclusive of State aid to soldiers' families, amounting to \$8000, that was reimbursed by the State. A large amount of sanitary articles were furnished by the Soldiers' Aid Society, to the value of nearly \$1500. The readiness with which the people responded to these calls is shown by the fact that on the 11th and 15th of

December, 1864, a fair was held to raise funds for the needy soldiers. The net receipts of the fair were \$617.58. The interest taken in it by the ladies is shown by the fact that two young misses called at the grist-mill about a mile southerly of the village, and solicited a bag of meal. The young Mr. S., who was in charge at the time, said he would give it if they would drag it up to the Town-Hall. They assented to the proposition, and, loading it into a little band-wagon, they soon accomplished the task. It may be interesting to add that Mr. S., not long afterwards, married one of the young ladies. A wheelwright gave a wheelbarrow, which was sold on shares for \$17. It was then given back, and sold two or three times at auction, and netted over \$46. The contributions to the Sanitary Commission, and directly to the soldiers of the town, amounted to more than \$2000, which was quite a generous sum for so small a town. On the 3d of April, 1865, the joyous intelligence reached the town, late in the afternoon, that Richmond, Va., the rebel capital, was captured, and that the members of the Confederate Government were fleeing for their lives. Great enthusiasm was manifested. The bell of the village church was rung, flags were displayed, and in the evening the house of the pastor of the First Parish was illuminated. Just one week later the most welcome news of the surrender of General Lee and his army was received with every possible demonstration of delight. The church bell rung for an hour, and almost all business was suspended. In order to accommodate all parties, a general illumination of the houses was deferred until the next evening, when a most brilliant exhibition was witnessed by crowds of people. An extemporized band of musicians paraded the streets, and finally all came together in the Town-Hall and listened to some patriotic songs. Yet many hearts were sad at the recollection of dear friends whose lives had been sacrificed during the "cruel war." The following persons were either killed, died of wounds or disease, or in rebel prisons, viz.: Lieutenant Winfield H. Benham at New Orleans, La., May 18, 1863; John Brown at Point Lookout, Va., September 5, 1864; Sergeant John Alpheus Brown at Winchester, Va., December 8, 1864; Thomas Cunningham at Salisbury Prison, N. C., October 30, 1864; Edward Andrew Davidson at Baltimore, Md., November 9, 1864; William Henry Dunlap at New York January 13, 1863; Samuel Hampton in rebel prison after June 5, 1864; Albert Mardough Kingsbury at Gaines' Mills, Va., August 31, 1862; Daniel Artemas Lovering, at Cold Harbor, Va., June 3, 1864; Francis William Moore at New Orleans, April 19, 1863; Albion Nutting at Washington, D. C., October 14, 1864; George Whitmarsh Parks at Gettysburg, Pa., July 2, 1863; Charles F. Perry March 18, 1863; James Rye at Vienna, Va., March 4, 1864; Abraham Foster Rogers at Baton Rouge, La., August 5, 1862; Corporal Matthew Smith at Danville, Va., December 2, 1864;

Joseph Albert Swift at Winchester, Va., October 12, 1864; Albert Walcott, April 15, 1864; George Franklin Whitecomb at Salisbury Prison, N. C., January 2, 1865; Thomas Whitman at Fair Oaks, Va., June 19, 1862; Sergeant Henry Windsor Wilder at Winchester, Va., September 1, 1864; George Willis at Quantilly, Va., September 1, 1862. Of these, Cunningham, Nutting and Rye were non-residents, but were credited to Stow.

NEW TOWNS.—About 1729 the question of forming a new town from parts of Stow, Lancaster and Groton was agitated, but the town voted, March 2, 1729–30, not to set off the lands beyond Beaver Brook, with the inhabitants thereon. This brook is in the westerly part of Boxboro'. On the 20th of August, 1730, the town, through their committee, John Whitman, John Foster and Phineas Rice, gave the following reasons why the petition of Simon Stone, Jonathan Whitney, Thomas Wheeler and others for the formation of a township should not be granted: A great part of the land was barren and incapable of improvement; the new town would take away about one-seventh of the inhabitants; that the town was poor and could hardly support their minister, nor could they bear the country charges without help from the others. But these pleas availed not with the General Court, and on the 29th of June, 1732, the town of Harvard was incorporated. This left a small strip of territory west of the Nashua River, about two hundred rods wide, belonging to the old town, but completely separated from it; and for many years it was known as "Slow Leg." But in March, 1764, the town voted that this tract of land, between Lancaster and Shirley, might be annexed to the latter place, on condition that all taxes due from the inhabitants be paid to Stow. Soon after, it became the southern part of Shirley, extending from Nashua River to Lunenburg.

Boxborough.—About forty years after the incorporation of Harvard another portion of the old town was wanted to help make a new municipality, but it met with no favor from a majority of the inhabitants. For, on the 1st of March, 1773, it was voted not to grant the request of Daniel Wetherby and others, to be set off from Stow, to form a new town, with portions of Littleton and Harvard. This vote was repeated in 1775. The chief reason given for a new town was the distance they were from the meeting-house and the difficulty of a regular attendance upon public worship. But to obviate this difficulty, while the town vote "no" relative to separation, Dec. 19, 1777, they agree to give the northerly part of the town £6 13s. 4d., lawful money, to hire preaching with. This did not, however, satisfy the north-enders. They still ask for a separation. Twice in 1779 the town refused to be dismembered, whereupon Edward Brown and fifty-one others apply to the General Court, asking to be erected into a town, for the reason that "many of us are four or five miles distant from the meeting-houses of their respective towns, whereby it

is impossible for them, with their families, to attend the worship of God, at those places, in the winter season, as they desire to do;" and also that, at great expense, they had built themselves a meeting-house, etc. Their prayer was not granted. June 15, 1780, it was voted not to provide any money for preaching in the northerly part of the town. And on Oct. 16th of the same year it was agreed to grant the prayer of the petitioners on these conditions, viz., that the proposed bounds should be somewhat changed, that those set off should take all the poor of that section and also the poor of the former inhabitants that should come back for support, and that Stow should be at no cost for roads nor any other thing. But for some reason there was a delay in the matter. Accordingly, in March, 1782, Silas Taylor and sixty-eight others again apply to the General Court to be made a town, district or parish. In about a year, after some opposition from Littleton, they were made a district, taking 154 inhabitants from Stow, and three-tenths of the valuation. It was more than three-fourths of a century before any more of the old territory was wanted for a part of another town. But when the time came, in 1866, for the incorporation of Hudson, no particular opposition was made to giving a few acres to the new town, as no inhabitants were included.

Maynard.—When it was proposed, in 1871, to take the easterly part of Stow and the westerly part of Sudbury to form the town of Maynard, seeing it was a forgone conclusion, very little opposition was made to the project, and about 2300 acres and 800 inhabitants passed into the new municipality. This leaves the old town in a much better form than when originally constituted, though with less than one-half its area.

CEMETERIES.—The cemetery at the lower village, near where the first meeting-house stood, was doubtless the first spot devoted to burial purposes. The earliest allusion to it we have found was August 21, 1738, when a committee was chosen "to lay out ye Burying-place in order for to fence it." But there seems to have been no haste about the work, for on the 31st of March, 1740, forty pounds were voted to fence the ground. Yet we presume the fence was not immediately built. In his will, dated May 13, 1751, Thomas Bart bequeathed to the town £6 12s. 8d., for the purpose of fencing the burying-ground, but provided that if it should be well fenced previous to the payment of the money, it was to be used to purchase "necessary or decent utensils for the communion table" of the church. The money did not become available until after the death of his widow, in 1762, when a committee was chosen to receive the bequest; and from a vote taken in 1763, it appears that after fencing the ground there was some money left, which was ordered to be delivered to a committee of the church. For more than a hundred years this was the only cemetery of which we have any record.

A new burial-place becoming necessary, the town voted, September 21, 1812, to take a part of the town's land near the meeting-house for a burying-ground. Thus the cemetery, situated on the southerly side of Pilot Grove Hill, near the brick school-house, came into existence. This was, however, too small a lot to last for many years. Accordingly, as additional space was needed for sepulture, the town, in the spring of 1864, purchased "Brookside Cemetery," on the Rock Bottom Road, and northerly of Assabet Brook; and it was, on the 1st day of the following October, publicly consecrated, with appropriate religious exercises, to the purpose for which it was set apart. The address was given by Rev. George F. Clark, the pastor of the First Parish.

POUND.—March 5, 1705, a three-pound rate was voted to build a pound. As early as 1698 the General Court decreed "that there shall be a sufficient Pound or Pounds made and maintained, from Time to Time, in every Town and Precinct within this Province . . . for the impounding or restraining of any Swine, Neat Cattle, Horses or Sheep, as shall be found damage-feasant, in any cornfield or other inclosures, or going upon the Common" without authority. So the town felt obliged to comply with the law. The pound was to be set "on a small Knowel, Betwixt the meeting-house & Thomas Whitney's house." It was to be "thirty foot square, seven foot high, with good white oak posts, the railles to Be Eyther sawed or hewed timber." In the progress of years a new pound was deemed necessary. Hence, October 21 1721, it was voted to "erect a good and substantial, pound, which shall be according to Law . . . on the edge of the highway between the Capt^{ns} house and the meeting-house." It was doubtless maintained there for many years, perhaps until the one near the brick school-house was erected.

POOR AND WORK-HOUSE.—The first reference to a pauper was March 17, 1724-25, when widow Mary Hewes was voted to be one of the poor, and provisions were made for her support. A mulatto child was thrown upon the town, June 28, 1748, by Deliverance Wheeler, and thus we suppose he was delivered of a burden. It was voted, December 20, 1784, to build a work-house to put the poor in. It was to be thirty feet square and seven feet stud. The house was not probably built, for in 1787 another vote was taken to build a house for the poor. April 11, 1788, money was granted to build a poor-house to be set on the side-hill near the burying place. Oliver Blood was chosen overseer of the work-house in May, 1790. In April, 1796, it was decided that the children in the work-house should go to school near Esquire Wood's, and twelve shillings were to be paid to that quarter. A committee was chosen December 1, 1828, to purchase a farm for the poor. The farm, we presume, was soon bought, and in March, 1829, it was voted that the poor-house should be a house of correction. The poor of the town are still provided for on this farm.

SLAVERY.—It is well known that several of the inhabitants of the town, many years ago, were owners, or perhaps we should say holders of slaves. Morally speaking, no man can be the owner of another man. Of course it is impossible, at this late day, to learn the names of all the slaveholders in town. Some of them are known to have been leading citizens. But the name of one man, whose moral eyes were so opened that he could see the injustice of human slavery, ought to go down to posterity as that of a philanthropist in advance of his times. We allude to Joseph Stone, who, in the early months of the Revolutionary War, recognized the inconsistency of fighting for freedom, while holding a fellow-being in bondage. On the town records the following act of manumission may be found, which we gladly transcribe:

"WHEREAS, I, Joseph Stone, did, on the 14th day of February, A.D. 1776, buy of one Nathaniel Sherman, of Boston, gentleman, a negro man named Youbel, to serve me and my heirs forever, as a servant; therefore, in consideration of his fidelity and other motives moving me, I have, and do hereby discharge and set at liberty from slavery said slave known as Youbel Stone." Perhaps it was in consequence of his emancipation that this Youbel Stone served forty-six months and eleven days as a soldier in the Continental Army. Soon after the close of the war, by a decision of a judge of the Supreme Court, slavery ceased to exist in the Commonwealth.

TOWN-HOUSE.—For a long period the town-meetings were held in the meeting-house, as there was no other suitable place. On the erection of the fourth meeting-house it was thought best not to use the auditorium of the building for the transaction of town business; and therefore, October 22, 1827, it was decided to finish a town-hall under the meeting-house, and meetings were held there until the house was burned. Then, on the 20th of December, 1847, it was voted to build a town-house; and soon after land was purchased of Francis Conant for \$125, whereon to erect the building, which was to be finished within a year, and is the one now used for town purposes.

TEMPERANCE.—For many years there was a great amount of travel to and from Boston, through the town, and there were two or three taverns within its limits for the "entertainment of man and beast." Intoxicating liquors were kept in these houses and freely sold to all calling for them. It was customary for some of the townspeople, especially in the evening, to resort to these places for a social time with the guests; and much drinking was often the result. The excessive use of liquor in those days was no uncommon thing, and quarrels were sometimes the result. Hence the town, March 4, 1771, ordered that the law respecting idle and disorderly persons be observed and carried into execution.

Again, in May, 1796, it was voted to put the law in

force to stop those persons who are spending their time and estate at public-houses, which indicates the town's desire to maintain good order and good morals. In accordance with a later law the town, in 1819, declared that they would support the selectmen in doing their duty in respect to those frequenting "the taverns and grog-shops, to the damage of themselves and families," by posting up their names in public places. And, in 1823, a committee was chosen to "enforce the law against bowling alleys and other complements of gaming." No decided temperance movement was inaugurated here until about 1829, when we are told that the late Deacon Calvin Hale was one of the first to "sign away his liberty," as it was called, by affixing his name to a pledge against the use of ardent spirits or distilled liquors. It was not until about 1838 that the pledge against the use of all alcoholic liquors was adopted. The Washingtonian crusade followed in 1840, and aroused a new interest in the reform. On the 23d and 24th of August, 1841, Dr. Charles Jewett gave temperance lectures, which awakened so much interest that a meeting, of which Jonas Warren was chairman, was held on the 25th to consider the matter of forming a temperance society. It was decided to organize an association, and two pledges were adopted, one against the use of all intoxicating liquors, but the other allowed the use of cider. The following pledge, however, was soon made the basis of the society, viz.: "We, the undersigned, mutually pledge ourselves that we will not use as a beverage any intoxicating liquor." The *Stow Total Abstinence Society* was formed September 1, 1841, with Rev. William H. Kinsley as president, and H. W. Robinson secretary. In the course of two or three weeks nearly all the officers, for some reason, resigned their positions, and others were chosen. There was a grand temperance celebration on the 25th of August, 1842, when a *Cold Water Army* of 200 members was enrolled. At the close of the first year 262 names were attached to the pledge—111 males and 151 females. After a year or two meetings were held very irregularly, sometimes almost a year intervening between them. Lectures were given occasionally, and committees chosen to induce the rum-sellers to quit their business. The last record of a meeting was October 16, 1852. Up to that time 266 men and 299 women had signed the pledge. The interest waned after the passage of the prohibitory law, in May, 1852, and little was done in the cause until February 16, 1863, when Protector Lodge of Good Templars was organized, composed of some of the most respectable citizens. For about ten years it exerted a very beneficent influence, when it ceased to exist. Gleason Dale Lodge, at Rock Bottom, was instituted June 3, 1867, and lived about seven years. Eben Dale Lodge was formed December 20, 1886, at Rock Bottom, and is the only temperance organization in town.

LAFAYETTE.—One of the red-letter days of the

town was September 2, 1824, when the Marquis de Lafayette passed through from Concord to Bolton. It was nearly sunset when he left Concord, and quite dark when he arrived at the lower village, where he was met by a military company, commanded by Capt. Pliny Wetherbee, and by a large concourse of citizens. Rufus Hosmer, Esq., was chief marshal of the occasion. For an hour or so there was a general reception at the hotel. Bonfires were kindled, flags were unfurled and the booming of cannon resounded among the hills as the distinguished friend of America and the intimate confidant of Washington was escorted on his journey beyond the limits of the town.

HOMICIDE.—In the year 1841 a trouble arose between William Goldsmith and George Hildreth, about grass which both claimed. Early in September Hildreth passed Goldsmith's house, while the latter was using an axe near his residence. The old quarrel was renewed, and it is supposed, in self-defence, Goldsmith struck his opponent with the axe, which proved a death-blow. Without knowing the result, Goldsmith entered the house and called for his best hat and coat, saying he "must be off from the place immediately," and left. The selectmen offered a reward of \$100 for his arrest. Having become weak and exhausted from travel and hunger in a day or two, he started to return, when he was met in Wilton, N. H., and recognized by a man who had learned of the reward offered, and he was taken into custody without resistance, and brought back. He was tried and convicted of manslaughter, and sentenced to the State's prison for seven years. But before the expiration of his sentence he was pardoned, and remained a very quiet and inoffensive citizen until his death.

BUSINESS MATTERS.—The principal employment of the citizens has, from the first, been agriculture. At one time considerable attention was given to the raising of hops, but nothing in that line has been done for many years. Besides other farm products, about 194,000 gallons of milk, worth \$18,250, some \$2000 worth of butter, and nearly \$8000 worth of apples have been sold some years. The aggregate value of all the agricultural products in 1885 was \$141,332.

A tannery was started a hundred years ago, or more, near where Mr. F. W. Warren now lives, and was subsequently operated by his father, Mr. Jonas Warren. Having had their tannery destroyed by the bursting of a reservoir, at Ashburnham, in May, 1850, Mr. Peter Fletcher and Nehemiah A. Newhall removed to town and established the tannery business, which they maintained for about twenty years, at the site of the old grist-mill, just below Brookside Cemetery. Sometime previous to 1853 Rufus Temple, Cyrus Brigham and Theodore Pomeroy carried on the shoe business at Rock Bottom. In 1853 H. Brigham assumed the owner ship. Mr. Brigham and A. Rice were in partnership from 1862 to 1864.

Mr. S. A. Gleason, with Mr. Brigham as a silent partner, managed the business from 1865 to 1867. The large shoe-shop built in 1862 was burned in 1875, which put an end to this industry in that village. The first allusion we have found to a mill was about the year 1700, when a road was laid out through Israel Heald's house-lot to the corn-mill. This mill was probably on the Assabet River, just above the present village of Maynard, and the road must have started from near the old cemetery at the lower village. Andrew J. Smith built a saw and grist-mill on Assabet Brook, not far from his house, in 1856. He sold them to Micah Smith in 1864. They were subsequently owned by A. Priest and B. F. Folsom, and are now operated by E. F. Wheeler. Other small mills are alluded to later, but their exact locality we have not learned.

Rock Bottom Mills and Factory.—From some reference to him, on the town-books, we presume that Ebenezer Graves had a saw and perhaps a grist-mill, on the Assabet River, at Rock Bottom, as early as 1735. On the 19th of February, 1770, his heirs sold these mills to Timothy Gibson, who six years later deeded them to Abraham Randall. They were on the east side of the river, about five rods below the present factory dam. Mr. Randall died in 1815, and in a few years his sons sold the premises to Joel Cranston, Silas Felton and Elijah Hale. A factory for the making of cotton yarn was erected on the west side of the river, in 1813, by Silas Jewell and Joel Cranston, drawing the water from the Randall mill-pond. Some two years later Jewell sold his half of the factory to Messrs. Felton and Hale, and the firm then assumed the name of the "Rock Bottom Cotton and Woolen Company." The origin of the name Rock Bottom is a little uncertain. This is the first mention of it. Mr. Felton disposed of his interest to Messrs. Cranston and Hale in 1823, and then the firm was known as the "Rock Bottom Manufacturing Company." In the financial crash of 1829 the firm became insolvent. Mr. Benjamin Poor soon became the owner, who built a new dam above the old one, and erected a new brick mill and introduced improved machinery. The "Rock Bottom Company" was incorporated in 1836, consisting of Mr. Poor, Charles Bradley, John A. A. Laforest and associates, with a capital of \$100,000. The company was not successful and became substantially bankrupt in 1849. The mortgage on the property was then assigned to Benjamin W. Gleason of North Andover, and Samuel J. Dale, of Ware, and they took possession February 14, 1849, Mr. Gleason becoming the managing partner of the firm of "Gleason & Dale." Prosperity attended them, and in 1850 an addition to the factory and other improvements were made. But on the 9th of May, 1852, the mill was burned. A new brick mill, 125 feet long, fifty feet wide and four stories high, was completed in 1854. Mr. Dale died March 1, 1853, from the effects of a severe cold taken at the time of the fire. His

brother, Ebenezer Dale, then became a partner in the firm of "B. W. Gleason & Co." His connection, however, was little more than that of a silent partner, and agent for the sale of goods. Soon after the death of Mr. Dale, December 3, 1871, Mr. Gleason became the sole owner of the property, and on the 1st of June, 1872, received into partnership his three sons, and the firm took the name of "B. W. Gleason & Sons," and so remained after the death of the senior member, and until November, 1887, when Stillman A. Gleason retired from the firm, and it is now entitled "C. W. & A. D. Gleason," who continue the manufacture of all-wool flannels, turning out over a million yards per year, and giving constant employment to eighty persons. "The systematic organization of the business, the well established reputation of the firm, and the experience of several years under the supervision of their father, have enabled the sons to maintain both the prestige and substantial prosperity of the concern."

PERSONAL NOTICES.—*Hon. Benjamin Whitney Gleason* was born at Petersham, Mass., October 12, 1806. He was descended, in the seventh generation, from Thomas Gleason, who was an early settler of Watertown, Mass., having located there previous to 1640, when his second child and oldest son, Thomas, was born. The latter removed to Sudbury in 1665 and thence to Framingham, Mass., in 1678, where he died, July 25, 1795. The fourth child and second son of this Thomas was Isaac, who, on arriving at manhood, removed to Sherborn, Mass., where he married Deborah Leland, the great-granddaughter of Hopestill Leland, who settled at Weymouth in 1624, and removed to Sherborn in 1653. The oldest son of Isaac and Deborah Gleason was also named Isaac. In early manhood he removed to Framingham, and thence, in 1757, to Petersham. His eighth child and fourth son was Joseph, who always, after the removal of his father thither, resided at Petersham, where he died in 1814, at the age of seventy-one years. He married, August 14, 1766, Sarah Curtis. His second son and eighth child, also named Joseph, was born in Petersham, April 7, 1781, and married, October 24, 1802, Susan Whitney, daughter of Benjamin Whitney, a descendant, of the sixth generation, from John Whitney, who settled at Watertown in June, 1635, and became one of the most influential citizens, and is supposed to have been the ancestor of all, or nearly all, of the numerous family of that name in the country. The Joseph Gleason last named, the father of Hon. Benjamin W. Gleason, was a farmer by occupation, and died when the subject of this sketch was but two years old. Consequently the young lad was deprived of paternal care and influence during his childhood and youth, and he had only the meagre opportunity for an education then afforded by the common schools of a small hill-town of Worcester County. Mr. Gleason was therefore dependent for his honorable career upon his na-

B. M. Heason
1891

tive talent and great strength of character, together with such self-discipline and culture as he was able to secure in a life characterized, especially in its first forty years, by repeated changes of business and location. He was emphatically a self-made man. When about fourteen years old he entered an establishment, in his native town, to learn the trade of cabinet-making, and served through the whole term of his apprenticeship with great fidelity, gaining an expertness in the use of tools and a general acquaintance with mechanical operations, which were of great value to him in his subsequent life.

Soon after reaching his majority he went to Grafton, Mass., and obtained employment in a cotton factory, at New England Village. He remained there about five years, working in the wood department of the machine-shop, which, as was usually the case at that time in cotton and woolen mills, was connected with the factory. Some portion of his work was the making of shuttles.

From Grafton he removed, in 1833, to Worcester, where he obtained employment, as a journeyman, in a machine-shop devoted to the manufacture of cotton and woolen machinery, and remained there four years. Leaving Worcester, he went to North Andover, Mass., and entered the employment of George H. Gilbert and Parker Richardson, manufacturers of cotton and woolen machinery, under the style of "Gilbert & Richardson." This firm was dissolved in 1842, Mr. Gilbert removing to Ware, Mass., and engaging in the manufacture of flannels.

Mr. Gleason, on the 13th of July, 1842, formed a copartnership with George L. Davis, who had been a fellow-workman with him in the employ of Messrs. Gilbert & Richardson. The name of the firm who then assumed the business was "Gleason & Davis." The partners were both in the prime of life, ambitious and enterprising, and well adapted to work together. The previous experience of Mr. Gleason had thoroughly fitted him to superintend the construction of the machinery composed of wood, while Mr. Davis had had a similar experience in the working of iron. Their business gradually increased until 1848, when Charles Furber, who for several years had been in their employ, was admitted as a partner, the firm assuming the name of "Gleason, Davis & Co."

Soon after this change in the firm Mr. Gleason's health began to fail, and the indications of pulmonary disease became so apparent that he was advised by his physician, as the only hope of recovery and of prolonged life, to spend the winter in a milder climate than that of New England. He accordingly made preparations to forthwith leave for Florida.

At this juncture it was suggested to him by his friend, Mr. Ebenezer Dale, of the firm of Johnson, Sewall & Co., commission merchants of Boston, who, with others, were large creditors in the insolvent Rock Bottom Company, of which we have previously spoken, that he should undertake to place the busi-

ness of that concern on a new and firm basis. The only apparent serious obstacle to a reasonable prospect of success was the precarious condition of his health. He, however, decided to take the risk, and, as we have before stated, entered into partnership with Mr. Samuel J. Dale, a brother of Ebenezer, above mentioned. The success attending the change of business, and the removal of Mr. Gleason to Rock Bottom, we have recorded in our sketch of the development of the water-power at that village.

In the autumn of 1875 Mr. Gleason suffered a slight stroke of paralysis, partially disabling him as to physical effort. Yet he continued in some measure to superintend his business until 1880, when his failing health compelled him at least to lay aside all business cares and responsibilities, but he continued to take an interest in the occurrences of the day nearly up to the date of his death, January 19, 1884.

While he was residing at Grafton he made the acquaintance of Miss Louisa Fessenden, of Shrewsbury, who boarded in the same family with him, whom he married, August 31, 1831. She died May 8, 1858. By her he had four sons and a daughter, one of the sons dying when about ten years old.

One of the marked features of Mr. Gleason's character, which contributed very largely to his prosperous career, was his strong self-reliance. With nothing of that vanity or arrogance usually resulting from an overweening self-esteem, he had that confidence in his own powers, and in the results of his own observation and experience, that induced him to undertake a business wherein there had been repeated failures on the part of others, and then to pursue his own course, giving his personal attention to what many would consider unimportant details, which could have been attended to by others, as well as to matters of great weight and importance. This he was able to do by his tireless industry, systematic methods and remarkable executive ability.

Again, he had great will-power, which enabled him in middle life, when his physician and others feared a fatal result, to resist and throw off disease, and so to renew his vitality that he nearly reached the allotted three-score and ten years of human life before he was compelled to abate his active labors. This enabled him, before he had placed his business upon the substantial basis of assured success, to overcome difficulties which, to a less determined spirit, would have seemed to be, and indeed would have been, insurmountable.

Again, he was remarkably shrewd and sagacious, and had a very clear and quick perception of those facts and principles whereby he was enabled to correctly decide questions of the utmost importance to mercantile success, and to the favorable management of a large manufacturing establishment. Hence he could not be duped by others, while he accorded to them all they could rightfully claim for themselves.

Once more, he was economical. Some one has said

that this is "the guardian of property, the good genius whose presence guides the footsteps of every prosperous and successful man." This most excellent trait of character, while in him it did not degenerate into parsimony, was nevertheless manifest in his preference, everywhere, in his mills, on his farm, about his home and in his numerous tenements, for the substantial and useful, rather than for the showy and merely ornamental. This characteristic, as with many other men who, beginning life without money, and dependent wholly upon their own exertions, have become wealthy, contributed largely to his success, for his early savings became the foundation of a future large accumulation.

To these innate faculties, which contributed so largely to his prosperous career in life, he added those genial qualities of mind and heart that made him a most agreeable companion and won for him the universal respect and esteem of those with whom he was more or less intimately connected.

He always manifested a deep interest in the educational affairs of the town, and especially of the village where he resided, which owes its development, during the last forty years, to the growing industry under his charge, and also in the social, domestic and personal welfare of his employes. He was also a liberal contributor to the support of the religious society in the village. Though it was of a somewhat different faith from that with which he had previously been connected, he did not deem it necessary, as too many sometimes do, to go out of town for religious instruction, but sought to build up a prosperous society at home. And to the several pastors of the village church he was ever a judicious counselor, an efficient supporter and a personal friend. He was prompt to extend sympathy, encouragement and needed pecuniary aid to his employes and others of the village, when in trouble, sickness, bereavement or other circumstances, even if they were sometimes in the fault. He was a genuine lover of law and order, a friend of the down-trodden and oppressed, and during the War of the Rebellion he was a firm and faithful supporter of the government, using his great influence in the town to secure the men and the means needed to preserve the nation's life.

Having a natural love for rural pursuits, he found his recreation in the superintendence of a large, well-managed farm, and in the rearing of domestic animals of the first quality.

Though deeply interested in public affairs at home and abroad, his engrossing personal business left him little time for such official service to the town or State as his townsmen sought to secure from him, and for which no one of the citizens was more eminently qualified. He, however, in 1859, and again in 1872, represented the town in the lower branch of the Massachusetts Legislature. He was also a member of the State Senate in 1860 and 1861.

Before coming to Rock Bottom he had become in-

terested in other manufacturing enterprises. From 1847 until his failing health, in 1880, admonished him to relinquish some of his cares, he was a director in the Norway Plains Company, at Rochester, N. H. He then declined a re-election. In July of that year the company unanimously passed this resolution: "That the stockholders of the company have learned with regret that the failing health of Benjamin W. Gleason has made necessary his withdrawal as a candidate for re-election to the Board of Directors, and they wish hereby to express and to place on record their hearty thanks for his faithful service to the interests of the company, continued for so long a time, Mr. Gleason having served as a Director for thirty-three years." He was also, for several years, a director, and one year the president, of the Cabot Manufacturing Company, at Brunswick, Me. At the meeting of that company, October 20, 1880, it was voted that "the stockholders desire to place on record their sense of the long and valuable service which he has rendered to that Company, and his constant devotion to their interests." These resolutions clearly indicate how highly he was appreciated by the business men with whom he had been associated. From 1871 to 1880 he was one of the directors of the Worcester Manufacturers' Mutual Insurance Company. Thus by his efficient management of a large and growing industry, and his remarkable success in that department, together with his unwavering fidelity in all the positions he occupied, Hon. Benjamin W. Gleason most completely established his claim to an honorable place among the representative textile manufacturers of the United States.

John Green.—One of the most notable residents of the town, in its early history, was John Green, who, after some years' residence in Charlestown, returned to England, and, being a man of much ability, was in high favor with the famous Oliver Cromwell, by whom he was made captain of the guard at the dockyard at Deptford, and clerk of the Exchequer. Upon the restoration of Charles II. he returned to New England, and finally came to Stow with his sister Mary and her husband, Thomas Stevens, to whom was assigned one of the original twelve foundation lots. Mr. Green remained here until his death, and was buried in the old cemetery at the lower village. His will was dated September 4, 1688, and he probably died soon afterwards, as his will was probated February 21, 1688-89. He was evidently a man of wealth, owning much real estate in Sudbury. His library alone was valued at twenty pounds, and was an unusually large collection of books for those times.

Hon. Henry Gardner.—Probably the most distinguished native of the town was Hon. Henry Gardner (H. C. 1750). He was the son of Rev. John Gardner, and was born November 14, 1731. He represented the town in the General Court most of the time from 1757 to 1775. He was a member of the Provincial

Edw. Whitney

Congress that met at Salem, October 7, 1774, and was chosen treasurer of the Province by that body October 28, 1774, which office he held until the adoption of the State Constitution in 1780, when he was chosen the first treasurer of the Commonwealth, and continued in that office until his death, October 7, 1782, aged nearly fifty-one years. He was also a member of the Provincial Congress that assembled at Cambridge, February 1, 1775, and also at Watertown, May 31st of the same year. He was chosen councilor May 30, 1776, and was re-elected until the Constitution rendered him ineligible. He was a justice of the peace throughout the State, and for some years was one of the judges of the Common Pleas Court for Middlesex County, and he was one of the original members of the American Academy of Arts and Sciences. On announcing his death, the papers of that day spoke of him as "a courageous, uniform, industrious patriot, and a discreet, humane and upright judge." He removed from Stow about the year 1778. He married, September 21, 1778, Hannah Clapp, of Dorchester, and was the grandfather of ex-Governor Henry J. Gardner.

Hon. Edwin Whitney, the subject of this sketch, was born at Harvard, Mass., Oct. 2, 1812. He was the son of Cyrus and Mary (Whitney) Whitney, grandson of Isaiah and Persis (Randall) Whitney, great-grandson of Isaiah and Elizabeth (Whitney) Whitney, and undoubtedly descended from John and Elinor Whitney, who settled at Watertown, Mass., in 1635, though, on account of the loss, or perhaps more properly the neglect of records, that fact cannot now be clearly established. He was born on the old homestead occupied by his ancestor, one of the first settlers of what is now the town of Harvard, and which has remained in possession of the family down almost to the present day. Having grown up on a farm, he was early inured to manual labor. While residing at the family estate he attended the common schools of his native town until he was prepared to enter those of a higher grade, when he went to Brattleboro', Vt., and became a student of the academy of that place. Here he applied himself with great diligence in preparation for the study of his chosen profession of law. About the year 1831 he commenced the reading of law in the office of Judge Cheever, of Albany, N. Y., where he remained two or more years. From thence he went to New York City and completed his course of professional studies with Judge Morrell, of that city. Having been admitted to the bar, he at once became associated with Judge Morrell in professional business. For some years he was constantly employed as a public administrator of the city, in which position he was quite successful. But, at the solicitation, as we are informed, of Col. Elijah Hale, he left New York in 1844 and removed to Stow, where he continued to reside during the remainder of his life. He soon became one of the most prominent and respected citizens of the town, always desirous and

ready to do what he considered for the best interests of the community. Though a man of unassuming manners, he was nevertheless possessed of those sterling qualities of mind and heart that prepared him to take a leading position in the community where he resided. He was gifted with a good degree of public spirit, so that for nearly forty years he was a constant and efficient promoter of those measures calculated to advance the prosperity and development of all those interests conducive to the general welfare of the town and the intelligence of its inhabitants. For a series of years he was an active member of the School Committee, and a portion of the time was also the efficient superintendent of the schools, in which he was deeply interested; and in various other positions he proved himself a faithful servant of the people among whom he lived. Not only in secular matters, but also in religious, his interest was strong and unwearied. He was an active and most devoted member of the First Parish Religious Society, which for a long period he served as one of the standing committee and a prominent supporter. To whatever was conducive to the welfare of the church of which he was a communicant, or of the cause of temperance, which found in him an unfaltering friend, as well as in everything calculated to promote sound morals and good citizenship, he was ever ready to lend a helping hand and bid it a hearty God-speed. Not only was he desirous of furthering every project designed to advance the progress of universal education, general morality and practical religion, but he also could inspire others to aid in the promotion of those noble objects. He was largely instrumental not only in inducing his friend, Col. Elijah Hale, a man of wealth and yet childless, to present to the First Parish the parsonage-house and grounds now owned by them, but also to give the generous fund of \$5000 to establish and help support the High School, which bears the honored name of the donor. All this most unmistakably shows how thoroughly he had the best interests of the town at heart. Few towns have found a truer or more loyal adopted son than he.

For some years previous to May 16, 1883, when occurred the two hundredth anniversary of the incorporation of the town, he was active in collecting material which would serve to illustrate the progress of the town during the two centuries of its existence. In previous years he had served as chairman of many important committees, and he was made chairman of the committee of fifteen, chosen by the town, April 3, 1882, to arrange for the approaching bi-centennial celebration, and was also selected as the president of the day, and for nearly a year was untiring in his efforts to make the occasion one of credit to the town. Though overruled by a majority of the committee in some of his plans, he still labored with undagging zeal to make the celebration a success. But he was not destined to see the long-looked-for day; for on the 7th of March, 1883, a little more than two months

before the celebration was to take place, after an illness of a few days of pneumonia, he passed from the mortal to the immortal sphere.

The committee in rendering their report of the celebration to the town, in 1884, speak of Mr. Whitney in these words: "His long and minute acquaintance with the history of the town, together with the large amount of statistical, biographical and other valuable information which he had gathered, made his death a great loss to the committee and the town."

While he practiced law to a considerable extent after his removal from New York, the duties of his profession were somewhat subordinated to the management of a large farm that devolved upon him, and to the care of other extensive real estate of which he was the owner.

Though originally identified with the Democratic party, he earnestly espoused the anti-slavery movement that resulted in the formation of the Republican party. During the War of the Rebellion he was among the foremost of his townsmen in the support of those measures that led to the triumph of the great principles of freedom and equality embodied in the Declaration of Independence made by our Revolutionary fathers.

He represented the town in the lower branch of the Massachusetts Legislature in 1846 and 1847; and again, the district of which Stow was a part, in 1879. He was a member also of the State Senate for the year 1850.

He married, October 26, 1841, Miss Lucia Mead Whitney, daughter of Moses and Lucy (Gates) Whitney, of Stow, who still survives. She is a lineal descendant of Thomas Gates, one of the original twelve settlers of the town, and was born on the farm that he occupied. They had no children.

In addition to those already mentioned who have held important positions in public affairs, either natives or residents of the town, may be added the name of Hon. Rufus Hosmer, who was a member of the Governor's Council in 1839, and died at Boston, April 19th of that year while in office.

John Witt Randall, son of Dr. John (Harvard College, 1802) and Elizabeth (Wells) Randall, granddaughter of Samuel Adams, the great patriot of the Revolution, was born in Boston, Massachusetts, November 6, 1813. He received his preparatory education at the Boston Latin School, in company with many who were afterwards his classmates in college, by whom his peculiar and marked originality of character is well remembered. Though among them, he was not wholly of them, but seemed to have thoughts, pursuits and aspirations to which they were strangers. This was also the case after he entered college, where his tastes developed in a scientific direction, entomology being the branch to which he especially devoted himself, though heartily in sympathy with nature in her various aspects. The college did little

at that time to encourage or aid such pursuits; but Mr. Randall pursued the quiet tenor of his way till he had a very fine collection of insects and extensive and thorough knowledge on that and kindred subjects, while his taste for poetry and the belles-lettres was also highly cultivated. He studied medicine after graduation, but his acquisitions as a naturalist were so well known and recognized that he received the honorable appointment of Professor of Zoology in the department of invertebra animals in the South Sea Exploring Expedition (called Wilkes), which the United States were fitting out about this time.

In consequence of the wearisome delays and jealousies which occurred before the sailing of the expedition, Mr. Randall was led to throw up his appointment. Since that time he has led a quiet and retired life, devoting himself to his favorite pursuits, adding to these also the collection of engravings. His collection is one of the most rare and original in this country. He has also devoted much time to the cultivation and improvement of an ancestral country-seat at Stow, Massachusetts, for the ancient trees of which he has an almost individual friendship. An account of his life and experiences from Mr. Randall's own pen would have been very interesting as well as amusing and witty; for in these qualities he excels. In excusing himself from giving this he writes as follows: "As for myself, my life, having been wholly private, presents little that I care to communicate to others or that others would care to know. I cannot even say for myself as much as was contained in Professor Teufelsdröck's epitaph on a famous huntsman, viz., that in a long life he killed no less than ten thousand foxes. It might have been interesting in former days to have related adventures of my foot journeys as a naturalist amid scenes and objects then little known or wholly unknown, where the solitary backwoodsman and his family, sole occupants of a tract of boundless forests, were often so hospitable as to surrender their only bed to the stranger and huddle themselves together on the floor. But since Audubon published his travels, and railroads have penetrated everywhere, such accounts cease to be original, and indeed the people themselves have become almost everywhere homogeneous. Itineraries fill all the magazines, and natural curiosities little known forty years ago have become long since familiar to the public. As for my present self, I will say no more than that for health's sake, to be much out of doors, I have been for a long time engaged in hydraulic planting, building and other improvements on my grounds, which create, it is true, pleasant occupation, but which, when compared with wild nature so varied about me, I am impressed with the conviction how inferior are our artificial pleasures to those simple enjoyments of wood, water, air and sunshine, which we unconsciously and inexpensively share with the innumerable creatures equally capable of enjoying them. As to my literary works,—if I except scientific papers on

J W Randall

subjects long ago abandoned, as one on 'Crustacea,' in the 'Transactions of the Academy of Natural Sciences of Philadelphia;' two on 'Insects,' in the 'Transactions of the Boston Society of Natural History;' one manuscript volume on the 'Animals and Plants of Maine,' furnished to Dr. Charles T. Jackson to accompany his geological survey of that State and lost by him; 'Critical Notes on Etchers and Engravers,' one volume; 'Classifications of Ditto,' one volume, both in manuscript, incomplete and not likely to be completed, together with essays and reviews in manuscript not likely to be published,—my doings reduce themselves to six volumes of poetic works, the first of which was issued in 1856 and reviewed shortly after in the *North American*, while the others, nearly or partially completed at the outbreak of the Civil War, still lie unfinished among the many wrecks of time painful to most of us to look back upon, or reflect themselves on a future whose skies are as yet obscure." Dr. Randall was never married and resides with his sister, Miss Belinda Lull Randall, in Roxbury, Massachusetts.

CHAPTER L.

BURLINGTON.

BY MRS. MARTHA E. (SEWALL) CURTIS, ASSISTED BY W. R. CUTTER.

INTRODUCTION.

BURLINGTON was originally a part of Woburn, and much of its history has been already included under the history of that town elsewhere. Previously to 1800 the section was an important portion of the older town, when the older community was merely an agricultural one, and farms were the principal property of the inhabitants. From 1730 to 1799 the town of Woburn contained two parishes. The First, or Old Parish included the portion now covered by the present towns of Woburn and Winchester, in general terms; and the Second Parish—otherwise known at that day as the West Parish, or Woburn Precinct—comprised the part known as the present town of Burlington, and a small section of Burlington afterwards set off to Lexington. Burlington was incorporated as a separate town in 1799. The Second Parish or Precinct of Woburn was incorporated September 16, 1730, and the meeting-house, yet standing, though considerably altered, was built in 1732. One of the most important events connected with the history of this house was the loss, in 1777, of near half of the roof by a hurricane. Cotemporary chroniclers state that "near half of the roof was taken off through near the middle, and the gable end of the west side was

taken off." Esquire Thompson, of the First Parish, states:

"Past the middle of August, 1777, a hurricane occurred that tore off about half the roof of the Second Parish meeting-house, and part of sundry other buildings were destroyed—Mr. Joshua Jones' barns and some others. The wind tore up a great many apple trees, and blew down and turned up by the roots many large and strong trees, blowing almost all the limbs off some; their naked trunks still standing, five or seven, eight or ten feet high, more or less. The hurricane reached two or three miles in length, but not a quarter of that in width."

There is extant an old list containing the names of the preachers and texts in this parish meeting-house, from the day of the ordination of Rev. John Marrett as minister, December 21, 1774, to July 16, 1775, and with this list are preserved other papers of interest, from which it is learned that the people of the parish donated £2 11s. 2d. for the Revolutionary sufferers of South Carolina and Georgia, 1782, and the sum of £1 15s. 10d. to assist in rebuilding a meeting-house in Charlestown, in 1783—burned by the British, June 17, 1775.

Another interesting local occurrence was the dark day of 1780, the following description of which is taken from an interleaved almanac of 1780, kept by Rev. John Marrett, then minister of the parish:

"1780, May 19. *Muse* [in the morning], thunder and rain, an uncommon Darkness from ½ 10 clk. A. M. to ½ past 1 P. M., so Dark yt I could not see to read common print at ye window, nor see ye hour of ye clock, unless close to it, & scarcely see to read a Bible of huge print; abroad, ple. [people] left off work both in ye house and abroad; ye fowls, some of ym [them] went to roost; it was cloudy, wd [wind] S. W.; ye heavens looked yellowish and gloomy; wht [what] ye occasion of it is, unknown; ye moon full'd yesterday morn'g; many persons much terrified; never known so dark a Day; ple. lit up candles to see to dine! May 20. Some cloudy and some fair, wd. W.; last night, extraordinary Dark, notwithstanding a moon; it was cloudy, but no rain! Could not see where ye windows of ye house were, not till ye moon was above an hour high; nor see ye hand, tho' close to ye nose, any more ym [than] if ye Eyes were shut!"

The old parish burial-ground in Burlington is interesting for certain monuments to be found there, such as the stones of the three ministers of the parish before 1800. Here is the memorial erected to the Rev. Supply Clap, 1747,—the first pastor of the "Second Church of Christ in Woburn," who died in the thirty-seventh year of his age, and the thirteenth of his ministry. Beside it is the stone—one of the most prominent in the yard—of the Rev. Thomas Jones, 1774, "late pastor of the Second Church of Christ in Woburn," who died suddenly in the fifty-second year of his age and the twenty-third of his ministry. And here, too, is the stone of the Rev. John Marrett, the "third pastor of the Church of Christ in this place," who died in the year 1813, the last of the ministers of the former century. These three inscriptions on these memorials of the early ministers of Burlington Church

¹ Marrett.

² Diary (copied), p. 3.

are lengthy and enlogisticspecimens of mortuary literature; yet, no doubt, they satisfied the wants and feelings of the people of that generation, who desired thus to perpetuate the memory and good deeds of the worthy ministers who had spent their lives among them.

Beside the stone of the Rev. Supply Clap stands another to Mrs., otherwise Madam, Abigail Jones, who was, according to her epitaph, the "relict of Rev. Thomas Jones, formerly pastor of the church in this place, and daughter of John and Sarah Wiswall, of Dorchester." Her death occurred May 22, 1814, when she was aged ninety-two years. Beside her stone is a small gravestone of a child named Charles Pratt Marston, the infant son of John Marston, Esq., and Mrs. Elizabeth Marston, of Boston,—probably connections of Mrs. Jones, they having sought refuge in the Burlington Precinct, while Boston was enduring a siege. The child died October 20, 1775, aged two months, "while British forces held his native town," says the epitaph.¹

Near the western wall of this yard is a respectable slate stone, erected in memory of Cuff, "a faithful black domestic of Madam Abigail Jones," who died in April, 1813, aged about sixty-seven years. He was borne to his grave by the selectmen of the town, personally, as a mark of respect to him and the families he had served so long.

In this yard also is a stone erected in memory of Madam Hannah Peters, the relict of the "late Rev. Mr. Andrew Peters, late pastor of the church in Middleton." Her death occurred, says the epitaph, "at Woburn, May XV, MDCCLXXXII, in the LXXVIII year of her age" [1782, in her seventy-eighth year]. The Rev. Andrew Peters was the first minister of the town of Middleton, ordained 1729. He was a graduate of Harvard College, and originated in Andover. He remained in the ministry at Middleton twenty-seven years, and died there on October 6, 1756, aged fifty-five years. The historian of Middleton² says very little is recorded there of his wife Hannah; "her name is not found on the church records." But she was buried in Woburn Second Precinct, as her gravestone intimates, and had been a resident here.³

¹ From entries recorded in Rev. John Marrett's diary, it would appear that Mr. Marston and wife and children moved from Boston to Burlington, or the Woburn Precinct, on June 10, 1775. Later, on June 16th, he is spoken of as arriving from Boston again, having escaped in a fishing-boat. On September 9, 1775, Mr. Marrett rode to Lexington with Captain Marston. On October 22, 1775 (Sunday), Mr. Marrett attended the funeral of Captain Marston's child—the one mentioned in the epitaph—and on Jan. 3, 1776, the minister visited, with Captain Marston, at Deacon Reed's. Captain Marston is again referred to, under date of March 8, 1776, as visiting the minister, in the evening. On April 26, 1776, Mrs. Marston visited him.

² Lewis & Co's *Hist. of Essex Co.*, vol. i, p. 941.

A memorandum among the papers of Rev. Samuel Sewall says, that Nov. 12, 1781, Timothy Winn gave notice to the selectmen of Woburn that he had taken in Mr. Hannah Peters, from Middletown, aged 80 years. She was helpless, but he supposed had a sufficiency for her support. He offered to give bonds at the end of the year if required by the town.

There is also in this yard a large marble stone to the memory of General John Walker, 1814, father of Rev. James Walker, D.D., a president of Harvard University. On this stone is a long and ably-written inscription.

It would be easy to allude to the stones of others less distinguished, but one inscription among the others should not be missed. It is as follows, and explains itself:

"Ruth Wilson, died Dec. 3, 1871, aged 89 years. This aged lady spent most of her long life in this, her native town, respected and esteemed by her relatives and friends; and from the proceeds of money earned by her in youth, gave for the benefit of the church in this place, a fund of six thousand dollars, and to the town, six hundred dollars, to keep in repair this ancient burial-ground."

One hundred dollars for the improvement of the old cemetery was used immediately in erecting a new wall on the front side of the old burying-ground, and five hundred dollars was invested as a fund to keep the yard in repair.

Names of occupants or possessors of dwelling-houses above the value of one hundred dollars, in that part of the town of Woburn now known as the town of Burlington, owned, possessed or occupied on the 1st day of October, 1798.

[From an original document in the possession of the Woburn Public Library.]

Giles Alexander, William Abbott, Isaac Baldwin, Thomas Wright, William Newell, John Radford, Josiah Blanchard, Nathan Harrington, Benjamin Blanchard, David Blanchard, James Barry, Ebenezer Cummings, David Cummings, Samuel Carter, John Caldwell, Samuel Cutler, Samuel Fowle, Nathaniel Cutler, Jr., Jonas Carter, Joshua Carter, William Carter, James Carter, Joshua J. Caldwell, Wid. Sarah Caldwell, Jesse Dean, Samuel Dean, Kemer Blackman, Josiah Flagg, Aaron Jones, Robert Homer, Rebecca Johnson, Calvin Simonds, Reuben Johnson, William Johnson, Jotham Johnson, Wid. Abigail Jones, Josiah Johnson, David Johnson, Reuben Kimball, Philip Peters, Abiathar Johnson, Josiah Locke, Thomas Locke, Ismael Munroe, Isaac Marion, Joseph McIntire, Rev. John Marrett, Samuel Nevers, Josiah Parker, Benjamin Parker, Jonathan Reed, Jacob Reed, Jacob Richardson, Prudence Reed, Jesse Russell, Jonas Reed, George Reed, James Reed, Samuel Reed, James Reed, Jr., Nathan Simonds, Thomas Skilton, Daze Skilton, Benjamin Smith, David Lovering, Caleb Simonds, Calvin Simonds, Samuel Shedd, Solomon Trull, John Wood, Abel Wyman, Ezra Wyman, Josiah Walker, Thomas Gleason, Joseph Winn, James Walker, Samuel Walker, Benjamin Gleason, Philemon Wright, Edward Walker, Rebecca Wilson, Timothy Wilson, David Winn, Timothy Winn, John Bruce, Edward Brown, John Wood, Jr., John Walker, Josiah Walker's heirs, James Wright.

Among the owners whose houses were held by "occupants" only were: Joseph Brown, James Bennett, Benjamin Blanchard, Thomas Bartlett, Jesse Blanchard, the heirs of Micah Cutler, the heirs of Jonas Evans, Ebenezer Foster, the heirs of Joseph Johnson, Reuben Kimball, Clement Sharp, Josiah Walker, Samuel Walker, Timothy Winn and Catherine Wheeler. The situation of the houses in relation to the town, country or county roads is stated. Some are given as in the centre of the farms, and the words "public road" are once used. The area or square feet they cover, the number of stories high, the number of windows, square feet of glass, the materials of which built are stated. The materials, without exception, were of wood. An exemption from taxation was claimed for

one only, viz.,—the one occupied and improved by the settled minister, Rev. John Marrett. The valuation of each dwelling-house, with the lot and out-houses appurtenant thereto, is given in dollars and cents. The total number of houses, including the minister's, was eighty-three; valuation of the houses, out-houses, etc., by the assessors, \$30,061.

Catalogue of papers in the Woburn Public Library relating to the separation of Burlington and Woburn. The dates covered by these papers are June 10, 1799, to March 1, 1801.

1. Agreement of the Committees of Woburn and Burlington.
2. Names of Paupers supported by Woburn and Burlington.
3. An account of the Town Stock, Weights, Measures, etc., between Woburn and Burlington.
4. An account of Articles sold at Vendue belonging to same.
5. Paupers supported by Woburn and Burlington Divided.
6. Agreement between Woburn and Burlington respecting Widow Wright.
7. Do, respecting the Pound.
8. List of Paupers.
9. Cost of the School-houses in the town of Woburn.
10. List of Paupers and their ages.
11. Non-Residents in Woburn and Burlington and how they Stand in the Single Tax.
12. Accounts allowed by the Committee of Woburn and Burlington.
13. Meetings of the Committee to Settle with Burlington.
14. Division of the West Road in Burlington.
15. Agreement respecting School-Houses Divided.
16. Do, respecting James Thompson, Jr.
17. Meetings of the Committee on the West Road in B.
18. Settlement of accounts between the towns of Woburn and Burlington.
19. Agreement respecting old Orders and Notes.
20. Last division of the West Road.
21. Report of the Committee of Woburn and Burlington.
22. Outstanding orders against the town of Woburn.

NOTE.—The Woburn Public Library has also many other papers relating to that section of Woburn afterwards set off as the town of Burlington, among them the alarm list of the military company there, 1776; returns of the training soldiers of that precinct, 1776, including those that were in the Continental service in the year 1775; a list of the draft of soldiers destined for Canada, etc., and the equipage of the alarm list of the same company. Also, there are similar rolls of the same company for 1777, 1780, 1781 and 1782, and records of company meetings 1777-80.

POPULATION OF BURLINGTON IN 1800.—From a copy of the census preserved in the Woburn Public Library, taken in that year. The original contains a list of the heads of families, and the statistics pertaining to each. A summary of these is the following:

Free white males, to 10,	63
to 16,	39
to 26,	48
to 45,	47
to 45, etc.,	44
Males	241
Free white females, to 10,	71
to 16,	43
to 26,	41
to 45,	55
to 45, etc.,	59
Females	269
Total Males and Females	510
Negroes	2
Total in the town of Burlington	512

Adding Samuel Fowle's and Robert Mullet's families and Sarah Johnson, making 13
Gave an additional total to Burlington of 525
inhabitants at the opening of the century.

The houses in Burlington, according to this enumeration, were 71. Of the negroes, one African, male, belonged to the family of Abigail Jones, and one African, female, to the family of James Reed.

CHAPTER XL.

BURLINGTON—(Continued).

CIVIL HISTORY.

IN the interleaved almanac or diary of Rev. John Marrett, for 1799, we find the following notes regarding the incorporation of Burlington:

"February 28, fair and moderate, *Dmi* [Domi], this Day an act for corporating this Parish into a Township was completed by y^e General Court.

"March 11, fair & cold. *Dmi*, p. m., attended first town-meet'g in Burlington to chuse town officers.

"March 18, very cold, w'd N. & Snowy, went to an Entertainment at Capt. Wood's, be'g a general meet'g of men & y^r wives, & rejoicing on acc't of this Parish being Incorporated into a Town."

Among the papers left by Mr. Marrett, there is still in existence a yellow and time-worn but well preserved copy of the proceedings at this celebration. It is interesting to compare it with accounts of similar occasions of to-day:—

"The Principle Inhabitants of the Town of Burlington had a general & Social Interview at Capt. John Wood, Jun's, *Social Hall*, and, after partaking of a Sumptuous Dinner, the following Toasts were given:

"1. The United States of America—may foreign Influence and Domestic faction be discountenanced by every Citizen.

"2. The President of y^e United States—may the wise, firm, pacific & energetic Measures which have marked his Administration insure to him the Love, Esteem, Confidence & Support of every American.

"3. George Washington, Lieut. Genl. of the Armies of the united States—If that Illustrious Character shall again have occasion to draw his Sword in the defense of his injured and insulted Country, may it never be returned until complete Satisfaction be made.

"4. The Commonwealth of Massachusetts—the first to assert its Rights; the last to surrender them

"5. His Excellency, Increase Sumner, our worthy and Meritorious Governor

"6. The Legislature of Massachusetts—the protection of the weak, the Relief of the oppressed, and the watchful Guardian of all our Rights.

"7. The Secretaries of State, of the Treasury, of the Navy and of War—wise as a Serpent, harmless as a Dove, swift as an Eagle, and terrible as an Army with Banners.

"8. Our Infant Navy—may it increase in proportion as y^e Exigencies of our Country & Commerce may require.

"9. The Army of y^e United States—may it Combat with none but our Enemies, and then may it prove invincible.

"10. Our Ambassadors to all foreign Courts—may they maintain y^e Dignity of their Station & be faithful to our Country's cause.

"11. The town of Wbn. [Woburn]—Altho' a part has been taken off, yet may y^e remainder increase in number, wealth & Beauty.

"12. The Inhabitants of Burlington—may they unite like a Band of

Brothers, & increase in wisdom, strength & virtue, and may no private animosity or local prejudice ever annoy their future prosperity.

"13. The American fair—may they be faithful and cover this good Land with their own Sons, and let the first Lesson which they teach them be love to God & their Country.

"14. Agriculture & ye Mechanic Arts—may we enjoy ye sweets of our own Labour, uninterrupted by forrigners.

"15. Rational Liberty & happiness to ye whole family of Adam.

"16. A speedy, honourable & permanent Peace to all ye Nations of the Earth.

"The company all rose & heartily joined hands."

The author of these sentiments is unknown, but it is safe to conclude that they were composed by Rev. John Marrett, since very few persons, in those days, except ministers or college graduates, held the pen of the ready writer. The patriotism shown in many of them was characteristic of the brave clergyman, whose name headed the "Alarm List" of Woburn Precinct in Revolutionary times.

The house in which the celebration was held is still standing in the centre of Burlington. It is now owned by the heirs of the late Charles Caldwell, and its original form is mainly preserved, although, in the change from a tavern to a dwelling-house, the "Social Hall" has been divided into chambers.

The first book of the records of the town is a well-preserved, leather-covered volume, inscribed on its title page, in a legible hand, "The Commencement of the Records of the Town of Burlington."

To this book we are indebted for many facts regarding the early town history.

The first town-meeting was called by John Caldwell, one of the principal inhabitants of the town of Burlington, in obedience to a writ served by John Walker, justice of the peace. It was held March 11, 1799. The town officers chosen were a town clerk, five selectmen and overseers of the poor, three assessors, a town treasurer, a constable, three surveyors of highways, two fence-viewers, two surveyors of lumber, a sealer of leather, two measurers of wood, a clerk of the market, a sealer of weights and measures, two "hog reefes" and three field-drivers. A motion to dissolve the meeting was then passed "in the affinity."¹

At the next meeting, held April 1, 1799, the vote for State officers was taken, and certain articles relating to the appropriation of money and other town affairs were considered. True to the spirit of the fathers, the first vote of appropriation was "to raise two hundred forty-eight dollars and ninety cents for the Rev'd John Marrett's salary, y^e present year."²

The next vote was "to raise one hundred and fifty dollars for schooling."³

In Rev. Mr. Marrett's diary of 1800 we find the following account of the service held in commemoration of the death of Washington:

"Feb. 22. The Day appointed by Congress to be observed in respect to the Memory of Gen'l Wash-

ington, deceased. We had an Exercise at y^e meet'g-house and procession to the meet'g-house."

In 1810 the population of Burlington by the United States census was 471, a decrease from the number in 1800; but in 1820 it was 508, and in 1850 it had increased to 545.

Those who are now familiar with the town must not think that the marked difference we see to-day between rural Burlington and the city of Woburn existed between the old and new towns at the beginning of the century. Then the inhabitants of both places were largely engaged in agricultural pursuits. Many farmers of substantial means lived in Burlington, and it was no small loss to the mother town to be deprived of their tax money. Burlington was on the stage-route from Boston to Concord, N. H. The coming and departure of the stage-coaches brought a certain stir of life into the village several times each day and furnished the most convenient means of communication with the outside world known at that time.

During later years the Marion Tavern, still standing, in the centre of the town, became noted as the "Half-way House" between Boston and Lowell. Here the horses were changed and the passengers sometimes took dinner.

When the Lowell Railroad was built, in 1835, its course was turned aside from the direct route to the north, and Burlington was stranded by the tide of progress. The stages ceased to run; even the mail was at last carried on the cars; and a quiet—unbroken by the merry horn or the cracking of the whip—settled over the little village. The opening of the railroad marked the close of one important era of the history of Burlington.

In the dark days of the Civil War, 1861-65, the citizens of Burlington gave abundant evidence of their patriotism. Meetings were held from time to time, money was appropriated, a recruiting committee was employed to canvass the town, and the recruits were drilled under competent instructors. The town furnished eighty-two men for the war—a number exceeding, by four, all demands of the Government. The amount of money appropriated and expended by the town for the war, not including State aid, was \$10,651. This was a large sum for a town, whose valuation, in 1860, was only \$328,461, with a population of 606. The women of Burlington also did a large amount of work for the soldiers, knitting, sewing, preparing lint and bandages for the wounded, and in other ways ministering to the needs of the defenders of their country.

The name of Ward Brooks Frothingham, son of the late Dr. Nathaniel L. Frothingham, and a nephew of Hon. Edward Everett, heads the list of soldiers from Burlington. In a personal communication, he gives an account of his experience in the army, which we record here:

¹ I first enlisted, September 6, 1861, as a corporal in Company D,

¹ Town Records, vol. 1, p. 3.

² Town Records, vol. 1, p. 6.

³ Town Records, vol. 1, p. 6.

'Everett Guard,' 22d Massachusetts Infantry Volunteers. I was wounded through the left shoulder by a minie-ball, at the battle of Guinea's Mills, June 27, 1862, was taken prisoner and confined in Libby Prison. I was paroled and discharged July 30, 1862. I re-enlisted as a second lieutenant, in the 59th Massachusetts Infantry Volunteers (Fourth Veterans), April 23, 1864. I was promoted to the rank of first lieutenant for gallant and meritorious services in the battle of the Wilderness, May 6, 1864. At the battle of Spottsylvania Court-House, May 12, 1864, I was shot through the hat, and, on June 17th of the same year, in an assault on the enemy's works, my canteen was shot away. I was wounded in the right leg at the battle of Pegram's Farm, September 30, 1864. In the attack on Fort Steadman, March 25, 1865, I was captured, and, after giving up my sword, marched to Richmond and Libby Prison. I was paroled for exchange April 2, 1865, and, returning home, was 'mustered out' May 15, 1865, my services being no longer required.

"I served in the Army of the Potomac, and all the engagements in which I participated were in Virginia. Nine years after the war I was most agreeably surprised by having my sword and belt returned to me, by the rebel captain to whom I surrendered. He says in a letter to me, which I still have with me, 'I trust the sword will never be drawn again except in defence of our common country.'"¹

When the centennial anniversary of the Battle of Lexington was celebrated by that town, April 19, 1875, an invitation was sent to the citizens of Burlington to join in the exercises of the day. At a town-meeting, held March 25, 1875, it was voted to accept this invitation and to raise a sum of money to defray the expenses of the day. It was also voted to form a company of cavalry to join in the procession. This company consisted of forty-six citizens of the town and four honorary members. The officers of the company were Captain, William E. Carter; first lieutenant, George L. Tebbetts; second lieutenant, James Graham; quartermaster, George W. Austin; orderly sergeant, Nathan H. Marion. They were dressed in neat uniforms, and presented a fine appearance. They carried a handsome flag and a banner bearing two views of the "Retreat of Hancock and Adams, April 19, 1775," now the residence of Samuel Sewall, Esq., of Burlington. The cavalry escorted two carriages occupied by the honorary members and four aged citizens of the town. On their way to Lexington the company stopped to pay their respects to the "Retreat of Hancock and Adams," which was appropriately decorated for the occasion, and also to give a salutation to one of the descendants of Paul Revere, who was, at that time, an inmate of the dwelling. The 19th of April, 1875, was a day long to be remembered in Burlington.

The citizens of Burlington have always been public-spirited and liberal, according to their means. This is shown by the neat appearance of their public buildings. The Town Hall, built in 1844, was enlarged and greatly improved in 1879. Beside a commodious hall for town-meetings, lectures and social entertainments, the building now contains a convenient room for the selectmen, and a room for the post-office and town library on the lower floor, and above a well-fitted dining-hall.

There are five school-houses in town, all in good condition. Four schools are kept throughout the

year, and one additional during the winter months. This year, 1890, the town, for the first time, employs a superintendent of schools, in conjunction with several adjoining towns.

The public library of Burlington was established in 1858. It now contains 2058 volumes. The circulation, 1889-90, was 1000 volumes. The library is free to all inhabitants of the town over twelve years of age.

The late David Simonds, a wealthy resident of Boston, who was born in Burlington, recently left by will a fund of \$1000 for the town library. The library-room is adorned by a portrait of the late Col. Leonard Thompson, of Woburn, presented by his son, Leonard Thompson, Esq. Colonel Thompson was born in this town. He was a wise and public-spirited man, who achieved a high reputation for benevolence and justice to his fellow-men. In his will he left a generous gift to the Sunday-school library of Burlington. Previous to the establishment of the town library in Burlington a social library was formed. The proprietors met Aug. 30, 1816. The number of proprietors was twenty-two. Shares were sold for two dollars each, the holders being subject to an annual assessment of twenty-five cents, with fines for neglect in returning books. The records of this library are very interesting. The library was commenced with less than ninety volumes, but increased to two hundred and fifty. These books were well selected and the list of them, still extant, shows that the popular taste of those days was certainly not inferior to that of our own times. This library, for lack of interest, and perhaps other causes, was given up, in 1842, and the books divided among the shareholders. Rev. Samuel Sewall was the librarian.

In 1880 a new almshouse was built, on the town farm in Burlington to replace the old house, which was destroyed by fire in the fall of 1879. There have been few inmates in the almshouse during late years, but these seem contented and happy. Kind and Christian treatment has been the rule of the institution.

In the Introduction a description of the ancient burial-ground of Burlington was given. In 1851 land was purchased and a new cemetery laid out, on the Belford road. This cemetery was dedicated with appropriate exercises and an address by Rev. Samuel Sewall, June 25, 1851. Of late years considerable attention has been paid to the care and adornment of the cemetery. Every year a committee is elected by the town to keep the ground in order, and a sum of money appropriated for their use. Many proprietors of lots also take great pains in their improvement and adornment.

The town of Burlington is noted for the beauty of its natural scenery.

The surface is uneven and diversified by conspicuous hills, which command fine views of the surrounding country. From Bennett Hill, in the centre of

¹ Communication of Mr. Ward Brooks Frothingham.

the town, can be seen, on a clear day, Mt. Wachusett, Mt. Monadnock and other mountains of New Hampshire.

The view of the village from this hill at sunset in summer—the church tower rising above the slate stones of the burying-ground, the houses nestling among the trees, and the green fields and orchards—is one hardly to be surpassed among our New England villages.

A clear and beautiful stream of water, a branch of the Shawshine River, called Vine Brook, waters the meadows in the south part of the town.

Sources of the Ipswich River have been traced to the east part of Burlington. Situated on elevated land, the town is noted for the healthfulness of its location. Very few epidemics have prevailed here, although a letter of Rev. John Marrett to his kinsman, Rev. Isaiah Dunster, of Harwich, dated May 25, 1790, seems to hint that our modern influenza was known in that early time. In this letter, he says:

"We have not had y^e Measles tho y^e hve been all round us. It has been sickly & a time of mortality in many places this spring. with us in general healthy. The Distemper called y^e Influenza has prevailed.—I have been confined with it about 10 days. But now well, as we all are."¹

His diary for that season recorded his own illness and shows an unusual number of visits to the sick.

A newspaper clipping from the *Middlesex Observer*, March 8, 1823, carefully preserved by Rev. Samuel Sewall, gives some interesting facts regarding the healthfulness of Burlington at that time. This clipping gives an abstract of the deaths that occurred in twenty towns in the county during the year 1822, with the population of each town, according to the census of 1820.

In point of healthfulness Burlington ranked second, there being one death to every 127 inhabitants. In Hopkinton, which ranked first, there was one death to every 184 inhabitants. The population of Burlington at that time was 508; the number of deaths for the year only four. A note says:

"This is an unusually small number. In 1821 the deaths were fourteen. The average number for the past nine years has been eight. The whole number since April 13, 1814, to December 31, 1822, is seventy-one. Nineteen of them were over seventy, nine over eighty, and two over ninety years of age."

Burlington is almost entirely an agricultural town. The soil is generally fertile, and, under skillful cultivation, produces good crops of grain, vegetables and fruit. There are many successful farmers in town who are daily demonstrating that farming may be a profitable employment. Some of them raise vegetables of all kinds, early and late, which are sent to the Boston market, and others are engaged in raising milk, principally for use in Woburn. Mr. John Winn,

in the east part of the town, keeps a herd of fifty or sixty cows, and supplies many people in Woburn with milk.

Mr. Samuel Walker has become quite celebrated in this vicinity as a raiser of small fruits. He has a number of acres planted with raspberry and blackberry vines and sends large quantities of the berries to the Boston market every year.

Mr. Henry A. Coffin is engaged extensively in the poultry business and is the inventor of a successful incubator. There is one saw and grist-mill in town, owned by Mr. Edward Reed, and situated on Vine Brook. On the same stream there is also an establishment for block-printing.

There are two shoe stock manufactories in the centre of the town. One of these, owned by Mr. George L. Tebbetts, has a steam boiler of twenty-two horse-power, and employs, on an average, seventeen people. A goodly amount of business is done there.

The other, owned by Mr. W. E. Carter, has a boiler of eighteen horse-power and employs about the same number of hands.

There are two grocery-stores in Burlington—one in the centre, owned by Tebbetts & Getchell, and the other in the west village, owned by J. C. Haven. The people do much of their trading in Woburn and Boston.

The most extensive business in town is undoubtedly the ham business, owned and managed by Mr. Thomas I. Reed, who cures the celebrated "Reed hams," at his establishment in Burlington, and sells them in Boston and in many towns in the county. This business was begun, in a small way, fifty years ago, by Mr. Reed's father, the late Isaiah Reed, Jr., who commenced by buying a few hogs and selling pork and sausages. Some people in Woburn, who knew that Mr. Reed had an excellent recipe for curing hams, employed him to cure theirs and gradually the business grew, until, in 1872, he was curing four or five thousand in the season. In 1868 he began to buy hams for sale, and, that year, sold one hundred. In 1872 Mr. T. I. Reed, who had then begun to work with his father, bought and sold four hundred and fifty hams. This, he thought, was a very good year's work. In 1874 Mr. T. I. Reed took the business, after the death of his father. The business since then has constantly increased and the territory has grown more extended. In the season of 1889-90, from October 1st, to the middle of June, about eight thousand hams were cured for others, and forty thousand were bought and sold by Mr. Reed himself. In this business he employed a large number of men and horses. He has two ham buildings, one story and a half high, with cellars, one measuring twenty by fifty-five feet, and the other seventeen by fifty-one feet, and two smoke-houses, each measuring twelve by twenty-four feet. Mr. Reed has also a large farm, which he cultivates profitably.

The finest residence in Burlington is now owned,

¹ "Henry Dunster and his Descendants," by Samuel Dunster, p. 91.

with the large farm adjoining, by Mr. Samuel W. Rodman. The mansion-house was built by Rev. Nathaniel L. Frothingham, D.D., minister of the First Church in Boston, and a noted poet and translator. Dr. Frothingham had his summer home in this town for several years, and Hon. Edward Everett, a relative of Mrs. Frothingham, spent at least one season here. During his residence in Burlington, Dr. Frothingham selected a family burial-place in the new cemetery, and there he was buried.

The Burlington Agricultural Society was organized in the fall of 1889, and held their first annual field-day and fair October 3, 1889. Large numbers of people attended, many coming from adjoining towns. There was a fine collection of needlework, vegetables and historical articles to be seen in the Town-Hall, and also a good exhibition of stock and poultry on the grounds. This society is prospering, and making active preparations for its fair to be held next autumn.

Like other country towns where few changes occur, Burlington is rich in landmarks of the past. Probably the oldest house in town is the one owned by Mr. Joshua Reed, in the north part of the town. Its exact age is not known, but it is said to be certainly two hundred years old. It was once used as a garrison-house.

In the history of Woburn an account is given of events connected with the historic house which was the refuge of Hancock and Adams and the fair Dorothy Quincy on the 19th of April, 1775. This story is one of the best of authenticated traditions. It was related to Rev. Samuel Sewall, who records it in his "History of Woburn," by two of the witnesses of the occasion—by Madam Jones, who was living when he came to preach in Burlington, and by the veritable Dorothy Quincy, afterward Madam Hancock, and, by a second marriage, Madam Scott, who was a relative of the Sewalls, and is still remembered by Samuel Sewall, Esq., of Burlington.

A very large chestnut tree near this house is supposed to be one which remained from the original forest, since no record exists of its planting, as is the case with the other trees around the house; it measures four feet in diameter.

The house of Captain James Reed, where the first Revolutionary prisoners were confined, is still owned by his descendants. The house owned by Deacon Samuel Reed, where the library and public records of Harvard College were kept in those perilous times, is still standing, although not in the possession of the family.

The Middlesex Turnpike, once a famous highway, passed through a part of Burlington. There were no gates in this town. The "Turnpike" is now one of the public roads.

The territory embraced by the town of Burlington was once the home of many Indians. Numerous relics, as stone tomahawks and arrow-heads, are still

found by the farmers as they overturn the fields with their plows.

Probably the most distinguished individual born in Burlington, or in Woburn Precinct, was the late Rev. James Walker, D.D., president of Harvard University for several years. He was the son of General John and Lucy (Johnson) Walker, and born August 16, 1794. His father was a famous and influential man of his times. His mother was descended from Captain Edward Johnson, one of the noted founders of Woburn.

There has been one native of Burlington whose life was extended to the long duration of one hundred years. Mrs. Betsey Taylor, who died March 25, 1865, aged one hundred years and five months, was born in this town and spent her life here. She remembered the 19th of April, 1775, and once told the Rev. Samuel Sewall that, while it was yet dark on that eventful morning, a messenger was sent from Captain Joshua Walker, commander of the military men of the precinct, to her father, Jonathan Proctor, drummer of the company, to beat an alarm as soon as possible, as the "red-coats" were on the march towards Lexington. As she advanced in years she asked Rev. Mr. Sewall to promise that the one hundredth anniversary of her birth should be publicly celebrated, as she felt that she should live to that "great age," as she called it. This he readily promised, and the celebration was held at her home, as she was then unable to leave the house—October 31, 1864. Mr. Sewall made an address and conducted appropriate religious exercises.

In concluding the civil history of the town, we are led to inquire what manner of men were these who laid its foundations and "buildd better than they knew?"

We have already spoken of their true Puritan principles and zeal for the worship of God, which led them to surmount all difficulties and endure "all manner of contradiction" that they might be incorporated as a parish, and have a place for public worship convenient to their homes. The cost of the meeting-house—\$943.17—was a considerable sum of money for those days, and the addition to the taxes of individuals, each one being taxed according to his estate, was not a small burden. Certain votes and proceedings at the early meetings of the town show us that money was not plentiful, even as late as 1800. Propositions which incurred expense were often promptly voted down.

In reading these records, we must remember that our forefathers acted not from parsimony only, but from what appeared to them, in the light of their times, to be true economy and thrift.

The attitude of the people on the reforms of the day is important. Very few slaves were owned in Woburn Precinct. The most noted of these was Cuff, the servant of Madam Jones, mentioned in the Introduction. The class distinctions of his day were such,

however, that he was obliged to sit in the gallery of the meeting-house, but, as he had the care of his young mistress, the granddaughter of Madam Jones, he took her to sit with him.

It is a remarkable fact that, although liquors were extensively used in olden times, at all occasions, joyful and sorrowful, even at ordinations and church-raising, there is no record that any money was expended for them by this parish or church.

The ordination of one of the ministers, at least, was celebrated by a ball, and it is related that the people once partly paid for the painting of the meeting-house in a similar way. The people gave strict attention to the observance of the Sabbath, which began at sunset Saturday night, and continued twenty-four hours. Travelers were not allowed to travel through the parish. A story is told of those days which shows that "one touch of nature makes us all akin." It is said that a certain drover came from the north and stopped over Saturday night at a tavern in this place. The tithingmen went to forbid his moving the herd on the Sabbath, but being received with great affability, they were entrapped into examining the herd, and the sight of one particularly fine animal tempted one of the tithingmen to ask its price, whereupon the drover called out to his men, "Let down the bars. If it's right to buy cattle on the Lord's day, it's right to drive them."

Whether this story is true or not, these traditions teach us that our forefathers were not entirely different from the people of to-day. They had their joys and sorrows, their virtues and frailties, their human affections and passions. Let us preserve all the records that remain of their family and social life, as well as the more public memorials of the transactions of the church and town.

CHAPTER LII.

BURLINGTON—(Continued).

ECCLESIASTICAL HISTORY.

Our fathers, where are they? The worthy of old,
Whose praise and whose honor with joy we have told?
With strength and with patience they labored and prayed,
They trusted God's mercy, though often delayed,
And still on the Mighty their courage was stayed.

The walls that they builded are firm as the hill,
We meet where they met, but their voices are still.
From altars of earth, they ascended on high,
To worship our God in the courts of the sky;
Their fame and their labor the ages defy.

We stand in their places, our foot-steps may tread
The path that they followed, by righteousness led.
We pray for their spirit, our work to perform,
While, faithful to duty, in shining and storm,
We gather the harvest of holy reform.

—Hymn for the 150th Anniversary of the Church in Burlington by M. E. S. C.

The history of Burlington, especially in early times, is vitally connected with that of the church. The

distance from the meeting-house in Woburn and the strong determination of the inhabitants of ancient Shawshin, or "Shushan," as this part of Woburn was then called, to attend public worship, led to the formation of the Second Parish in 1730, and shortly afterward, to the building of the meeting-house and organization of the church. There has been but one church in Burlington, and never any strenuous attempt to form another, although a few families have always attended the churches of their choice in adjoining towns. This church is Congregational Trinitarian. It has always been liberal in spirit and doctrine, and very few theological controversies stain its records.

This church was organized October 29, 1735, Old Style, or November 8, 1735, according to our present mode of reckoning. Ten male members, including the pastor, subscribed to the church covenant. The following list of these members is given for convenience in reference:¹

Simon Thompson, John Spear, James Thompson, Joseph Pierce, Edward Johnson, William Bruce, Supply Clap (the first minister), George Reed, Ebenezer Johnson, Samuel Walker.

The history of this church and parish from 1730 to the incorporation of the town in 1799, has been included in the "Ecclesiastical History of Woburn."

A note in the first book of church records, in the handwriting of Rev. John Marrett, states that from November 23, 1735, to December 28, 1800, 943 people were baptized.² In the same book, Rev. Samuel Sewall, his successor, records that the whole number baptized by Mr. Marrett, from December 25, 1774, to his death, in 1813, was 358.³

Later church records help to furnish the following statistics: Whole number admitted into the church, 466; present number of members, 58; whole number of baptisms, 1177.

In the description of the ancient burial-place in the Introduction, the fund left to the church by Miss Ruth Wilson was mentioned. The interest of this sum for years paid one-half of the church expenses. Of her it may be truly said, "She being dead, yet speaketh."

In the Introduction to this history reference was made to the old meeting-house, built in 1732, two years after the Old South in Boston. In 1799 this ancient house of worship was still preserved in its original form. After forty years' exposure to the wind and storms it was painted, and the diamond panes in the windows were exchanged for the square form of glass; but it had neither steeple nor bell. When the meeting-house was built there were no pews, but the floor was occupied with long seats. The men sat on one side of the broad aisle and the

¹ Records of Second Church in Woburn, vol. i, p. 1.

² Church Records, vol. i, fly leaf.

³ Church Records, vol. i, p. 98.

women on the other. In those days it was necessary, according to the old custom, to "seat the meeting-house." In 1735, by a vote of the parish, the first pew lots were sold and pews built upon them, and these continued, from time to time, to replace the ancient seats, until, in 1814, the last seats were exchanged for pews. In 1824 the meeting-house suffered from the injuries done by a severe storm. The front door was blown down, and the inside of the house was considerably damaged. These injuries were repaired and by the pious care of the people; the meeting-house was kept in good condition and in its original form until 1846. At this time it was thoroughly repaired and remodeled.

Ten feet were added to its length, the porch was built and also the steeple with its bell. The inside was entirely changed and greatly improved. On the last Sunday in which the people worshiped in the parish meeting-house, before leaving it to the hands of the repairing workmen, Rev. Samuel Sewall preached a sermon from the text, "Remember the days of old, consider the years of many generations; ask thy father and he will shew thee; thy elders and they will tell thee." Deut. 32: 7. This sermon is still remembered as "The Farewell to the old Meeting-House."

Its closing sentences are given here, as affording a picture of the ancient house of God and showing also the simple and genuine eloquence of the preacher:

"For myself then and for you, in your name, I will now bid Farewell to this House of Prayer.

"Farewell, ye pews, in which we and our fathers and our fathers' fathers have sought our God and listened to the instructions of his Word.

"Farewell, ye galleries, and especially thou, in which the sweet singers of our Israel, the skillful in holy song, in our days and in those which have gone by, have declared the high praises of our God, have sung the songs of Zion.

"Farewell, thou Deacons' Seat, in which the former deacons of this Church of God, now deceased, a Reed and a Walker, a Johnson and a Reed, a Winn and a Blanchard, a Simonds and a Cutler, were accustomed successively to sit; where its former pastors have stood, one after another, and blessed the memorials of the Saviour's death, and dedicated to his service with baptismal water the infant offspring of their people.

"Farewell, thou Sounding-Board; under whose shade many a venerable minister of religion in former days has stood, dispensing the Word of Life, thinking he was much indebted to thee for his power to be heard, but whose services the notions of modern times have led men to dispense with.

"Farewell, thou Pulpit, in which my predecessors and I once used to stand in performing the holy offices to which we were called. Thanks for all the enjoyment and comfort I have taken and for any good I may have done in thee: and if I or any other

preacher that has occupied thee has ever abused or slighted thy accommodation, may God forgive!

"Farewell, thou House of God, in thy present form; a long, a final farewell. But, blessed be God! we hope to meet in thee again, with thy walls rebuilt and with new and better accommodations for the sacred services for which thou art designed than thou hast ever afforded. The prospect of that day we will cherish with thankfulness; we will hail its arrival with pious joy. Amen."¹

It does not appear that the meeting-house was dedicated at the time of its erection, but, in 1846, when it was re-opened to the public, after the repairs, it was consecrated, with appropriate ceremonies, to the worship of God.

In the loft of this remodeled meeting-house could still be seen the timbers of the original frame, untouched with decay, and, as the old sexton of the parish used to remark, "so hard that no worm could eat them."

These remain to this day in the heart of the building, and stoutly resisted the carpenter's chisel in 1888.

The one hundred and fiftieth anniversary of the organization of the church and settlement of the first minister was celebrated on Sunday, Nov. 8, 1885. The church was decorated with rare plants, flowers and evergreens. Noticeable among the decorations was a board taken from the meeting-house in 1846, bearing in ancient lettering this inscription:

Built—1732.

Repaired—1793.

This was sold with other lumber to Mr. William Locke, of Lexington, who had the charge of remodeling the meeting-house in 1846. By his generosity it was restored to its original place. A large audience attended and the old meeting-house was once more filled with worshipers as in the olden days, when tradition says that all the seats were occupied, on ordinary occasions, and the teller of the tale, then a boy in the parish, was obliged to sit on the gallery-stairs.

The exercises opened with the singing of "Old Hundred" by the congregation. Prayer was offered by Rev. Leander Thompson, of North Woburn. A hymn written for the occasion by Rev. Charles C. Sewall, of Medfield, was sung by the congregation, to York Tune as sung by our forefathers.

An excellent historical sermon was delivered by Rev. Charles Anderson, the pastor of the church.

His text was from Joshua 13: 1—"Thou art old and stricken in years and there remaineth yet very much land to be possessed." This sermon gave an interesting review of the past and pointed lessons of inspiration and admonition for the future.

At the conclusion of the sermon the hymn at the heading of this chapter was sung. The sacrament of

¹ Manuscript sermon of Rev. Samuel Sewall.

the Lord's Supper was then administered by the pastor, assisted by Rev. Leander Thompson.

The ancient silver cups used in this service were presented to the church as follows: two by Dea. George Reed, in 1718 and 1734; one by Roland Cotton, 1741; one by Roland Cotton and Nathaniel Saltonstall, no date; one by Silvanus Wood, 1808; one by Rev. John Marrett, 1813; one by Timothy Winn, 1814.

On Monday evening the citizens of the town held a banquet and reception in the Town Hall. Prominent among the decorations was the sword of Rev. John Marrett. At the post-prandial exercises, addresses were given by Rev. Charles Anderson, Rev. Daniel March, D.D., Samuel Sewall, Esq., Rev. E. G. Porter and William Winn, Esq.

At this time considerable enthusiasm was aroused, among the people of the town and those from abroad who were interested in the place as their former home, or the home of their forefathers, in regard to repairing the meeting-house, which had begun to plainly show the marks of time and age.

Through the efforts of Rev. Charles Anderson the funds for this purpose were raised, generous help being given by friends from abroad. The work of repairing and remodeling was begun and completed in 1888. The steeple was removed and a new tower and porch built on the south side of the meeting-house. The interior was entirely changed and, instead of the one room with hall and gallery, now contains an auditorium for public worship, a vestry for the Sunday-school and above the vestry a parlor and kitchen, all handsomely decorated and furnished. The windows in the auditorium were given by Mrs. S. D. Warren, of Boston, as a memorial to her father, Rev. Dorus Clark, D.D., once acting pastor of this church, and to his wife, "who loved and served this people."

Before the remodeling of the meeting-house was completed Rev. Charles Anderson had resigned his pastoral charge and Rev. Charles H. Washburn was acting as pastor of the church. Interesting services of re-dedication were held at the meeting-house December 20, 1888. The sermon was preached by Rev. Daniel March, D.D., of Woburn. The Sunday-school has been for many years an important factor in the life of the church.

Rev. John Marrett faithfully performed the duty of catechising the children, as recorded in his diary. This was continued by his successor, Rev. Samuel Sewall, for a time. Mr. Sewall then formed Bible classes for the young men and women of the parish, who met at the house of the minister, to be instructed in the Scripture. The Sunday-school was organized May 4, 1827. At their first meeting Dr. Ezra Ripley, of Concord, addressed the school. A library was given by Messrs. J. B. and Nathan Blanchard.

The present superintendent of the school is Mr. Thomas I. Reed, chosen in 1871. It has been a

peaceful and prosperous school, productive of great good to the young people of the town.

The Ladies' Benevolent Society, connected with the church, has always acted a prominent and useful part in charitable work among the poor and in contributing to the funds of the church. This society celebrated the fiftieth anniversary of its organization by a reception and reunion of members, May 22, 1890. The president, Mrs. Mary B. Reed, has held her office for thirty-six years.

The ministers of the church in Woburn Precinct previous to 1799 were Rev. Supply Clap, ordained November 8, 1735, died January 8, 1748, and Rev. Thomas Jones, ordained January 2, 1751, died March 13, 1774.

An account of these ministers will be found in the Ecclesiastical History of Woburn.

The pastor of the church in 1799 was Rev. John Marrett, a direct descendant of the fifth generation from Henry Dunster, first president of Harvard College. He was born in Cambridge September 21, 1747, and graduated from Harvard College in 1763. He married, December 16, 1779, Martha Jones, daughter of Rev. Thomas Jones.

He was ordained December 21, 1774, and continued his ministry in Burlington until his death, February 18, 1813. The time between these dates includes a period of loving, faithful and earnest service as pastor, neighbor and friend, which left a mark on his contemporaries and influenced generations then unborn. Mr. Marrett was a fine representative of the old-fashioned clergyman—a class which has ceased to exist, even in our rural villages.

Among his manuscripts are copies of short addresses to his people which show that his ideas were in advance of the time in which he lived. In regard to admitting persons into the ordinances of the church, he says:

"I would n't [not] have y^e Door so large or wide as to admit unsuitable persons nor so streight or narrow as to exclude y^e well disposed." In the same address he recommends that when persons have any confession to make to the church it shall be before the church alone and not before the congregation.

In his time the reading of the Scripture was not usually a part of public worship, but when a large Bible was presented to the church he signified his intention of reading in it, "while y^e season was moderate." The last words bring manifold suggestions of the days when our fathers worshiped in unwarmed, comfortless, meeting-houses, without the modern conveniences we now think necessary to our spiritual well-being.¹

Like nearly all country clergymen of a century ago, Mr. Marrett was also a proprietor of land and a practical farmer. Tradition hath it that he often worked in his own fields.

¹ "March 5, 1790. Began to read y^e S. S. in Publick."—*Diary*. "S. S." meaning the "Sacred Scriptures."

Mr. Marrett kept a diary, still in the possession of his descendants, to which frequent reference has been made in this history. Besides notes of the weather, descriptions of journeys, memoranda of parish work and farming, it contains accounts of noted public events, such as the Boston massacre, the Boston tea party and the battles of Lexington and Bunker Hill. Several times, he writes, that he went to meeting "on rackets," or snow-shoes. Mr. Marrett's successor as minister of Burlington was Rev. Samuel Sewall, still remembered and revered as "Father Sewall." He was descended from Henry Sewall, of Newbury, the first of the name in this country, and son of Henry Sewall, the mayor of Coventry, England. Among his ancestors were Samuel Sewall, chief justice of the Province of Massachusetts Bay from 1718 to 1728, celebrated as one of the presiding judges at the witchcraft trials in Salem, 1692, and his son, Rev. Joseph Sewall, a noted minister of the Old South Church in Boston. Samuel Sewall was the son of Chief Justice Samuel Sewall and Abigail (Devereux) Sewall, and was born at Marblehead June 1, 1785. There is a family tradition that he was consecrated in infancy by his mother to the Christian ministry. Certainly, his parents seem to have directed his education with that end in view. Wise and thoughtful beyond his years, as his early writings show, he readily took a hold upon "things unseen," and began in youth to lay the foundations of that character whose symmetrical completion was an inspiration to all who knew him in his ripe old age. Having fitted for college in the academy at Marblehead, he entered Harvard University in 1809, when only fifteen years old, and graduated with honor in 1804. Having already decided upon his profession, he at once began the study of theology at Cambridge, filling, at the same time, a minor position in the college government.

After the completion of his professional studies he took orders in the Episcopal Church, of which his parents were members; but, after officiating in this church for a short time, in Cambridge and elsewhere, he became dissatisfied with some articles of its creed and decided to enter the ministry of the Congregational Church. He was ordained at Burlington April 13, 1814, where he preached as a candidate, after the death of Mr. Marrett. He married, January 1, 1818, Martha Marrett, daughter of Rev. John Marrett, and took up his abode in the house formerly owned and occupied by his predecessors, Mr. Jones and Mr. Marrett, the grandfather and father of his wife. This dwelling was especially dear to him on account of its associations with the past.

As a pastor, Mr. Sewall was greatly beloved by his people. His name is still spoken with loving memory at the firesides of the parish. His sermons, still in existence, are marked by their earnest purpose and vigor of thought. After twenty-eight years of faithful ministry, Mr. Sewall gave up his pastoral charge, but did not relinquish his interest in the wel-

fare of his townspeople or his zeal in the cause of his Master. He continued to preach, from time to time, as long as he lived. He was the first minister of the church in North Woburn, where he preached for some time, and during his ministry the first meeting-house in that place was built. A memorial window in the new meeting-house, given by the church in Burlington, commemorates his faithful labors in that parish.

Mr. Sewall was a man of public spirit, and ever active in all movements for the good of the town. He filled the offices of town clerk and School Committee with acceptance for a term of years. It is a well-known fact that men of strong intellect usually cherish a favorite avocation or study apart from their business or professional cares, which they pursue with avidity in leisure hours. This chosen study with Mr. Sewall was historical and genealogical research. Certain circumstances of his life favored this choice. Descended from a family rich in traditions and memorials of the past, he was connected by marriage with another family also famous for the preservation of these valuable heirlooms.

As an antiquarian Mr. Sewall became widely distinguished. His contributions to historical literature have always been highly valued, and those who knew him best can testify to the care and faithfulness of his researches. His last and greatest work was the "History of Woburn." This was printed while its author lay on his death-bed. For himself, he said he wished to live only a few hours longer, that he might see the completion of this work, the result of years of study and toil; but this could not be. Mr. Sewall's last sermon was preached at Carlisle, Mass., August 11, 1867. The last public service in which he participated was the ordination of Mr. Alfred S. Hudson, at Burlington, December 19, 1867, where he made the ordaining prayer. Rev. Samuel Sewall died February 18, 1868. His funeral, attended by hundreds of his friends and former parishioners, was held at the Burlington meeting-house, February 21, 1868, and his remains were laid at rest beside his wife—who died several years before—in the new cemetery at Burlington.

It is impossible for us in the limits of this sketch to do justice to the historian, the author and the preacher, Samuel Sewall. Worldly distinction he never sought, and fame he never courted. He was indeed one of those whom the poet Lowell describes:

"The bravely dumb that did their deed
And scorned to blot it with a name,
Men of the plain, heroic breed
That loved Heaven's silence more than fame."

After the resignation of Mr. Sewall the church remained without a settled minister until 1849, when Rev. Harrison G. Park was called by a unanimous vote to the office of pastor. He was installed November 15, 1849, and continued in his office until May 10, 1852, when he was dismissed at

his own request. Mr. Park died several years ago. The next settled minister was Rev. Alfred S. Hudson, who was ordained December 19, 1867, and resigned his office June 9, 1873.

He is now minister of the Congregational Church in Ayer, Mass., and has achieved a worthy reputation as the author of the "History of Sudbury," his native town.

In 1873 the churches in North Woburn and Burlington agreed to unite in the choice of a minister, and, September 2, 1874, Rev. Charles Anderson was ordained and settled over the two parishes.

Mr. Anderson's ministry extended over a period of fourteen years. Possessing remarkable power as a preacher, he might easily have filled a more noteworthy position, but he preferred to remain among the people of his first choice. His self-denying devotion was richly rewarded, and his ministry was marked with signal success.

In 1887 he received a call to a professorship in Robert College, Constantinople, Turkey. As he had been a teacher in that institution in his youth, and was thoroughly acquainted with the work, he felt that this was a summons of duty, and, greatly to the regret of his people, he accepted. He was dismissed July 2, 1888, and in September sailed with his family for Constantinople.

Rev. Charles H. Washburn is the present acting pastor of the church.

Among the ministers who have, at different times, preached in Burlington, although not settled, were Rev. Nathaniel Richardson, Rev. Dorus Clarke, D.D., and Rev. Eb Moody.

EXTRACTS FROM REV. JOHN MARRETT'S INTER-
LEAVED ALMANAC FOR 1775, AND 1776, NOT
ELSEWHERE NOTICED.

January 1, 1775. Preached at Woburn; went from Deacon Reed's to meeting on snow-shoes.

3. Rode to Cambridge; lodged at College.

4. Rode to Boston and returned to Cambridge; lodged at College. Patty B-r-d-n married to Mr. Osgood, of Andover.

5. Returned to Lexington. 6. At Lexington.

7. Rode to Woburn; lodged at Deacon Reed's.

8. Preached at Woburn. 9. At Woburn.

10. At Woburn. Spent evening at Deacon Reed's. Sons much company.

11. *P.M.* Rode to Lexington.

12. At Lexington. Sent my goods to Woburn.

13. Moved to Woburn. Board at Madam Jones's, for 40s. per week, and keep my horse myself.

[15.] Sunday. Preached at home. A full meeting.

18. Spent the evening at Reuben Kimball's. Much company.

21. *P.M.* Rode to Billerica. Sunday. Preached at Billerica on exchange.

23. Rode to Woburn. Lodged at Lieut. Johnson's. Visited a number of families in West Quarter.

24. Dined at Deacon Reed's. Rode home.

25. Dined at Deacon Johnson's with much company.

27. At home. Mr. Thaxter dined here.

28. Last night, between 9 and 10 o'clock, had to visit a sick woman, Mrs. Twiss. Sunday. Preached at home.

30. *P.M.* Visited a number of families on Billerica Road. Evening. Mr. Coggin spent with me.

31. Hay brought me by Messrs. Trask and Dodge. Evening. Deacon Reed's sons and wife visited [me].

February 1, 1775. Attend Mr. Sherman's Lecture and preached.

2. Preached a lecture for Mr. Cummings.

5. Sunday. Preached at home. A full meeting.

7. Deacon Reed and Sergt. Joseph Johnson visited me.

8. Rode to Lexington. 9. Lodged at my brother's last night. Attend lecture at Lexington; a lecture on the times. I began with prayer. Mr. Cushing preached from Psalm 22: "He is governor among the nations." Mr. Clark concluded with prayer.

10. Spent last evening at John Wood's. Much company. Lodged at Deacon Reed's.

12. Sunday. *P.M.* Very snowy. Thin meeting.

13. Rode to Wilmington and return.

15. Chilly, uncomfortable. Rode to Boston and returned to Cambridge. Lodged with Mr. Gannett at College. 16. Returned home.

19. Sunday. Preached at Wilmington on exchange.

21. Mr. Clark, of Lexington, visited here.

27. Visited several families towards Lexington side—seven houses.

28. Married a couple. Visited three houses.

March 6, 1775. Prayed at March meeting. Rode to Lexington. 7. Lodged last night at Brother's. Spent day at Lexington. Attend training there. At night rode home.

12. Sunday. Preached at Lexington in exchange.

13. Parish meeting. A committee came to know if I would accept some certain sum of money in lieu of my wood, and after some discourse I told them that I would accept of £8 annually in lieu thereof, which they cheerfully and thankfully received.

14. Attend the funeral of Mrs. Sarah Johnson, widow of the late Deacon Johnson.

16. Annual fast. Preached at home, *P.M.* A very full meeting.

20. Rode to Cambridge. Dined at College. Returned home.

21. Training. Viewed arms.

25. Towards night rode to Woburn Old Parish.

[26.] Sunday. Lodged last night at Mrs. Burbeen's, and preached at Woburn Old Parish on exchange. Mr. Prentiss preached for me, and Mr. Sherman for Mr. Prentiss, and I for Mr. Sherman. Returned home.

27. At home. Bottled cider; 11 dozen and 1 bottle, and visited Messrs. Trask, Abijah Smith and Andrews.

29. My Lecture. Mr. Cummings preached from John 20:29. A good sermon. Mr. Edward Brooks and wife, of Medford, here.

30. Preached lecture at Billerica and returned.

April 2, 1775. Sunday. The first sacrament I have had since ordination. Lengthened the intermission during summer season two hours.

3. Visited Henry Reel, James Twist, Stearns, Gleason and McIntire.

4. Rode to Wilmington and Reading. *P.M.* Heard Mr. Stone [of Reading] preach a sermon to the minute-men. Returned to Wilmington; lodged at Mr. Morrill's.

5. Returned home before dinner.

6. Rode to Lexington; attend lecture. Mr. Cooke, of Menotomy, preached. Mr. Cushing and Mr. Woodward there.

8. People moving out of Boston on account of the troops.

9. Sunday. Mr. Marston came up from Boston to get a place here for his wife and children.

10. Rode to Stow. Dined at Concord. Lodged at Madam Gardner's. 11. Rode from Stow to Northboro'. 12. At Northboro'; at Mrs. Martin's. 13. Return from Northboro' to Lexington. 17. Visited Thomas Locke, Newman and Welsh.

18. Attend funeral of child at Abel Wyman's.

20. *P.M.* Attend funeral of Mr. Baldwin, in Woburn town, who died of a fever; and afterwards rode to Lexington and saw the mischief the Regulars did, and returned home.

21. Rode to Concord. The country coming in fast to our help. Returned home.

22. At home. All quiet here. Our forces gathered at Cambridge and towns about Boston. The Regulars removed from Charlestown to Boston the day before yesterday.¹

[23.] Sunday. Preached at home. Soldiers traveling down and returning; brought their arms with them to meeting, with warlike accoutrements. A dark day. In the forenoon service, just as service was ended, Doctor Blodget came in for the people to go with their teams to bring provisions from Marblehead out of the way of the men of war. Considerable number at meeting.

24. At home. A dull time. Packing up my most valuable effects to be ready to move on any sudden occasion.

25. Rode to Cambridge. Our forces very numerous there. Lodged at Richard Clark's, Watertown.

26. Returned home, *via* Lexington. Many houses on the road pillaged by the Regulars between Lexington and Charlestown.

27. Josiah Quincy arrived this week from England and died at Cape Ann.

29. Rode to Bedford. Sunday. Preached at Bedford on exchange.

May 2, 1775. Rode to ministers' meeting at Mr. Stone's. Lodged at Mr. Smith's. 3. Rode to Topsfield and to Boxford. Lodged at Mr. Holyoke's.

7. *P.M.* Preached at Old Parish in exchange with Mr. Coggin.

8. Rode to Billerica and returned. 9. To Lexington.

11. Fast Day. Preached at Reading in exchange for Mr. Haven. Rode to Medford.

12. Lodged last night at Capt. Brooks, Medford. Rode through Cambridge to Dorchester. Surveyed the situation of our forces.

13. Lodged last night at Mr. Wiswell's, at Dorchester, and returned home through Cambridge.

17. Saw about 9 o'clock *P.M.*, a great fire towards Boston. Went up a hill and saw the blaze. Just before the fire heard a great noise.

18. The fire last night was in Boston. Burnt a number of stores. It began in one of the barracks.

21. Sunday. Married Josiah Wilkins, of Marlboro', to Judith Fox, of Woburn Old Parish. They came to my lodgings.

23. Last Sabbath our people destroyed a quantity of hay at Weymouth, which the Regulars attempted to get to Boston. Some firing on both sides, but have not heard that any were killed.

26. Mr. Prentiss, of Reading, dined with me.

[27.] Sunday. Last night exceeding warm. Lay most naked. All day and in the night heard the cannon at Boston. A skirmish, I suppose, between the troops under General Gage and our forces. Heard the cannon in time of service, *A.M.*, and hear our forces have burnt a tender to a man-of-war, this morning, at the mouth of the Mistic River, and that they from yesterday, *P.M.*, to to-day, were firing at each other.

29. Catechising the children,—thirty in number.

30. Rode to Cambridge. Lodged at Dr. Appleton's.

31. Rode to Watertown. Dr. Langdon preached to the Congress from Is. i: 28. Lodged at Waltham.

June 1, 1775. Rode to Watertown. Heard Mr. Stevens preach Convention sermon. Rode to Cambridge and home.

4. Sunday. Mr. Wyeth came up between meetings and preached *P.M.*

6. *P.M.* Married Joshua Reed.

9. Went fishing at Billerica with Messrs. Blanchard and Andrews.

10. Mr. Marston and wife and children moved from Boston here.

16. Mr. Marston, of Boston, arrived here. He escaped in a fishing boat.²

19. Rode to Menotomy and lodged at Mr. Wellington's.

20. Rode to Watertown and Cambridge, and viewed the intrenchments of our army between Cambridge and Charlestown and returned home.

¹ For entry regarding the events of the 19th of April, see Sewall's *Woburn*, 363.

² For entry regarding the events of the 17th of June, see *Woburn Journal*, May 22, 1875.

21. Mr. Wigglesworth came here and lodged.¹

24. Began to rain about noon. We have had an early and long and severe drought. *P.M.* Just heard that our army had entrenched last night near the enemy on Bunker's Hill, and that the enemy this morning appeared with their horse in battle array and in readiness at the bottom of the Hill by Charlestown Neck to drive our forces away; but after a while they withdrew. The heavy cannon are now playing, the firing is smart and very plainly heard.

29. In evening, married Ruth Wyman to Josiah Kendall.

July 1, 1775. Heard the firing of some cannon which were at Roxbury Neck.

[2] Sunday. A great deal of firing below. It began about daybreak and continued till 7 o'clock. Heard it was at Roxbury Neck. Mr. Prentiss, of Charlestown, preached for me. *A.M.* *P.M.* Preached myself and attended a funeral of Jesse Russell's [wife] in the other parish.

3. Rode to Lexington and returned, and attended a funeral in the other Parish of a young man, who received his death wound by a horse's throwing him.

4. Attended Ministers' meeting at Billerica. I was admitted into the association.

9. Sunday. Mr. Prentiss, of Charlestown, preached for me, *P.M.*

10. Thermometer 92° in a shade abroad.

11. Thermometer 95° in the shade abroad.

12. Rode to Lexington. *P.M.* Great shower of rain, which extended far and wide. Rained about an hour as fast as ever I saw. I believed the water ran in brooks and stood in ponds. After shower rode to Watertown.

13. Last night lodged at Watertown, and rode to Roxbury, Cambridge, and to Prospect and Winter Hills, and viewed the forts and entrenchments, well executed and strong. Prayed in evening with Colonel Gerrish's regiment and returned home. 16. Sunday. Mr. Prentiss, of Charlestown, preached for me. 17. Great shower of hail, etc.

20. A General fast appointed throughout British America by the Continental Congress at Philadelphia. Preached at home.

21. Rode to Cambridge. Lodged at Mr. Watson's.

22. At Cambridge. At evening prayed in the army. [23.] Sunday. Last night lodged at Mr. Tappan's. *A.M.* Preached in the army. *P.M.* Some rain which prevented preaching. 24. At Cambridge.

25. Return home.

26. Very unwell. 27. Extreme sultry: hot. Rain, *P.M.*, etc. It has been a very dry time, the hay cut greatly short. English hay here 22s. per hundred. Indian corn looks promising. The rye very short and flax. 28. Dine at Mr. Reuben Kimball's.

30. Sunday. Attend the funeral of old Mr. Simonds; a very large funeral.

August 2, 1775. My lecture; Mr. Morrill preached from Psalm 56: 3. After lecture had church meeting. Chose Mr. David Blanchard and Mr. Joseph Johnson (3d), deacons. There were 17 members present. Mr. B. had 10 votes; the rest scattering votes. Mr. Joseph Johnson, the Third, had 11 votes.

3. Evening. Married a couple.

6. Sunday. Mr. Prentiss, of Charlestown, preached all day. Sacrament.

8. Visited a sick person in the Old Parish at Capt. Brooks's. *P.M.* Visited James Johnson's son.

10. Visited Capt. Walker's son, sick.

11. Rode to Bedford and returned. On return called and prayed with Bacon's family, very sick, and also visited and prayed with Capt. Walker's son.

13. Sunday. Preached at Bedford on exchange. Returned very unwell. 14. Very unwell. 15. Do.

16. Better, but very feeble; a cold in the limbs, attended with some fever; little or no appetite. 17, 18, 19, Sunday. Unwell, at home. Mr. Wyeth preached all day for me. I am very unwell—not able to preach—the rheumatic disorder.

21. Visited Jonas Walker, very sick.

23. Rode to Deacon Reed's and returned at night. Unwell. 24. Not well. 25, 26. Ditto. 27. Sunday. No preaching nor meeting. Not well.

28. Master Hutchinson, of Boston, lodged here. To-day I rode to Lexington, dined at Brother's and returned.

29. Rainy day, at home. Took a vomit. 30. At home, unwell. 31. Better of my sickness.

September 1, 1775. Confined to house. 2. Rode, but in the *P.M.*, unwell. [3.] Sunday. Exceeding rainy, a northeast storm; abundance of rain. Mr. Brooks, of Medford, preached for me. At home; did not attend meeting; very unwell. 4. At home, confined to house. 5. Rode out in Parish. 6. Rode to Wilmington. Feel better in health. 7. *P.M.* Rode to Billerica and back. 8. Rode out in the afternoon. 9. Rode to Lexington with Capt. Marston. A short shower at Lexington and some rain at Woburn. Very warm after the rain.

11. Visited three sick persons, viz.: Old Mrs. Proctor, John Gleason's wife and Stratton's wife.

12. Rode to Cambridge, and viewed the camps and forts, and returned at night. Boston is hedged in on every side but the water.

13. *P.M.* Attend a funeral of Mr. Switcher's [Sweetser] child, of Charlestown, now living in the other Parish, and prayed with a sick woman at Dr. Hay's.

14. Attend a funeral of Bartholomew Richardson's child in Old Parish.

16. Visited Mrs. Kendall, a dying person, and who died while I was there.

17. Sunday. After meeting *P.M.*, attend a funeral of a child of Jonathan Carter's, Old Parish.

18. Visited four sick persons and attended the funeral of Mrs. Kendall. A sickly time.

¹ For entry on the 22d, see Sewall's *Woburn*, 578, the 29th, see Sewall, 573.

19. Visited three sick persons.
 20. *P.M.* Attended the funeral of Mr. Isaac¹ Snow, Old Parish, and on return prayed with the sick at Capt. Walker's.

21. Attended and preached Mr. Clark's Lecture, My birthday.

22. Visited Elizabeth Reed's daughter, sick.

23. Attended the funeral of Capt. Walker's child.

24. Sunday. Put on coarse, linen shirt.

25. Visited six houses where there were sick, and prayed, and two houses of well.

27. Lecture. Mr. Cumings preached. Mr. Whitney, of Attleboro', here with Mr. Cummings.

29. Visited sick at John Caldwell's and Center's, Old Parish.

30. Attended the funeral of Abraham Alexander's child.

October 2, 1775. Visited the sick and catechised the children present, 24.

3. Prayed with Center's Son and Mrs. Kendall, Old Parish. Rode to Reading, attend Ministers' meeting at Mr. Prentiss's, and *P.M.*, returned and attended the funeral of John Caldwell's child.

5. *P.M.* Attended two funerals in Old Parish and prayed with a sick person. Evening, married Jonas Evans, of Reading, to Rachel Eames, of Woburn.

6. Deacon Johnson moving my goods, I purposing to board at his house.

9. Moved myself from Mrs. Jones's to Deacon Johnson's to live.

10. Visited George Reed's and Elizabeth Reed's families, very sick.

11. Attend the funeral of Center's son, aged 8 years and 7 months. Evening, came on thunder and lightning and rain. Rained most of the night. The lightning exceeding sharp and very frequent,—more lightning than at any one time this year. A building on fire at the westward, not far distant. Set on fire, I imagine, by the lightning. Isaac Stearns's barn, of Billerica, was consumed, being struck with lightning. Barn was 85 feet long.

13. Rode to Lexington. Attended the funeral of one of Brother's children, viz., Ruth, aged seven years, and returned.

18. Messrs. Wigglesworth and Gannett dined here.

22. Sunday. Attend the funeral of Capt. Marston's child.

23. Rode to Watertown, *via* Lexington. Very sickly at my brother's. Lodged at Watertown.

24. Rode from Watertown to Cambridge, viewed the camps and returned home.

25. Mr. Burbeen dined with me. *P.M.*, visited old Mrs. Reed, being sick.

30. Visited Mr. Welch's daughter, she being sick.

November 1, 1775. Rode to Concord. Attended the Dudleian Lecture. Dr. Langdon preached from Micah 4: 5. Subject: Natural religion. Returned home.

2. Deacon Marrett, of Cape Ann, here. 3. He lodged here, weather bound. *P.M.* Attended funeral of the Widow Mary Reed. 4. Deacon Marrett went, morning. 6. Visited at Mr. Symmes's.

7. Rode to Wilmington to Ministers' meeting and returned.

9. Cannon fired much from 12 to 3 o'clock; about 400 or 500 Regulars landed on Lechmere's Point and carried off 1 cow. They were soon drove off by a party of our soldiers. We lost 1 man killed, and 1 mortally wounded. What they lost, cannot tell.

13. *P.M.* Attended funeral of one Mrs. Perry in the Old Parish, and visited Solomon Wood's wife, being sick.

21. President Langdon came here.

22. Visited Mrs. Temple's daughter, dangerously ill.

23. Thanksgiving Day.

25. *P.M.* Attended the funeral of Mrs. Temple's daughter.

28. Visited Mr. Peters's child at Jonathan Johnson's.

30. Attended three funerals in my Parish, viz., Widow Speer; a child of Abraham Alexander's; and a child of Mr. Peters's, of Wilmington, which died here; and married a couple.

December 2, 1775. *P.M.* Attended the funeral of Samuel Converse, of Old Parish, aged 40 years.

5. Rode to Cambridge and back. Hear Quebec is taken by the Provincials.

9. Attended the funeral of Mr. Sweetcher's wife.

17. Sunday. Heard several cannon fired. Our people are raising a covert way from Prospect to Cobble Hill, and the enemy endeavoring to prevent them.

18. The firing yesterday was at Lechmere's Point, our people intrenching there. A ship that had lain up the River all summer moved off this morning.

20. Fair, and the coldest day this season. At home. Heard several cannon fired.

23. *P.M.* Attended the funeral of Mr. Gardner, leather dresser, formerly of Charlestown; he died in the other parish.

25. Christmas.

27. Attended the funeral of Madam Temple, late of Charlestown, who died at Captain Johnson's; and married Josiah Locke to Elizabeth Richardson, both of Woburn Old Parish.

29. Rode to Cambridge and returned, and lodged at Jonathan Carter's. Last night our forces arranged to attack Bunker Hill over the ice on the mill pond, but the ice was not strong enough, and therefore they desisted.

30. *P.M.* Many cannon fired. Returned home, *A.M.*

January 1, 1776. Dined at Mrs. Temple's, and visited John Dix's sick child.

2. Spent evening at Shubael Johnson's.

3. Visited with Captain Marston at Deacon Reed's, and in evening married a couple.

¹ Should be Timothy, not Isaac Snow.—Etc.

10. Called up about break of day to visit Capt. Wood's wife, being sick.

15. Ditto.

18. Cannon fired much. Heard our army is defeated at Quebec.

21. Sunday. Preached at Old Parish on exchange with Mr. Burbeen.

22. Evening, singing meeting here.

23. Rode to Cambridge and viewed the lines, and returned home; Deacon Johnson and wife went with me.

24. Got my hay home from Caldwell's.

31. Eight men enlisted out of this parish for two months.

February 2, 1776. Heard several cannon.

4. Sunday. Fair and exceeding cold. Last night, between 11 o'clock and 12 o'clock, there was either a small shock of an earthquake or else the ground cracked, it being frozen very hard. It gave the house a sudden and smart shock and was felt in like manner at Wilmington at the same time. It proceeded from north to south.

12. Heard many cannon, supposed to be below Boston, at sea.

14. Last night the enemy burned some houses and barns on Dorchester Neck.

19. Rode, *P.M.*, to Esquire Reed's, of Lexington, and back again. Mr. Trask, of my parish, dined with me.

20. Brother Marrett and wife visited here. *Vespere*, at Deacon Reed's.

22. Visited old Mrs. Wyman, being sick.

23. Visited, at Thos. Skilton's, the widow Simonds.

28. Mr. Stone, of Reading, and Mr. Jacob Gould, of Weymouth, dined with me. Sent my watch by Mr. Gould to Braintree, to Mr. Cranch's, to be mended.

March 3, 1776. Sunday. *P.M.* Master Coggin preached from 2 Cor. 5: 10. People in great anxiety about some important transactions speedily to take place between our army and the enemy's forces. 4. Last night, from eight in the evening till the morning, the cannon and mortars between our army and the enemy fired more or less; and to-day were firing more or less, till between 12 o'clock and one, a general battle or a very smart skirmish, ensued, as I judge, from the report of small arms and cannon. The regulars had a mock fight in Boston. Visited Lieut. Tidd's sick child. My people collecting rags, etc., for the use of the army.

5. Last night, the mortars and cannon played very fast most all night from both sides, and our army entrenched on Dorchester Hill without any molestation. Rode to Cambridge.

6. Lodged at Cambridge. Returned home.

7. Fast day. Preached at home, *P.M.* Mr. Coggin made the first prayer.

8. Evening. Captain Marston visited here. Visited Lieut. Tidd's children, being sick.

10. Sunday. Last night our forces entrenched on another hill on Dorchester Point, nearer to Boston. A smart firing ensued on both sides. We lost about 12 men. [At first we were drove off, but by a reinforcement carried on and completed the work. *Not true.*]

11. Visited Mr. Spear, being sick, and prayed at parish meeting. Hear the small-pox is at Welch's.

12. Attend a funeral of Lieut. Tidd's grandchild.

13. Attend the funeral of Mr. Robert Spear.

18. Yesterday morning, about break of day, the British troops evacuated Bunker Hill and Boston, and all the shipping moved off and lay wind bound below the castle,—whither bound, know not,—but it is conjectured to Halifax to wait on orders from Great Britain. Our forces have taken possession of all the places they have left. The Lord be praised! Last night we intrenched on Dorchester Point.

19. Dined at Timothy Winn's. *P.M.* Rode to Old Parish and attended Mr. Pool's funeral. Mr. Morrill and I prayed with the sick woman, Mrs. Pool. Hear that below the Castle the ships are arrived to the fleet of the enemy, which lies below.

20. Rode to Charlestown Ferry and viewed Bunker Hill, the works of the enemy, and the ruins of the town. The fleet lays below the Castle. Returned home *via* Cambridge. 21. A great fire last evening at the Castle, the enemy demolishing it. Rode to Old Parish to see Mrs. Pool, sick.

22. Attend a funeral of Abijah Thompson's child, Old Parish.

23. Visit James Twist's wife, being sick.

25. *P.M.* Visit James Twist's wife and Dodge's child, being sick. 28. Attend the funeral of James Twist's wife.

April 2, 1776. Attend funeral of Nathaniel Wyman.

5. Attend the funeral of Daniel Simonds and his wife, two aged persons in Lexington.

8. *P.M.* Visit old Mrs. Ditsen, being sick.

14. Sunday. After meeting, *P.M.*, attend the funeral of an infant of Mr. Ranger, and visited Mrs. Ditsen, being sick.

19. Rode to Lexington; dined at Brother's. *P.M.* Attended a lecture in commemoration of Lexington Battle. Mr. Clark performed the whole exercise; preached from Joel, 3d chapter, the last verses; a very crowded audience; the militia companies in Lexington mustered. Returned home.

23. Rode to Boston and returned home. First time I have been to Boston since the enemy evacuated it.

24. *P.M.* Spent at Reuben Kimball's. 26. Mrs. Marston visited here.

28. Sunday. Mr. Gannett preached for me all day, from Psalm 110: 1, 2.

May 3, 1776. Mr. Thurston, a preacher in the other Parish, visited me. 5 (Sunday). Rode to Concord and preached on an exchange with Mr. Emerson. 6. Lodged last night at Doctor Minot's. Returned home. 7. *P.M.* Attend Ministers' meeting at Mr. Stone's; admitted Mr. French. Returned.

16. Attended the funeral of George Reed's negro woman.

17. A Continental Fast; preached at home, a full meeting.

18. Visited Amos Wyman and wife, being sick.

19. Sunday. Exchanged with Mr. Haven, of Reading, and returned.

20. Hear a large brig loaded with wartlike stores was taken by us from the enemy, as she was coming into Boston Harbor.

23. Dined at Joshua Jones's.

27. Catechise the children.

29. Rode to Watertown; attend Election; Mr. West, of Dartmouth, preached. 30. Lodged last night at Mr. Meriam's, of Newton. Attend Convention; Mr. Cooke preached from 1 Thess. 2:4. Returned home in the afternoon.

June 1, 1776. Hear our forces at Quebec have been driven from their entrenchments, and renewed the attack afterwards, being reinforced, and recovered their lost ground.

3. Went to the Castle with Woburn militia to intrench.

4. Lodged last night at Roxbury. This morning sailed from Boston to the Castle: intrenched all day. *P. M.* Returned home with the militia.

5. Visited Jotham Johnson's child, sick.

6. Dined at Mrs. Wood's.

8. Rode to Needham. 9. (Sunday.) Preached on exchange with Mr. Coggin, at New Parish, in Needham.

13. Rode to Reading; Attend Mr. Haven's wife's funeral; Mr. Morrill prayed. Returned.

14. Capt. Marrett dined here.

15. Night before last, 5000 of our people went down and intrenched on an island and another place in Boston Harbor, and yesterday morning drove all the enemy's ships down below the lighthouse. A 50-gun ship was obliged to cut her cable and be towed down by boats, etc. At home, Mr. Clark was here.

16. Sunday. Preached at Lexington and returned.

17. Visit Amos Wyman, being sick.

18. Attend Training.

19. *P. M.* Set out for Boston. Lodged at Carter's.

20. Rode to Boston and returned home.

24. Visited James Thompson's wife and Reuben Kimball's wife, being sick.

25. Exceeding hot; the hottest—very dry and melancholy time. At home.

27. Wind northeast, cooler than for many days.

29. Exceeding hot and scorching, and burning sun. The land mourning by reason of the dearth.

30. Sunday. *P. M.*, 6 o'clock, came up a cloud attended with some thunder and sharp lightning, and rained for above an hour;—great part of the time exceeding fast;—abundance of rain for the time. The water stood in ponds and ran like brooks; and afterwards [it was] misty and moist. Not so much rain have we had for a month past. The Lord is gracious

and full of compassion, slow to anger, and of great mercy!

July 2, 1776. Independency. 3. Lecture on account of the drought and war; Mr. Penniman preached from Psalm 39:9. 4. Attend lecture at Bedford; Mr. Emerson prayed and preached; I made last prayer. Returned home.

6. Small-pox in Boston, inoculating there. Ten men, of the fifteen, enlisted out of this parish for the expedition to Canada—5000 to be raised from this province for New York and Canada.

14. Sunday. Preached at Bedford. Mr. Sprague preached for me, and Mr. Penniman for him, at Carlisle (Concord). Five o'clock *P. M.* Preached at lecture, at home, to a party of soldiers going on the Canada expedition.

15. Visited Amos Wyman, sick in a deep consumption. [The diarist had visited him times before.]

18. *P. M.* Rode to Lexington and back; my brother and two of his sons and eighteen others inoculated last week in his own house for the small-pox.

23. Mr. Wyeth came here and tarried all night.

24. Hear the enemy's ships are destroyed by a tempest at South Carolina; two 40-gun ships, one 50-gun ship and a tender and a transport lost, and all the men perished.

25. Woburn Company of soldiers for the Canada expedition marched for Crown Point. Prayed with them at Deacon Blanchard's.

29. Visit young Mr. Nevers and Mr. Amos Wyman, being sick.

30. The moon eclipsed.

August 1, 1776. Provincial Fast. Exchanged with Mr. Morrill.

2. Evening, saw either uncommon frequent flashes of lightning in the northeast towards Cape Ann, or else flashes of cannon.

9. Prayed with Deacon Blanchard, being sick.

12. Visit Mrs. Nevers, sick. Extreme hot.

14. Attend the funeral of Zebadiah Wyman's wife, 2 o'clock *P. M.*

17. Visit Mrs. Nevers, a dying.

18. (Sunday.) Attend funeral of Samuel Nevers's wife.

23. The enemy landed on Long Island, New York.

24 and 25. Fight at New York, Long Island.

26. Visit Ditson's child, sick.

September 1, 1776. Sunday. Attend funeral of Samuel Ditson's child.

7. Hear our forces are beat off from Long Island, at New York, and that four boats full of men in coming away were taken prisoners.

12. Visited Elijah Wyman, sick.

15. (Sunday.) Read the Declaration for Independency.

20. Visit Joshua Jones's wife, sick.

25. Attend Duddiean Lecture at Cambridge. Mr. Morrill, of Wilmington, preached. Subject: Revealed religion from 1 Peter 3: 15.

26. Attend the funeral of Luther Simonds's child.

October 2, 1776. Mr. Jones, candidate preaching in other parish, preached from 1 Peter 1: 12;—"Which things the angels desire to look into."

4. Attend funeral of Mrs. Nevers's youngest child.

6. Sunday. Uncle Dunster and his wife kept Sabbath here.

9. Rode to Mistick and back.

10. Visit Mrs. Burton on account of her child's death.

13. Sunday. Preached at Old Parish on exchange with Mr. Jones. Mr. Emerson, of Concord, died at Otter Creek.

17. Attended Lecture in Lexington; Mr. Cooke preached.

26. Rode to Stow.

[27.] Sunday. Preached at Stow on an exchange.

28. Rode to Lancaster and returned to Stow; lodged at Deacon Gates's.

29. Returned home. Heard [that] Mr. Emerson, of Concord, died at Otter Creek, [the] 13th inst.

November 7, 1776. Jacob Bacon, who was put into Concord Jail, for abusing his wife, this day made way with himself by cutting his throat, in jail.

15. Visit Sylvanus Woods, being sick.

16. Fort Washington taken.

19. Rode to Newton.

20. Lodged last night at Mr. Pigeon's. Visit some in Newton and rode to Cambridge.

21. Lodged last night at College. Rode to Boston and returned home.

24. Sunday. Rode to Medford and preached on exchange.

25. Lodged last night at Edward Brooks's, dined at Menotomy, and returned home.

December 9, 1776. Visited Elizabeth Reed, sick. Hear a fleet of the enemy's ships are seen off Rhode Island.

12. Thanksgiving. First snow, 2 inches.

13. Dined at Samuel Reed's, Jr.'s; General Lee taken prisoner by treachery.

14. Attend funeral of Thomas Skilton's child.

16. Visit James Thompson's wife and John Gleason, being sick. Spent evening at Mr. Grimes's.

18. General Howe marching towards Philadelphia, General Washington before, and General Lee behind.*

22. Snow on level about 6 inches.

23. Visited Elizabeth Reed and Thomas Skilton, being sick, and dined at Deacon Reed's.

24. In evening, married Widow Wyman to Mr. Richardson, of Billerica.

31. Visited Jonathan Tidd, Jr., and old Mrs. Thompson, being sick.

CHAPTER LIII.

SHERBORN.

BY ALBERT H. BLANCHARD, M.D.

Two hundred and fifty years ago the territory which now constitutes the pleasant town of Sherborn was one vast wilderness. No white face had ever been seen within its borders; only the Indian and his dusky mate trod its forest paths and plied the canoe on its fair streams. In peace and plenty they lived their rude life, contented with the products of the chase and of the lakes and rivers, the Charles on the east and the Sudbury on the west. The Nipmuck tribe, less warlike than some of their neighbors, occupied this region and that to the westward of it. They had just heard, in 1621, of the arrival on the shores of Plymouth of a band of men with pale faces, and in some manner communicated with them. This was the first inland tribe with which the English formed an acquaintance. It was independent of other tribes and powerful in numbers. Naturally peaceful, they prospered so long as they held together, and resisted the influences of the other tribes. When first known to the white settlers they were governed by a squaw-sachem, who resided near Wachusett Mountain, and they possessed most of the present counties of Middlesex and Worcester, and still more land to the north and west. But in the year 1647 they were unable to agree concerning a chief, and divided into as many as five bands, each having a different chief. Traditions appear to show that one of these bands settled in the locality which is now the southwest part of Sherborn, and erected their "stan-nocks" or wigwams there; hence the name by which that district was formerly known, and by which it is still called by some of the older inhabitants.

After this disunion of the great Nipmuck nation it lost its former power and prestige, and the divisions became subject to more powerful tribes. The band which settled in this locality came under the influence of Massasoit, the chief of the Wampanoags, and were induced by his son and successor, King Philip, to unite with him in his disastrous war against the English. They ultimately gained nothing by this step, their numbers being reduced in the warfare, and after the death of Philip but few were left.

While the Nipmucks dwelt in the southerly portion of this territory, another tribe of Indians had settled about five miles to the northeast of them, at the present site of South Natick. They were called the Natick Indians, and were brought thither from Nonantum by the Apostle John Eliot, who desired a more secluded place. Although the date of their removal is not accurately known, it was probably not far from the year 1650. By the time the town of Sherborn was formed, they had already a town organization and many of them were converted to

* 26. General Washington, with 3000 in the Jerseys routed a body of 1000 of the enemy, who were stationed at Trenton. Took prisoners 919, besides what were killed and wounded, mostly Hessian troops; 6 brass pieces of ordnance, 1200 small arms, 4 stands of colors, a band of music, etc.

Christianity. It was a colony of Indians, founded and encouraged by Eliot; and Waban was the most prominent and influential man among them, and his name often appears in the business transactions of that day.

It cannot be supposed that land so well situated and so well watered could long remain unattractive to the English settlers. Medfield had been previously colonized, and individuals from that town had doubtless explored the neighboring Bogistow and perhaps had visited the then friendly Indians in that locality and had noticed its capabilities for improvement. Grants of land by the General Court were commenced as early as the year 1643, and were continued at intervals for thirty years, but always subject to the rights of the Indians, who received payment and gave deeds for all the land afterwards included in the township. Grants are found recorded to Rev. John Allen, Captain Robert Kayne, Richard Brown, Richard Parker, Simon Bradstreet, Captain Eleazer Lusber, Dean Winthrop, Tho. Holbrook, William Colburne, Colonel William Brown, Lieutenant Joshua Fisher, Edward Tyng, John Parker. These persons were non-residents, and at later dates conveyed their grants to actual settlers.

We are now approaching the period when an entire change is to commence in the territory which we have been considering, and in the condition of its Indian inhabitants. The white man is to appear upon the scene—the Anglo-Saxon, with his cool head, his calculating brain, and an intellect cultivated through generations of ancestors. Although entering upon the land with the fairest and kindest feelings towards the aboriginal inhabitants, still it is impossible that the latter, with their free and untrammelled life, their uncultured instincts and habits, which brooked no control and which answered a slight or an insult with the spear or the tomahawk, could long live in peace and harmony with a race diametrically opposite in character and modes of life. It has always proved true that the race that dominates intellectually, holds the land and the situation, while the inferior race, after ineffectual attempts at resistance, gradually succumbs and melts away. It was so in this instance. Had the Nipmucks held together and retained their former peaceable habits, the evil day might have been long delayed. When they lost union they lost strength. Dissensions and division into bands weakened their force and led to further dissension, by which they became a prey to the seductive voice of the able and wily Philip and were drawn into his scheme to exterminate the new race of colonists, who had come to these shores to take away the fair hunting-grounds of the red men, as they believed, and to despoil them of their birthright. An eloquent writer has described their feelings and caused them to say "Stranger, there is eternal war between me and thee." Some of the shrewd sachems, and notably Philip, of Mount Hope, had the foresight to perceive that these

two races could not exist together; and, with characteristic cunning and violence which had never failed him before and which he believed would not fail him now, determined on a war which should continue until the hated pale-face should be destroyed or driven from the face of the land.

Nor can we wonder at this feeling among a people who had for centuries occupied the country and had the belief that it was their own, and that no foreign race had a right to claim what had been bequeathed by their ancestors. They knew nothing about conciliation. It had always been their habit to conquer by force and violence whatever was opposed to their wishes, and they could act in no other manner now. Although received peaceably at first, the arguments of the chiefs excited the Indians gradually against the English settlers, until the horror and desolation of a savage war was upon them.

Leaving now the native inhabitants, we come to the commencement of actual settlement by the English colonists.

The first transfer to actual settlers, of the land of either of the grantees, was made May 8, 1652, O. S., by Richard Parker to Nicholas Wood, Thomas Holbrook and Andrew Pitcher, all of Dorchester. The deed described 535 acres of meadow and upland "lying in the woods on the West side of Charles river, 3 ms. from Natick, lying between the land of Capt. Robert Kayne on the S. side, and Mr. Richard Browne, of Watertown, in some part on the S. side also; by Charles river on the E. (and a rocky point now called the Neck, running into the river); and by common woods on the W."

Nicholas Wood and Thomas Holbrook immediately took possession and commenced labors upon the land. But it is probable that Wood had resided here before this date, as he had a child recorded at Medfield as early as January, 1651. He may have settled upon the grant with the consent of the grantee, before any negotiations were completed for the purchase of the land. It is generally conceded that he was the first settler. He was a hardy, enterprising man and became one of the foremost in the new colony. He signed the first petition for the incorporation of the town, was a member of the church, and was possessed of a large property for those times, his inventory after death amounting, after the payment of debts and expenses, to £978 18s., or about \$5000. He erected his house very near the present site of the cider manufactory of Jona. Holbrook & Sons, and founded it on a rock, as though he intended to commence strongly and surely. Although he had no male issue which perpetuated his name, yet some prominent and highly distinguished men were descended from him, among whom were Henry Ware, Sr., D.D., and Asher Ware, LL.D.

Thomas Holbrook built his first house on his share of the grant near Dearth's bridge and near the present residence of Charles Howe. He planted an

extensive orchard there, and was so liberal in the distribution of its fruit that his buildings were secured from the torch of the Indian enemy while others near him were laid in ashes. In 1657 he petitioned for the high, rocky point east of Parker's grant, comprising the Neck before mentioned, and the General Court granted him 50 acres. He then purchased 43 acres more of the government and thus became possessor of the entire tract between the first purchase and the river. In 1666 he erected a new dwelling on the spot where the late Dexter Amsden lived, and in that year deeded 80 acres of his first purchase of Parker to his brother-in-law, Henry Layland or Leland, who had already occupied it for twelve years, having removed from Dorchester in 1654. He was a son of Hopestill Leland, the common ancestor of all the New England Lelands, who came from Yorkshire, England, about 1624, settled at Weymouth, and afterwards removed to Dorchester. He passed his last days with his children at Bogistow and died there in 1655, at the age of seventy-five. He was one of the oldest men that had then settled in New England, having been born in 1580.

Henry Leland became a man of mark in the new colony, and tradition gives him a high character for piety and kindness to the Indians. He signed both petitions for the incorporation of the town. He was chosen on a committee to provide a minister for Sherborne, and was associated with the selectmen "to grant town lots to those that were known among the inhabitants."

In 1847 a large meeting of his descendants was held in a mammoth tent on "The Plain," and the occasion was one of great interest. Mrs. Millard Filmore, whose husband was President of the United States two years later, was present at the celebration as one of Henry Layland's posterity. A granite monument to their common ancestor, suitably inscribed, was dedicated to his memory on the same day by his grateful descendants, as a part of the exercises which had been arranged. It stands at the north side of the Common.

Andrew Pitcher, the third purchaser of the grant of Richard Parker, does not appear to have settled here, but sold his land in lots or parcels to other persons.

In 1657 or 1658, Benjamin Bullard, George Fairbank, John Hill and Thomas Breck, having purchased of the executors of Capt. Robert Kayne, of Boston, a part of his grant at Pawsett Hill, removed here and settled near Bogistow Pond, south of the land purchased by Thomas Holbrook and divided their land into suitable lots, built houses and also erected a substantial fort, of which we shall hear more at a later date.

Benjamin Bullard became one of the foremost men in the colony. He signed both petitions for the incorporation of the town, was one of six brethren to constitute the church at its formation, served as

thingman and as selectman, and was chosen to the very delicate office of seating the meeting-house when the edifice was completed. At this day we have but little idea of the responsibility attached to the duty of assigning seats to the different members, in due order of precedence and dignity, so as to give to each one their just claims, as they were then considered. He was also one of the chief contributors to the extinguishment of the Indian claims, a work which had not been completed by the grantees, but was left for the settlers.

George Fairbank also took a considerable part in the business of the new town and seems to have been an orderly and esteemed citizen. One of his sons, Jonathan, was the first physician of Sherborn, and an important man in his day. He was selectman seven years and town clerk three years. He is supposed to have lived in the old stone house north of Bogistow Pond, and was drowned by falling through the ice, in crossing from Medfield in the night.

John Hill signed the petitions for incorporation, drew many lots of public lands, and was assessed the highest among the proprietors of Sherborn to extinguish Indian claims in 1686. He was therefore a man of good property.

Thomas Breck married a sister of John Hill, with whom he bought a portion of Robert Kayne's grant, which they then divided as was the custom, so that each should have suitable portions of meadow and upland, arable land and cedar swamp. In such divisions it was a matter of prime importance that each colonist should have a portion of cedar woods from which to cut posts and rails, for they had not then learned that such could be made from other kinds of wood. Breck signed both of the petitions for incorporation, and his descendants remained living in the same locality until a few years since.

Daniel Morse purchased of Simon Bradstreet, the grantee, 800 acres in the eastern part of Sherborn, and immediately settled upon it in 1658, building his house at or near the present site of the residence of the late Leonard T. Morse. The whole tract was called Morse's Farm, and afterwards "The Farm," a designation which it retains to this day. Morse was evidently a man of rank, and acted as a leader in the new colony. In all public meetings and elections, precedence was uniformly yielded to him as long as he lived. His son Obadiah was the first town clerk and representative, and also acted as a schoolmaster in the town.

These were the principal and permanent early settlers of the colony. Some others came, but removed prior to 1674. They were men in the prime of life, of strong, determined character and not easily discouraged, and most of them were men of substance. Many of their names still live in the persons of their descendants, who are found among the prominent citizens of Sherborn at this day. And they required all the energy and endurance of which man is capa-

ble, to subdue the wild lands "in the wilderness beyond Medfield," and to protect themselves against the lurking Indian. Their farms, as has been seen, were mostly in the present southern part of Sherborn, and included a portion of the eastern portion of Medway, and the colony was known by the Indian name of Bogistow. It is perpetuated in the name of a meadow, pond and brook, which are so called to this day. In various petitions to the Governor of the Colony and to the General Court, the settlers term themselves "inhabitants of Bogistow," and "inhabitants & proprietors of lands at or near Boggestow."

As the colonists received, from time to time, accessions to their numbers, with the prospect of further additions, they began to entertain hopes of being formed into a town. Although living at a considerable distance from Medfield, and not included within its bounds, they took up privileges there and became enrolled and taxed as her citizens, and the births and deaths in their families were there recorded for twenty-five years.

But in ten years after the first settlement an effort was made by the colonists to gain recognition as a town, and there was prepared "The humble petition of several of the inhabitants of Bogistow, to be presented to the much honored General Court, 7 of 3 mo. (May), 1662," signed by fourteen heads of families. The General Court appointed "Ephraim Littlefield and Edward Jackson a Committee to view the place and return their apprehensions." The result seems to have been unfavorable, as nothing more is seen in the records concerning the petition. Of its fourteen subscribers, six removed and died before 1674. The settlement continued, however, and others were added to its numbers, both by new arrivals and by the marriage and establishment of sons of the first planters. These were men not easily daunted nor turned from their purpose when they had once determined to settle themselves in the wilderness and form new homes, and, eventually, a new town.

At length, in the year 1674, twenty-two years after the arrival of the first pioneers, the number of families amounted to twenty, and the population to about 108. Capt. Joseph Morse, a young man of great ability, had lately removed into the colony, and had married Mehetabel, a daughter of Nicolas Wood, who was the first Anglo-American child born here, the date of her birth being July 22, 1655. They settled upon a part of her father's farm and built their house where Joseph W. Barber now resides. Capt. Morse was a son of Joseph Morse, of Medfield, and a nephew of Colonel Morse, of Cromwell's army. He inherited in his father's right, with his brothers and sisters, the land on which West Medway Village stands.

In 1674 a second petition, of which Capt. Morse was the first signer, and probably the framer, was presented to the General Court October 7th, and on October 21st the Court granted the petition; "and the name of the town to be called Sherborne."

As the petitioners were not prepared to propose any name for their town, the General Court probably assigned, as in similar instances, the name of the native place of some settler or proprietor. Sherborne (not Sherborn), after which it is named, is an ancient town in the northern part of Dorsetshire, England, about 118 miles west by south from London.

This name, by usage, was gradually changed to Sherburne, by which the town was known for more than a century, and no more beautiful name could have been adopted. But in the year 1852 a petition was presented to the General Court to alter that name to "Sherborn," from a mistaken idea that such was the name of the original town in England. A most thorough search has convinced the present writer that the name of the Dorsetshire town was "Sherborne;" and the General Court in session in 1674 doubtless contained men who had lately come from the mother-country and were well-informed of the correctness of that name, which they then bestowed upon this township. Moreover, in the "confirmation" of this grant by the General Court, in 1684, "it is ordered that the name of the town be Sherborne, and that it belongs to the County of Middlesex."

The first meeting of the inhabitants of the new town was held January 4, 1674-75, O. S., and was attended by Daniel Morse, George Fairbank, Robert Badcock, Henry Adams, Thomas Holbrook, Benjamin Bullard, John Hill, Henry Laland, Joseph Morse, Obadiah Morse, Daniel Morse, Jr., Jonathan Morse, John Perry and Jonathan Wood. "Thomas Eames is accepted as an inhabitant of Shearborn." Committees were appointed to take a view of the land granted by the General Court; to make an agreement with Thomas Thurston, surveyor, and to treat with Captain Gookin and others concerning an exchange of land with Natick.

Another meeting was held March 8, 1675, and it was chiefly devoted to the consideration of the exchange of land with Natick in order to make their township more compact and more easily accessible. They had fairly compensated the Indians for the land already possessed, and had received from them a deed of the territory. In the language of that day they "had extinguished the Indian title." But this territory was very irregular in form, extending in one direction from the Charles to the Sudbury River, and in the other from the Natick line to Hopkinton and Bellingham. And as portions of some previous grants were taken out, the land assigned to Sherborn has been compared in shape to a huge windmill whose north and west arms were joined together. Owing to interruptions which will soon appear it was more than two years before the exchange with Natick of 4900 acres of land for the same number of acres near Hopkinton was considered, and it was finally four years before that exchange was completed. These negotiations and all other business, excepting that which was

imperatively required, were soon suspended by an event of which we can form no adequate conception, and which required the undivided energies of the colonists and prevented all action for the benefit of the town for nearly two years. This was nothing less than the horror of an Indian war. The able and wily Philip, chief of the Wampanoags or Pokanokets, (not of the Narragansetts, as has been sometimes thought, although the latter tribe was drawn into the struggle by Philip, as were many other tribes hitherto friendly), had taken the war-path and was determined to effect the complete extinction of the new race. He little knew with whom he had to deal, as the sequel will show. Let us imagine, if possible, the condition of our new inhabitants, who were just becoming well established and had subdued to some extent the rough forest land. They had accomplished their long-cherished desire of receiving incorporation as a town and eagerly looked forward to the privileges which it would confer and the inconveniences which it would abate. They could now have a church of their own within a reasonable distance, and they could direct their own town business and make their own rules and regulations therefor. But now the dreaded Indian, who, when excited, knew neither fear nor mercy, had declared war against them, and not merely a common war, but a war of extermination. Philip publicly declared on a paper which he posted on the bridge between Medfield and Bogistow that the Indians "will war this 21 years if you will," indicating his determination to continue fighting long enough to cut off all the English people and exciting a corresponding consternation in their minds. As if further to harrow their feelings, he stated in the same notice that "the Indians loose nothing but their lives. You must loose your fair houses and cattle." There was much truth in these words and the settlers keenly felt the force of them and the misery of their situation was increased thereby.

As soon as they heard that the Indians under Philip were moving in this direction, they repaired to their garrisoned houses, two of which were erected at that time. The larger and better of these was situated on the farm of Benjamin Bullard, near the buildings of the late Daniel W. Bullard, at the south end of the town. The other was at the homestead of Daniel Morse, Sr. Three other garrisons were afterwards built, which it will be proper to mention in this connection. One was near the homestead of the late Captain John Leland, and not far from the ancient house now occupied by Charles Leland; one near Holbrook's mills; and another at the north of Edward's plain (probably so called from Edward West, who then owned that whole tract of land), near the house of the late Nathaniel Dowse.

The garrison-house on the land of Benjamin Bullard was carefully and systematically constructed by himself and eight neighbors who knew something of the traits of the Indians and knew that no depend-

ence could be placed upon their continued friendship, notwithstanding that they had been treated fairly and equitably by themselves. They felt that they must be prepared for depredations and assaults. And accordingly these garrisons were built in different parts of the town according as new settlements were made; and in case of any suspicion or alarm of an invasion by the red men, whether by day or night, all the families in the neighborhoods repaired to the nearest garrison and lived there, sometimes for considerable spaces of time. These were their places of refuge for as many as two generations, and here many of their children were born. The garrison we are now considering was situated on the north shore of Bogistow Pond, on a bank having the extensive "Broad Meadows" to the east and northwest. The intervening strip of land was burned over so as to afford an uninterrupted view of the country and to cut off all shelter for the lurking foe. The house itself was built in a superior manner, and was a spacious and regular fortress nearly seventy feet long and two stories high, all of faced stone brought from a quarry about a mile distant, and laid in clay mortar. It had a double row of port-holes on all sides, lined with white oak plank, and flaring inward so as require no one to expose himself before them, while, by taking cross-aims they could direct their fire to any point of the compass, or to several points at once if needed. It was lighted and entered at the south end, overlooking the pond, where the bank was so low that enemies in leveling at the high windows would only lodge bullets in the plank chamber floor or in the roof of the fortress. The second story was set apart for the women and children, and a separate room was provided for the sick. Here, then, our southern colonists assembled, with suitable preparations for subsistence, when the news had reached them that Philip was on the war-path.

Of the other garrison-house at the residence of the venerable Daniel Morse, we have not as particular information. But it was doubtless solidly constructed and had adequate means of defence, as we do not hear that any persons were killed there by the enemy. It is believed that the only persons who sought refuge there belonged to the family of Mr. Morse, including his sons and daughters and their families; not a small number, however, as he had nine children, and some grandchildren were born before the time of Philip's war. It must not be supposed that these strongholds were not used until the invasion by Philip; for the inhabitants had been accustomed to flee to their protecting walls from the beginning of the settlement on any alarm or report of hostile Indians. This they were obliged to do for many years before and after the war, for we learn that Capt. John Golden, who did not settle in Sherborn (now in the bounds of Holliston) before 1705 was, with his family, repeatedly driven, by alarms of Indians, to the garrison that stood near the house of the late John Le-

land, Esq. In fact, the settlers were obliged to be constantly on their guard against Indian depredations for a great length of time.

A communication from Daniel Morse, probably directed to Governor Leverett, is of interest at this point of the history. It reads, "May it please your Worship, prostrating my humble service to your Worship, I made bold lately to request your help of four men to be the garrison at my house, which is for my family and my son with me, most being married men. I humbly prosecute my request that so it might be that I might have four men out of Medfield, and that Edward West and Benjamin Fisk (sons-in-law) might be two of them, they living in the remote part of Medfield next my farm and they being willing to come if liberty by authority were given that they might be imprest by authority to be ready when I shall call for them. Thus I make bold, humbly begging the everlasting blessing and constant presence of the Almighty to be with your Worship." This letter was dated "Sherborne, 26, 11, 1675-76," or February 26, 1675-76, and is endorsed, "Granted for the present." It is obviously true that Mr. Morse had previously made a similar request, and that as soon as the Indians had attacked Medfield, he renewed or "prosecuted" that request, not knowing how soon in turn he might be assaulted.

The bold attack upon Medfield was made on the 21st day of February, 1675-76, with 300 warriors. They had been in a state of continual warfare since the previous June, assaulting first the settlements in the Plymouth Colony and in Rhode Island, and then appearing suddenly and unexpectedly in various parts of Massachusetts and Southern New Hampshire. The town of Lancaster, in this State, was attacked and nearly destroyed, but eleven days before the raid upon Medfield. This latter was a daring deed, because the town was so near Boston, was well supplied with garrison-houses and 200 soldiers were quartered there. Sentinels kept a careful watch, and on Sunday, as the people were returning from public worship, one or two Indians were seen on the neighboring hills, which excited some suspicion.

At dawn of day a force of 300 Indians, led by King Philip himself, suddenly awakened the inhabitants by the unearthly war-whoop. The torch and the tomahawk were applied without mercy, and at least fifty persons were murdered and a large part of the buildings reduced to ashes.

Among the people massacred at Medfield was the respected Lieutenant Henry Adams, one of the chief settlers of the town and a considerable owner of land in Sherborn. We have thus mentioned the surprise and conflagration at Medfield, because its inhabitants were closely associated with our settlers at Bogistow, and because it is probable that the first attack on Bullard's garrison at the latter place was made after the retreat of the savages from Medfield. On the same day Jonathan Wood, a son of Nicholas Wood,

the first settler, was killed by the Indians on the bank of the river, probably during their retreat; and his brother Eleazer fell at his side beneath the tomahawk, and was scalped and left for dead. He recovered, however, but was ever afterwards depressed in mind, and peculiar. The widow of Jonathan died the next day in Bullard's fortress, after giving birth to their only child, Silence. The latter afterwards married John Holbrook, and settled where Jonathan Holbrook, one of her descendants, formerly resided near his mills, on land inherited from her father. John Holbrook was a son of the original settler, Thomas Holbrook.

The garrison or block-house of Benjamin Bullard was constructed with great care and solidity, as has been seen. It is probable that all of the women and children and many and perhaps all of the men living in that part of the settlement repaired to this refuge as soon as they were informed that Indians were in the neighborhood. And it may be true that the brothers Wood, who were so violently assaulted, had gone out from the fortress for a reconnoissance, and had met the enemy sooner than they expected. Either on the same day on which Medfield was destroyed, or soon after that time, this fort was besieged by a body of Philip's warriors. But the preparations of the colonists for just such an event had been carefully made. There was no shelter for the foe. They must approach the garrison over open fields, and the unerring aim of its inmates, which, it will be remembered, could be taken at various angles, proved so destructive to the red men that they nearly gave up the assault in despair.

What should they do to reach the hated foe? What *could* they do? The solid white oak timbers of the fortress forbade successful attempts to storm the stronghold from an open approach where multitudes would be picked off by the muskets of the English. The cunning of the wily Indian was apparently foiled, when one, wiser than the rest, thought of the torch. Wood would burn, be it ever so hard and solid, and they had a device before employed, for conveying fire to a building without the direct agency of human hands, and without exposing themselves in person to the fatal gun barrel projected through the loop-holes before them. It will be remembered that this garrison-house was placed on the side of a hill descending to the meadows which border Charles River. The plan of the Indians, which they soon proceeded to execute, was to fill a cart with flax, set it on fire, and from the top of the declivity above the fortress push it down against the doomed building, which must inevitably take fire from the burning mass. Then the colonists would either be destroyed by the conflagration, or be driven outside, when they would be at the mercy of the savages. But "man proposes and God disposes." Although a clear and open course was doubtless selected for the descent of the cart, it deviated a little from the straight track and struck a rock

which arrested its progress and there burned itself to ashes without damage to anybody. With howls of rage and disappointment the baffled savages retreated and gave up the siege, and our settlers were saved.

Then was great rejoicing and thanksgiving to God, who had mercifully interposed to shield them from a horrible form of death. Some two months later the Indians again attacked the fort, but on this occasion our ancestors sallied forth and punished them so severely that "they never dared to show their faces there afterwards." The walls of this fortress stood for more than a hundred years after this time, and with care might have been preserved to this day, had the owner of the land realized their interest and value to posterity. The rock which stopped the cart may still be seen.

For several months after the attack on Medfield, Philip and his band continued their devastating excursions in various parts of Massachusetts Bay, Plymouth Colony and Connecticut. He excited consternation and terror wherever he appeared, and caused the destruction of many lives and much property. But our colonists by no means abandoned the defence, and in many cases they were victorious in the encounters. They were gradually becoming more familiar with Indian warfare, and had some noble leaders amongst their number, Col. Benjamin Church being one of the most bold and efficient. They had come to this country *to stay*, and although their numbers were decimated by this unhappy struggle, they had no thought of abandoning their settlements, but only of fighting to the bitter end. As the months passed on, their condition relative to the aborigines slowly improved.

They gained more victories, they gained some accessions from the ranks of the Indians, who were not only inclined for their individual safety to turn to the winning side, but in many cases made the change because they became disaffected with Philip. Some of the Indians began to complain that Philip had drawn them into a war from which they were not reaping the benefits promised by him, and which they expected. Although they knew that they had inflicted great damage upon the colonies, still their own condition was not improved. They were unable to plant their usual crops, and were often reduced to great straits for sufficient food. They were constantly watched and followed by the English soldiers, now well organized, and were obliged to retire to swamps and other inaccessible places, from which they would suddenly rush forth to their work of massacre and ruin, and again disappear as suddenly. In short, many of the Indians and even some tribes were becoming tired of the contest from which they reaped so little ultimate advantage.

Philip was forced by his impatient warriors to commence the war before he was prepared to do so, and before his plans were fully matured; and he suffered corresponding disadvantages in pursuing the conflict.

He had also some good traits of character, as he did not forget those who had befriended him previously, and in many instances used his authority and influence to protect them. A family by the name of Leonard, of Taunton, was a notable instance of this protecting care, and as long as he lived Philip gave strict orders that Taunton should be the last town to be attacked. It is believed, also, that he did not countenance the torture and cruelty that were often practiced by his subordinates, and prevented them when possible. On the other hand, the English did not always temper victory with mercy. They sometimes beheaded and otherwise mutilated the bodies of Indians and squaws whom they had killed, in a manner that was neither humane nor politic. It was not politic because it aroused anew the vindictive passions of the red men, and led them to commit fresh atrocities. The settlers had naturally become exasperated with the murderous acts of their foes, and regarded them merely as savages and heathen for whom no treatment was too severe. In many cases they sent to the West Indies those whom they captured alive, men, women and children, and unjustifiably sold them into slavery, and thus provoked the Indians to fresh outrages.

The summer of 1676 had now arrived, and Philip was drawing toward the end of his career. His wife and children had been taken and killed or sold, his Indian allies were forsaking him, and his own band was greatly reduced in numbers. He had become disheartened. He secluded himself in forests and swamps, and his enemies were diligently seeking his life. At length an Indian whom he had offended came to Captain Church and offered to show him the place of Philip's concealment, in a swamp near Mount Hope. Captain Church disposed of his force with great skill, surrounding the swamp and also posted men in ambush in various places. In attempting to flee, Philip ran into an ambush where were hidden a white man and the Indian who had brought the information, named Alderman. The white soldier first aimed at the chieftain, but his gun missed fire. He then directed the Indian to fire. Says Abbot, "A sharp report rang through the forest, and two bullets, for the gun was double charged, passed almost directly through the heart of the heroic warrior. For an instant the majestic frame of the chieftain, as he stood erect, quivered from the shock, and then he fell heavy and stone dead in the mud and water of the swamp."

Thus the directing brain and the skillful hand were removed, and the power of the Indians and their ability to harm the colonists began to wane from that day.

Philip, or Pomietacom, the great sachem of the Wampanoags, was dead. His followers had received a severe lesson, and had learned the power and resources of the English inhabitants. They did not, therefore, take any further concerted action against

the people of Massachusetts; but they kept the latter in suspense and in constant preparation for surprise by isolated forays in small bands. The great body of the Indians transferred the seat of operations to the district of Maine and the province of New Hampshire, where they hoped to find the inhabitants less familiar with the character of savage warfare, and where they inflicted an immense amount of misery. So greatly were the people depopulated, and so greatly were the survivors alarmed, that there was no settlement remaining east of Portland excepting one garrison. This dreadful warfare continued for eighteen months after the death of Philip. Finally the Indians themselves, who had suffered greatly also by death and starvation, sued for peace in February, 1678, and terms were settled between the sachems and the commissioners from Massachusetts, not wholly to the advantage of the English, but considered preferable by them to a continuance of hostilities. It was still many years, however, before the inhabitants of New England could pursue their daily avocations in peace and security.

Besides the losses already mentioned in Sherborn, the house of Thomas Eames, at the north part of the town, now in Framingham, was burned by the Indians during his absence from home, in February, 1676-77, his wife and some children murdered and others taken into captivity.

As soon after the close of the war in this State as the people could resume their occupations, the important question of the exchange of lands with Natick was again considered. The report of the committee chosen by the General Court was favorable to the wishes of the inhabitants, and the Court approved the return provided that the tract of land (now in Framingham) belonging to Thomas Danforth, Esq., Deputy-Governor, be excepted. Finally, after much consideration and discussion, articles of agreement for the exchange of the lands were drawn up and signed "upon this sixteenth day of April, 1679," by Daniel Morse, Sr., Thomas Eames, Henry Lealand and Obediah Morse, in behalf of the town of Sherborn on the one part, and by Wabon, Pimbow, Thomas Tray, John Awonsamag, Sr., Peter Ephraim and Daniel Takawombpait, on behalf of the town of Natick on the other part. The 4000 acres of land thus acquired by Sherborn was bounded northeast by Natick, southeast, southwest and west by Sherborne, and west and northwest by Mr. Danforth's farm. And Sherborn agreed to give in compensation 4000 acres of land lying towards Hopkinton, and "the full and just quantity of 200 bushels of Indian grain, to be paid one-half in hand, or at demand, and the other half the last of March next ensuing," which would be about one year after the date of the agreement. Peter Ephraim, above-mentioned, owned land near Peter's Hill, which was so named on that account, and between that hill and Brush Hill; and one article of the agreement allowed

him to "enjoy the land he hath broken up within that tract," and "to add thereunto so much more as may make the lot twelve acres, with an equal proportion of meadow; but to be under the government of the township of Sherborne, as the English are." It is gratifying to observe, in the fourth article, that a lot of fifty acres was set out and appropriated forever "to the use of a free school for teaching the English and Indian children there the English tongue and other sciences." Thus at this early day the care for the education of her children which has ever distinguished Massachusetts was notably shown, and thus was planted the seed which has grown and blossomed forth into our magnificent system of common schools. This exchange of lands, now happily completed, was a measure of great importance to the new town. It rendered their territory more compact in form, more easily governed and much more convenient for the inhabitants in their attendance on meetings and in the transaction of public business.

During the same year, 1679, the famous "social compact" was adopted. It was a very useful instrument, and showed great wisdom and forethought. After a suitable preamble, it says: "We, the persons whose names are next under-written, for the prevention of questions and mistakes, do order and determine, and resolve as followeth." Article first provides that all persons whatsoever receiving grants of land from the town shall become subject to all the orders of the town, provided that they be not repugnant to any orders of the General Court, and that all such grantees "shall, for the firm engagement of himself and his successors, thereunto subscribe his name to our town-book, or otherwise his grant shall be of none effect." In article second it is agreed that "questions, differences or contentions" shall be submitted to arbitration, and shall be settled in that way whenever possible; and in the third article it is also agreed that they would "faithfully endeavor" that only such persons should be received into the township as they believed to be "honest, peaceable and free from scandal and erroneous opinions." In article fourth it is stipulated that none of the inhabitants shall, for seven years, "upon any pretence whatsoever, without the consent of the Selectmen," sell or in any other manner convey to others any part of the land which had been granted to them by the town, "except to some formerly accepted by our society; always provided that this shall in no sort prejudice or hinder any heirs at common law." This provision was obviously intended to exclude persons of disreputable character, and such as might create dissensions in the community.

The compact is signed by thirty-two heads of families, and probably included all the land-owners in the township, and it was ratified and allowed by a vote of the General Court.

The article requiring grantees to hold their lands for at least seven years, was also designed to secure

permanency of occupation. The settlers had endeavored, by liberal offers of land at low prices, and, in some cases, even without compensation, to induce persons to take farms and become inhabitants of the new town; and it was now desirable to retain all who had arrived, for a length of time sufficient to enable them to form homes and become attached to the land, with the hope that they would thus become permanent residents, and assist by their contributions and labors for the public good in building up the new community. They believed that a man should become a part of the body politic not merely for his own advantage, but also for the purpose of acting his part in the councils of the town, and of promoting the general welfare.

The inhabitants, having settled the great question of the exchange of lands with Natick, now thought it time to give attention to the proper business of a town, the administration of its internal affairs having been postponed on account of more urgent matters. At a meeting held in February, 1679 (1678-41 mo. -1 day), it was voted that five men be chosen as selectmen,—Daniel Morse, Sr., George Fairbanks, Edward West, Thomas Eames, Obadiah Morse. This was the first Board of Selectmen chosen, and they served for ten years. Obadiah Morse, who had been chosen early in 1676 to keep the records of Sherborn, was now formally elected town clerk. He also kept such records pertaining to the church as were not recorded on the books of the town. But as there was but one church in the town for a great number of years, its early records were entered with the records of the secular business.

The people also felt the need of establishing a church and engaging a pastor, as these were among the prime objects of their desire to form themselves into a new and separate community. Moreover, the General Court, in the previous year, 1678, had granted them freedom from one single rate in a year for the three following years, provided "they be supplied with an able minister;" and they felt that in order to avail themselves of this offer they must soon secure a spiritual adviser. In 1677 they had voted to raise thirty pounds per year for that purpose, but they had accomplished no more. In 1679 they voted to pay for the "maintenance of the minister £40 per year by the inhabitants—£20 in money and £20 in good country pay as is most suitable to the minister—and to build a suitable house." They also chose a committee "for the settling the minister amongst us, Mr. Gookin or some other minister as God shall direct."

The great obstacle to the completion of their arrangements for the establishing of public worship was an obstinate disagreement concerning the location of the meeting-house. All of the earlier settlers excepting Daniel Morse resided in the southern quarter of the town, and as they had from the beginning of the colony practically transacted the public

business according to the dictates of their own judgment, they thought they had a right to decide so important a matter as the location of the meeting-house. They naturally desired that it should be placed at a point not far from their own houses, and had staked out a lot on a hill which is believed to be near the present South Cemetery. The dwellers on Edward's Plain and those in the more northerly portions of the town were dissatisfied with this allotment, and wished for a spot more nearly equi-distant from the extremities of the township. But the southern inhabitants insisted upon their choice, and had laid out roads diverging to the different parts of the town. The other party was equally obstinate, and in consequence of the contention nothing was accomplished.

A committee was chosen to build a suitable house for a minister. But the former committee, selected to engage a suitable minister, reported in 1680 that "except the inhabitants do agree to what was done by that committee in '79, 7 mo., they see no likelihood of obtaining Mr. Daniel Gookin to settle among us." Affairs were complicated, and it seemed impossible for the people to untangle the net which they had wound about themselves. Discouraged at last, the venerable Daniel Morse, Sr., Dea. Benoni Larned and others, in 1680, petitioned the General Court imploring "aid that they may be relieved of their difficulties, professing a desire to settle a pious and able minister, without which their hopeful plantation would be ruined and they and their wives and children be forced either to live like heathen, without God's Sabbath and ordinances, or remove."

In answer to this petition the Court appointed an advisory committee to repair to Sherborn and endeavor to settle the differences among its inhabitants. Although the committee was invested with power to decide the questions submitted to them, they do not appear to have secured a complete reconciliation, and their return to the Court was placed on file, "not perfected." Then the Great and General Court seem to have thought it time to settle the disputes of the contumacious inhabitants by using the strong arm of authority; and they appointed and empowered "Wm. Stoughton, Tho. Savage and John Richards, Esqs., a committee to order and governe the prudentials of the said town for three years next commencing, as to laying out lots, and raising of taxes." The town could do nothing but submit, for the authority of the Court was paramount and at that time supreme; and, to their credit be it said, they submitted gracefully and dutifully.

The new committee soon decided the question of the location of the meeting-house and placed it in the more central position, on the site of the house of the First Parish of our day. It was finished in 1684-85. And this has always remained the situation of a church edifice, a second one being completed in 1726 and enlarged in 1770 by inserting twenty feet in the

middle of the building; and a third, the present meeting-house, being built in 1830.

Before the town had obtained a minister, divine service was held for some years in the house of Capt. Joseph Morse, and Edward West acted as a lay-reader. A grant was made by the town to Capt. Morse for the accommodation thus received, and concessions were also made to Mr. West. In 1679 a grant of land was voted to the latter "in case he should stay in Sherburne one year from the date hereof, if the town have not a minister settled. If there be a minister settled, then to be in the same condition with other inhabitants."

The year 1681 had now arrived, and the inhabitants were ready at last to proceed to the actual business of obtaining and settling a minister. Early in the year a committee, consisting of Daniel Morse, Sr., Joseph Morse and Edward West, three of the best men, was chosen to treat with a minister with a view to his settlement. After inquiry concerning "Mr. Cushing," they again applied to Mr. Gookin with better success. In the same year, doubtless, Mr. Gookin wrote as follows:

"I, whose name is hereby subscribed, do freely and fully engage to remain in the work of the ministry of Sherborne so long as I can live in said place, so as to attend to my work without distraction.

"DANIEL GOOKIN, JR."

The salary which the town agreed to pay Mr. Gookin was "twenty pounds in money, and twenty pounds in country pay, such as we raise ourselves;" and when the minister should have a family and the inhabitants increased in number, they agreed, "then to augment his allowance." This stipend seems small to us, but it must be remembered that the purchasing power of money was much greater than at the present time. He also had the use of a house in addition. In this connection it will be of interest to transcribe an order of the selectmen made May 29, 1707. "At a meeting of the selectmen, it was ordered that each person in town, for the Pool or Pools he or she is rated for, shall cut and carry to the house of Rev. Mr. Gookin one-half cord of wood per poll; and each and every person who neglect to perform as aforesaid shall pay a fine of 2 shillings per poll to the use of said minister."

Mr. Gookin was a man of uncommon ability and attainments. He was born in 1750 or 1751, was a son of Major-General Daniel Gookin, one of the magistrates of the commonwealth and superintendent of the Indians. He was a friend and assistant to the apostle Eliot in his missionary labors at Natick, and this fact doubtless made him acquainted with the people of Sherborn and their spiritual requirements; and the contiguity of the latter town to Natick probably made him more willing to undertake the charge of the small church in this town, as he could be near his friend Eliot and still assist him. He was graduated at Harvard College in 1669, received the degree of A.M. in 1673 and was chosen a Fellow of the college in the same year. Although he was

not ordained at Sherborn until March 26, 1685, it is probable that he conducted divine service there for some time prior to that date. Rev. John Eliot says of him, in a letter to Hon. Robert Boyle, dated April 22, 1684, "Major Gookin has dedicated his eldest son, Daniel Gookin, into the service of Christ; he is a pious and learned young man, about thirty-three years old, hath been eight years a fellow of the college; he hath taught and trained up two classes of young scholars unto their commencement; he is a man whose abilities are above exception, though not above envy. His father with his inclination, advised him to Sherburne, a small village near Natick, whose meeting-house is about three miles, more or less, from Natick meeting-house. He holdeth a Lecture in Natick meeting-house once a month; which many English, especially of Sherburne, do frequent. He first preaches in English to the English audience, and then the same matter is delivered to the Indians by an interpreter, whom, with much pains, Mr. Gookin had fore-prepared. We apprehend that this will (by God's blessing) be a means to enable the Indians to understand religion preached in the English tongue, and will much further Mr. Gookin in learning the Indian tongue."

The only church records known prior to 1731 are contained in one small volume, and consist wholly of accounts of contributions raised for various purposes, commencing in the year 1685. The records of the church and town were kept together in the books of the town until October 27, 1734, when the proper records of the church commence. But we do not find any account of the formation of the church in any of these records. A manuscript journal of Judge Sewell (who, it may be remembered, married a daughter of Capt. John Hull, of Sherborn), shows that the church was gathered March 26, 1685, the same day that Mr. Gookin was ordained. It reads, "Thursday, March 26, 1685. Went to ye Gathering of ye Chh at Sherborn, and ordaining Mr. Daniel Gookin their Pastor. But 6 bretheren and 3 of the names Mors. Mr. Wilson [of Boston], Mr. Adams [of Dedham], and Mr. Nathl. Gookin of Cambridge managed the work; Mr. Nathl. Gookin the younger introduced the Elder; a happy type of the calling of ye Jews." Twelve other clergymen were present "and fellows of the Colledge. Only Maj. Genll. and self of Magistrates. No revelations were made; but I hope God was with them."

Mr. Gookin was a faithful pastor, diligent and able in his work. He continued his labors with the Indians, also, during the greater part of his life, as time and opportunity permitted, and he died lamented, January 8, 1747-48, in the sixty-eighth year of his age. In an obituary notice, written probably by his colleague and successor, Rev. Daniel Baker, dated Jan. 9, 1747-48, and found in the *Boston News Letter* it is stated that "He was the oldest son of Honorable Daniel Gookin, Esq., a good scholar and solid Divine,

was many years a fellow of Harvard College, and a tutor. From his ordination he continued our minister about thirty-four years, being diligent in his study, tender of his flock, and exemplary in his life." During the latter part of his life, for about seven years, "by great pain and indisposition of body, he was taken off from his work," so that Oct. 23, 1707, the town "Voted to hire a minister while [until] March next and that Mr. Baker be the man to supply Mr. Gookin's Pulpit, now in the time of his restraint, if he may be obtained." December 11, 1710, Mr. Baker was formally engaged as an assistant to Mr. Gookin, and in April, 1711, the latter repeated an offer he had previously made to the town, freely to remit ten pounds of the country part of his salary in consequence of his infirmities and the necessity of hiring a colleague. This was publicly read and gratefully accepted by the town.

The old Central Cemetery in Sherborn, "in which y^e first grain was sown, June y^e 17, 1686," received the remains of Mr. Gookin, and the spot was marked by a plain stone bearing the inscription, "Here lyes y^e body of y^e Reverend Daniel Gookin, Pastor of y^e church of Christ at Sherborne, dec'd Jan'y y^e 8th, 1717-18, in y^e 68th year of his age."

As it is more convenient to proceed with the ecclesiastical history of the town before returning to its civil history, that course will now be pursued.

At a meeting of the inhabitants, held December 11, 1710, Capt. Joseph Morse and Deacon Benoni Learned, moderators, "Then it was put to the inhabitants by the said Moderators, that inasmuch as the work of the Ministry is apparently too hard for our Rev. and worthy Pastor, Mr. Daniel Gookin," whether they were willing to give Rev. Mr. Baker a call or invitation to settle in the town as an assistant to their pastor. It was voted "verry fully on the affirmative" to give Mr. Baker a call, and was also voted "To give the said Mr. Baker a yearly salary of 50 pounds money during the life of our Rev. Pastor, and after his decease to augment Mr. Baker's salary if need be. Voted in the affirmative."

After due consideration, Rev. Daniel Baker accepted the invitation in a letter dated Dedham, December 29, 1711, addressed to the committees of this church and town.

At a town-meeting held soon after, January 14, 1711-12, "voted that Rev. Daniel Baker's answer be very gratefully accepted, and the town renders thanks to him for his good intentions towards them, and do freely concur and take up with his said answer." And at the same meeting a committee was chosen to take charge of the subscriptions for his dwelling-house.

After the death of Mr. Gookin it was agreed that the salary of Mr. Baker should be advanced to seventy pounds per annum. He also had the use of a house and land.

Mr. Baker was born in Dedham about 1686, grad-

uated at Harvard College in 1706, and died May 14, 1731, at Sherborn, in the forty-fifth year of his age. He married Mary Quincy, daughter of Hon. Edmund Quincy, and second Rebecca Smith. He had but two children, daughters, one by each wife, who lived to adult age. Several other children died young. He is described as "a gentleman of bright and natural parts, much improved by acquired knowledge, very pathetical in prayer, orthodox and powerful in preaching, tender of his flock and congregation, having always the cause of God and religion much at heart. His church increased greatly under his ministry." During his latter years his health was poor and his condition feeble, so that he was sometimes wholly incapacitated for his work.

The only known publication of Mr. Baker is an 18mo. volume of 164 pages, containing two Fast-day sermons, one delivered at Dedham, October 5, 1726, and the other at "Sherbourn, May 10, 1727." They were printed at Boston for D. Henchman, 1728, and the expense of the work was defrayed by his parish.

The remains of Mr. Baker were interred also in the Central Cemetery.

Soon after the decease of Mr. Baker there was chosen "1731, June 16th, a conamittee of three, viz.: Deacon Greenwood, William Lealand and John Holbrook to take Care for the Supply of the Pulpit untill y^e Town Com into Som other methord." Then was granted the sum of fifty pounds for the "Supply of y^e Pulpit." Other sums were granted during the next three years for the same purpose, and various candidates were received, and votes were passed accepting no less than five ministers successively, but none of them appears to have been settled. But at last, on April 25, 1734, "The church and Town by a Unanimous Vote made choice of Mr. Samuel Porter to be their Gospel Minister, and voted three hundred pounds in Bills of Publick credit towards his Settlement. Also voted one hundred and thirty pounds per annum for his Salary in Bills of Credit on this province, according to their present value; and to rise and fall as Silver money doth With the Merchants of this province—Provided he Settle with us, in the Gospel ministry, and so long as he Continues in the Same."

Rev. Samuel Porter was now formally chosen the pastor of the church of Christ in Sherborn. He was the third of the sterling ministers of the town. All of them were distinguished for learning, piety and sound judgment, and they were men worthy to be held in lasting remembrance. In those days the clergymen were the leaders of the people, not only in moral and spiritual affairs, but also in those of a secular nature. Their counsel was often sought by the people and had much weight with them, and as they were usually settled for life their interests were identified with those of their flock, and they had a tender care for their welfare. Mr. Porter was a man of this character. He was born in Brookfield, Mass., in 1709,

and graduated at Harvard College in 1730, his grandfather having left £100 to enable him to complete his course of study there. He came to this town from Hadley, and was ordained on the fourth Wednesday (23d) of October, 1734, according to a vote of the church and town, which also "granted 25 pounds to be Levied on Poles and Estate by Way of vote, according to the rules prescribed in the Law for the Support of the Ministers and Messingers at the ordination."

We have not been able to find an account of the exercises at this ordination, but it is evident from the above vote that they were conducted with all due ceremony by his brethren in the ministry. Mr. Porter was twice married, first to Mary Cooledge, of Cambridge, October 29, 1735, who died August 10, 1752. They had five children, all of whom died young excepting Mary, who afterward married Rev. Samuel Locke, her father's successor in the ministry. His second wife was also named Mary, but her surname before marriage is not known. The second Mary died August 8, 1758, and the respected pastor did not long survive her; he died on the 16th of September following, at the age of forty-nine years, and his loss was universally lamented.

Of the published sermons of Mr. Porter, we know of two only. One of these was given at the ordination of Rev. William Phipps at Douglas, December 16, 1747. Mr. Phipps was a son of John Phipps, of Sherborn, who was a grand-nephew of Sir William Phipps, once Governor of the Colony of Massachusetts. He was a man of great literary attainments and had a peculiar facility for the acquisition of languages, of which he is said to have mastered no less than twelve. Douglas, Massachusetts, had previously been called New Sherborn on account of the grant to Sherborn of 4000 acres of land in that settlement, confirmed by the General Court in 1715, as an equivalent for the seventeen families set off to Framingham at its incorporation in 1700. Douglas was incorporated as a district in 1746, and as a town in 1786, and Mr. William Phipps was chosen its first minister. It was so named for Dr. William Douglas, author of a history of New England and a proprietor and benefactor of the town. Frequent references to this town are found in the records of Sherborn, whose inhabitants took up grants of land in Douglas. The sermon of Rev. Mr. Porter speaks of the new pastor in warm and affectionate terms as a child of Sherborn, with the hope and belief that he "will be a rich blessing to you and to the world in his day."

The other sermon mentioned was delivered at the ordination of Joseph Perry to the pastoral care of the church in Windsor (Connecticut probably), June 11, 1755. Of this sermon we have but little information; but its subject was doubtless an able man, as he was a son of Captain Joseph Perry, Esq., a prominent man in Sherborn 150 years ago, selectman for sixteen years, and in 1741 a representative to General

Court. It is believed that Rev. Joseph Perry did not long survive to fill his pastoral office.

Mr. Porter resided in the house directly opposite the church, owned at a later day by Hon. Calvin Sanger and his heirs, and at present by Abijah R. Leland, Esq. Here originated the famous Porter apple, first raised by the venerable minister and named for him. It was considered a great acquisition to the list of fruits, and adds to the reputation which our town possesses in the cultivation of apples of a good quality. The stump of the original tree was standing on these grounds within the memory of the present generation.

The remains of Mr. Porter were deposited in the Central Burying-Ground by the side of his two predecessors in the ministry; and two stones adjacent commemorated the qualities of his two wives. In the year 1857 the sacred relics of these three early ministers were collected and conveyed to the new Pine Hill Cemetery, and a marble monument was erected above them by Calvin P. Sanger, Esq.

Having described at some length the first three ministers of the town who acted parts so important in its early history, we shall be obliged to notice more briefly the remaining pastors.

Rev. Samuel Locke was born November 23, 1732, and ordained November 7, 1759, and served until 1770, when he was inaugurated president of Harvard College. He occupied this distinguished post but three years, when he returned to Sherborn and opened a private classical school, which was very successful. He died in 1777, at the age of forty-five, and his remains were laid in the Central Cemetery. But soon after the erection of the memorial monument in Pine Hill Cemetery, a granite monument was erected there to the memory of Rev. Dr. Locke, by Harvard University.

Rev. Elijah Brown was the fifth pastor of the church. He was born at Waltham, May 31, 1744; graduated at Harvard College in 1764, and ordained November 28, 1770. He served for forty-six years and died October 24, 1816. His pastorate was longer than that of any minister in the town excepting one of the present incumbents, Rev. Dr. Dowse. Although peculiar in some of his ways, Mr. Brown was a man of much ability. Judge Sprague, formerly of Lancaster, Mass., was a class-mate of Mr. Brown in college; and he once observed that, in his opinion, "there were about a dozen real *geniuses* in the class and that Brown was one of them." He was an excellent and sympathetic pastor, and his visits to the sick and sorrowful were acceptable and consoling. He possessed a natural vein of wit and humor, which he could not always retain within the bounds proper to a man of his profession. But on the whole he was useful and successful in the discharge of his responsible duties. Some of his sermons were published, one of the most important being that given at the ordination of Rev. Zedekiah Sanger (a native of Sherborn) as pastor of the church in Duxbury, July 3, 1776.

Within a few weeks after the decease of Rev. Mr. Brown the church invited Shearjashub Bourne Townsend to become their pastor, and in December, 1816, the town, by vote, concurred in the invitation, and granted money for his salary. Mr. Townsend had been a tutor in Brown University, his *alma mater*, and was well fitted, intellectually, for the position. By joint action of the church and town an "ecclesiastical council convened at Sherburne," and he was ordained a pastor on the 2d day of July, 1817. He was an able and cultivated man and an excellent pastor, greatly beloved by his people. He was born in Barrington, R. I., April 14, 1796, and was graduated in 1814. He had a fine presence and stature, being six feet in height. He delivered an oration September 3, 1822, before the Society of United Brothers of Brown University; and also an oration at Sherborn, July 4, 1821, on the means of preserving our civil and religious liberties, a thoughtful and valuable production. Both of these papers were published.

But with all his accomplishments, Mr. Townsend did not possess firm health, and after a service of eleven years his strength began to fail, and assistance in the performance of his duties was required. He had invited Rev. Amos Clarke, a native of Sherborn, to supply the pulpit until further action could be taken. In the autumn of 1829 Mr. Townsend was obliged to proceed to the Southern States for the benefit of his health. According to his expressed desire, he retained, nominally, the position of pastor to the church, generously granting to his colleague the whole of the salary. He never returned, but died at Milledgeville, Ga., July 20, 1832, deeply lamented by his parishioners and friends.

Rev. Amos Clarke was chosen colleague by a majority of the society. The minority desired to hear other candidates, not being satisfied with the religious views held by Mr. Clarke. This difference led to a separation and to the formation of a new society, which will be described below. Mr. Clarke was an excellent pastor, a successful teacher and a wise and useful man in the community. He was born in this town April 23, 1779, was prepared for college under the instruction of Rev. Elijah Brown, of Sherborn, graduated with honor at Harvard College in 1804, and studied theology with Rev. President Bates, then pastor at Dedham, with whom he subsequently became connected by marriage. He was licensed to preach, but his health being slender, he engaged in the calling of a classical instructor, in which he was very successful, training the minds and manners of his pupils as well as their intellects.

Mr. Clarke, who had supplied the pulpit since 1828, was invited, March 22, 1830, to become the associate pastor, and after the death of Rev. Mr. Townsend he was the sole pastor of this church. At this post he continued until May 20, 1841, when he was obliged by feeble health to relinquish it, to the great

regret of the members of the parish. Mr. Clarke occasionally appeared afterwards in the pulpit, was a member of the School Committee, represented the town in the Legislature of 1845, and rendered service in various ways to the inhabitants, by whom he was highly respected.

During the year of Mr. Clarke's appointment (1830) the First Parish caused a new meeting-house to be erected, very near the site of the old one, which had been in use for more than a century. The last service was held in the old church on Sunday, December 26th, and an interesting and instructive sermon was given by Rev. Mr. Clarke. On the following Wednesday, December 29th, the new house was appropriately dedicated, Mr. Clarke delivering the sermon on this occasion also. It still stands in good condition, after nearly sixty years of service, and is the third edifice on this site.

The next minister of this church was Rev. Richard Cecil Stone, who was installed September 28, 1842. He was born in Scituate, R. I., July 18, 1798, and served in other towns as a clergyman before coming to Sherborn. He was a man of strong, cultivated intellect and dominating character. Although highly respected by some of his parishioners, he gradually became distasteful to others among them, and this feeling led, after an active service of six years, to a separation in October, 1848. A portion of the church and congregation went with the pastor, and formed a new society, which they called the Wesleyan Methodist Society. They worshiped in a new chapel erected by them north of the Common, and continued their services for about six years, when Mr. Stone removed from the town and the society was dissolved.

He was succeeded in the charge of the First Parish by Rev. John Fleming, a native of England, where he was born January 20, 1820. He labored diligently in his profession, and earnestly strove to fulfill his duties to the parish and to render himself acceptable to the people. He performed good service also as a member of the School Committee for some years. After three years he resigned the office of pastor in 1853, and retired from the ministry. He has continued, however, to reside in the town as a respected citizen.

Rev. Theodore H. Dorr was the next minister. He was born in Boston August 13, 1815, graduated at Harvard College in 1835, and was installed pastor of the church at Sherborn December 3, 1854. He continued its efficient head for more than eight years, when his waning health admonished him to retire from active labor. He resigned the charge of the parish March 1, 1863. He was a man of thorough education, courteous manners and considerable force of character. He was persevering in his efforts to support and advance the interests of the church, was interested in the work of education and in the general improvement of the town. He was for some years an active member of the School Committee, and was

zealous in forwarding preparations for raising soldiers and supplies in the War of the Rebellion. He was a member of the committee chosen at a town-meeting called for the purpose of considering the whole subject, to prepare resolutions expressive of the sentiments of the town.

Mr. Dorr returned to Boston after his resignation, and resided there for several years.

Rev. William Brown was born in Concord, Massachusetts, September 10, 1838, graduated at Amherst College in 1860, and at the Cambridge Divinity School in 1863. He was ordained pastor of the church in Sherborn November 5, 1863, and held the office for nearly nine years. On the 1st day of March, 1872, he tendered his resignation of the position, to take effect August 31st, following. For several years after that date he was pastor of the church in Walpole, N. H., but has lately removed to West Bridgewater, Mass., as minister of the church there, and teacher of certain branches of study in the Academy.

Mr. Brown was a man of genial nature and cultivated intellect, a firm friend, and a good townsman, interested in education and in all that pertained to the welfare of the people. The town sustained a loss in his departure. This was his first parish, and he studied and labored diligently for its improvement. He was for many years a member of the School Committee, and his efficient services will not soon be forgotten by his colleagues of that period. He was one of the steady, valuable workers for the public good, and was equal to any with which the town has been favored during the last thirty years.

After the resignation and removal of Rev. William Brown, in September, 1872, there was an interregnum of nearly twenty months, during which time the pulpit was temporarily supplied. Several gentlemen officiated as candidates, but it was not until May 13, 1874, that Rev. Alfred Edgar Mullett, the eleventh minister, was ordained. Mr. Mullett had graduated at Cambridge Divinity School the previous year, after a collegiate course at Tufts College. This was therefore, his first parish. He was a young man of good education and attainments. Although he exerted himself to fulfill his duties, he soon found that he was not adapted to the work in this parish, and tendered his resignation April 1, 1875, to take effect in three months afterwards. He has since that time served in other towns, and, we believe, is now settled in a Massachusetts parish. Mr. Mullett was born in Charlestown, Mass., November 13, 1847.

In September, 1876, Rev. Eugene De Normandie, a native of Philadelphia, who had previously served acceptably in this State, was invited to supply the pulpit of the First Parish. He accepted the invitation, and continued to officiate as its minister through the autumn months. On the 1st day of December he was engaged to serve for one year, at the expiration of which time the engagement was renewed,

and was continued to the Fall of 1890. He has been the respected pastor of this church, whose interests he labored diligently to support. He belongs to a family of clergymen. One brother, Rev. James De Normandie, was for many years the minister of the Unitarian Society in Portsmouth, N. H., and is now serving as the pastor of the church in the Roxbury District, Boston, which was for so long a time in charge of Rev. Dr. George Putnam. Another brother, Rev. C. T. De Normandie, has been settled since 1872 in the ancient town of Kingston, originally a part of Plymouth, and once called North Plymouth.

Mr. De Normandie has identified his interests with those of our town, and endeavored to render himself useful to its inhabitants. He brought with him a considerable experience in school-work, and has been an active and efficient member of the Board of School Committee during several of the years of his residence. He was born in Philadelphia, January 3, 1832. In 1890 he accepted an invitation from the society in Danvers, Mass., and removed there in September.

Allusion has been made to the formation of a Second Parish in the year 1830. A majority of the church did not coincide in the appointment of Rev. Amos Clarke as the minister to succeed Rev. S. B. Townsend, although Mr. Clarke was chosen by a majority of the society. Those members of the church, claiming to represent the doctrines of the original church, therefore formed a new society, which was known for many years as the Second Parish in Sherborn, but since 1875 as the Pilgrim Society, by act of the Legislature. They worshiped in a hall in the centre of the town until the completion of their new meeting-house, in November, 1830. This edifice was dedicated November 4th, and at the same time their first pastor, Rev. Samuel Lee, was ordained. He was a native of Middletown, Connecticut, and graduated at Yale College in 1827, and subsequently at the Theological Seminary attached to that college. He was a man of good education, and more than average ability. He was eminently social in his intercourse with his people, and was highly regarded by them as a pastor. Some of his sermons were published. At his own request he was dismissed April 27, 1836. He afterward settled in New Ipswich, N. H., where he passed the remainder of his life.

The second minister was Rev. Daniel Talcott Smith, born in Newburyport in 1813, graduated at Amherst College in 1831, and at Andover Theological Seminary, where he was afterwards an assistant professor. He received the degree of D.D. from Waterville College in 1853, and from Bowdoin College in 1858. He was a thorough scholar, and excelled in a knowledge of languages and classical literature. He was ordained pastor of this church and society December 7, 1836, and was an earnest and successful pastor, so far as his health would allow.

But the duties of the position proved too great a draft upon his strength, and he was obliged to resign in 1838. He was dismissed on the same day of the ordination of his successor, October 10, 1838. He was afterwards a professor for many years in the Bangor Theological Seminary, where he held a high rank. Some years since his name was changed to that of Daniel Smith Talcott.

On the 10th day of October, 1838, Rev. Edmund Dowse, a native of Sherborn, whither his ancestors removed from Charlestown, Mass., in 1775, was ordained the third pastor of the Second Parish, and of the church of which he had been a member for some years. From that day to the present time, more than fifty-two years, Mr. Dowse has remained as the respected and beloved pastor of this religious society. Few ministers have so long a pastorate, especially in the place of their birth and life-long residence, and but few have retained so continuously the confidence of the community, as well as that of the people of his charge. The twenty-fifth, the fortieth and fiftieth anniversaries of his ordination were celebrated with appropriate ceremonies, the latter with great enthusiasm in 1888. During the same year Mr. Dowse received from Amherst college, his *alma mater*, the degree of D.D.

Dr. Dowse represented this district in the State Senate in the years 1869 and 1870, and has served as Chaplain of the Senate from 1880 to 1890, inclusive.

He has also been active in the cause of education and a member of the School Committee for fifty-two years.

In the year 1859 the church building was much enlarged and remodeled, and is now a prominent and attractive feature of the town. In 1890 a substantial addition to its funds was received from the estate of the late Aaron Greenwood.

We have now completed the account of the religious societies and their ministers, so far as the materials for their history have been found after diligent research. The foundation and progress of the Puritan church in one of the old New England towns carries with it an important part of the history of that town, and it was originally considered a part of the town business, and was regulated in town-meeting with fully as much interest as any other part of the town affairs. And it is right, and of the highest importance to the welfare of the town that its religious interests should be among the first to be supported and cherished, as one of the bulwarks of a free community, and one of the corner-stones of the prosperity of a free State.

We naturally pass from the church to the school. Our fathers gave early attention to the subject of education, the importance of which they fully realized. Section four of the articles of agreement between the committee appointed by the town and certain Indians of Natick says: "Also, we agree and consent that on the lands we are to have of Natick there be a lot of fifty

acres set out where the Commissioners of the Colonies, Major Gookin and Mr. Eliott, and Indian rulers, shall choose within that tract of land, to be appropriated forever to the use of a free school for teaching the English and Indian children there the English tongue and other sciences." This resolve was made April 16, 1679, when the town had just recovered from the effects of Philip's war, and had become settled to the regular order of business. The work of teaching was at first performed in the several families, or in some private houses where the children could assemble for that purpose. Obadiah Morse, the first town clerk, was the first teacher in this primitive fashion, and in 1694 Edward West, who was then town clerk, was chosen schoolmaster for the town. In the year 1718 twelve pounds, and in 1719 eighteen pounds, were granted for the support of a school for the teaching of children and youths to read, write and cipher. It is presumed that this education was conducted in dwelling-houses until 1729, as the first appropriation for building a school-house was made in December, 1727, "to build a school-house eighteen feet wide and twenty feet long, and to set it on Meeting-house Common, on the southeasterly side of the meeting-house." It was completed early in 1729. The spot then chosen by the town remained the site of a building used either wholly or in part for school purposes for nearly one hundred and fifty years.

As the population increased other school-houses were erected in different quarters of the town, until, at the present day, there are eight buildings in which instruction is given in the rudiments of learning.

In addition to these common schools there has been since 1774 a school of advanced grade for instruction in the higher branches of learning. But, until about the year 1859, these were all private schools, conducted by many different teachers. Although excellent of their kind, many of the inhabitants felt the need of a permanent school of this character. They therefore cordially received, in the year 1858, the proposition of the executors of the will of Thomas Dowse, a former resident of the town, to render assistance in the establishment of a High School. With the aid of this gift, the "Dowse High School" was founded, and its doors were first opened in 1859. This bequest was a great acquisition to the means of education, and for fifteen years it continued its good work during a portion of each year.

Thomas Dowse was the son of Eleazer and Mehitabel Dowse, and was born at Charlestown, Massachusetts, December 28, 1772. On the ever-memorable 17th of June, 1775, when but two and a half years of age, his parents fled from the flames of their home in that town. After sojourning for a short time in Holliston, they settled in Sherborn, where their descendants remain to this day. Eleazer Dowse was the first of his name who settled and remained in this town. Lodowick Dowse was here as early as 1683, and had a lot of thirty acres assigned him May 27,

1684. But he did not long remain here. No connection has yet been traced between his family and that of Eleazer Dowse, but it is probable that there was a distant relationship.

Thomas remained in the town, and in due time worked with his father at his trade of a leather-dresser, until he reached his majority. He then sought and obtained employment in the same occupation at Roxbury, where he resided for several years. It was in the year 1803 that, with the assistance of his employer, he commenced business for himself at Cambridgeport, as a wool-puller and leather-dresser. And here he continued during the remainder of a long life, distinguished for the thoroughness and excellence of his work, and gradually accumulated a considerable fortune. A carved lamb stood upon a pillar before his door, as a sign and symbol of his trade, during many long years. He possessed a real love for books and their contents, and also for art. And thus, instead of expending his money for outside show, he used a liberal share of it every year in the purchase of books of real value, and in volumes of engravings. In this manner he gradually became possessed of a very valuable library of 5000 volumes, nearly all in the English language, and handsomely bound. But his books were not kept for show. They were regularly and diligently used, and he had not only much pleasure, but a just pride in their possession. He was strongly attached to his library, and when advanced in years he was naturally solicitous for its future, and was thus led to reflect upon his disposition of it. He decided to convey it during his lifetime to the Massachusetts Historical Society, with the sole condition that the books should always be kept in a room by themselves, and only to be used in said room. This society gratefully accepted the gift, but appropriately allowed it to remain with the venerable donor during the remainder of his life.

After devising a handsome sum of money to his relatives, and making some special bequests, he confided the residue, more than forty thousand dollars, to his executors, to be by them appropriated to charitable, literary or scientific uses. This important trust was fulfilled by them with signal good judgment and discretion. A beautiful collection of water-colors which accidentally came into his possession, was added to the gallery of the Boston Athenæum. A conservatory at the Botanic Garden, Cambridge, was built in part at their expense; a liberal contribution was made toward the purchase of a chime of bells in the same city; and a public clock was procured for the street in which he lived. Contributions were made to the funds of two of the charitable institutions of Boston, and the Dowse Institute was founded in the city where he had so long resided, and an annual course of lectures on literary and scientific subjects is thus furnished to its inhabitants. Lastly, the sum of five thousand dollars was conveyed to the town of Sherborn, for the foundation and support of

the "Dowse High School," which thus became a lasting monument to his memory. The executors, who appear to have left no place or circumstance unconsidered with which Thomas Dowse had any important connection during his life, remembered this town on account of his long residence here in early life, and the continued and present settlement in Sherborn of many relatives bearing the family name. They also carefully inquired into the needs of the town before deciding upon the particular object to which the money should be devoted and for which it should be given, desiring that the means of usefulness and improvement contemplated by the donor should be made as effective as possible.

The town gratefully accepted the gift, and thus a way was opened for a commencement of that instruction in the higher branches of learning which had long been desired by many inhabitants of the town. An education which would answer for an introduction to the practical business of life could now be obtained within our own limits, and many pupils here received their entire instruction in advanced studies. For some years but two terms of school were held during each year, one in the spring and one in the autumn season. In the year 1862 this plan was changed for the convenience of the people, the school commencing in December instead of September, and continuing for four months, as required by the terms of the bequest, being divided, however, into two consecutive terms. But this arrangement did not succeed in meeting the wishes of the inhabitants, and was soon abandoned, and the two terms were henceforth held in the fall and winter months as long as the school continued as an independent organization. Many of our present citizens can look back to the old Dowse High School with feelings of gratitude for the privileges enjoyed, and of pleasure for the friendships formed, which in many cases will last as long as life itself. They also remember with peculiar interest many of their teachers to whom they became attached, such as Baker, and Stone, and Park, and Hoitt, and many others. Mr. Fisher A. Baker was the first of the long line of teachers, and was a man peculiarly fitted for his work. He is clearly remembered by the older class of pupils, and is an object of additional interest on account of being the pioneer in this work of advanced education in Sherborn. He had previously been engaged in the work of teaching in the South School for four successive winters, and by his able and dignified course had gained the approbation of the committee, the respect of the scholars and the universal esteem of the parents. The committee therefore felt that he would be the right man to inaugurate the system of instruction in the new High School, and their decision was heartily approved by all persons of his acquaintance in the town. They were justified in the choice, as the success and general good management of the school abundantly proved. Many other able teachers followed Mr. Baker, but a

peculiar interest attached to him as the man who commenced the work of the Dowse High School. The school continued as a separate institution for fifteen years, the last term being held in the autumn of the year 1873.

But Sherborn had still greater favors in store, all unknown to its people until the year 1870. Then the executors of the will of Martha Sawin, of Natick, gave notice to the town that Miss Sawin had bequeathed a large sum of money for the purpose of founding and supporting an academy, to be called the Sawin Academy, for the free instruction of its youth in the higher branches of science and literature, and also in the classical languages, in preparation for a college course when desired. This was truly a munificent gift, which promised to establish a permanent yearly school and thus supplement and complete the educational privileges of the inhabitants.

Although living for many years past in the town of Natick, the Sawins were old residents of Sherborn. Thomas Sawin, born September 27, 1657, the son of John Sawin, of Watertown, removed to this town and had a home lot of twenty-four acres assigned to him May 13, 1679. He was a millwright, and settled at Chestnut Brook, in the northwestern part of the town, near the present residence of Albert B. Fay, and there built the first mill in Sherborn. He was admitted to be an inhabitant November 29, 1679. After the removal of the family to South Natick they continued in the business of milling for several generations, and many persons now living have a distinct memory of Sawin's mills, which are now owned and managed by Mr. Andrew Morse. Living near the boundary line, the family continued its connection with the people of Sherborn, with whom they were well acquainted, and for a long time attended church and school here. Their interests were, therefore, in a great measure identified with those of Sherborn, and as the town of Natick was already supplied with a well-ordered High School, the reason of the decision of Miss Sawin to leave her property to this town and found an institution bearing her name, is easily seen.

Martha Sawin, familiarly called Patty Sawin, was the daughter of Thomas and Abigail (Bacon) Sawin, and was born in Natick August 16, 1794. She lived with her brothers, Baxter and Thomas, and kept house for them in the homestead at South Natick, all being unmarried. They carried on the mills and the farm until well advanced in age. They were shrewd, practical persons, methodical in their habits, and well acquainted with the value of money. When Miss Sawin had determined upon the manner in which she would dispose of her estate, she called for the assistance of George White, Esq., judge of Probate for Norfolk County, and after advising with him in regard to particulars, desired him to make out the necessary documents expressing her wishes. She died

June 22, 1869, at the age of about seventy-five years. In addition to the sums conveyed to her relatives, she devised five hundred dollars to each of the religious societies in Sherborn, in memory, doubtless, of the privileges she had enjoyed there.

In response to the notice of the executors, a special town-meeting was called for December 19, 1870, when the bequest was formally accepted, and a committee was chosen to take charge of the estate and transact the necessary business. The fund was largely invested in land and in securities which were not immediately available. It was some time, therefore, before the committee was able to commence the immediate work of placing the academy in operation. An act of incorporation was obtained of the Legislature April 12, 1871, in which the direction of the academy and the care of its funds was vested in five trustees, to be chosen by the town from its inhabitants, one of whom should retire each year, his successor to be chosen for five years. These trustees were also to be trustees, from that date, of the Dowse school fund, the Dowse High School being united with the academy; but the two funds were to be kept separate and distinct.

By the terms of this act a certain proportion of the Sawin fund could be used for the erection of a building. Upon this much thought and consultation were expended before its plan was selected. The trustees were desirous of constructing an edifice which should be at once elegant and substantial, and adapted to the purpose for which it was designed. It was no easy task. It was difficult to decide whether it was wiser to build with wood or with some more solid material. Both had their advantages. The sum of money to be expended on the building was also a serious question, as they did not wish to encroach too greatly on the fund in its reduced condition, the heirs of Miss Sawin having contested the will, thus rendering a compromise necessary. The trustees exercised their best judgment at the time in deciding a difficult and perplexing question, and they produced an elegant building, which is an ornament to the town. It was placed on a lot bought for the purpose which faces the public Common in the centre of the town, where most of the public buildings are situated. It was constructed of brick, with granite trimmings, and has an appropriate inscription cut in a tablet of granite. It is fifty-four by sixty feet in size, two stories high, with a Mansard roof, and has at the eastern corner an octagon tower of ninety feet elevation. It contains several commodious, well-lighted school and recitation rooms. This edifice was commenced in the year 1873 and completed in 1874, and on the 10th day of September, 1874, the exercises of dedication were held and were very largely attended by the inhabitants of the town and the friends of the institution from other places. Among those present were Hon. Henry Wilson, then Vice-President of the United States, Judge White, who made the principal

address, and Judge Bacon, of Massachusetts, and George B. Emerson, LL.D., the veteran teacher and friend of education, and all took part in the exercises, as did also the Messrs. Allen, the prominent teachers in West Newton. The music was furnished by the Sherborn Musical Association.

The academy still continues a benefaction to the inhabitants, and gives to their children a more complete education than many of them could otherwise have obtained. The first principal was Edward A. H. Allen, C. E., of Northborough, a teacher of ripe experience, who served until 1882. He was succeeded by Horace W. Rice, of Hopkinton, until 1888, and by Warren F. Gregory, of Winchendon, from 1888 to the present time.

Sherborn has been well supplied with brooks and early measures were taken by the town to encourage the erection of grist-mills and saw-mills upon them. The first mill, as just mentioned, was built by Thomas Sawin, on Chestnut Brook, in 1679, and others at later dates. These mills were of great advantage to the settlers in the young and growing community, and subsidies in land were frequently granted to those who would establish them. One of these mills, on Sewell's Brook, has been continued in use to the present day, James H. Leland being the present proprietor.

October 27, 1681, it was "Voted by the Inhabitants that there shall be a division of so much of our common land as is judged meet for a dividend . . . if our honored Committee approve of it." Only a portion of the land comprising the area of the town was at first assigned to the inhabitants, the remainder being reserved for division among new inhabitants who were expected to settle here; and the above note related to one of these later divisions. It may be remembered that the town was at this time placed under the guardianship of a committee appointed by the General Court, principally on account of the difficulties which arose concerning the location of the meeting-house. This committee, consisting of Thomas Savage, John Richards and William Stoughton, had the charge and direction of all the affairs of the town, civil as well as religious, for three years. They approved and confirmed the above vote and gave some directions concerning the manner of dividing the land fairly and equitably to both old and new inhabitants.

Following is a "list of persons admitted to be Inhabitants of Sherborn since its incorporation, with the dates of admission;" the dates in parentheses being inserted by the present writer as the probable dates, none appearing in the town records:

"Ensign Samuel Bullen, Edward West, (1677); Joseph Morse, (1671); John Perry, (679); William Allen; Thomas Eames, Jan. 1, 1674; John Death, 11 mo. 1, 1677; Thomas Gleason, 8 mo. 5, 1678; Hopestill Leland, 11—1, 1678; Ebenezer Leland, 11—1, 1678; Joseph Twitchell, 11—1, 1678; Thomas Pratt, sen., 2 mo., 1679; William Sheffield, May, 1674; Zecry Paddleford, 2 mo., 1679; John Eames, 2 mo., 1679; Isaac Learned, 2 mo., 1679; Thomas Pratt, Jr., 2 mo., 1679; Thomas Sawin,

9 mo. 29, 1679; Jonathan Whitney, 1679; Will Goddard, 9 mo. 29, 1679; Benoni Learned, 9 mo. 29, 1679; Will Rider, 9 mo. 29, 1679."

This list has proved to be of much value in determining doubtful questions concerning the dates and even the fact of residence of some of the persons mentioned therein.

An extract from the records of the General Court, October 11, 1682, states, "Whereas there is about fifty soldiers at Sherborne, in probability they will increase to a greater number in a short time, and they having no higher officer than a Sarjant, it is ordered by this Court and the authority thereof that Sargeant Edward West be Leiftenant to the said company and Jonathan Morse, Ensign, and they are to choose two sarjants, a drummer and clerk for the said company according as the law directs; and that the said company do belong to the regiment of Maj. Gookin, and ye Secretary is ordered to issue both commissions for them."

February 3, 1695, at a meeting of the inhabitants of the town, the important work was consummated of voting to lay out and complete the exchange of land with Natick, which rendered this township more compact and of better form. This was done in fulfillment of the agreement made in 1679, by which 4000 acres in the southwesterly part of Natick were added to Sherborn, and an equal quantity of land "adjoining to Mauguncog Indian Hill," near Hopkinton, and also 200 bushels of Indian corn, were conveyed to Natick in exchange. This was a valuable transaction for this town, whose territory had previously been narrow in that portion which contained the largest number of inhabitants.

We now approach the year 1700, when an event occurred of great importance to the town. In common with all the earlier towns in the State, Sherborn contained a very large extent of land, and this extensive area rendered it difficult for those persons near its borders to attend the religious and civil meetings of the town. As the number of inhabitants in these localities increased by the addition of new settlers, a spirit of uneasiness began to appear among them, and finally a desire to form themselves into new towns, with privileges of their own. Objections arose on the part of other inhabitants of the town, as to the mode or place of division, or to any division whatever. The older townsmen naturally desired to increase rather than to diminish their population, and also to retain all the tax-payers possible. We shall endeavor to describe the result of this diversity of wishes and opinions.

Previous to the year 1700 seventeen families residing on "Sherburne Row" in the north part of this town, a portion of them adjoining "Mr. Danforth's farms," and others holding leases from Mr. Danforth, made propositions for separation in order that they might join the inhabitants of "Framingham plantations" in the formation of a new town. There was great opposition to the project on the part of the

people of Sherborn, whose population was still small. It was decreed by the General Court some years previously that "all other farms that are nighest Sherborn Meeting-house shall be likewise in the bounds of Sherborn, and do duty and receive privileges therein," the tract of land belonging to Thomas Danforth, Esq., Deputy-Governor, being however excepted. This act gave to Sherborn a valid claim upon these families, and the town was naturally reluctant to give them up. An effort was made by the town in 1695 for an enlargement of their town bounds by the addition of "land joining to the farm of Henry Rice to make one township," embracing such farmers as were willing to join the township. It was proposed "to run a straight line from the south corner of Henry Rice's farm to the cartway crossing Cochituate brook, near where Course brook meets with Cochituate brook." This was evidently a plan to secure these inhabitants and their lands as permanent inhabitants of Sherborn; but as we find no further record concerning it, no successful result was probably attained.

Rev. Daniel Gookin sent to the General Court a remonstrance against the assignment of these families to the projected town of Framingham, and another remonstrance was presented by the inhabitants of Sherborn. The bounds of Sherborn in this direction appear never to have been well defined and the rights of territory thus became involved and uncertain, and these conditions led to a long and troublesome dispute.

The town of Framingham was incorporated in the year 1700, but it was not until June 16, 1710, that the Court passed the order finally including the seventeen families within Framingham line, to be "accounted part of that town forever," and granting to Sherborn in compensation, 4000 acres of land west of Mendon. And so the great contention was settled in an equitable manner by the strong hand of the law.

Should the town of Framingham be divided and a new town be formed at South Framingham, it is probable that Sherborn would be called upon to yield another portion of her territory to complete that township.

One remarkable event in the history of a town, as in that of an individual person, is often followed by another similar event within a short time. We therefore soon find that the western inhabitants were increasing in numbers and were thirsting for privileges of their own. Their first concern referred to their lack of religious privileges. Their farms were situated at a long distance from the church, and they made representations in the town-meetings of the difficulty they often experienced in attending public worship. The town met their wants in an amicable spirit, and at first passed a vote March 6, 1723, nullifying a vote previously passed to build a new meeting-house on the old spot, and deciding to erect it at a point which would better accommodate these

inhabitants "Who are Dwellers on ye West side of Dopping brook." But in the following November, the town "voted to nullifie and make void this vote of March 6, in consideration that the Form and Situation of the Town is so ill Convenient, that one Meeting-house cannot be so placed as to suit the whole town, but that in time there will be need of two to accommodate the inhabitants." They also voted to build on the old spot and to levy £160 on the inhabitants for the purpose, at the same time agreeing to remit to these western inhabitants their proportion of this sum "whenever they are sett off."

In answer to petitions from these latter persons presented in June, 1724, showing the great inconvenience they are under by reason of their great distance from the place of public worship, the said town being near twelve miles long and the meeting-house situated at the easterly end, and praying that they be made a distinct and separate township, the General Court appointed a committee to investigate the matter. The committee reported and recommended that the "western part be erected into a precinct," and also offered rules and restrictions for the new parish.

The report was accepted, but the General Court voted that this western part shall be a town and not a precinct, and that it be called Holliston in honor of the illustrious Thomas Hollis, Esq., of London. John Goulding, a principal inhabitant, was empowered and directed to summon the qualified voters to meet "for the chusing of town officers to stand until the next annual election according to law." This bill was passed to be enacted by both Houses, Dec. 3, 1724. And thus another child of the old town was started into the world to transact business on its own account.

From this date there were but few events worthy of notice in the civil history of the town for many years. The regular business of the town was carried on. Meetings were held for business, as required by the laws of the Commonwealth; new schools were established and old schools continued; and much thought and labor were expended in the formation and improvement of the roads in the township.

The population had increased during one hundred years from the first settlement, as we find that in the year 1764 there were 113 families and 630 inhabitants.

Among the prominent citizens of the first quarter of the eighteenth century was Captain and Honorable Samuel Bullard, born in 1667, a son of Benjamin Bullard, the first settler of that name. For many years he acted as moderator of the town-meetings; served nineteen years as selectman, five years as assessor and five years as representative to the General Court, where he aided in procuring the grant to the town of 4000 acres west of Mendon. His was the controlling mind of that period and there is undoubted evidence of his talent and integrity. He died in 1727.

He was succeeded later in that century by Joseph

Twitchell, Esq., and Honorable Daniel Whitney, successively, both men of ability and high character. The former was captain in the militia, commissary for the army in the War of the Revolution, town clerk, selectman, representative and magistrate. He was born in 1719 and died in 1792. The latter was a born leader of men and an able, patriotic citizen. Morse says, "He was early and long in public life, and during the Revolutionary struggle an efficient instrument in arousing and directing the energies of his fellow-citizens. He was a member of the Provincial Congress, 1775; Representative, 1776; member of the convention to form the State Convention, 1780, and of that which adopted the Federal Constitution in 1788; and between 1781 and 1799 he represented Sherborn fourteen years in the House, was for several sessions a member of the Senate, and repeatedly one of the Executive Council. As a magistrate he was much valued, and he passed away amidst the regrets of an extended acquaintance." He was born in 1733 and died in 1810.

His mantle fell upon Honorable Calvin Sanger, one of the most able and distinguished sons of Sherborn, whose career we notice in connection with those of his predecessors, although it was comprised within the early years of the present century. He was a son of Captain Samuel Sanger, a dignified, energetic and worthy inhabitant, and was born October 10, 1768. He was not robust in health, but was endowed with natural gifts, sound common sense, a tenacious memory and excellent judgment. When, therefore, in the year 1806, a new leader of affairs was required, the minds of the townsmen unanimously turned towards him. In that year he was appointed a magistrate and also a representative to the General Court, and for nearly thirty years he continued to be a member either of the House or the Senate. He also filled various town offices with full satisfaction, and was town clerk for twenty-five years. "In his care for the public he was vigilant, self-denying and persevering, consulting the interests of the future as well as the present."

When a company of cavalry was raised in the vicinity, he was chosen captain; and he subsequently became colonel of cavalry. He died in 1835.

The year 1754 is to be noted as the time of the appearance of an uncommon disease of an epidemic character, called in Sherborn "the Memorable Mortality," and in Holliston "the Great Sickness." Nearly thirty lives were lost in this town by its ravages and fifty-three in the town of Holliston, and alarm and despair were excited in the minds of the inhabitants. It appears to have been present during the whole year, but no deaths are recorded during the warmer season. The fatal months were January, February, March, April, November and December.

The French and Indian War, from 1755 to 1763,

did not seriously affect this colony. Some of its young men served in these campaigns, and we have been able to learn the names of fourteen who lived in Sherborn, besides two who were born here and settled in Mendon and Douglas. Among these were Benjamin Bullard, afterwards captain in the War of the Revolution, and Ensign Hezekiah Coolidge, a graduate of Harvard College in 1750, who died at Crown Point in December, 1761.

In this, as in many other towns at that period, a company was raised which consisted of two bands, a "trained band" of sixty-six men and an "alarm band" of forty-one. The latter were wholly for home service, but from the ranks of the former were selected soldiers for active service as needed. And most of the fourteen men above mentioned were thus selected. The officers of the company were: Captain, Joseph Perry; Lieutenant, Amos Coolidge; and Ensign, Thomas Russell.

The time of greatest trial to these colonists as well as those of the whole country, came with the War of the Revolution. Great as was their attachment to the mother country, and reluctant as they were to sever the strong bonds which held them to allegiance, still the exactions of the home government were becoming too onerous to be borne. The people of the colonies began seriously to consider the necessity of throwing off the yoke. Sherborn was ready now, as ever, to do its part in contributing men and means to support the great struggle for what it deemed to be just and right.

As early as 1774 a Committee of Correspondence was chosen, and also committees to attend the county conferences at Concord and Cambridge, and to procure a field-piece. Three cannon procured by the latter committee, instead of a six-pounder, were accepted by the town, and it was voted "that the committee prove them at the town's expense, and fire the biggest as soon as may be, with all the necessaries that may be needed." Many other votes were afterwards passed, showing that the people were animated to a high degree with the spirit which finally achieved the independence of the Colonies. In 1776 it was voted to extend relief to the poor of Boston, then besieged by the enemy, and to find places for them to live in. A company of minute-men was raised, and £8 granted to provide ammunition for the cannon. As soon as the news reached this town of the conflict at Lexington, April 19, 1775, the minute-men proved themselves worthy of their title by marching immediately to meet the assailants. The officers of this company were: Benjamin Bullard, captain; Aaron Gardner, lieutenant; and Joshua Leland, ensign. There were four sergeants, four corporals and forty privates. The names of all are recorded in the archives of the State.

This company, with some alterations in its membership, served for some time afterwards, whenever needed, at the siege of Boston, at Bunker Hill and

¹ "History of Sherborn and Holliston, Boston," 1856.

other engagements. A large proportion of the able-bodied men of the town became soldiers, and Sherborn names are found in the lists of those engaged at Ticonderoga, White Plains, West Point, Brandywine, in the expeditions to Rhode Island in 1779-80, and in other battles. Seven brothers, the sons of Mr. Samuel Clark, enlisted as soldiers and served, on an average, over three years per man.

In May, 1776, the town voted that if Congress decided to declare the colonies independent of Great Britain, the people would, with their lives and fortunes, endeavor to support them in that measure. And Daniel Whitney, their representative, was instructed, to act accordingly.

When the question of the adoption of the Federal Constitution arose, Sherborn sent Daniel Whitney to the State convention held in Boston, in 1788, with general instructions, which conclude as follows :

"But, sir, we mean not to give you positive instructions relative to your voting for or against the reported Constitution. When assembled, you will have the collected wisdom of the State before you; will hear all that can be said on the subject, and consequently be able to form a judicious opinion. And having the fullest confidence in your political wisdom, integrity and patriotism, we cheerfully, on our part, submit the all important question to your decision. And we beseech the All-wise Governor of the world to take the Convention under his holy influence, that so the result may be the best good of the people of the United States of America." And that honorable member was one of the majority who voted in favor of this great charter of our freedom.

In 1781 an entry in the town records states that the salary of Rev. Elijah Brown for one year, ending March 1, 1781, was £73 6s. 8d., equal to £2,933 6s. 8d., Continental currency! This shows the depreciation which the latter had suffered, and that it took more than £40 of that currency to equal £1 of sound money. Although made necessary by the circumstances of the times, it presents a powerful argument against the establishment of an irredeemable currency.

In the year 1786 occurred Shays' Rebellion in Massachusetts, on account of supposed political grievances. It was headed and commanded by Daniel Shays, of Hopkinton, and for a while assumed rather formidable proportions. The inhabitants of this town, in the interests of liberty and order, furnished their quota of officers and privates to the troops commanded by Gen. Lincoln.

"Mr. John Ware, of Sherborn, acted as adjutant in this expedition. Being sent with orders to a distance from Lincoln's army, he stopped for refreshment at a tavern in or near Brookfield where there happened to be a small party of insurgents, who took him prisoner and confined him in an upper room of the house, while they kept guard below. In the course of the day, Ware saw from his prison a company of

cavalry approaching, which he soon recognized as being on the side of the Government. He hailed them from a window of his apartment and made them acquainted with his situation. The house was immediately surrounded, the Shaysites surrendered at discretion, and W. was enabled to accomplish the object of his mission."

When President Washington made his tour through New England in 1789, he was entertained in this town by Capt. Samuel Sanger, a prominent and patriotic citizen and father of Hon. Calvin Sanger; and the old house and the room occupied by the distinguished guest were standing a few years since and excited much interest in the minds of visitors.

In the year 1807 and 1808, when one hundred thousand militia were called by the President, to be in readiness in case of invasion, the town voted to add to the pay of the soldiers of their quota a sum sufficient to make their whole pay, when in actual service, twelve dollars per month. And in 1814, when hostilities were in progress with England, this sum was increased to fifteen dollars per month. The chief duty performed by our soldiers was in garrison in the forts of Boston Harbor.

As there was no event in the annals of the town for several years which it is important to record, we will now give an account of the physicians of Sherborn, commencing with a list of their names.

Jonathan Fairbank, 1685-1719; Eleazer Hill, from about 1712; Jonathan Tay, 1772-1827; Samuel Locke, from about 1783-88; Tapley Wyeth, 1784-1813; William Sweetser, from about 1818; Oliver Everett, 1825-52; Albert H. Blanchard, 1852 to the present time.

Dr. George W. Dennett has also resided in the north part of the town since 1863, and Dr. Wm. P. Sylvester in the southern portion since 1877.

During the eighteenth century and the early years of the nineteenth century several other physicians have resided here; but little information can be gained concerning them or the dates of their sojourn. Notices occur of the names of Drs. Wilson, Lincoln, Sheppard, Levet, Blodget, Flagg, Wise and Wight.

Dr. Jonathan Fairbank was an important man in his day. Besides his practice as physician, he was selectman seven years and town clerk three years. It is supposed that he lived in the old stone house north of Bogistow Pond; and he was drowned by falling through the ice while crossing the river from Medfield in the night.

Dr. Jonathan Tay came from Salem, settled in the west part of the town and had an extensive practice. He served as selectman twelve years and resided here fifty-five years.

Dr. Samuel Locke was a son of Rev. Dr. Locke, the fourth pastor of the church in Sherborn. He lived but a few years after he became a physician.

Dr. Wyeth was an eminent physician and a valuable citizen. He was especially interested in the

cause of education. He served six years as selectman, and as representative in the year 1813.

Dr. Sweetser was a thoroughly educated man and possessed literary tastes. He remained here "for a considerable time," probably six or seven years, and left to accept a professorship in the Vermont University at Burlington.

Dr. Everett was born in Dedham November 11, 1798; graduated at Brown University in 1821, and received his degree of M.D. from Dartmouth College. He settled in Sherborn in 1825, by invitation of the town, and for many years had an extensive practice in this and adjoining towns. In fact, his practice was too large for his own welfare, and his life was probably shortened by the great amount of work he performed. He was a man universally respected and was very popular as a physician. Morse, in his "History of Sherborn" and Holliston, says: "His worth became ineffaceably stamped upon the minds and hearts of the entire community, and no man of his generation ever fell in Sherborn whose death was so universally and deeply lamented." He died December 12, 1851. He was appointed surgeon M. V. M. April 25, 1825.

The present writer, also after invitation by a committee of citizens, came to this town from Boston, his native place, December 19, 1851, and has remained here in practice to this day with the exception of two years during the Civil War, for the greater part of which time he served as surgeon of the Third Massachusetts Cavalry.

In the year 1847 occurred the reunion of a very large number of the descendants of Henry Leland, previously noticed when describing their ancestor.

In 1852 "Pine Hill Cemetery" was dedicated.

Sherborn has, from the earliest times, set apart lots of land for use as cemeteries. The old burial-places were seven in number, namely: the ancient South Cemetery, which received the body of the venerable Hopstill Layland (born in 1580), in 1655; the Central Cemetery, 1686; the Farm, which was first used after the death of Daniel Morse, Sr., in 1688; the Brush Hill, 1785; the New South, 1790; the Plain, 1792; and the West Sherborn, about 1825.

In general, these lots were bare and uninviting spots, devoid of beauty or attraction, as was often the case in New England towns. Before the middle of the present century the subject of a more modern, rural cemetery was seriously considered and finally urged by some of the inhabitants. Prominent among these was the lamented Dr. Everett, by whom a location was most judiciously chosen on Pine Hill, convenient to the centre of the town and yet sufficiently secluded from public view. The gravelly and mineral character of the soil, combined with a natural drainage, render it peculiarly suitable as a place of interment. An association was formed, about ten acres of land were purchased and the grounds were tastefully laid out by Captain Jacob Pratt, the superintendent, who had a deep interest in the work, and

had also selected the same spot for the cemetery independently of Dr. Everett.

On the 19th day of May, 1852, the "Pine Hill Cemetery" was consecrated with suitable exercises, an address being given by Rev. Edmund Dowse to a multitude of interested citizens. Among the remains first deposited there were those of Dr. Everett himself, who, when selecting this locality, may possibly have had a premonition that his life might not long continue.

This cemetery has always been a source of great satisfaction to the people, and continues to be a chosen place for interment.

The commendable desire to preserve memorials of the ancient worthies of the town had inspired various persons, and notably Rev. Abner Morse, author of the "History of Sherborn and Holliston," to urge upon their descendants the sacred duty of preserving the tombstones of the founders and prominent men of Sherborn, or when this could not be done, to erect new monuments to their memory either on the original spot or in some other appropriate place. With this purpose in view, Calvin P. Sanger, Esq., a late inhabitant, who did much for the welfare of the town, caused the remains of the first three ministers to be taken up from the old Central Burying-Ground, long disused and neglected, and interred in the new Pine Hill Cemetery beneath a marble monument bearing these inscriptions:

"Erected to the memory of the first three ministers of the church in Sherborn, Whose remains together with those of their families were removed from the Central burying-ground to this Cemetery, Sept. 15, 1857." On the second face, "Rev. Daniel Cookin, first minister of the Church in Sherborn, graduated at Harvard College in 1669, was a Fellow for eight years, and was ordained March 26, 1685. He was distinguished for his tenderness and fidelity to his people, and for an eminent Christian example. He died Jan. 8, 1718, aged 67 years." On the third face, "Rev. Daniel Baker, second minister of the Church in Sherborn, graduated at Harvard College in 1706, and was ordained in 1712. He was fervent in prayer, powerful as a preacher, deeply interested in his labors, affable, and resigned under trial. He died May 14, 1731, aged 45 years." And on the fourth face, "Rev. Samuel Porter, third minister of the Church in Sherborn, graduated at Harvard College in 1730, and was ordained Oct. 23, 1731. He was a man of rare mental endowments, an earnest preacher, an affectionate and devoted pastor, and a shining example of the Christian life. He died Sept. 16, 1758, aged 49 years."

As before mentioned, soon after the erection of the above monument, upon a representation made by the Cemetery Association, the authorities of Harvard College placed there a solid block of granite over the remains of Rev. Dr. Locke, which were removed from their original resting place, and the marble headstone

in the old Central Cemetery was at the same time removed and may be found near the granite monument. Upon the latter is inscribed "Samuel Locke, S.T.D. Died Jan. 15, 1777. Pres. of Har. Coll., 1770-3."

Upon application of the proprietors this cemetery and also the other cemeteries in town belonging to associations were accepted by the town; and it was voted, April 9, 1888, to assume control of them if desired by said associations.

In ancient times, and even to a comparatively recent date, the stated meetings of the inhabitants for the transaction of the business of the town were held in the public meeting-house, which belonged to the town. The town and parish business was conducted in the same meeting, and the town records contained also the records of the parish until August, 1809. In the year 1836 the town purchased of the proprietors the first academy building, which had been erected by subscription for the accommodation of a private high school, and the public town-meetings were held in it for several years. But finally the building had become old and worn, and also of insufficient size for the increasing numbers of the inhabitants, and it was evident that better accommodations must be provided. The subject was discussed, and it was decided that the town-house must be repaired and enlarged, or that a new building must be erected.

But before any definite action was taken the proposition of the executors of the will of Thomas Dowse was received and accepted, and their consent obtained to invest the amount in a new town-house which should contain a suitable room for the use of the proposed high school. The town agreed to pay, as interest, a sum sufficient to support the school for four months in each year. Thus was the town providentially aided in a highly important work, only a small additional outlay being required to complete the building. It stands on the old site of the school-house at the southeast corner of the Common. It is a neat structure of sufficient size for the wants of the town for many years, and contains a large hall for meetings and lectures, a good school-room, ante-rooms and a room for a public library. It was dedicated with appropriate ceremonies, Dec. 23, 1858. Having been injured by fire, it was rededicated June 17, 1876, and the day was also celebrated with addresses and music in recognition of the centennial anniversary of the battle of Bunker Hill.

In the year 1859 "The Sherborn Widows' and Orphans' Benevolent Society" was founded, chiefly by means of a handsome donation made by Calvin P. Sanger, Esq. "Its object shall be to aid such indigent widows and orphans," says its constitution, "as may from time to time be residents of Sherborn; and such other persons, whether males or females, who, though reduced to necessitous circumstances, would shrink from a resort to the town for support; but it is not intended that this charity shall in any way or

manner relieve the town of its duty to its poor." The society was organized October 19, 1859, under a general law of the Commonwealth. It has been the means of great benefit to the class of persons referred to, the annual interest of the fund being appropriated, by a vote of the Board of Managers at each regular meeting held for that purpose. The society is still in existence, and still continues its benevolent work. In the year 1890 it received a handsome bequest from the estate of the late Aaron Greenwood.

For many years there had been a library in the town, owned by an association of individuals, called the Social Library, and afterwards the Proprietors' Library. It was first established in the year 1808, and was useful in its day, furnishing to many the means of literary culture and enjoyment. At a later date an association of farmers and others, interested in agriculture and horticulture, collected a library of books devoted to those subjects. Soon after the passage of an act by the Legislature, allowing towns to establish public libraries, the members of these associations expressed a willingness to present their collections to the town for the purpose of forming the nucleus of a town library. The proposition being favorably received by the people, the associations presented a petition to the town at a regular meeting, held March 5, 1860, for the establishment of a public library, accompanied with the offer of the gift of both libraries (comprising 573 volumes), provided it would comply with the request and conform to the full provisions of the State law on the subject. The town cheerfully granted the petition, and made an appropriation for the foundation of the library. At a subsequent meeting, held April 2d, articles of organization were adopted, and also rules and regulations for the government of the library. It was decreed that the management should be vested in seven trustees, to be annually elected by the town, who should have power to fill vacancies in their own board, and who should hold office until their successors were chosen. The library was opened for the use of the inhabitants in the following month of June. Annual grants of money by the town have secured the addition of new books, and great satisfaction has been derived by the citizens from this popular institution. The whole number of volumes March 1, 1890, was 4000, including many works of reference. This small town deserves credit for its early adoption of the State law, and it takes pride and pleasure in this material aid to education. In the year 1890 the library received a liberal contribution bequeathed by the late Aaron Greenwood, a life-long inhabitant of the town.

The year 1861 is an era long to be remembered. The feeling of dissatisfaction in the Southern States, which had long been existing, came to a climax, and precipitated upon the nation the tremendous burden of a civil war. The crisis must be met, and it devolved upon the Northern and Western States to

preserve the integrity of the Union. The President issued his proclamation for troops, and each State and town must furnish its quota of men. Sherborn had always performed her duty in great emergencies; she did it now, and we can turn with just pride to her honorable record of those days.

As early as May 1, 1861, at a town-meeting called for the purpose, a committee was appointed to prepare the following resolutions, which were unanimously adopted:

"Whereas, the stability of the Government of the United States is placed in great danger by an armed rebellion in several of the Southern States, threatening the destruction of our national capital and national prosperity, and a resort to armed resistance has become necessary for the preservation of our lives and liberty; and whereas, by proclamation from the President of the United States, the Commonwealth of Massachusetts is called upon for her share in the common defence, therefore,

"Resolved, that the people of this town place the most perfect reliance and trust in the present form of our Government, that we believe it to have been founded in wisdom and patriotism, and that we will throw aside all party feeling, and, with a firm reliance on the blessing of God, pledge our lives, our fortunes and our sacred honor to uphold and perpetuate the Government and institutions of the United States.

"Resolved, that the town of Sherborn appropriate two thousand dollars to fit out and furnish all necessary clothing for all those persons who have or may hereafter volunteer as soldiers in said town, or who may be drafted into service from said town, and to provide for their families in their absence."

At the same time a vote was passed intrusting the expenditure of this sum to a committee consisting of the selectmen and seven other citizens. It was also voted to guarantee to all volunteers and drafted men such a payment as with the Government pay should amount to \$17 per month.

A military school was formed for drill under the direction of an instructor, and aid in meeting the expense was granted by the town. In November, 1861, five hundred dollars was granted towards the support of families of volunteers. In 1862 a bounty of \$175 was offered to each volunteer from the town. Frequent meetings were held during the same year, at which addresses were given by public speakers on the subject of the war. In 1863 \$3000 were granted for aid to volunteers, and in 1864 \$2000 for the same purpose.

Private subscriptions and contributions also were forthcoming, and they supplemented the appropriations of the town.

All these records show that Sherborn was animated with patriotic feelings and was ready to assume her full share of the burden which the war laid upon thousands of loyal towns in the Union States. Eighty-two of her citizens were enrolled in the army, and of this number nineteen laid down their lives in the battle-field, the hospital and the prison. Of those who lived to return to their homes, many came with shattered health, and there are but very few who do not bear the marks of wounds or the effects of disease contracted by the hardships and exposures of a soldier's life.

The memory of those trying times can never be obliterated from the minds of those who took part in

the great conflict; but the establishment and yearly observance of Memorial Day have served to keep fresh in the hearts of all people the hallowed events of those days. That anniversary has always been sacredly kept by the veterans of Sherborn, and since 1885 has, by vote of the town, been observed as a public commemoration; the old soldiers, assisted by a Post of the Grand Army of the Republic from one of the neighboring towns, taking the leading part in the exercises of the day, and in decorating the graves of those who have passed away from the field of life.

In the year 1868 a lodge (No. 297) of the Independent Order of Good Templars, a temperance organization, was formed in the town and continued its useful work for about twenty years, when, on account of the removal of members to other places and of other causes, it was dissolved. The plan for celebrating the second centennial anniversary of the incorporation of the town in 1874, was inaugurated by this brotherhood, and its successful execution was largely due to their efforts. The lodge was named "The Oliver Everett Lodge," in respect to the memory of the late physician of the town.

In 1869 the Sherborn Musical Association was formed chiefly for the purpose of taking part in the World's Peace Jubilee in Boston. It also assisted in the second jubilee in 1872, and its members have been called together on several similar occasions of lesser magnitude since that date. It has also furnished vocal music frequently on public occasions within the town, to the benefit of the community and the improvement of its members. The cultivation of the art of music has always received much attention among the people of the town.

The Sherborn Review Club was formed September 11, 1874, by a number of ladies and gentlemen who met to consider a plan for the circulation of magazines and reviews among the members. Simple by-laws were adopted at the second meeting and officers chosen for the management of the business. It has been a very popular and useful association and has continued to the present day, furnishing to its members a great variety of the best periodical literature. The number of members has varied from sixteen to twenty. When several other persons applied for membership they were advised to form a new club rather than add to the numbers of the old one, and thus inconveniently increase the length of time for the circulation of the magazines. They accepted the suggestion, and the Sherborn Literary Club was organized in November, 1882.

During the years following the close of the Civil War the number of convicts in Massachusetts was steadily increasing. The prisons were overcrowded and there was no opportunity for the reformation of any of the inmates. The attention of a number of influential ladies who had been interested in the condition of prisoners was directed to this fact and they resolutely commenced action to bring about a differ-

ent state of affairs. Prominent among these ladies was Mrs. E. C. Johnson, the present superintendent of the Reformatory Institution for Women. They petitioned the Legislature in 1870 for a separate place of confinement for women, with a view to their reformation. In the same year Rev. Edmund Dowse, of Sherborn, then a member of the Senate and chairman of the Committee on Prisons, presented a bill "to provide separate prisons for women and for the classification and better discipline of prisoners." The bill became a law June 15, 1870. The experiment was first tried in the county jail at Greenfield, a separate portion of which was assigned to female prisoners. But after an experience of two years the authorities were satisfied that the plan could be successfully executed only in an institution devoted wholly to this purpose. Therefore, in 1874, another bill was enacted authorizing the prison commissioners to select a site on which to erect a suitable reformatory for three hundred prisoners. This was no easy task, but finally a spot was chosen in this town, near its northern boundary and near the village of South Framingham, a great railroad centre. Sufficient quiet and seclusion was thus secured, and at the same time easy access to a railroad station from which diverge lines to all those portions of the State which furnish the largest number of prisoners to such an institution. Work was commenced on the land in the autumn of 1874, and the buildings were erected and ready for occupancy in 1877. They are each three stories in height and are three in number, being 330 feet, 460 feet and 240 feet in length, respectively. Besides these buildings for the inmates there are several houses for the use of the officers and employees.

The prisoners are all classified and an admirable system of grading stimulates their ambition. They are offered incentives to well-doing and improvement, by the bestowal of privileges and favors, and are thus led and encouraged to a desire for a better life. The superintendent, Mrs. Ellen C. Johnson, possesses much executive ability, and it is all needed in the management of this extensive institution. She is interested in the work, personally supervises the various branches of labor and of discipline, and is doing excellent service to the large number of inmates as well as to the State. She has occupied her position since 1883, the former superintendents being Mrs. E. A. Atkinson, Dr. Eliza M. Mosher and Miss Clara Barton.

At the corner of the road leading from Framingham, adjacent to the prison grounds, stands the W stone on the boundary line between Sherborn and Framingham. It is a well-known landmark in this region and is worthy of notice. As early as January, 1683, mention is made in the records of Sherborn of the W tree. This tree was a large black oak and was so called because that letter was carved upon it, the wheel-tracks of the two diverging roads forming the letter. It served to mark the bounds at that spot for a great number of years, but finally became decayed,

and its remains were removed in 1822, and the present stone was erected in its place by Galim Bullard, an ancient inhabitant of that portion of the town, who was born in 1765 and lived until 1853.

In the same quarter of the town, in the year 1882, there was an event of great importance, which changed the whole aspect and condition of that small outlying district. Previous to that date the land between the county road leading to Framingham and the northern point of Sherborn, which projects in a triangular form between Framingham and Natick, had but five or six houses upon it. This triangle comprises more than one hundred acres, a portion of which was arable land, and the remainder low, swampy land, through which flows Beaver-dam Brook. It was one of the spots the most unlikely to be selected as a site for a village. But circumstances favored the selection, as will shortly be seen.

The Para Rubber Company, of Boston, had erected a large manufactory in South Framingham, not far distant from the Sherborn line. A large number of operatives was to be employed and the greater part of them were not previously residents of this locality and must be provided with places of residence. The owner of a lot of land within the Sherborn triangle, before mentioned, made arrangements with the Para Company to erect several blocks of tenements on his land for the use and occupancy of the persons and families who worked in the manufactory, the company guaranteeing the payment of the rent. This was the beginning. Before long some other proprietors of land erected cottages to be rented, and also sold land to others who built more houses, either for themselves or other persons, until in the course of two years a large number of buildings stood on the land which had never before been occupied for any purpose except that of agriculture. The number of persons thus added to the town is estimated at 300, and the staid old town was not a little disturbed at this influx of unsought residents. It became necessary to build new roads and to build a new school-house for the younger children, the older ones being sent to the old school-house, which had never before been filled. The town had also to assist and care for many poor people, who, from sickness or lack of work were unable to support themselves. At the same time these people, although living in Sherborn are not a part of it, as their interests all centre in Framingham. An effort is now being made, by petition to the Legislature of 1890, to take from Sherborn this territory and another larger strip of land, amounting in all to 575 acres, and add it to the town of Framingham. It is doubtful if this transfer is accomplished on account of the large area of land mentioned in the petition; while if the triangle alone had been asked for, it might have been granted. A great amount of interest is felt in the subject and it is a topic of frequent discussion between the inhabitants of the town.

In the year 1883, Grange No. 110 of the Patrons of Husbandry was established in this town. This order is intended to advance the interests of farmers, and is well adapted to this community, where agriculture is the chief pursuit. It is emphatically a fraternal order, and both sexes are represented in its membership, which adds much to the interest of its meetings. These meetings are held twice a month and are devoted to discussions and readings on agricultural and literary subjects, interspersed with music and singing. The object in view is the improvement of its members in mental discipline and in social intercourse, and also the advancement of their business by the benefits of co operation. This Grange is in a flourishing condition, the number of its members having constantly increased from the beginning, until in February, 1890, it amounts to 128 persons. The first Master was Norman B. Douglas, a native of Vermont and a resident of this town since 1878, who has always taken a lively interest in its welfare. He was one of its original members and was one of the chief promoters of the plan to introduce the order here. He has also been actively interested in the order throughout the State, and has been chosen Master of the State Grange for the year 1890, a position of honor and responsibility. After a service of three years at the head of Sherborn Grange, he was succeeded as Master by George L. Whitney, a native of the town and a prominent and interested member, who was also chosen for three successive years to the post. In the year 1889 this chair was filled by Jonathan Eames, a life-long resident of Sherborn, and one of the original and active members, through whom the advantages and principles of the Grange were first introduced to our citizens. He was re-elected for 1890, and therefore remains at the head of the order in this town. The ladies of the Grange have an auxiliary association, devoted to a promotion of the material prosperity of the order, and they have contributed in no small degree to that object.

Sherborn is a border town in the county, and this Grange belongs to a district association called the Middlesex and Norfolk Union Grange, which embraces several towns in this vicinity. Monthly meetings are held and a special feeling of fellowship exists among its members, who frequently visit the meetings of other Granges than their own within the Union.

Sherborn is situated in the southern part of the county and about twenty-one miles southwest of Boston. It borders on Charles River, which separates it from the county of Norfolk. Until the year 1870 it had no railroad connection with other towns, the nearest station being at Natick, on the Albany Railroad, three miles distant, with which communication was had by stage. In that year the Mansfield and Framingham Railroad was completed and was opened for travel in February, to the great convenience of the citizens, who thus had easy connections with

other roads running in all directions. After a considerable time, in the year 1883, this road, together with the railroad from Mansfield to New Bedford, and that from South Framingham to Fitchburg, were purchased by the Old Colony Railroad Company and became its Northern Division, thus constituting a continuous line of road from New Bedford to Fitchburg, under one management. A new road is in contemplation by the Old Colony Company, which will probably connect Sherborn with some point on the Dedham Branch of its Providence Division and thus give an additional means of communication with Boston. A second track is about to be constructed on the old road, to accommodate the increasing business of this line. At New Bedford connection is made with steamboats for Martha's Vineyard and Nantucket and at Fall River with boats for New York City.

Sherborn is well supplied with weekly local newspapers, the *Sherborn Tribune* and *Sherborn Mirror* having a large circulation among its inhabitants for some years past. And before the establishment of these journals, newspapers from Natick and Framingham were sent to this town. The *Framingham Gazette* still has subscribers here.

In 1882 the proprietors of the *Natick Bulletin*, J. B. Fairbanks & Son, commenced the publication of an edition of their newspaper devoted in part to the interests of Sherborn and called the *Sherborn Mirror*. It has been continued to the present day and has a large circulation in this town. For a few years past it has been under the sole management of Mr. George C. Fairbanks.

In the year 1883 the *Sherborn Tribune* was established by Charles J. McPherson, of the *Framingham Tribune*, the first copy being issued on the 27th of October of that year. The present editor and proprietor, Mr. Charles F. Adams, of Sherborn, became connected with it as a correspondent in 1884, became associate editor in 1885, and finally purchased it in December, 1885. In 1887 the newspaper was transferred to the *Natick Citizen*, under which management it was issued until 1889, when Mr. Adams again became its proprietor. It has a large list of subscribers in the town.

The 10th day of October, 1888, witnessed a highly interesting and noteworthy celebration. It was the fiftieth anniversary of the ordination of Dr. Edmund Dowse as pastor of the Pilgrim Church, and the arrangements made for the day were most successfully carried out. Nearly all the inhabitants of the town were interested in the event and all circumstances conspired to render the celebration one of the largest and most enjoyable that have ever occurred here. It was indeed a jubilee. The day was ushered in by the ringing of bells and the booming of cannon. Before ten o'clock, the hour for the opening exercises, people were arriving from all quarters, both by railroad train and by private carriage. Not only the residents of the town came, but former parishioners, friends and

brother clergymen from surrounding towns as well as some from distant towns; members of the Senate of Massachusetts, to which Dr. Dowse formerly belonged and of which he is still chaplain; and also the chaplain and some members of the House of Representatives. Rev. Daniel S. Talcott, professor in the Theological Seminary at Bangor, Maine, the predecessor of Dr. Dowse in this pastorate, was here, and gave an address which carried his hearers back more than fifty years. He was present at the ordination half a century since and some laymen were also present on this day who attended the original ceremonies.

Skilled performers furnished the music, and after the opening exercises a cordial address of welcome was delivered by Rev. Amos H. Coolidge, of Leicester, Mass., a native of this town who grew up under the teachings of Dr. Dowse. An address by the pastor appropriately followed, and then the chief address of the day, by Dr. Geo. M. Adams, of Holliston, representing the association of clergymen of this district. Original hymns, which were sung by the congregation, were written for the occasion by Rev. George G. Phipps, of Wellesly, and Rev. William M. Thayer, of Franklin.

The afternoon session was devoted chiefly to short addresses after the delivery of a regular address by Dr. E. B. Webb, of Boston. Many genial remarks were made by clergymen, Senators and old friends, and great enthusiasm and good feeling prevailed. A pastorate of fifty years is so rarely known, in this century at least, that the occasion was one of great rejoicing among the numerous friends of Dr. Dowse. There is but one other clergyman in this Commonwealth whose service approaches that period of time.

A reception after the close of the services and a social reunion in the town-hall in the evening, pleasantly crowned and completed the exercises of the day—a day which will fill a prominent place in the annals of the town.

Mr. Dowse is still in active service in his fifty-third year as pastor and in his eleventh consecutive year as chaplain of the Senate.

Farm Lake is a beautiful sheet of water, with clean, gravelly shores, in the eastern part of the town. From the earliest times it has been a favorite resort for amateur fishermen of this and neighboring towns. An ancient inhabitant of that portion of the town about the year 1700 was so much devoted to fishing that the town jestingly voted to grant him the privilege of fishing there constantly. Within a few years this lake has been stocked with black bass. Its area is about 200 acres. From the time when the custom of holding picnic-parties was first introduced, this has been a chosen resort for people of this town and of many other towns in this vicinity. Pleasure boats have been placed upon the lake, and thus the pleasures of sailing and rowing are added to those of the

groves and fields which exist upon its shores. Steam launches have also been added to the fleet within a few years. It has become an ideal place for a picnic, and the number of such parties has greatly increased since the year 1880. There are now three groves on its banks which are open to the public during the warm season of the year. The lake is fed entirely by springs, and has an outlet which preserves its waters pure in the hottest weather. An excellent quality of ice is obtained here in winter.

Little Pond, covering about forty acres, is situated about one mile north of Farm Lake. It is used only for the purpose of fishing.

CAPT. AMARIAH LELAND was born in Eden, Maine, followed the seas, and was master of a ship for many years and continued in that business after his removal to Sherborn. He finally retired from that service and settled here, where his ancestors resided until 1710. He bought a farm which borders on Farm Lake, and his grove has become a great resort for picnic parties.

He has been a selectman of the town since 1886.

Sherborn is one of the towns which reach the southern border of the county, and is separated by the Charles River from Medfield and Dover in Norfolk County. Its population in 1890 is about 1400. In addition to agriculture and fruit culture, the chief industries are the manufacture of shoes, of willow goods, and of cider and vinegar. One of the latter manufactories is not surpassed in size and in the magnitude of its business by any similar establishment in the country. A considerable business is done in procuring ice from Farm Lake and from some of the ponds in the township. A saw-mill in the southwestern section of the town annually converts a large number of logs into lumber.

A pamphlet "History of Sherborn," pp. 80, was written by William Biglow, of Natick, and published at Milford in 1830. In 1856 a "History of Sherborn and Holliston," with genealogies, was issued by Rev. Abner Morse and printed in Boston. In 1875 there was printed at Natick, in one pamphlet, the address of Hon. George B. Loring given at the bi-centennial celebration, and also an historical sermon delivered by Dr. Edmund Dowse about the same time.

BIOGRAPHICAL.

ALBERT H. BLANCHARD, M.D.

Albert H. Blanchard, M.D., was born in Boston June 25, 1828, the son of John W. and Sarah A. Blanchard. He was educated in Boston schools, received a Franklin medal at the Hawes School, in South Boston, in 1841, and entered the English High School the same year. From 1845 to 1848 he resided in Portsmouth, N. H., and while there he learned the art of pharmacy, pursued his academical studies and

commenced those relating to medicine. Returning to Boston in 1848, he continued his studies in the Boylston Medical School, and attended lectures at Harvard Medical College for two years. Although ready to graduate in 1850, he postponed that ceremony on account of his election as one of the house physicians to the Massachusetts General Hospital, where graduates were not then received. After a profitable and interesting sojourn of a year at that institution, he received his diploma at the commencement of 1851, having thus been engaged for six years in the preparatory studies of a physician.

Immediately after the death of Dr. Oliver Everett, in 1851, he was invited to settle in Sherborn as the physician of the town, and has remained to the present time, excepting two years during the Civil War. In 1854 and 1855 he transcribed the ancient records of the town, an act which had been authorized by the Legislature not long before, and he found the earliest book, a mere pamphlet, greatly worn and difficult to decipher. A similar work is greatly needed in many other old towns of our Commonwealth.

In August, 1861, Dr. Blanchard was appointed surgeon of the Forty-first Massachusetts Volunteer Infantry, after an examination by the State Board of Surgeons, and was mustered into the United States service September 4th. The regiment formed a part of the "Banks expedition" to Louisiana, where they arrived early in December, 1862. June 17, 1863, the regiment was converted into cavalry, and is more generally known as the Third Massachusetts Cavalry.

The duty was onerous and severe and the climate malarious, so that Dr. Blanchard became weakened by sickness and was finally obliged to resign his commission. He was honorably discharged from the service February 29, 1864.

After a long sickness in the spring of 1864, he recovered sufficiently to perform some temporary service in the army in Virginia, and in August, 1864, returned to Sherborn and resumed practice. For thirty years he has also served as a member of the School Committee and much of that time as secretary of the board. He has been interested in the history of this ancient town and has given much time to the study of its settlement, its progress, and its people. He has also written a number of historical articles concerning the town.

He was married at Dorchester, May 18, 1852, to Eunice Alden Hooper, of that town.

FRANKLIN GROUT.

Franklin Grout is a native of Sherborn and has always resided there. He was born in 1839, a son of Nathan and Laura Ann (Fay) Grout, a grandson of Nathan and great-grandson of John Grout. The latter removed from Sudbury to Sherborn in 1760 and settled here. The grandfather, Nathan, and his brothers, Elias and Silas, were all soldiers in the War

of the Revolution, serving from three to five years each.

The subject of this sketch was educated in our common schools and afterwards attended for a considerable time the well-known English and Classical School of Messrs. Allen, in West Newton. A good training and a solid groundwork of education were thus secured.

Mr. Grout inherited a large farm, which he has conducted with skill and success. He has taken a prominent part in town affairs for many years, having served continuously as a trustee of the Town Library and of the Sawin Academy and Dowse High School, and also as a member of the Board of Assessors for several terms, most of the time as chairman. In the year 1884 he was chairman of the selectmen and would have been re-elected a member of that board had he not been chosen town clerk and treasurer in 1885. He also received a commission as justice of the peace during the same year. He has continued to fill the latter offices to the present time, in 1890, and is highly esteemed as a correct and careful guardian of these important interests of the town.

He was married, in 1864, to Elizabeth Leland, of Sherborn.

CHARLES A. CLARK.

Charles A. Clark belongs to an old Sherborn family. The first ancestor of which we have knowledge was Jonas Clark, who settled early in Cambridge. His son Samuel removed to Concord in 1686 and died there in 1730. Arthur, the fourth son of Samuel, came from Concord to Sherborn between the years 1715 and 1718, married here, settled near Charles River and founded the Clark family of this town. His oldest son, Samuel, was the great-grandfather of the subject of this article. Three sons of Samuel took part in the Revolutionary struggle, one of whom, William, is thus described by Morse in his genealogy of Sherborn: "William, long a leading and honored citizen of Sherborn, early imbibed the spirit of '76; entered the army in the commencement of the conflict, served five years as a soldier, was in the battle of Bunker Hill and at the surrender of Burgoyne; became a member of the church, served her as deacon and the town as selectman; kept a store and tavern, was much employed in settling estates, and sustained through a long life a high character for responsibility, soundness of judgment and integrity. He married Elizabeth Whitney June 24, 1784, daughter of Hon. Daniel Whitney," one of the foremost men of his time in this State. In 1788 he purchased the estate of Captain Amos Coolidge on "The Plain," where the store above mentioned was commenced in the year 1800, and has been kept continuously on or near the same site by Alpheus, the son of William, and by Charles A., his grandson. Alpheus Clark, Esq., was also prominent in the service of the town, having been town clerk and treasurer for seventeen years, se-

lectman for six years and Representative to the General Court for four years. He was also a captain in the State Militia. He married Nancy Leland, of Sherborn, in 1819.

Charles A. Clark was born in the old homestead July 4, 1829, and has continued to reside on the same spot, although the original house, which had become very old, was replaced by a new and larger one in 1876. A large farm is attached and has been increased by several additions to the original purchase of Deacon William Clark. It has been cultivated and improved by the three generations in addition to their business of store-keeping.

In the year 1888 Mr. Clark purchased of Hawes Brothers the stock and trade of the general store in the Central village, which had been carried on for many years by his brother, George Clark. Since that time he has conducted business at both places. Like his ancestors, he has performed duty as an officer of the town, having served as selectman six years and assessor five years.

On the 1st day of January, 1852, he was married to Martha A. Paul, of Sherborn.

CHAPTER LIV.

CARLISLE.

BY SIDNEY A. BULL.

CARLISLE has had an existence peculiarly its own in certain respects, inasmuch as it existed as the District of Carlisle for a little less than two and a half years, then ceased to exist for a period of nearly twenty-four years, when, by an act of the General Court, it was allowed to exist again as a district, which state of things continued for a period of nearly twenty-five years, when it was incorporated by an act of the Legislature, with the full powers, authority and responsibilities of a town, which prerogative it has been allowed to enjoy to the present date, and doubtless will go down the ages with at least all the prestige with which the struggles and triumphs of the past have endowed it.

The original corporation, known as the District of Carlisle, was taken wholly from the territory included within the limits of the town of Concord, and included in part a considerable portion of settled territory known as the Bloods' Farms, which tract of land came into the possession of the brothers John and Robert Blood, partly by purchase as early as 1650, and partly probably by descent from their father.

Robert also possessed other extensive contiguous territory in right of his wife, who was the daughter of Major Simon Willard, to whom the General Court of the Colony had granted lands as a reward for his eminent public services.

After the incorporation of Billerica, in 1655, the Bloods, whose farms adjoined the new plantation, though not within its limits, appear to have been considered as belonging to that township.

During King Philip's War the Bloods sought refuge in Concord, and were there taxed as inhabitants; but on their petition the General Court, on the 9th of May, 1678, ordered these taxes to be repaid them without charge to the petitioners.

This appears to have been the beginning of a controversy between them and the town of Concord, which resulted, on the 17th of March, 1685, in an agreement between the parties by which the "Farms," which had heretofore existed as a "peculiar," were annexed to Concord, upon conditions by which Robert Blood, Sr., his heirs and assigns, were exempted from obligation to serve in any town office, and from all rates excepting such as should be laid for repairing or building the meeting-house.

By this agreement also the "waste lands" of the Bloods were to be exempted from taxation, highways were to be laid out to and from the town for their accommodation, and they were to have "meet places assigned to them in the meeting-house" in Concord.

No express reasons for granting the exemptions claimed by the inhabitants of the territory above named have been found in the State archives, but the settlers there occupied an outpost on the frontier, and were remote from the meeting-house in Concord Village, from which they were separated by the Concord River, and to which they had access only over roads often submerged, or otherwise impassable. The conjecture is not unfounded that these circumstances furnished sufficient inducement for consenting to their enjoyment of these special privileges.

As early as December 18, 1732, Jonathan Blood, John Parlin and twenty-six others, inhabitants of the northerly part of Concord, subscribed to an agreement to support meetings for public worship at the house of Joseph Adams; the whole amount thus subscribed was £18 4s.

The subscribers appear also to have organized as a society, to have chosen a clerk, and to have held meetings for prudential affairs, sometimes at the house of David Parlin.

At a meeting of the inhabitants of Concord held May 21, 1733, a vote was passed pursuant to an article in the warrant upon the questions, "whether the town would make allowance to sundry inhabitants of the north part of Concord to support preaching amongst them in the winter season, or would sett off the said inhabitants to be a separate precinct," both of which were decided in the negative.

The preceding petitions presented to the town were doubtless the result of the meetings for public worship held at the house of Joseph Adams, and also of the advisory meetings held at the house of David Parlin and elsewhere.

Although their requests had not been granted, an

agitation had been started which gained in favor and strength, as year by year it was considered, and periodically brought before the minds of the people.

Another way, however, was open by means of which the petitioners might obtain relief.

The following year, during the fourth session of the Assembly, a petition of Benjamin Stone and twenty-five others of Concord, doubtless representing the same body which had organized for public worship in the winter of 1732, and had unsuccessfully petitioned the town for aid in the spring of 1733, setting forth the distance they are at from the place of public worship in said town, and praying that they may be erected into a separate precinct by the bounds stated in the petition, was read, and notice thereof was ordered to be served on the town of Concord, returnable on the first Tuesday of the next May session.

This petition came up for consideration June 4, 1734, together with a certificate of twenty-eight other inhabitants of the *proposed precinct*, showing their unwillingness to be a part of the precinct. Also in the mean time the town of Concord had chosen a committee of three to be present at the hearing and give reasons to the General Court why the prayer of the petitioners should not be granted. After consideration the preponderance of opposition prevailed, and the petition was ordered to be dismissed.

The petitioners had now been twice refused their request, each time by a different tribunal; but at a town-meeting held by adjournment March 7, 1737-38, and called, among other things, "to see if the town will dismiss Zechariah Blood and others, petitioners with him, from Concord, in order to join with part of Chelmsford and part of Billerica to make a separate township," and to hear the petition of Eleazer Brown and others on the northwardly side of Concord River, "that all the inhabitants of the town, on the north and northerly side of the North River, so called, may be set off a separate township."

The inhabitants refused to grant the latter petition by a vote of seventy-six to twenty-six, and on the former petition, "the town saw cause not to act at that time, for that a greater number than lived within the bounds asked for appeared against the wanting the said petition than appeared for it."

Two years later, on the 3d of March, 1739-40, at a meeting of the inhabitants of Concord, for which the twelfth article in the warrant was "to hear the request of Jonathan Blood and others, of the northwardly part of the town who desire to be set off to be a separate precinct, according to bounds set forth in their petition," the town refused to grant the prayer of the petitioners.

The next attempt that has been discovered to have any portion of the territory north of the Concord River set off as a separate town or precinct, was on the 5th of May, 1746, when the warrant for the next town-meeting contained an article for hearing and

considering the petition of John Hartwell and others, then to be laid before the town for that purpose.

The meeting at which this petition was considered was held May 20th by adjournment from the 12th, and at the adjournment the petition was referred to the next town-meeting.

The grounds for separation, alleged by these petitioners, were "in order to their more convenient coming to ye publik worship of God, from which they are many times many of them hindered by ye Difficulty of passing ye river in times of flud and by ye great Distance of their abood from ye place where ye publike worship of God is now upheld."

On the 3d of November of the same year the warrant for the town-meeting to be held on the 17th contained an article for considering the petition of John Hartwell and others, which it is probable was the original petition, and it was again referred to the next town-meeting.

The record of the next town-meeting, held by adjournment on the 3d of March, 1747, contains no reference to this petition.

This and other similar applications were ineffectual until the year 1753, when, having failed to get a vote of the inhabitants of Concord consenting to their separation, James Chandler and forty-six other inhabitants of this territory (not, however, including Blood's Farms) appealed to the General Court in the following petition, which was read in the House September 13, 1753, and notice thereon ordered to be served on the town of Concord, returnable "on the second Wednesday of the next sitting of the Court:—"

"To His Excellency William Shirley, Esq., Capt.-General and Governor-in-Chief in and over his Majesty's Province of the Massachusetts Bay in New England, and to the Hon^{ble} His Majesty's Council and House of Representatives in General Court Assembled. The Petition of the Inhabitants of the Northerly Part of the Town of Concord Humbly Sheweth,

"That whereas your Petitioners have for many years Past attended with our Families on ye Publick worship of God at the old Parish in said Concord with many and great Inconveniencies by Living many of us so Remote therefrom, there is a great Number of aged, and youngerly Persons are very Frequently Necessarily Detained from the Publick worship, They not being able to Travel so far in the heat of Summer without Exposing their health, and in ye winter season the Days Being so Short they Cannot without a great Deal of Pains and Trouble get to ye Place of Publick worship in season and in case they tarry till the times of Exercise is over they Cannot Return to their Places of abode till Sometime in the Evening, which greatly Endangers them to Suffering with the Cold, and Particularly in times of floods there is great Numbers (of all Sex) are obliged to Tarry at home on ye Sabbath, altho there is good bridges over the Rivers, but Cannot Come at them, all which Renders your Petitioners' Case very Inconvenient.

"Your Petitioners therefore Humbly Pray your Excellency and Honours would take our Case into your wise Consideration and Grant unto us a District under such Restrictions and Regulations as your Excellency & Honours, in your great wisdom, Shall Think Fit.

"Including all within the Bounds hereafter mentioned in ye Northerly Part of sd Concord,

"Beginning at ye Corner of the Town, Near Joseph Parlin's, then with Axtom Line to where it Crosse's Neshobey Brook (so Called), then Down Said Brook to the River, then with Said River till it Comes to Blood's Farm (so Called), then Bounding on sd Blood's Farm till it Comes to Billrace Line, then with Billrace Line to the Corner first mentioned, and your Petitioners Further beg Leave to Inform your Excellency and Hon^{rs} that we Have Petitioned the Town of Concord to

vote us off as a District; and they haive had a Town-meeting for that Purpose, but Refused so to Do; and we, as In Duty Bound, Shall Ever Pray, &c."

Before action was taken on the above petition the inhabitants of the town of Concord passed a vote agreeing "that the inhabitants of the Northerly part of the Town Shall and May have all the Liberty that the Town can Grant them, to Go off as a Separate District at any time when they shall Agree or Choose so to do by the following bounds:

"Vizt—to begin at Concord River and Run streight to Acton Line so as to Run across the Road Leading to Blood's farm and across Groton Road (so-called) at Each of them one Mile and three Quarters from the Meeting-House upon a streight line and then to be Bounded on Acton and Billerica and on Concord River to where it began."

Early in the next session Jonathan Blood and twenty-seven others who were desirous of being included in the territory to be set off, and who thought, with many others who lived in the northerly part of said town, that the part voted to be set off was too small, sent in a petition to the General Court, asking that the grant of the town may be confirmed with a small addition, according to bounds given, which are nearly identical with the bounds included in the act which was finally passed, making a district of the northerly part of Concord by the name of Carlisle, and which will appear later on, and which would include Blood's Farm (so called).

In the mean time Jonathan Brooks and twenty others, who lived within the territory described in Chandler's petition, filed their objection to being "layed off," in any shape, according to that request.

A committee chosen by the town of Concord for the purpose also appeared and presented their objections to the Chandler petition, some of which were as follows:

"That while the petitioners Pray for a part of said Town to be sett off as a District Containing in all Six thousand Nine Hundred and Thirty acres, on which are upwards of Eighty Families and is in the most valuable part of the town, being the most fertile and Profitable land, and Contains all, or almost all the Lands within the first parish in Said Town, Capable of Making any New or additional Settlements. Whereas much of the Remaining part is Barren and unprofitable pine Land, which never can be improved to any advantage. That if their petition should be Granted, the Bounds mentioned in their petition which Comes within one Hundred and ninety-four Rods of the meeting House, it will leave the first Parish in bad situation & Circumstances, and will make the Burden very heavy on a few Persons, we would also Observe that the Injustice in Passing the River mentioned in their Petition is without Foundation, the Town Having lately been at a Great Expence in Raising the Causey and Building a wide wall for people to travel over on foot when a flood Covers the Causey. And said Petitioners in their Petition have Left out and made no mention of Blood's Farm (so called), which adjoins to the northerly Part of Concord and Contains about One Thousand Eight Hundred and fifty acres, with about fifteen families thereon, and which is Accounted a part of Concord and live the most Remote from the Publick worship of any belonging to the town and are obliged to travell through that Part Petitioned for to be Sett off in Order to Get to the Place of Publick worship."

For these and various other reasons which seem to be plausible and just, the said town of Concord protested against the latter-named petition and urged the

consistency of the bounds as previously noted, which was the vote of the town, and which included in the aggregate about six thousand and six hundred acres of land, and on which there were living at the time about sixty families, "and Room Convenient for a Considerable many additional settlements. This was thought by the Inhabitants of the Town at their said meeting to be as much as they Could Spare without manifest Injustice to the Remaining Part, and to be as Large as the Petitioners and Others Concerned Could Reasonably desire and what was thought to be Sutticient to satisfie them although Something less than they asked for," but in referring to the Jonathan Blood petition, which it is claimed would take in about five families more than the town voted to them, no objection would be made.

On the 13th of December, 1753, the above answer, together with the petition to which it relates, was referred to the same committee to which had been referred the above petition of Blood and others.

Another petition, signed by John Hartwell and forty-two others (all but twelve of whom were signers to the above petition of James Chandler and others), which had been read in the House on the 7th of December, was referred to the same committee.

The petition of John Hartwell and others was antagonistic to the petition of Jonathan Blood and others, which they pray the General Court not to grant, for the reasons, as they allege, "your Petitioner, humbly Conceive is for No other end But to Defeat your Petitioners in their Proceedings in that affairs and Likewise we think that what they Petition for—is no ways sufficient to Carry on Such a work."

On the 14th of December the joint committee submitted a written report, dated the 13th, in which they stated that they found "such an uneasiness and disagreement amongst the parties, that they reported it as their opinion that the petitions and answers be referred to the next sitting of this Court, for further consideration unless the parties should before that time accommodate their difficulties among themselves." This report was accepted, and the petitions, etc., were referred accordingly.

During the following winter and spring, until late in March, the joint committee appear to have had this business still in charge, endeavoring to bring about an agreement between the petitioners and remonstrants, and in the State archives there are preserved six different petitions and reports addressed to this committee during this period.

On the second day of the fourth session (March 28, 1754) the foregoing papers were read again in Council and referred to the same committee, on which were substituted two new names, because of the absence of two of the original committee, with orders to "hear the parties and report what they judge proper for this Court to do thereon as soon as may be."

The committee as thus changed completed their report on the 10th of April, and were of the "Opinion

that the Prayer of the s^d Petition of Jon^s Blood & others the Inhabitants of the Northly part of Concord be so far granted as that they be sett off and made a separate District," by certain bounds named in their report, which are nearly identical with those named in the petition of said Jonathan Blood, and included Blood's Farm, so called.

On the 11th this report was accepted and an order was passed by both branches in concurrence, "that the petitioners have liberty to bring in a bill" accordingly. On the 12th the following bill, which made the First District of Carlisle, was read twice and passed to be engrossed in Council, and sent down to the House for concurrence, where it had its first, and second reading the same day, and on the 13th was passed in concurrence, to be engrossed with two amendments which were concurred in by the Council.

On the 16th it was passed to be enacted, and was consented to by William Shirley, Governor, April 19, 1754.

The following is the act as finally passed:

"An act for dividing the town of Concord and making a district of the northerly part thereof by the name of Carlisle.

"Whereas, the inhabitants of the northerly part of the town of Concord, by reason of their being remote from the place of the publick worship of God, have petitioned this court to be set off a separate district.

"Be it enacted by the Governour, Council and House of Representatives [Sect. 1] that the northerly part of the town of Concord within the following bounds, viz., beginning at Concord River, at the mouth of Ralph's Brook, so called, and running westerly to a white-oak tree, on or by the highway on the easterly side of Hunt's Hill, otherwise called Gravel Hill; thence still westerly to a heap of stones by the wall in the highway, about four rods northerly of Daniel Cole's barn, and so extending on a straight line to a way a little westerly of Richard Temple's house, and then running northerly, by said way which leads toward Acton Line, till it comes to Benjamin Temple's land; thence running to Acton line, so as to take into the new district the said Benjamin Temple's land, and from thence, bounded on Acton and Billerica, untill it comes to Concord River, taking in Blood's Farm, so called, and then on Concord River to where the line first began, be and hereby is set off from the said town of Concord, and erected into a separate district by the name of Carlisle; and that the inhabitants thereof do the duties that are required, and be vested with all the powers, privileges and immunities which the inhabitants of any town within this province do, or by law ought to, enjoy, excepting only the privilege of choosing a representative to represent them in the great and general court, choosing of whom the inhabitants of said district shall join with the inhabitants of the town of Concord, as they have heretofore done, and also in paying said representative; and that the town of Concord, as often as they shall call a meeting for the choice of a representative, shall give seasonable notice to the clerk of said district for the time being of the time and place of said meeting, to the end that the said district may join them therein; and the clerk of said district shall set up, in some publick place in said district, a notification thereof accordingly, *provided, nevertheless*, the said district shall pay their proportionable part of all such town, county, parish and province charges as are already assessed, in like manner as though this act had never been made.

"And be it further enacted,

"[Sect 2] That the inhabitants of the said district shall, from time to time, forever hereafter, pay their proportionable part of the charge of keeping in good repair the great North Bridge, so called, over Concord River; and that James Minot, Esq., is hereby empowered to issue his warrant, directed to some principal inhabitant in said district, requiring him to warn the inhabitants of said district, qualified by law to vote in town affairs, to meet at such time and place as shall be therein set forth, to chuse all such officers as shall be necessary to manage the affairs of said district."

Now the petitioners have succeeded in getting their request granted, and a vexatious problem of

over twenty years' standing has been finally, and we may suppose amicably, settled. The district of Carlisle is established, as far as action by the General Court is concerned, and a glance over the proceedings of the past would justify the assertion in consideration of the number of petitions and remonstrances presented to this body, the multiplicity of which tended to show the great diversity of opinion in the minds of the people living within the bounds of the district, that the question was one requiring discretion and wisdom, as well as patience, to be exercised in its adjustment.

The warrant mentioned in the foregoing act was granted and read as follows:

"These are, therefore, in his majestyes Name to Require mr. John Green, an inhabitant in s^d District, to warn all the Inhabitants of the said District, qualified by Law to vote in Town affairs, to meet at the Dwelling House of mr. Joseph Adams in s^d District, on Friday, the third Day of may next, at one of the Clock in the after noon, in order to transact the affairs above mentioned, &c.

"Here of Full not. Given under my hand and Seal, at Concord, April ye 26, and in Twenty seventh year of his majestys Reign, Anno Domini 1754.

"JAMES MINOT, Just. of Peace."

The warrant as returned at the time and place of meeting bears the following endorsement:

"Middlesex SS., May 26th, 1754. In observance of this warrant I have warned and Given Notice to all the ratable inhabtance Liveing in Carlisle to meett at the time and Place within mentioned.

"JOHN GREEN."

The house of Joseph Adams, where this first town-meeting was held, it will be noted, was the same place at which Jonathan Blood, John Parlin and twenty-six others, inhabitants of the northerly part of Concord, had subscribed to an agreement to support meetings for public worship, as early as 1732, and is still in existence, although having been somewhat remodeled within a few years, being the same premises lately owned by the Amos Melvin heirs, and more recently conveyed to Mr. Willard White, and is located in Concord, a few rods beyond the present limits of Carlisle, on the main road from Carlisle to Concord.

The meeting organized by the choice of Jonathan Puffer for moderator, and elected the following officers for the ensuing year, viz.: District Clerk, John Hartwell; Selectmen, John Hartwell, John Green, Joseph Adams, Jonathan Puffer and William Fletcher; Constables, Ephraim Farrar and John Blood, Jr.; Treasurer, Deacon Ephraim Brown; Tithingman, Daniel Raymond; Surveyors of Highways, Thomas Hodgman and Ephraim Melvin; Fence-viewers, Josiah Hodgman, and David Melvin; Hog-reeves, John Hodgman, Samuel Loughton, Jr., Benjamin Ball and Jonathan Palmer; Deer Officers, Jonathan Farrar and Robert Melvin; Sealer of Leather, Thomas Davis.

This was the first of a series of twenty district meetings which occurred consecutively in a little less than two and a-half years, all of which were warned by the constable serving notice personally, and were held at private residences in various parts of the dis-

trict, wherever convenience and justice to the voters, as regards distance to be traveled, should from time to time indicate.

The second meeting was held at the house of Mr. John Green, in the easterly part of the district, Tuesday, May 21st, eighteen days after the former meeting, and the first article in the warrant was as follows:

"To see what method they will comin to to Perfix a Place to set a meeting House for the Publick worship of God amongs us, etc." The above article may be considered as indicative of what appeared in most of the succeeding warrants; for of the twenty meetings referred to above, the warrants for seventeen of the number called for action in some shape relative to locating a place for building a house for public worship.

The prominent idea appeared to be to locate the spot as near the centre of the district as possible, and several surveys of the district were made to determine this location.

Various places were selected by as many different parties as being proper places for erecting the building, and district meetings were called for the consideration of each one of these locations, the more prominent of which were as follows: "The Easterly corner of Dea. Ephraim Brown's land, near Capt. Abijah Brown's paster, Lieut. Jonathan Buttrick's plain and Poplar Hill." On the two latter-named locations the district voted to build, and went so far as to prepare a part of the timber and have it teamed to the location on Poplar Hill, which location is situated on an elevation at the right of what is known at the present day as the old Concord road, and near what was formerly known as the Estabrook place, but which, at the present time, is used only for the purpose of pasturing cattle, and is only distinguished by the ruins of what was formerly the cellar, no building having covered the same for many years past. This timber was never used, but, tradition informs us, was allowed to lie on the spot until it decayed.

Since the district had thus far been unsuccessful within themselves in deciding upon a satisfactory location for building the meeting-house, it was voted at a district meeting held Wednesday, October 30, 1754, at the house of William Fletcher, "that they will chuse a commeetee out of Town to view the District and perfix a Place for us to build a meeting-House for the Publick worship of God amongs us." This committee consisted of three members, as follows: Lieutenant John Varnum, of Draut; Lieutenant Jonas Prescott, of Westford, and Lieutenant Samuel Dakin, of Sudbury; said committee came on to the ground and performed their duty, for which they were paid the aggregate amount of two pounds and eighteen shillings.

At the very next district meeting, held at the house of Mr. James Russell on Wednesday, January 1, 1755, the warrant contained but one article, which was as follows:

"To see whether the District will, by ther vote, Exsept of the Place to build a meeting-House for the Publick worship of God amongs us, which the committee chosen by us has Perfix for that end," etc., which, when put to vote, was passed in the negative.

Next occurred the second annual district meeting, held March 3, 1755, at which the following officers were elected for the ensuing year: District Clerk, John Hartwell; Selectmen, John Hartwell, Jonathan Puffer and John Green; Constables, Timothy Wilkins and Daniel Raymond; Treasurer, Deacon Ephraim Brown; Surveyors of Highways, Simon Blood and Simon Hartwell; Fence-viewers, John Barrett and Jacob Farrar; Tithingman, Joseph Adams; Hog-reeves, Abraham Temple, John Parlin, Jr., Benjamin Hodgman and Ezra Blood; Sealer of Leather, Thomas Davis.

After holding several more district meetings and trying in vain to settle the disputed question among themselves of locating a place for a meeting-house, a meeting was finally called at the house of John Hartwell for Tuesday, July 29, 1755, and in the warrant for said meeting the third article to be acted upon was as follows:

"To See if the District will chouse a commeetee to Petition the great and General Court to send up a commeetee to Perfix a Place for us to build a meeting House on, etc."

Action on the above article resulted in choosing a committee of five residents of the district and instructing them to petition the General Court as above. If this petition was ever presented, the town records do not show that the General Court ever sent the committee petitioned for, and the records of the next district meeting—held Tuesday, January 27, 1756, nearly six months later—would indicate that nothing had been done in the mean time, for on this date the district voted that "they will build a meeting-House for the Publick worship amongs us, and that the district will Perfix a Place for to build a meeting-House on," which latter duty was referred to the next meeting, which was held February 3, 1756, at the "house of Jonathan Hodgman, which was Capt. Eleazer Melvin's." Here it was voted that "the District will Build a meeting-House on Capt. Jonathan Buttrick's Plain, about ten Rods southerly from a stake set up By Simon Davis and others." A committee of five were chosen to attend to the building, and were "Directed to Provid timber for a House about as Large as Stow meeting-House is."

The next district meeting was held at the house of Ephraim Melvin, Monday, March 1, 1756; the first article in the warrant to be acted on was: "To Chuse Necessary District officers For the year ensuing." Jonathan Puffer, whom it will be remembered was moderator at the first district meeting, was elected to the same office at this their third and last annual meeting for choice of officers. The following is the list of officers elected: District Clerk, Benjamin Brown; Selectmen,

Benjamin Brown, William Fletcher and John Green; Constables, John Melvin and John Green; District Treasurer, Deacon Ephraim Brown; Surveyors of Highways, Jacob Farrar and Thomas Brown, Jr.; Fence-viewers, Oliver Farrar and Jonathan Harris; Tithingmen, Samuel Heald and John Barrett; Hogs-reeves, John Parlin, John Loughton, Ephraim Smith and Jonathan Buttrick; Sailer of Leather, Thomas Davis; Deer-reef, Jonathan Farrar.

At this meeting it was voted to raise the sum of fifty pounds, lawful money, toward defraying the cost of building a house for public worship; also a committee of three were chosen to purchase two acres of land of Captain Jonathan Buttrick to build a meeting-house on. Whether this land was purchased or not does not appear, but another district meeting was held at the house of Thomas Davis, inn-holder, Tuesday, April 6th, following, at which the following vote was passed, viz.:

"Voted on the Third Article and chose Major John Jones, Esq., of Hopkinton, Colonel William Lawrence, Esq., of Groton, and Major Ephraim Curtis, Esq., of Sudbury, a Committee to view All Circumstances of the District and Prefix a place for Setting up a house for the Publick worship." Also a committee of four residents of the district were chosen to entertain, instruct and assist the latter-named committee.

The committee, having completed their undertaking, made a report to the district, which was accepted at a meeting held at the house of Thomas Davis, inn-holder, Thursday, June 24, 1756. The report was as follows:

"CARLISLE, June 2, 1756.

"Pursuant to a vote of the District of Carlisle of the 28th of April last, and at the Request of a Committee duly appointed by the sd District of Carlisle, we, the subscribers, have met at sd District and viewed the whole of sd District in order to find out the most Convenient Place to Put a House for the Publick worship of God, And to consider all the circumstances of said District, which we have Done and heard all Parties concerned and Duly Considered their Pleas and allegations with the circumstances, And are of opinion that the most convenient Place to Set a House for the Publick worship of God in said District is South 41 Degrees West twenty six poles to a Black oak free from a heap of stones on a Hill Called Poplar Hill and From the Centre of Angles which is our Judgement,—All which we Humbly Submit."

"JOHN JONES

WILLIAM LAWRENCE,

EPHRAIM CURTIS,

} Committee "

At the same meeting it was "voted and agreed to Purchase two acres of Land (in a convenient form) at the Place Prefixed for Setting up a House for the Public Worship." And a committee of three were chosen to carry out the provisions of said vote.

While a sufficient number of the inhabitants of the district favored the plan as set forth above, to vote its acceptance, a feeling of dissatisfaction and discouragement seems to have pervaded others, for a petition bearing date the same as that of the meeting last called was presented to the selectmen, and by them disregarded, which resulted in its being finally placed in the hands of a justice of the peace, who

caused action by the district to be taken upon it. The petition was as follows:

"To the Selectmen of the District of Carlisle, Gents

"We the Subscribers being sensible of the Great Difficulties we Labour under and the Great Hardships we are unavoidably Exposed to if we are oblig'd under Such Circumstances as we are in at Present to Build a meeting-House & Settle a minister & Pay for highways that will be Necessary to accommodate the Inhabitants if we Proceed according to the Design of being Set off, the Situation of the District being Such that but a Small Part of the Inhabitants Can be much better accommodated to the Publick worship in any Place that has been Proposed than they are to the Town of Concord

"Therefore Gent^{le} We Desire that you would Call a meeting of the District as soon as Can or may be to see if the District will agree by their vote to Petition the General Court that sd District may be Set back to the Town of Concord with all our Former Privileges, and Chuse a Committee for that Purpose.

CARLISLE, June 24, 1756.

"EPHRAIM MELVIN,
DAVID WHITTAKER,
PHINEAS BLOOD,
ABRAHAM TEMPLE,
EPHRAIM WHITTAKER,

JONATHAN HARRIS,
JOHN LAUGHTON,
EPHRAIM SLOW,
SAMUEL LAUGHTON,
JONATHAN PUTTER,
SAMUEL BULLOCK, JR."

In response to the above petition, the following proceedings explain themselves:

"Middlesex, ss. To Mr. Ephraim Farrar, one of the Constables for the District of Carlisle in Said County greeting:

"Whereas Complaint hath been made to me, Thos Whiting Esq^{re}, one of his Majesties Justices of the Peace for Said County by Ephraim Melvin and others, Inhabitants of said District of Carlisle, that a meeting of said District is Necessary and that their Request thereof hath been Laid before the Selectmen for said District: Who unreasonably Refuse to Call a meeting of Said Inhabitants of Carlisle afores^d, which Refusal having been made appeal to me

"You are therefore hereby Required In his Majesties Name
SEAL } to give Notice to all the ratable Inhabitants of Said Carlisle
to meet at the Dwelling House of Mr. David Whittaker in Said Carlisle on Wednesday, the Fourteenth Day of July Entrant, at Four of the clock in the after Noon to Consider and act on the Following articles viz^t

"1 To Chuse a moderator For Said Meeting.

"2nd To See if the District will agree by their vote to Petition the great and General Court to be Laid back to the Town of Concord with all their Former Priviledges, & Chuse a Committee For that Purpose

"3rd And make Return of this warrant to the Clerk of said District on Some one of the selectmen for said District on or before the afore Said Fourteenth Day of July with your Doings therein here of Fail not as you will answer your Neglect at the Perel of the Law in that Case Provided. Given under my hand and Seal at Concord the Seventh Day of July in y^e 30th year of his majesties Reign Annee Domini—1756.

"Thos WHITING, Jst of Ps."

The meeting was held at the time and place named in the foregoing warrant. Jonathan Puffer was chosen moderator, and the action taken upon the second article, is recorded as follows:

"Voted, That They will Petition the great and General Court that the whole of the District of Carlisle be Returned Back to the Town of Concord with all their Former Priviledges. And, also, that None of the Inhabitants be Set off again into a Separate Town, District or Precinct, Excepting Such as Shall hereafter Sign a Petition to the great and General Court to be set off.

"Mr. William Fletcher enter^d his Decent against th above sd vote.

"Voted that Mess^{rs}. John Barrett, Jonathan Puffer and Dan^l Raymond be a Committee to Petition the

great and general Court For the Purposes above mentioned."

Two district meetings were successively called upon a special petition of John Hartwell and others, the first for Monday, July 26th, and the second for Monday, August 9, 1756, in the warrant for each of which the following article appeared, which seems at least to have been one of absorbing interest to a part of the inhabitants, viz., "To See if the District will agree to Dismiss the Committee that was Chosen at a meeting at Mr. David Whittaker's, for to Petition the great and General Court to be Laid back to the Town of Concord." On each occasion the consideration of the article resulted in the district passing a vote in the negative, and the committee chosen for the purpose presented their petition to the General Court, where it was first read and considered August 12, 1756, and notice thereof was ordered to be served on the town of Concord, returnable on the first Tuesday of the next October session.

Accordingly on the return day the inhabitants of Concord, having voted in the mean time (September 28th, at a general town-meeting, duly warned for the purpose), "first not to choose a committee to oppose this petition, and second that they would receive the district back agreeable to their petition," the following order was passed:—

"In Council, October 6, 1756, Read again, and it appearing that the Petrs had served the Town of Concord with a Copy of the Petn who have made no answer to the same, Therefore Ordered, that the Prayer of the Petition be granted and that the Inhabitants of the District of Carlisle, together with their Estates, be annexed to the Town of Concord, agreeable to their Petn, there to do duty and enjoy Priviledge accordingly.

"Sent down for Concurrence. THOS. CLARKE, *Depty. Secry.*

"In the House of Repes, Oct^r 6, 1756. Read and Concur'd. All^{rs}.

"ROLAND COTTON, *Cler Pro Tempore.*

"Consented to S. PHIPPS."

A difficulty was now encountered in the extinct district, which called again for the interposition of the Legislature. While the district no longer had an existence as a responsible corporation, there were a number of individual claims against it which demanded settlement, and in order that this might be accomplished, application was made to the Legislature, which resulted in an order being passed January 11, 1757, granting the assessors, constables and district treasurer, chosen at the last annual meeting for choice of district officers, to make all the necessary assessment collections and payments within the limits of the late district as would be required to make full settlement of all just claims against the same.

Thus the affairs were finally settled, and the mother town of Concord, like the parent of the "prodigal son," gladly received back to herself her penitent offspring.

The prime cause of the dissolution of the district, which, having existed as such for less than two and a half years, was what proved to be the perplexing duty of "Prefixing" a place on which to build a house for public worship. Meeting after meeting of the inhab-

itants of the district had been called, and plans of various kinds had been resorted to with the hope that unity of desire and action might be the result; but such was not the case, and a spirit of dissatisfaction and discouragement pervaded the district to such an extent that they longed for the peace and freedom of circumstances that they enjoyed previous to being set off as a distinct corporation.

During the existence of the district three sets of officers, as already noted, had been chosen, and sums of money raised for various purposes beside actual necessities—for instance, some for keeping school for "reading and writing," some to support preaching, which, although they had no building especially dedicated to the worship of God, yet they made provision and had public worship at the private residences of the inhabitants of the district as circumstances and ability allowed. During the existence of the extinct district the inhabitants appeared several times before the General Court with petitions, which were unsuccessful, and therefore have not been mentioned in their proper place. But after their being finally set back to the town of Concord, no attempt to disturb the settlement thereby effected occurred for a period of sixteen years; but application was made to the General Court at the first session in 1772-73, by certain inhabitants of Concord, Billerica, Chelmsford and Acton living near together, and far distant from the place of public worship in their respective towns, who prayed that they might be erected into a separate town or district according to certain bounds contained in the petition, and which would include in all about seventy-six families, and that a committee of the Legislature might be appointed at the expense of the petitioners to view their situation and circumstances, and render their decision in regard to the expediency of the plan. The petitioners alleged, as reasons for their prayer, the distance that many of them lived from the regular places of worship in their respective towns, some of whom were as far as seven miles away, and those who lived nearest were about three miles distant, which prevented many from attending except when the weather and traveling were the most favorable, and also stated that out of a just regard to the religious education of their children, they had, at their own expense, erected a place of public worship among themselves, not more than two and a half miles distant from any of their homes, which, and the "hiring preaching" from time to time, added to the province taxes, and their full proportion of the minister rates in the towns they now belong to, proved a burden extremely heavy.

This petition, after due consideration, was, however, finally dismissed.

After a lapse of a little more than six years a similar petition of John Green and others, praying that a part of said towns of Concord, Acton, Chelmsford and Billerica may be set off and made into a separate town, district or parish, occupied the attention of

the Legislature, which sent a committee to the several towns to view the situation and hear the parties interested. A surveyor was employed and a plan of the territory to be incorporated was prepared at the expense of the petitioners, which plan the legislative committee submitted with their report, which was favorable for the petitioners, and recommended that they be allowed to bring a bill embodying the request of their petition, which they did, and which, after certain amendments, was finally passed April 28, 1780, establishing the second District of Carlisle.

By the provisions of this act the district was to join with the town of Acton in the choice of a representative; pay one-sixth part of the charges for maintaining the North Bridge in Concord, until the inhabitants of said district shall build a bridge from said district over said river, and support a pauper named Sarah Fletcher; also the inhabitants of said district were entitled to demand and receive from the several towns to which they formerly belonged their just proportion of arms and ammunition to which they were entitled.

On April 29th, the day following the passage of the foregoing bill, William Stickney, Esq., issued his warrant, directed to Asa Green as one of the principal inhabitants within said district, requiring him to warn the inhabitants of said district, qualified by law to vote in town affairs, to assemble at the meeting-house on Monday, the 8th day of May, 1780, at two o'clock in the afternoon, to choose such officers as are necessary to manage the affairs of said district for the ensuing year. Phineas Blood was chosen moderator, and the following is a full list of all the officers chosen to conduct the affairs of the newly incorporated district, for the first year of its existence:

District Clerk: Zebulun Spaulding.
 Selectmen: Zebulun Spaulding, Phineas Blood, Lieut. John Heald.
 Committee of Safety: Capt. John Green, Thomas Spaulding, Capt. Israel Heald, Thomas Hodgman, Nathan Munroe.
 Constables: Timothy Wilkins, Sergt. Simon Barrett.
 Surveyors of Highways: Jonas Robbins, John Robbins, Jr., Edward Brown, Isaac Wilkins, Simon Blood, Jr., Ebenezer Hardy.
 District Treasurer: Capt. Samuel Heald.
 Tythingmen: Nathan Munroe, Lieut. Isachar Andrews.
 Fence-Viewers: Lieut. Nathan Parker, Sergt. John Robbins.
 Hog-reeves: Amos Flint, Josiah Heald, John Nickless, Edmund Andrews.
 Sealer of Leather: Henry Fletcher.
 Sealer of Weights and Measures: Lieut. Asa Green.
 Field-Drivers: Christopher Barrett, Samuel Davis, Jonathan Robbins, Phineas Blood.
 Deer-Reef: Jonas Robbins.
 Surveyor of Boards and Timber: Thomas Spaulding.
 Sealer of Hoops and Staves: Samuel Green.

By an act of the General Court, passed in the year 1775-76, all existing districts in the Colony were converted into towns. Now it is worthy of note that Carlisle was the first district incorporated after the passage of the above act, and also that it was the only district in Massachusetts at the time of the adoption of the Constitution of the Commonwealth.

The second district-meeting was called for Thurs-

day, June 1st, to be held in the meeting-house also. At this meeting a committee of three persons were chosen to see that the district be supplied with preaching for the ensuing year, and it was also voted to raise the sum of two thousand pounds for the support of the Gospel during said time, and before the close of the year it was voted to raise another sum of equal amount, in addition, for the same purpose; it was also further voted to build the body-seats and ceil up the meeting-house as high as the bottom of the windows, and the sum of one thousand pounds was raised to be applied towards completing the work, and a committee of five were chosen to superintend same.

Sums varying in value were raised for various purposes—for instance, two thousand pounds was raised to support the poor and defray the necessary charges that may arise in the district during the year; also two thousand pounds was raised to be laid out for schooling, two thousand pounds to amend and repair the highways and district roads; also under the head of this article it was voted that the sum of thirty dollars a day be allowed each man who shall work on the highways and perform his duty to the acceptance of the surveyors, and that a man with team (which probably implied an ox-team) shall be paid at the rate of sixty dollars per day.

The various sums mentioned above doubtless appear to the casual observer to be extravagant in the extreme, and if they really meant what they purport to mean, such would be the case; but it must be remembered that these claims were paid in Continental bills, which had been gradually depreciating in value since the year 1777, when, in the month of January, one hundred dollars in gold or silver would purchase one hundred and five dollars in bills of credit of the United States, until the month of April, 1780, when one hundred dollars in gold or silver was equal to the enormous sum of four thousand dollars in bills.

So it will appear that the man who worked on the highways with his ox-team during the year last named, and received for the same the sum of sixty dollars in bills per day, really got but one dollar and fifty cents in solid cash.

The district was incorporated just in time to vote for the first Governor under the State Constitution, and the record of a meeting called for that purpose and held Sept. 4, 1780, reads as follows:

"Voted and Chose for Governor the Hon^{ble} John Hancock, Esqr., of Boston, by 28 votes.

"Voted and Chose for Lieutenant, James Bowdoin Esqr., of Boston, by 28 votes."

Considerable attention was given during the first two years of the existence of the district to the laying out of new roads, and repairing and straightening some that had previously existed.

As early as Dec. 21, 1780, it was voted by the inhabitants that the "district be divided by the Selectmen into six squadrons in order for the schools." For

many years this division was adhered to, and the money raised by the district was equally divided between them. There is a school fund amounting to the sum of \$500, given by will of the late Simon Blood, Jr., the interest of which can only be used, and is annually applied toward the support of schools.

The following is a copy of the first order found in the records for paying for schooling, viz.:

"CARLISLE, February 27, 1751.

"To Capt. Samuel Heald, Treasurer.

"Sir,—Please to pay out of the money raised to support schooling, to Samuel Emery, the Sum of one Hundred and fifty Pounds to answer his Demands for keeping a writing school in said Carlisle, one month and boarding himself, £150. 0. 0.

"By order of the Selectmen

"ZEBULON SPAULDING, *District Clerk.*"

The first money that was paid for taking care of the meeting-house, of which any record was made in the town-books, was the sum of twelve shillings and two pence, which was paid out of the town treasury to Mr. Timothy Wilkins, Jr., for sweeping and taking care of the meeting-house for one year, which ended the 1st of March, 1784; other payments of similar amounts were made to various persons for the same service in subsequent years.

In early times it appears to have been the duty of the selectmen to guard against the possibility of any person coming into the district to reside who would be likely to become a pauper, and instances are of common occurrence where persons thus suspected were warned by the constable to depart out of the district.

One order drawn on the district treasurer, and dated March 2, 1786, is for the sum of seventeen shillings, to be paid to Deacon John Robbins for service done the district in warning out seventeen persons.

The following is a copy of a summons taken from the town-records, and will serve as a sample of many others that are to be found there:

"Middlesex SS. To Ben. John Robbins, one of the constables of the District of Carlisle, in the County of Middlesex. Greeting. Whereas, Sarah Crosby, who is an inhabitant of the Town of Billerica, came last from Westford on the Eighth of November instant to Reside in the District of Carlisle, the circumstances of the above Named person is such it is supposed She will Soon be Chargeable to Some place, and the Selectmen of Said Carlisle do Refuse to admit her, the above named person, of becoming an inhabitant, or any way Chargeable to Said Carlisle or any of the inhabitants thereof.

"These are therefore in the Name of the Commonwealth of Massachusetts, to Require you immediately to warn the above-named person forthwith to Depart out of Said District and Stay no longer within the Bounds of the Same. Heretofore had not, etc.

"ASA PARLIN, }
JONATHAN HEALD, } *Selectmen.*

"Carlisle, November 12, 1885."

At the annual April meeting in the year 1790 it was voted to have a collector for the whole district to collect the district rates, and that the office should be given to the lowest bidder, providing he shall be required to furnish satisfactory bondsmen.

Previous to this date the service had been performed by the constables, two of whom were annually appointed, one for the east and the other for

the west side of the district, and the rates for that part of the district for which they were chosen constable were committed to them to collect.

Mr. Amos Blood's bid for collecting on the above-mentioned date was four-pence half-penny on the pound, and as he was the lowest bidder was chosen as the first collector under the provisions of the preceding vote.

The custom of venduing the collection of taxes prevailed for years; the lowest bidder, providing he could furnish sufficient bonds, held the office, and was usually chosen constable.

The price paid by the town for this service was usually four or five cents on a pound, but two instances appear on record where the collector paid the town for the privilege of the office, viz., in years 1807 and 1808, on the former of which Mr. Nathaniel Hutchinson, Jr., offered to give one farthing on the pound, and on the latter-named year it was struck off to the same person, he agreeing to give the town four and a half cents on the pound to be collector and constable.

The explanation of the above occurrence may be deduced from the fact that the custom prevailed of appointing the collector constable also, which, in those times, was a remunerative office, and might have been sufficiently so to justify the paying of a moderate amount in order to secure the two companion offices.

At the annual meeting held March 7, 1803, it was voted that the selectmen serve gratis the ensuing year. Since it was customary, on various occasions, connected with their duties, to provide drink, there might have been to some a temptation to aspire to the office even under these conditions.

Previous to the year 1790 it had been the custom for the selectmen to commit the warrant for calling district-meetings to the constable, who personally warned the inhabitants, one taking the east side and the other the west side of the district, the dividing line being the road from Chelmsford to Concord, which at that time went past the meeting-house, the southern part of which is now known as the Old Concord Road.

At a meeting held on the 4th day of October, 1790, it was voted that the annual meetings in March and April be warned in the future by posting up a copy of the warrant at the meeting-house the number of days required by law previous to said meeting.

Thus was inaugurated the more modern method practiced until the present day.

The first record that is found relating to guide-posts, is recorded under the proceedings for the year 1796, and is as follows:

"The Selectmen of Carlisle have agreed that it would be convenient to have Guide Posts Set up at the following places in Said Carlisle, viz.: one near Mr. Timothy Wilkins, Junr. House, to Direct to Chelmsford & Bedford; one near the School House

in the East part of Carlisle, to Direct to Concord and Bedford; one near the School House in the South-west part of Carlisle, to Direct to Concord, Chelmsford and Carlisle."

The following year several sums were paid out of the treasury for guide-boards and expenses in procuring and erecting same, and it would seem that quite a number were erected in the district.

In the year 1801 the district made their first appropriation for music, when it was voted to raise the sum of twenty-five dollars for the purpose of hiring a singing-master. In subsequent years larger amounts were often raised and appropriated for the same purpose.

In the year 1802 the district voted that a premium of twenty-five cents a head on crows be allowed to any inhabitant of the district who should kill them within the limits of the district. Lieutenant Daniel Wheat was authorized to pay for same on presentation, and, as subsequently appears, seventy-three crows were carried to him and paid for, at an expense to the district of \$18.25.

Another similar offer was subsequently made by the town when, in the year 1872, it voted that the sum of twenty-five cents be paid out of the town treasury for each wood-chuck killed within its limits. A committee of five located in different parts of the town were chosen to receive them and keep the account. The result was the destruction of 560 animals, for which the town paid the sum of \$140.

The largest number credited to any one person was forty-three, for which Mr. C. H. Hutchinson was paid the sum of \$10.75. Mr. Amos Baldwin reported the next largest number and received the sum of \$9 for the destruction of thirty-six animals.

By the act which incorporated the district of Carlisle it was debarred of the privilege of sending a representative annually to the General Court from among its own citizens, and while enjoying all the other privileges usually granted to towns, it was compelled to join with the town of Acton in the choice of a representative.

Several times during the past twenty years the question of making application to be incorporated as a town had been agitated by the inhabitants of the district, but it was not until June 11, 1801, that final action was taken.

On the above-named date the inhabitants were assembled agreeable to a warrant for that purpose, the first article in which was as follows:

"To see if the district will agree to choose agents to petition to the General Court to have said district of Carlisle separated from the town of Acton, and that they may have appellation of town instead of district, agreeable to a request of a number of the inhabitants of said district, and pass any votes respecting the matter which they may think proper when met."

The action taken on this article was that the district make choice by ballot of an agent to petition the General Court to have the change brought about, and

to have the district incorporated as a town. Jonathan Heald, Esq., received the appointment as agent, and the result of the petition was the following act of the Legislature, which incorporated the district as a town, after having existed as a district for the space of nearly twenty-five years:

"COMMONWEALTH OF MASSACHUSETTS.

"In the year of our Lord, one thousand eight hundred and five.
An Act to incorporate the District of Carlisle, in the County of Middlesex, into a Town by the name of Carlisle.

"SEC. 1. Be it enacted by the Senate and House of Representatives in General Court Assembled, and by the authority of the same, That the district of Carlisle, in the county of Middlesex, be, and hereby is incorporated into a town by the name of Carlisle. And the said town is hereby vested with all the powers, privileges and immunities to which other towns are entitled by the constitution and laws of this Commonwealth.

"SEC. 2. Be it further enacted, that the said town of Carlisle shall be liable to be assessed for the pay of Representatives heretofore chosen, in the same manner and in the same proportion as if this Act had not passed."

The foregoing act was approved and signed by His Excellency Caleb Strong, Governor of the Commonwealth, February 18, 1805.

By the foregoing act the boundaries of the district of Carlisle as incorporated in the year 1780 remained unchanged. Very little in point of privilege appears to have been gained thereby, and yet it gave to the inhabitants a degree of independence, a prerogative which it was their privilege to enjoy, and which it is much to their credit that they saw fit to avail themselves of; beside, it marks an eventful era in the history of the town, the time when it outlived its minority, and put on the full garb of manhood, standing shoulder to shoulder with her sister towns, in point of privilege as well as responsibility.

It appears by the town record that an order was drawn on the town treasurer on the 25th of the succeeding March in favor of Jonathan Heald for the amount of \$47.00, it being for his attending the General Court twenty-one and a half days for the purpose of getting the act of incorporation passed, and for cash paid the clerk of the Senate, and a journey to Acton. The above amount probably covered the expense for the act of incorporation.

In the early history of the town an article which annually appeared in the town warrant was as follows, viz.: "To see if the town will agree that horses, neat cattle, and swine may run at large in the district." It was usually voted that this privilege be granted in the case of swine, but a vote in the negative was usually passed in relation to horses and neat-cattle, except in the case of some poor persons who were required to get a permit from the selectmen in order to continue the practice. This article, as far as it relates to swine, appeared for the last time in 1831, and to horses and neat-cattle in the year 1836. Another custom which has become obsolete at the present day is that of annually choosing fish and deer-reeves.

The practice of choosing a sexton at the annual town-meeting appears to have originated in the year

1805. James Kemp was the first to hold this position by vote of the town, and his duties consisted in taking care of the burying-place, digging the graves for all persons and taking charge of the meeting-house.

This service was, after a few years, let out by auction to the lowest bidder.

There appears to have been a pound erected by the district soon after its incorporation, and by vote of the town its walls were used in preparing the foundation for the new meeting-house erected in 1811; and in the year 1812, at a town-meeting held on the 4th day of May, the selectmen were chosen a committee to procure a location for a new pound, and also to let out the contract for building same to the lowest bidder. Said contract was given to Mr. Nathaniel Parker, for which he was paid the sum of twenty-five dollars.

This was probably the last pound erected by the town, and was located a few rods from the village, on the Westford road, and was recently removed by consent of the town.

A little inconvenience appears to have been experienced by the inhabitants of the town from the fact that the grant of land from Mr. Timothy Wilkins, mentioned subsequently, did not include quite all of what is at present known as the Common, and in response to an article in the warrant for the annual town-meeting, held Monday, March 1, 1813, a committee of three persons, viz., Mr. Frederick Blood, Mr. Nathan Green, Jr., and Mr. Thomas Heald, were chosen "to buy the land around the meeting-house within the roads, if they can agree with the owners thereof."

The above-mentioned land appears to have belonged to Mr. Reuben Duren, from whom the Committee chosen by the town purchased a half-acre, more or less, for the sum of thirty dollars, which, according to a plan of the purchase, included three small strips of land located respectively on the south, west and north sides of the said Wilkins grant, and took in all between the roads.

Several times during its existence the town has appropriated money to be expended upon the Common. The largest sum appropriated at any one time was one hundred and twenty dollars, raised in the year 1828, and laid out in labor on land around the meeting-house.

In later years a modern organization, known as the Carlisle Improvement Association, has done much to improve the Common, beside building sidewalks, erecting street-lamps and otherwise beautifying the general appearance of the village. This society was organized April 8, 1878, with the following list of officers: President, Prescott Nickles; vice-president, Thomas A. Green; secretary, Albert S. Day; treasurer, Marshall Lee; executive committee, Gilman Nickles, L. F. Duren, J. F. Carr, Mrs. E. J. Green and Mrs. D. W. Robbins.

Considerable money which this society has received from various entertainments given under its auspices,

and from membership fees, has been judiciously expended for improving the village.

The bounds on the southeast corner of the town, or the line separating that portion of the town of Carlisle from the town of Concord are very irregular, because of the unwillingness of certain inhabitants of that locality to have their farms set off from the town of Concord when the new district of Carlisle was incorporated.

An effort was made by the town of Carlisle, in the year 1826, to effect a straightening of the lines, or removal of the bounds. A committee of three persons were appointed to confer with the town of Concord in relation to the affair. This effort, however, proved ineffectual.

Again at a town-meeting held Nov. 10, 1851, Messrs. John Jacobs, Thomas Green and Joel Boynton were chosen a committee to petition the Legislature that the above-mentioned bounds be straightened, and said committee were authorized and instructed by the town to take all necessary measures to accomplish the purpose, which also proved a failure, as have several other less pretentious attempts in the same direction, and the original zig-zag lines continue to divide the towns until the present day.

The question of building a town-house appears to have been one thought to be worthy of consideration by some of the inhabitants of the town as early as the year 1833, for at a town-meeting held on the 1st day of April in said year, the first article in the warrant read as follows, viz.:

"To see if said town will agree to build a town-house, etc." The action of the town was to dismiss the article. Again, at a town-meeting held Jan. 20, 1851, a committee previously appointed to provide a place to hold future town meetings, were requested to report at the following March meeting what would be the estimated expense of erecting a building suitable and convenient for town purposes. The committee reported as follows:

"The expense of erecting a wooden building having a ground area of 1468 feet, divided into a town hall, an entrance and two small ante-rooms, furnished in suitable manner, would be, according to the best information and judgment of the committee, \$1648.

"It may be doubted whether it would be wise and judicious for the town to erect a building so small as that indicated in the above estimate. It might serve their present wants, but would hardly be suitable to accommodate a greatly increased population, etc."

The town concluded in this case to hire what was known as Parker's Hall for the sum of \$25.00 per annum, rather than be at the expense of building.

During the time intervening between the years 1845 and 1854 what was known as Mrs. Wheat's Hall, Parker's Hall and the hall under the First Parish meeting-house were, as occasion required, engaged by the town for town purposes, at which latter-named date the town engaged the last-mentioned hall to be

used for town purposes, for the consideration of twelve dollars per year, which sum the town continued to pay annually until the year 1873, when the price was raised to twenty-five dollars per annum, which sum the town has continued to pay to the present date rather than build.

In the year 1832 a fire-engine was secured partly by subscription, the balance being paid from the town treasury. The first officers elected were: John S. Barker, Master; Isaac Duren, Second Master; Al Wheat, Clerk.

Twenty-one engine men were appointed by the selectmen to work and manage the engine, which was an inferior machine, and never of much advantage to the town. It was finally sold at auction by the town, in the year 1868, for the sum of \$6.50.

There is but one post-office within the limits of the town. The date of its establishment was March 12, 1834, and Dr. John Nelson, who was the first post-master, received his appointment on the latter-named date.

Succeeding him the following-named persons have successively held the office, against the name of each appears the time from which their several commissions date:

Joseph V. Heald	December 23, 1835
John C. Nickles	April 13, 1842
James W. Wilkins	January 30, 1844
Artemas Parker	July 8, 1846
Lucius Stiles	June 8, 1849
George W. Green	December 2, 1852
John E. Cutter	July 20, 1859
Artemus Parker	November 12, 1861
John H. Champney	June 18, 1867
Charles T. Wortley	March 2, 1868
Sidney A. Bull	July 1, 1870
John S. Gerow	January 14, 1887
Sidney A. Bull	April 10, 1889

In the year 1847 it was voted at the March meeting that the receipts and expenses of the town for the past year be printed, and that a copy of the same be furnished to each voter at the subsequent April meeting. This appears to be the first annual report of the town officers that the town ever ordered to be printed.

In the early history of the town the custom prevailed of annually venduing the poor; the vendue for a number of years took place at the house of Mr. Timothy Wilkins, he often being vendue master, and annually, until about the year 1830, the town paid bills for liquor used on these vendue occasions. The following order, copied from the records, is a sample of others found there, and gives a glimpse of the times as they were:

"CARLISLE, FEB. 3, 1806.

"To Mr. Nathan Green, Treasurer. Please pay out of the town's money to Mr. Samuel Brown the sum of one dollar, it being for his finding six mugs of toddy last April when the poor were vendued.

"By order of the Selectmen,

"JONATHAN HEALD, Town Clerk."

As occasion required, previous to the year 1830, collins were furnished for the burial of paupers, which

were usually made by some resident of the town, and cost from one dollar and fifty cents to two dollars and fifty cents each.

In the Spring of the year 1850, in annual town-meeting, the town considered the advisability of purchasing a town farm, but finally dismissed the article.

No more efforts in this direction on the part of the town appear to have been put forth until nearly two years later, when, at the annual March meeting in the year 1852, a committee of five persons were chosen to gather information, and report at the next April meeting, the terms at which farms in the town suitable for a poor farm can be purchased. Their report is quite lengthy, giving the particulars concerning seven farms which they have examined, one of which was a farm in the possession of John W. Holland, of Lowell, containing, as is stated, 162 acres of land, the price of which was \$2900, which price a part of the committee considered reasonable.

This farm, the committee say in their report, is the only one on which they can agree (all things considered) to recommend to the town for their favorable consideration, should they decide to purchase.

In concluding their report the committee state that the annual average cost of supporting the poor for the past twelve years has been \$424.87½. The foregoing report which was given at the April town-meeting was accepted, and a committee of three, viz.: Thomas Green, True Wiggin and Jonas Parker, were chosen to purchase for the town the Holland farm, and take a deed of the same.

The latter-named committee were instructed to make a report of their proceedings at the next town-meeting, which they did on the 8th of November following, stating that they had purchased the George Nickles farm (so called) for the sum of \$2900, and that they have paid down the sum of \$900, and given their note on demand, at six per cent. interest for the balance of \$2000 to John W. Holland.

The town voted to accept the report and doings of the committee and authorized their treasurer to give the town's security for the notes given by the committee. The town voted to raise the sum of \$1500, to be used for the purpose of furnishing the farm and supporting the poor.

At a town-meeting held November 3, 1868, the town voted to authorize the overseers of poor to procure materials sufficient to repair the barn at the town-farm as they think necessity requires. Very little was done, however, until the year 1870, when it was repaired, enlarged and made nearly new at an expense to the town of \$1124.24.

At a town-meeting held November 2, 1880, the town voted "that the overseers of the poor be authorized to sell the wood on the town-farm, and that the amount of sales be appropriated toward the town debt." Before the close of the fiscal year, which ended March 1, 1881, the overseers had sold a certain

lot of wood from the farm for which they received the sum of \$2025, which money was appropriated as required by the provisions of the foregoing vote.

Now that the barn on the town-farm had been put in good repair, and the condition of the house being bad, and scarcely suitable for a dwelling, the attention of the town was directed toward an improvement in this particular, and at a town-meeting, held March 21, 1881, the town voted to build a new house on the town-farm, and at a subsequent town-meeting held April 23d, voted to raise and appropriate the sum of \$1500 for said purpose, and that the money be expended under the supervision of the selectmen.

The contract for putting in the cellar was subsequently given to Mr. Frank S. Bartlett for the sum of \$225, and for furnishing stock and building the house Mr. H. W. Wilson was paid the sum of \$1975. Extra work and other incidentals required in erecting the building, added to the above amount, made the entire cost of the building \$2592.32 when completed.

The custom of annually choosing tithingmen prevailed until the year 1850. The following is a list of those chosen at the annual March meeting in the latter-named year, who were the last ever elected by the town, viz.: James W. Wilkins, Samuel P. Stevens, Gilman Nickles, Amos T. Monroe, Austin Marsh and Nathaniel Hutchinson.

In the year 1857 Captain Thomas Green, Selar Simons and Isaac Blaisdell were chosen a committee to purchase a safe for the town, which they subsequently did, and for which the town paid the sum of forty-five dollars. This is the only safe the town ever owned, and at the present time answers the purpose for which it was intended only in name, being far too small to hold the town records.

Several times since the incorporation of the town the boundary lines have been changed by acts of the Legislature. The last instance was the result of an act approved Feb. 17, 1865, whereby a part of the town of Chelmsford was set off and annexed to the town of Carlisle. The territory added to the town by this act appears to be virtually the same as was taken from the town and added to the town of Chelmsford, by an act passed March 1, 1783, entitled "An Act for setting off David Parker from the District of Carlisle and annexing him to the town of Chelmsford."

A custom which has passed into disuse is that of ringing one of the church bells at the noon-hour, which was discontinued after the year 1869. It was in the warrant for the annual April meeting for said year that the usual article appeared, viz.: "To see if the town will vote to have the church-bell rung at the noon hour during the ensuing year." It is recorded that the town voted in reply to said article (in a jocular sense, without doubt) "that any man that has a bell shall ring it himself." It would seem that this manner of settling the question was not satisfactory to some of the inhabitants, for another town-meeting

was called fourteen days later," the warrant for which contained but two articles, the first of which was in relation to having the church-bell rung.

The town voted that the selectmen be authorized to procure the use of one of the church-bells and employ a suitable person to ring the same at twelve o'clock M., the ensuing year; the article never appeared in the warrant again.

Carlisle has been unfortunate as regards railroad accommodations, and yet twice, at least, has been called upon to take action in regard to a proposed location for one through the town, the first of which was Jan. 15, 1870, when a town-meeting was called, principally for the purpose of ascertaining if the town would take any action in regard to the proposed railroad from Framingham to Lowell, which would naturally pass through the town.

The town voted that a committee of three persons be appointed by the selectmen, and that they have full power to take such action in reference to the location of the proposed railroad from Framingham to Lowell as will best subserve the interest and convenience of the town, and especially that they be authorized to pledge the town to subscribe twenty thousand dollars to the capital stock of said road.

The committee subsequently appointed by the selectmen were Messrs. Selar Simons, B. F. Heald and William W. Morse. Whatever efforts this committee may have put forth, the result was of but little benefit to the town, as the final location of the road was two and a half miles to the west of the centre, barely crossing a corner of its territory, with the depot located just beyond its boundary lines, in the town of Westford.

April 29, 1871, the town voted to take measures to secure a favorable location through its territory for the Middlesex Central Railroad, and chose by ballot a committee of five persons, viz.: H. Prescott, William Green, Geo. H. Robbins, Benjamin Barrett and W. W. Morse to assist in making a survey for said road. The town also voted to be assessed five per cent. on its valuation for the purpose of aiding to build said road if a favorable location should be the result; this, however, was not the case, and the town to-day is badly in need of improved railroad conveniences.

FREE PUBLIC LIBRARY.—Previous to the year 1872 there had never been in the town a free public library owned by the town. One or two small libraries have existed however, but were the property of share holders, who, of course, made by-laws to protect themselves and their property, rather than for the accommodation of the public generally.

It was in the year 1870 that the Rev. Moses Patten moved to town, having accepted the pastorate of the Congregational Church. His wife, Mrs. Lydia S. Patten, a person possessed of a philanthropic turn of mind, and realizing the benefit to be derived from the possession of a free public library, which may be considered second only to the public schools as a public

educator, she immediately set about starting one by private subscriptions of money and books.

Before very long she had succeeded in getting together quite a formidable collection of books, and by her own personal efforts, in serving as librarian without compensation, put them in circulation. Now that the library was in running-order, comfortably housed and centrally located in a room rented for the purpose, and for which the annual rental of \$20 was paid (which sum was raised principally by entertainments, gotten up especially for the purpose), the proposition was made to present it to the town, which, if accepted, would place it in a position to be perpetually cared for, added to and otherwise made useful.

The result of the proposition was an article inserted in the warrant for the annual town-meeting held March 18, 1872, which read as follows, viz.: "To see if the town will appropriate money to aid in the establishment of a town library."

The town voted to raise and appropriate the sum of \$140 for the establishment of a town library, and also that a committee of five persons, consisting of three males and two females, be chosen, whose duty it shall be to have the general supervision of said library.

Thus March 18, 1872, may properly be considered as the date when the Carlisle Free Public Library was established, and the committee chosen by the town, who were the first to serve in this capacity, were as follows, viz.: Mrs. Lydia S. Patten to serve five years, Joseph F. Carr for four years, Miss Hattie Hutchinson three years, N. A. Taylor two years and Dr. Austin Marsh to serve one year.

In the year 1889 the number of committee or trustees was reduced to three, the office of one of said number to expire annually, whose successor is also annually chosen at the March meeting.

It is possible that the town would, ere this date, have become the possessor of a town library, had it not been for the efforts of Mrs. Patten, who worked earnestly and hard for its establishment, and whom the town is proud to name as its founder; one thing certain: she doubtless caused its establishment to antedate many years, what otherwise would have been the case. She removed from the town in the year 1876, and has since passed to her final rest. Her works do follow her, and are a constant reminder of her to the people of the town.

It would seem appropriate and fitting that a life-size portrait of her should adorn the walls of the library-room, in consideration of the respect due to her from the hands of the town.

The library has been yearly increasing in size since its first inception, the result of appropriations by the town and the gifts of friends, until at the present time it numbers in all one thousand or more volumes. By vote of the town the refunded dog tax is appropriated as a permanent fund to replenish its shelves, and for its support.

It has no permanent abiding-place, but yearly a room is hired by the trustees for its accommodation. An opportunity presents itself for some liberal-minded person to act the part of the philanthropist, and present the town with a library building, an act which would be appreciated by all future generations, as well as be a constant reminder of the liberality of the donor.

FLAG-STAFFS AND FLAG.—During the existence of the town two flag-staffs have been erected, both in the same location—near the centre of the Common—the tree for the main staff for both of which was given by the late William Green.

Money for defraying the expense of erecting the first staff was obtained by subscription, solicited by Mr. Nathaniel Hutchinson in the year 1861, who procured in all the sum of \$137.50, \$100 of which was used to erect the staff, and the remaining \$37.50 to purchase a flag, which latter is used by the town at the present day, although somewhat worn, yet is the only flag which the town ever owned. At the raising of this flag, after the erection of the first staff, public exercises were held on the Common, A. R. Brown, Esq., of Lowell, being the principal speaker.

March 21, 1887, the town voted "to raise and appropriate the sum of One hundred dollars to erect a flag-staff in connection with the offer of Mr. William Green, and the selectmen were chosen as a committee to carry out the provisions of the vote.

Of the above appropriation, the sum of \$96.85 was expended during said year for labor, top-mast and other incidentals. The cradle on said staff bears the inscription in gilt letters, "William Green's Gift, 1887," in honor of the donor of the main part of the staff.

Among those who have made donations to the town, and should be kindly remembered by her citizens, is the name of Mrs. Mary G. Scott, who, by her last will and testament, bequeathed to the town the sum of \$300, with the request that it should be appropriated toward paying the town debt. At a town-meeting held March 15, 1886, the town voted to accept the bequest, and to use the money in accordance with the request in the will.

SCHOOL-HOUSES.—In the year 1818, at a meeting of the inhabitants of the Centre School District, held in the meeting-house on the 23d day of March, it was voted to erect a school-house in said district, when said meeting was adjourned to April 12th, at which adjourned meeting it was voted to build the school-house on the top of the hill south of the meeting-house; also voted to build with brick, and that the building should be twenty-one feet square, with a porch, after which it was voted that \$75, which would be the district's proportion of the money raised by the town for schooling, be appropriated for the purpose of erecting the building; also, it was further voted that the district be taxed, in addition to said sum, for the amount of \$230 for the

above-mentioned purpose. Deacon John Green, Nathan Green, Jr., and John Jacobs were chosen as a building committee.

In the year 1828 the inhabitants of the North School District voted that the district be assessed for the sum of \$550 for the purpose of building a school-house in said district. The contract for erecting the building was awarded to Benjamin Barrett, Jr., for which he received the sum of \$553.62. The same building still remains in said district, and is the only school-house, as far as information from the records can be obtained, ever erected in the district. It was thoroughly repaired in the year 1869, at an expense to the town of \$582.52.

In the year 1837 the number of school districts was reduced from six, which had existed up to the last-named date, to five. A committee appointed by the town to investigate the circumstances and report on the advisability of said change, reported in its favor, and included in their report the bounds of division of the several districts, which report was accepted and adopted by the town.

In the year 1839 the inhabitants of the East School District voted to raise, by tax, the amount of \$170, to build a new school-house in said district. This building was destroyed by fire in the early part of the year 1869, and was rebuilt during the latter-named year at a total expense to the town of \$1574.10, and is the same building which serves at the present time in said district the purpose for which it was erected.

December 11, 1839, the inhabitants of what was made to constitute the South School District voted to raise the sum of \$70, by tax, to be appropriated toward defraying the expense of building a new school-house in their district.

May 28, 1840, by vote of the inhabitants of the West School District, they agreed to be assessed for the sum of \$175 for the purpose of building a new school-house in their district.

Consequently it would appear that within the space of twenty-two years, or between 1818 and 1840, five new school-houses had been built in the town, or one for each school district.

This seems to have sufficed until the year 1848, when District No. 1, in the centre of the town, voted to raise \$600, by tax, to build a new school-house, which is the one used at the present day, the lot of land on which it is located having been given to the town for the purpose by the late William Green.

The school-house in the south part of the town having been entirely consumed by fire during the latter part of the year 1886, a town-meeting was called for January 12, 1887, at which the town voted "to erect a school house in said district to replace the one recently destroyed by fire, at an expense to the town not to exceed the sum of \$800, including furniture." Messrs. H. Prescott, Artemas Taylor and J. P. Davis were chosen a building committee, who pro-

ceeded with the work assigned them and in due time presented the town with the result of their labors, which included the building in a finished state, furnished and ready for use at an expense to the town of \$805.08.

BRIDGES.—The act incorporating the District of Carlisle made it incumbent on the district to pay one-sixth part of the charges that may arise from the maintaining of the North Bridge over the Concord River, in Concord, until such time as the inhabitants of the district shall build a bridge over said river themselves.

Several sums of money were raised by the district for the purpose from time to time, and paid usually to the inhabitants of the district for doing the work required.

An extract from an order given on the treasurer by the selectmen, which pertains to the case in question reads as follows:

"CARLISLE, Jan. 3, 1789.

"To Mr. Jonathan Blood, Treasurer, Sir, please to pay out of the District money to Mr. Simon Blood, Junr, the following Sums, viz.: One pound, thirteen Shillings and Six pence, it being for fourteen gallons and three quarts of Rum provided for those that worked at the north Bridge in Concord; also pay to him the Sum of thirteen Shillings, it being for five Day's work done at Said Bridge, &c."

On Thursday, the 9th day of December, 1790, at a meeting of the inhabitants of the district, the following was the second article which appeared in the warrant, viz.:

"To See if the District will agree to build a Bridge over Concord River between Carlisle & Bedford, or any part thereof, or do any thing for the encouragement of a public Road through Carlisle and Bedford, or act on the article as they may think proper."

In response to the above article a committee of five inhabitants of the district were chosen, 1st, to determine as to the necessity of building said bridge; 2d, should they deem it advisable to build, to determine the most proper place; 3d, to confer with the inhabitants of Bedford respecting the matter, finally to see how much they can get by subscription toward building said bridge.

This was the beginning of a question which agitated the minds of the inhabitants of the district for upward of four years, and which resulted in the establishment of a public road from Carlisle to Bedford, and the building of the first bridge over the river between the two towns, which was probably completed for use in the year 1795, although appropriations for the purpose of repairing the causeway and for plank for the bridge are subsequently of frequent occurrence.

At a meeting called on the 26th day of May, 1791, it was voted "to prepare a Road from the Meeting-House to the River, and build an abutment on this side at the place agreed to by the committee, if Bedford will prepare a Road to the River and build an abutement on the other Side." At a subsequent meeting, held October 3, 1791, by adjournment from September 5th, it was voted to dismiss the former committee, and that the district take the subscription

and build a bridge over the river if the town of Bedford would conform to the provisions of the previous vote.

The selectmen were chosen a committee to petition the town of Bedford to lay out a road to the river, and build the abutment on their side.

Later it was voted to "petition the Court of General Sessions of the Peace for a Committee to View the necessity of a road from Carlisle to Bedford Meeting-House," and the selectmen were delegated a committee to accompany them and also to build the bridge.

Several sums of money were voted for the purpose, the largest of which was one hundred pounds, voted March 3, 1794, which was to be appropriated for the purpose of building one-half the bridge over the river, also the causeway on the Carlisle side, and to pay land damages occasioned by the road.

The money thus appropriated was paid out at various times, and in varying sums as occasion required. The following is a copy of an order drawn on one of the constables, and is made to appear here, not because it is a sample of very many others, although it is of some, but principally to show the contrast between the customs of a hundred years ago and the present time:

CARLISLE, Feb. the 18, 1795.

"To Mr. John Jacobs, Constable of the District of Carlisle: Sir, please to pay out of the district's money which you are ordered to collect to Defray the expence of building a Bridge over the River, to Mr. John Green the Sum of Seven pounds, two Shillings and four pence, for Rum and Sugar used at the Bridge when building the Same, and this Shall Discharge you for that Sum. £7. 2. 4.

"By order of the Selectmen.

"ASA PARLIN District, Cler."

A district meeting was called for August 29, 1803, and the sixth article in the warrant was to "See if the District will agree to raise a sum of money to raise the Causeway on the river meadow near the Bridge, &c." On consideration of the article it was voted to "raise the Sum of one Hundred Dollars for the purpose of filling up the Causeway on the river meadow, and that the Causeway be vendued the 5th Day of September, at 4 o'clock, and that the selectmen be a committee for that purpose and to provide drink."

At a town-meeting held Jan. 14, 1822, twenty-seven years after the building of the first bridge over the Concord River between Carlisle and Bedford, the town voted to rebuild their part of the river bridge the approaching summer, and chose as a committee for said purpose, Benjamin Barrett, Paul Forbush and Capt. Stephen Blood, which committee were subsequently increased by vote of the town May 6th, same year, by four more names, viz.: Samuel Adams, Thomas Heald, John Heald and Isaiah Green. The town clerk was instructed to notify the selectmen of Bedford of the action taken by the town in relation to their half of the bridge, which it was voted to construct twenty feet wide, and upon mud-sills, the timber,

with the exception of the mud-sills and plank, to be white oak.

At the intervening April meeting the town voted to raise the sum of \$500 for the purpose of defraying the expense of rebuilding. As in the former case, "rum and sugar for the laborers and committee" consumed a part of the appropriation.

At a town-meeting held April 4, 1870, the town voted to raise the sum of \$600 to be expended by the selectmen for the purpose of repairing the river bridge and making it safe for travel, and also voted that the repairs be made at the earliest practical moment. Of the above appropriation \$230.42 was expended, but it would seem, however, that the bridge was not yet considered safe, for at a town-meeting held Nov. 7, 1871, the town chose a committee of three, viz.: H. Prescott, N. A. Taylor and Benjamin Barrett, who were instructed to keep the river bridge in safe condition for public travel, and to rebuild it whenever in their judgment it may be necessary to do so. The work of rebuilding was done in the year 1872, and the expense of the undertaking was met by an appropriation by the town of \$2500. The entire expense, however, of one half of the bridge, which the town was required to build, was \$2327.48.

This bridge differed from those previously constructed, being built upon driven spiles, instead of mud-sills.

Very little has been expended upon the bridge since it was last rebuilt.

BURYING-GROUNDS.—There seems to have been no provision made for a public burying-ground previous to the year 1784, when, at a meeting of the inhabitants of the district held April 5th, it was voted that "there be one-half acre of Land Provided for the use of a burying-place, including the spot of ground that hath been made use of for that purpose already." Also at said meeting a committee of three persons were chosen to confer and settle with Mr. Wilkins for said land.

A little more than three years later two sums of money were paid out of the treasury for land purchased for a burying-place, viz.: to Timothy Wilkins, the 3d, the sum of ten shillings, and to Timothy Wilkins, Jr., the sum of sixteen shillings, which was the proportional part due each of the above-named parties, whom, it would appear, were joint owners of the land, which was what is now known as the Central Burying-Ground, the same that is located near the centre of the town, and which, at the present date, is seldom, if ever, used for the purpose of interment.

The stones all stand facing the east, and indicate the age of slate, with the exception of two or three marble slabs. There are no monuments within its enclosures.

Here rest the remains of the first minister that was settled in the town, the Rev. Paul Litchfield; also the remains of many of the first settlers of the place.

Many of the inscriptions on the stones which commemorate their names have attached military and church titles.

That interments were made here previous to its being purchased by the district would seem evident from the inscriptions found upon the stones, some of which date back as far as 1778, and, doubtless, some who earliest found a resting-place here have nothing erected to their memory.

In later years it became apparent that more room would be required for the purpose of a burying-ground, the question of procuring which continued to be agitated from time to time in town-meetings. Several times the propriety of purchasing an addition to what was known as Green's burying-ground had been considered. The latter-named place was a tract of land containing about half an acre, located about half a mile southeast of the centre of the town, and which was set apart and given by Mr. John Green, to be used by the Greens exclusively for the purpose of a burial spot.

From time to time, however, permission was given to others to make interments there, until nearly all the available space was taken up.

The stones here also indicate the era of slate, nearly all of which are slate slabs, erected, according to the ancient custom, facing the rising sun.

In the fall of the year 1831 a committee of three, consisting of Silas Green, Thomas Heald and Dea. John Green, were chosen by the town to purchase a piece of land for the purpose of enlarging Green's burial-ground.

It is probable that they attended to the duties to which the town had delegated them, but it was not until the April meeting in the year 1837 that the town voted to pay Mr. Leonard Green the sum of \$25 for half an acre of land to enlarge Green's burial-ground, and cause the same to be enclosed by a fence.

In the year 1841 the town voted at a meeting held in May to lay out said burial-ground in lots, and chose for a committee to carry out the provisions of said vote the three following-named persons, viz.: Capt. Thomas Green, Dea. John Green and Capt. Ezekiel Nickles.

In the year 1863 the town purchased of Capt. Thomas Green one acre of land, as an addition to Green's burying-ground, and in the year 1866 purchased of Mrs. Oliver Forbush one acre more, which was the last addition made, and which enlarged it to its present proportions.

At a town-meeting held April 2, 1866, the town voted to appropriate the sum of \$150 for the purpose of building a wall in front of the cemetery. Two years later the committee report having expended for the afore-named purpose, and for a number of stone bounds, the sum of \$116.73, and also for gates put in at the two entrances, the sum of eleven dollars.

In the year 1870 the town appropriated the sum of \$150 for the purpose of setting out trees and shrubbery in and around Green Cemetery, and at the annual April town-meeting held the next year a committee of three persons were chosen to have the general charge and care of the burial-grounds. This committee were: Benjamin Barrett, chosen for one, Prescott Nickles for two, and Selar Simons for three years, respectively, which committee attended to setting the trees and shrubs which at the present time ornament Green Cemetery. Since the latter-named date the custom of annually appointing a cemetery committee has prevailed in the town.

Near the centre of Green Cemetery is located a very neat and pretty octagon-shaped summer-house, of symmetrical proportions, and about ten feet high, the roof being tin covered.

A piazza surrounds the building, inside of which are benches suitable for seats. In the centre of said building stands a table bearing a marble tablet, on which is the following inscription:

This building erected July 8, 1874,
And presented to the town of Carlisle
By Miss H. L. C. Green.

So live with men, as if God's curious eye
Did everywhere into thy actions spy:
Strive to live well, tread in the upright ways,
And rather count thy actions than thy days.

At a town-meeting held April 5, 1875, the town formally accepted of the building, and passed resolutions of gratitude to be extended to the donor, and also agreed to keep the building in good repair, and to have it appropriately dedicated, which was subsequently done. The dedicatory address was delivered by Rev. James T. Powers during the summer of the latter-named year, from the piazza of the building, before an assembly of people who had gathered there for the purpose.

March 18, 1878, the town voted to establish a public watering-place at the cemetery road-side, for which purpose a well was dug about midway of the cemetery and outside the enclosure. Subsequently a pump was furnished, since which time it has served the purpose for which it was intended.

During the year 1880 a concrete walk was laid at the west entrance, at an expense to the town of \$52.25.

In the northwest corner, or old part of Green Cemetery, the earliest interments were made, some of which date back as far as the year 1785; a stone erected to the memory of Sarah, wife of Asa Parlin, who was at that date clerk of the district, and also one to the memory of Lieutenant Asa Green, bear date as above.

In near proximity to these is a neglected-looking slate slab, three and a half feet tall, covered with moss and leaning, also bearing the ancient representation of an angel's head and wings at top and pillars on sides. The following is the inscription:

In memory of Mr. Simon Blood, Junr.,
who died Nov. 7, 1795,
in the 47th yr of his age.

His generous donations to public uses do honor to his memory, and will
preserve his name to posterity.

Naked as from the earth we came
And crept to life at first,
We to the earth return again
And mingle with our dust.

The above is what marks the resting-place of one who served the district in its infancy in the various capacities of school-teacher, town treasurer for two years, selectman for ten years, having been a member of the second board chosen by the district, and was also holding the office at the date of his decease. He was one of the first, as well as largest, donors to the interests of the town; his name deserved to be perpetuated, and his grave, in the absence of relatives, to be kept green by a posterity who are enjoying the benefits of his liberality.

In the southwest corner, near the hearse-house, are interred the remains of her to whom the town is indebted for the donation which called into existence the soldiers' monument in the centre of the town. The lot is enclosed with a granite curbing, and a granite monument marks the spot. The inscription reads as follows: "Lydia A. G., wife of William Farrar, died September 27, 1881, aged seventy years, nine months, twelve days." Near the centre of the cemetery, and back of the summer-house, located on main avenue, is a double marble tablet erected to the memory of Abel Taylor, Jr., and wife. His death occurred December 16, 1887, aged eighty-two years, seven months, thirteen days; his wife preceded him by a few years.

His munificence, shown by the legacy left to the Union Calvinistic Society, will always be remembered with gratitude by those who worship with this society, of which both he and his wife were members at the time of their decease. The tablet bears the motto: "We part to meet again." The remains of but two clergymen rest in the town, viz.: those of the first minister, Rev. Paul Litchfield, interred in the Central Burying-Ground, while in Green Cemetery an unpretentious granite tablet marks the place where rests the remains of one other who performed the duties of a clergyman in the town for upward of eight years. The inscription on the tablet reads as follows: "In memory of Rev. James T. Powers, 1828-1888. The joys of those with God in heaven can never end."

In this cemetery are also buried numerous others who have in times past, out of their abundance, contributed for the benefit of the church or town. Some of their names may be recalled as follows: Mr. Thomas Green, Mr. William Farrar, Mrs. Mary G. Scott and Mr. William Green.

HEARSES AND HEARSE-HOUSES.—At a town-meeting held April 4, 1808, it was voted that the town raise \$100 to procure a hearse, and Captain Nehemiah

Andrews was chosen to expend said money, and provide a hearse for the use of the town.

On March 10th of the following year the town treasurer paid out of the town's money to Mr. Isaac Blaisdell, who supported a wheelwright's shop in the town at that time, the sum of \$29.75, it being for his building a hearse for the use of the town. Another order was drawn the preceding day in favor of Mr. Andrews, the above-named committee, for the sum of \$26, it being for iron, harness and boxes, and his time spent in procuring a hearse for the use of the town. A third order was drawn a little later in favor of James Kemp for the sum of \$8.50, it being for his doing the iron-work on the hearse. These three sums, the total of which is \$64.25, are all that appear to have been paid from the town treasury for the purpose of paying for the first hearse which the town owned. Rather a moderate sum it would be considered at the present date to expend for a similar purpose.

Now that the town was the owner of a hearse, the next consideration was to provide a place of shelter for the same. An article was inserted in the warrant for the annual April meeting the following year, which called for action on the subject. At this meeting it was voted that the town erect a hearse-house sixteen feet long, nine feet wide and seven feet high. A committee of three, consisting of Captain Nathan Haywood, Paul Forbush and Captain Stephen Blood, were chosen to prepare a plan of said building, with specifications which they were to present on the evening of the same day, when it was voted that the erecting of the building be vendued.

The following order, subsequently drawn on the treasurer, would seem to indicate the name of the contractor, as well as the cost of the building:

"To Mr. Nathan Green, Jr., town treasurer:

"\$ Six:—Please to pay out of the town's money to Capt. Nehemiah Andrews Twenty six dollars and four cents, it being for his building a house for the town hearse."

This building was located on the southeast corner of the Central Burying-Ground, where it stood until the year 1867, when it was voted that the selectmen be authorized to dispose of it in such manner as they deem best. It was finally sold for the sum of \$35, moved away and transformed into a dwelling. During its existence as a hearse-house it answered the double purpose of providing a shelter for the hearse and of serving as a sort of armory or receptacle for the town's supply of powder, fire-arms and equipments.

In the year 1838 a committee of three were appointed in town-meeting to have the old hearse repaired, which finally seems to have answered its purpose until the year 1865, when, at a town-meeting held Nov. 7th, a committee of three persons were chosen to procure a new hearse and to dispose of the old one. Messrs. E. S. Hutchins, George F. Duren and Nathaniel Hutchinson were chosen and accepted for

said committee, who subsequently procured the more modern and ornamental carriage for the dead, owned and used by the town at the present day, and which was purchased of A. Tolman & Co., of Worcester, for the sum of \$430. The old hearse was sold at auction for the sum of \$2, and after certain alterations subsequently served the purpose of a pleasure-wagon, for a number of years, for the purchaser, who was a resident townsman.

By vote of the town, March 19, 1888, the selectmen were instructed to buy a pole and runners for the hearse, which they procured for the sum of \$19.50, exclusive of the bill for painting.

At a town-meeting held May 25, 1867, the last article in the warrant was to "see if the town will provide a suitable place for the new hearse or act thereon," when it was voted "that the selectmen be authorized to build a suitable hearse-house." The result of this vote was the building used for a hearse-house at the present time, and which is located in Green Cemetery, erected at an expense to the town of nearly \$250.

The following is a list of the physicians who have resided and practiced in the town, the latter of whom has been the resident physician for the past fifty years: John Nelson, 1816-1836; Paul C. Kittredge, 1837-1839; Austin Marsh, 1839.

The more important town officers have been as follows:

<i>Town Clerks.</i>	<i>Years.</i>
Zebulun Spaulding, 1780-81	5
Asa Parlin, 1785-1802, '06-08	21
John Jacobs, 1803, '09-12, '26, '47-52	12
Jonathan Heald, 1804-05, '18-20	5
Jonathan Heald, Jr., 1813-14	2
John Heald, Jr., 1815-17, '21-25, '27-29	11
Cyrus Heald, 1830-35, '47-46	8
Calvin Heald, 1836-40, '43-41	7
Ephraim Robbins, 1841-42	2
George F. Duren, 1853-69	17
Selar Simons, 1870-72	3
Austin Marsh, 1873-80	8
John E. Bull, 1881	

<i>Town Treasurers.</i>	<i>Years.</i>
Captain Samuel Heald, 1780-85	6
Simon Blood, Jr., 1780-87	2
Jonathan Blood, 1788	1
Samuel Green, 1789-1802	14
Nathan Green, Jr., 1803-18	16

John Q. A. Green, 1853-54, '63, '78, '84-87	8
Timothy Wilkins, 1855	1
Isaac Blaisdell, 1856-60, '62	6
Selar Simons, 1861	1
Abraham Hutchins, 1863	1
J. M. Currier, 1863, '72	2
Sebra D. Bartlett, 1864-65	2
William Farrar, 1866-69	4
John H. Champney, 1866	1
Samuel E. Scott, 1867	1
Nathaniel A. Taylor, 1868-69	2
George S. Skelton, 1869-71, '76-84	12
William W. Morse, 1871	1
Samuel H. Robbins, 1872	1
Humphrey Prescott, 1873	1
Austin Marsh, 1874, '77	2
Daniel W. Robbins, 1874-75, '88-90	5
Asa Nickles, 1876-83	8
George H. Robbins, 1879, '86, '88-89	4
Nathaniel Hutchinson, 1880, 1881, 1887	3
Sidney A. Bull, 1882	1
Albert S. Day, 1883	1
John P. Davis, 1884-89	6
John E. Bull, 1885	1
Abel G. Hodgman, 1887	1
Warren H. Blaisdell, 1890	1
Leonard M. Green, 1890	1

In the year 1781 the number of selectmen elected was five, with which exception the number annually elected has always been three.

The following is a list of names of persons who have served as representatives from the town :

Deacon Ephraim Robbins, 1790, 1806, 1807, 1808.
Asa Parlin, 1803; convention 1788.
Paul Litchfield, 1809, 1810, 1811.
Timothy Heald, 1812.
Thomas Heald, 1815.
Jonathan Heald, Jr., 1816.
John Heald, 1818, 1821, 1823, 1826, 1827, 1830.
Dr. John Nelson, 1821.
Cyrus Heald, 1832, 1833, 1834, 1835.
Benjamin Barrett, 1836; convention 1820.
Rev. George W. Stacy, 1837.
Calvin Heald, 1839, 1866.
Amos Spaulding, 1840, 1841.
Thomas Green, 1843, 1850.
Benjamin F. Heald, 1848.
John Jacobs, 1851; convention 1853.
Joel Boynton, 1852.
Amos T. Monroe, 1855.
Samuel B. Chamberlain, 1860.
Humphrey Prescott, 1871.
Sidney A. Bull, 1880.

The population of the town, each decade, since the year 1790, as supplied by the State census, is as follows :

1790	555	1840	556
1800	634	1850	632
1810	672	1860	621
1820	681	1870	569
1830	566	1880	478

MILITARY.—The District of Carlisle had its birth in the middle of the Revolutionary period, and demands were frequently made on her for funds and men to supply her proportion of the quota for the army. She seems to have been willing to perform her obligations in this respect, and at a meeting of the inhabitants held by adjournment in the meeting-house, July 3, 1780, it was voted to raise the sum of thirty thousand pounds to be applied towards paying the soldiers and otherwise discharging such debts as may arise on account of the war.

Also the following proceedings as recorded of a meeting held February 26, 1781, for the purpose of raising men in response to a call of the Court for same, is but an illustration of what was frequently occurring until the close of the war. After the choice of a moderator, "then the orders or Resolves of Court was Read Respecting Raising a number of men to Serve in the Continental army for three years, or During the war with Britton.

"Voted to chuse a committee of seven to hire men. Chose Lieut. Isachar Andrews, Capt. Israel Heald, Timothy Wilkins, James Nickles, Zacheus Green, Ephraim Robbins and Stephen Blood, Jr. Then Capt. Samuel Heald and Lieut. Isachar Andrews imbodyed the men present at s^d meeting, and went Round in or^d to Se if any was Spirited to Inlist." None enlisted, however, and it was voted to adjourn the meeting until the following Monday at four o'clock P.M.

At the adjourned meeting it was voted that the selectmen divide the district into six classes, and re-

quire each class to procure a man to serve in the army.

Numerous instances appear on the town records where money was paid for various items for the benefit of the army, such as beef, corn, blankets, various kinds of provisions and necessities; also, in several instances, a horse was purchased and paid for to be sent to the army.

The demands were frequent, and in the aggregate amounted to quite an expense to the district, as well as a heavy drain upon the men able to perform military duty.

The following list of names of men who served in the Revolutionary War from the District of Carlisle was procured from searching the Revolutionary rolls at the State House and the town records; doubtless they are approximately complete. The list, however, would probably have been more than twice as long did it contain all the names of soldiers who served in the war that deserve to be credited to the limits of the district; but since more than four years had elapsed subsequent to the battle of Concord before the district was incorporated, all soldiers from within its limits, who enlisted previous to this date, were credited to the respective towns to which they then belonged.

List of Soldiers from Carlisle in the Revolutionary War.

Joel Wheeler, Asa Wheeler, Nathan B. Monroe, Abraham Andrews, Daniel Wheat, Leonard Green, Thomas Wood, Timothy Wilkins, Jr., Joseph Nixon, Samuel Proctor, Patrick Neif, John Crosby, Paul Langson, Jonathan Heald, Abram Taylor, James Mackensay, Merchem Taylor, Amos Amos, Ebenezer Stone, Jr., Thomas Welch, Matthew Jenner-son, Peter Oliver, Philip Boston, Barrett Blood, Thaddeus Parlin.

At a district meeting held August 18, 1794, it was voted "that the minute-men have Seven Dollars' per month in case they Shall be called into actual Service, while in Service Including the Continental pay, and also give them three Dollars Bounty within twenty days from this time, or Sooner, if called upon to march; and further Voted that the minute-men who Shall turn out Voluntarily and enlist Shall have the Same pay which the Town of Concord have agreed to give their minute-men."

In compliance with the above vote an order was drawn on the district treasurer August 29, 1794, for £13 10s., it being the total amount of the bounty, at eighteen shillings each, which the district voted to give in consideration of their services as minute-men to the following persons, viz.:

List of Minute-Men.

Lieutenant Daniel Wheat, Nathan Parlin, Jr., Samuel Hartwell, James Kemp, Benjamin Robbins, Reuben Durant, Thomas Heald, Asa Hartwell, James Russell, Jr., David Walker, Simon Wheeler, Nathan Wheeler, Amos Green, Asa Green, Nathaniel Parker, Jr.

In the year 1800 a special meeting of the inhabitants of the district was called for Tuesday, April 19th. The fourth article in the warrant was as follows: "To See if the District will agree to make provision for their Soldiers at the General muster at Concord or act on the article as they may think proper."

In regard to this article it was "Voted that each Soldier who attends the muster shall have one pound and an half of Beef of Sutable pieces, and one pound and an half of Bread, one third part of a pound of cheese, and one quarter of a pound of powder, and the Company one Barrel of old cider and three gallons of W. I. rum a day, and that the Soldiers that do duty in other companies draw as much money as the cost is to each Soldier who draws provision."

A committee of three persons were chosen to provide said articles, which they did, as orders subsequently drawn on the treasurer in their favor would go to prove,

That a military organization existed in the district ever after its incorporation would appear from the reference often made to it in the proceedings at the district meetings.

On June 11, 1804, it was voted "that the District of Carlisle supply the Training Band with Cartridges, and also furnish two flints for each member to be forever kept in store for said Band."

Captain Ezekiel Nickles, Lieutenant Nathan Heywood and ensign Abel Nickles were appointed a committee to furnish the said articles, and it would seem probable that they were the commissioned officers of the organization at that date.

At a town-meeting held May 16, 1808, the town voted to raise \$25, to be laid out for powder to be used on Independence Day, and also voted that the three commissioned officers of the Carlisle company, be authorized to procure said powder. This is the first recorded appropriation or expenditure of money by the town for the purpose of celebrating Fourth of July.

In the year 1814 the town voted to purchase guns and equipments (said guns and equipments to remain the property of the town) for all those required to perform military duty and who were unable to equip themselves. Also at the same time, it was voted to procure at the expense of the town, for the use of the soldiers, sixty canteens, and a few years later knapsacks were provided for what was known as the Carlisle company. These equipments were stored in the hearse-house, and some are preserved to the present day.

In the year 1830 and for several subsequent years it was customary for the town to refund the amount of the poll-tax assessed on those persons who performed all the military duty in uniform (which uniform was probably provided at their own expense), required of them by the laws of the Commonwealth, and each year the town treasurer was served with a list of persons who were entitled to have said amounts refunded and ordered to pay the same.

In the year 1853 it would appear that military ambition was on the wane, and that military drill was practically discontinued, for the tenth article in the warrant for the annual April meeting in said year was "to see if the town will agree to sell the old

guns, and other articles in the hearse-house belonging to the town." It was voted to have the town treasurer sell the same.

A few of these old flint-lock pieces are to be found in the town at the present day; many, however, have been so transformed as to conform to the more modern inventions.

At a town-meeting held September 9, 1851, the town voted to accept an invitation from the town of Acton to join with them in the celebration of the erection of a monument, which at that time was being erected to the memory of Captain Isaac Davis and others of Revolutionary fame, and also chose a committee of five persons, viz.: Benjamin Barrett, Joel Boynton, John Jacobs, True Wiggin and Rev. Seth W. Banister, to confer with the committee of Acton, and make the necessary arrangements.

At a town-meeting held March 18, 1875, the town was called upon to consider and take action in reference to an invitation extended by the towns of Concord and Lexington, inviting the town of Carlisle to join with them in the celebration of the centennial anniversary of the battles of said Concord and Lexington.

The following are extracts from resolutions which were accepted and adopted by the meeting and which were virtually carried into effect by the town, viz.:

"WHEREAS, The citizens of the town of Concord, on the 19th of April next, propose to celebrate in a suitable manner the centennial anniversary of the battle of Concord, and have invited us to join with them in that celebration,

"And whereas, many of our ancestry largely participated in the events to be commemorated, therefore

"Resolved, That we cordially accept the invitation and will attend the celebration as an organized body, with music and an appropriate banner, and that we will invite the Spaulding Light Cavalry to act as our escort on the occasion, etc."

A committee was chosen by the town to make all necessary arrangements, who were as follows, Stephen Taylor, Selar Simons, Geo. F. Duren, E. S. Hutchins, L. M. Green, N. A. Taylor, H. W. Wilson, John W. Heald, George P. Nickles.

The committee procured the services of the Dunstable Cornet Band, who furnished music, and also had especially painted for the occasion a large banner on which was represented, in life-size, a soldier in Continental dress.

An invitation to act as escort for the citizens of the town was accepted by the Spaulding Light Cavalry, and thus the town added not a little to the display of the occasion.

The sum of \$500 was raised by the town and appropriated for the expense of the celebration, of which sum the amount of \$348 was used by the committee to pay the bills.

Three delegates from the town, viz., Paul G. Forbush, Albert Boynton and Benjamin F. Blaisdell, were

chosen to represent the town at Lexington, and be present at the centennial exercises.

The first action taken by the town in its corporate capacity in matters relating to the Rebellion was at a town-meeting assembled on May 11, 1861, when it was voted to allow and pay each person who already has, or may hereafter, enlist, to the credit of the town, and be mustered into the service of the United States not exceeding ten in number, the sum of nine dollars per month, in addition to the amount allowed by the government compensation to commence from the date of their being mustered into said service, and continue for a term not exceeding one year.

A committee of five chosen by the town were as follows, viz., B. F. Heald, Artemas Parker, Selar Simons, Thomas Green and B. P. Hutchins, who were authorized to draw on the treasurer and disburse the money necessary to carry out the provisions of the foregoing vote.

July 21, 1862, a town-meeting was called. The warrant contained but one article, which was "to see what inducements the town will hold out to obtain the town's quota of men required by the late call of the government, otherwise than by drafting."

The town voted to raise the sum of \$900 and to pay each volunteer, not exceeding nine in number, who shall enlist for three years, the sum of \$100 each, when mustered into the United States service.

Rev. Josiah Ballard, Artemas Parker, Selar Simons, S. H. Robbins and H. Prescott were chosen a committee to canvass the town for volunteers.

August 27, 1862, the town voted to pay the same amount of bounty to nine months' volunteers, for the purpose of encouraging enlistments, and Asa Nickles, C. T. Worthley and W. A. Ingham were chosen as an enlistment committee.

September 8, 1862, voted to pay those persons credited to the quota of the town, and now in the service, who have not received any bounty from the town, the sum of \$100 each, and it was also voted to pay an equal sum as bounty to any citizen of the town who would enlist to the credit of the town, and help to fill the present call for nine months' men.

October 6, 1862, the bounty for nine months' men was increased to \$150, and E. S. Hutchins, W. A. Ingham and C. T. Worthley were chosen a committee to raise recruits.

March 2, 1863, the town raised the sum of \$1000 for the purpose of aiding the families of volunteers, and the following month the selectmen were authorized to pay the families of deceased or disabled volunteers such sums as they might believe their necessities to require, but not to exceed six dollars a month to any one family.

April 4, 1864, the town voted to raise \$1000 as aid for families of volunteers, and also the sum of \$125 for each volunteer or drafted man to the number of six, which was the remaining part of the quota of said

town, under an order of the President, issued subsequent to March 1, 1864.

Another call for men was issued by the President July 18, 1864; the town called a meeting of its citizens the 3d of the following August, when it was voted to raise and appropriate the sum of \$125, to be given to each man who would enlist and help to fill the town's quota. On the 15th of the same month the town voted to pay the said bounty of \$125 in gold.

January 12, 1865, the town voted that the selectmen be authorized to enlist as many men into the service of the United States as may be required to fill the town's quota, on any call that may be made prior to March 1, 1865.

The town treasurer was also authorized to borrow such sums of money as were required to pay for the same.

The town furnished a surplus of men over and above all demands. None were commissioned officers. Three were drafted in the year 1863, viz.: Joseph Forbush, James T. Powers and Timothy Wilkins, each of whom furnished a substitute. Thirteen either died or were killed during their term of enlistment.

The following is a list of soldiers who were residents of the town, and helped to fill the town's quota in the War of the Rebellion. Upwards of thirty non-residents and strangers were passed to the credit of the town, having been hired or otherwise engaged to help fill the quota, whose names, for want of space, do not appear here. Also there were several native or resident citizens who participated in the war, but enlisted to the credit of other places, whose names do not appear in the following list.

Adams, Albion A., must. in Aug. 15, '62, 1st Co. Sharpshooters; disch. June 30, '65; re-enlisted Co. A, 1st Bat. Frontier Cavalry, Dec. 30, '64; sergeant.

Adams, John Q., must. in Aug. 15, '62, 1st Co. Sharpshooters; died at Harper's Ferry, W. Va., Sept. 20, '62.

Blood, John N., must. in July 2, '64, Co. C, 16th Regt.; disch. May 3, '64.

Blood, Wilham, must. in June 28, '61, Co. C, 16th Regt.; killed at 2d battle Bull Run, Aug. 29, '62.

Blood, William H., must. in Oct. 16, '62, Co. G, 47th Regt.; disch. Sept. 1, '63.

Curtier, Edwin C., must. in Nov. 1, '64, Co. B, 32d Regt.; disch. May 14, '65.

Champney, John H., must. in March 21, '62, 1st Co. Sharpshooters; disch. Jan. 26, '64.

Chandler, George, must. in Aug. 5, '62, Co. G, 33d Regt.; disch. Aug. 20, '64.

Duren, Thomas, must. in Aug. 11, '62, Co. H, 33d Regt.; died at Madison, Indiana, May 16, '64.

Duren, Frederick, must. in Jan. 27, '63, Co. E, 2d Cavalry; disch. July 20, '65.

Dutton, Myranda, must. in July 31, '62, Co. H, 33d Regt.; killed at Dallas, Ga., May 25, '64.

Esty, John M., must. in July 31, '62, Co. H, 33d Regt.; died in hospital at Chattanooga, Tenn., Aug. 5, '64.

Forbush, Charles, must. in Oct. 16, '62, Co. G, 47th Regt.; disch. Sept. 1, '63.

Gilson, Albert A., must. in Aug. 5, '62, Co. E, 33d Regt.; disch. June 11, '65.

Green, John P., must. in Aug. 7, '62, Co. H, 33d Regt.; disch. June 11, '65; corporal.

Howe, John, must. in Nov. 4, '61, Co. B, 32d Regt.; disch. Feb. 18, '63.

Hutchins, Edward S., must. in Oct. 16, '62, Co. G, 47th Regt.; disch. Sept. 1, '63.

Hutchins, Freeman, must. in Sept. 17, '61, Co. E, 26th Regt.; disch. Aug. 26, '64.

Hutchins, Samuel M., must. in July 11, '63, Co. H, 12th Regt.; disch. Feb. 15, '65; transferred to 112th V. R. C.

Heald, Alfred, must. in Nov. 4, '61, Co. B, 32d Regt.; disch. Dec. 11, '64.

Heald, Austin M., must. in Aug. 15, '62, 1st Co. Sharpshooters; died at Falmouth, Va., Jan. 30, '63.

Heald, Timothy W., must. in March 24, '62, 1st Co. Sharpshooters; disch. Oct. 31, '62.

Heald, Warren F., must. in Feb. 3, '64, 2d Cavalry; rejected recruit.

Hodgman, Amos H., must. in Nov. 4, '61, Co. B, 32d Regt.; disch. Jan. 6, '63.

Hodgman, Luther F., must. in Sept. 17, '61, Co. E, 26th Regt.; disch. Oct. 24, '62.

Ingham, William A., must. in Oct. 16, '62, Co. G, 47th Regt.; disch. Sept. 1, '63; 2d enlistment, July 15, '64, Co. G, 6th Regt.; disch. Oct. 27, '64.

Litchfield, William F., must. in July 2, '61, Co. C, 16th Regt.; disch. July 27, '64.

Litchfield, George M., must. in July 2, '61, Co. C, 16th Regt.; disch. July 27, '61.

Litchfield, James J., must. in Oct. 9, '61, Co. E, 26th Regt.; disch. Oct. 24, '62.

Litchfield, Albert, must. in July 12, '61, Co. B, 15th Regt.; disch. Oct. 12, '62.

Locke, Warren P., must. in Nov. 28, '61, Co. B, 32d Regt.; killed at Bethesda Church, Va., June 3, '64.

Monroe, George V., must. in Oct. 15, '62, Co. G, 47th Regt.; died at Carrollton, La., Aug. 9, '63.

Moore, William, must. in Mar. 7, '62, 1st Co. Sharpshooters; died at Fort McHenry, N. Y., Sept. 9, '62.

Monroe, William H., must. in Oct. 16, '62, Co. G, 47th Regt.; disch. July 3, '63.

Maybury, Orren, must. in July 2, '61, Co. C, 16th Regt.; re-enlisted Dec. 27, '63, and transferred to Co. E, 11th Regt., July 14, '65.

Nickles, Otis, must. in Jan. 4, '64, 7th Battery L. A.; died in Barracks Hospital, New Orleans, La., July 16, '64.

Nickles, George P., must. in Nov. 4, '61, Co. B, 32d Regt.; disch. Nov. 27, '64.

Northum, William H., must. in Aug. 7, '62, Co. H, 33d Regt.; disch. June 11, '65.

Nickles, Charles E., must. in Oct. 16, '62, Co. G, 47th Regt.; disch. Sept. 2, '63.

Nickles, Abel, must. in Dec. 22, '63, Co. K, 2d Heavy Artillery; disch. Sept. 3, '65.

Norcross, George E., must. in July 2, '61, Co. C, 16th Regt.; disch. July 27, '64.

Osgood, Isaac P., must. in Nov. 4, '61, Co. B, 32d Regt., disch. Dec. 14, '63.

Parker, Sidney A., must. in July 15, '64, Co. G, 6th Regt.; disch. Oct. 27, '64.

Prescott, John H., must. in Nov. 4, '61, Co. B, 32d Regt.; disch. Feb. 9, '64, corporal.

Robbins, Daniel W., must. in July 2, '61, Co. C, 16th Regt.; re-enlisted Dec. 27, '63, and transferred to Co. E, 11th Regt.; disch. July 14, '65, 1st sergeant.

Robbins, Charles H., must. in Oct. 16, '62, Co. G, 47th Regt.; disch. Sept. 1, '63.

Stevenson, Thomas G., must. in May 1, '61, Co. G, 5th Regt.; disch. June 8, '61; re-enlisted July 2, '61, Co. C, 16th Regt.; disch. Dec. 29, '62.

Webster, Benjamin H., must. in Oct. 16, '62, Co. G, 47th Regt.; disch. Sept. 1, '63.

Wiggin, Francis M., must. in Feb. 15, '62, Co. F, 13th U.S. A.; died at Memphis, Tenn., Oct. 16, '63.

Wiggin, George W., must. in Aug. 31, '62, Co. G, 6th Regt.; disch. June 3, '63.

Wilkins, James W., Jr., must. in Sept. 6, '61, Co. B, 32d Regt.; disch. Nov. 27, '64.

Wortley, Charles T., must. in Oct. 16, '62, Co. G, 47th Regt.; disch. Sept. 1, '63.

Wortley, Hiram P., must. in Oct. 16, '62, Co. G, 47th Regt.; disch. Sept. 1, '63.

SOLDIERS' MONUMENT.—The erection and dedication of a soldiers' monument is an incident in the history of the town long to be remembered, and at the same time it was but the performance of an incumbent duty of a grateful posterity to those who sacrificed even life and limb, which resulted in finally eradicating one of the greatest evils which could exist in any nation.

The circumstance which led to the erection of this monument was a bequest which, with accumulations, amounted to the sum of \$653.70, and which was left to the town by the late Mrs. Lydia A. G. Farrar. At a town-meeting held March 20, 1882, the town voted "that the town treasurer be authorized to receive the legacy and hold the same until further action by the town."

The donor by her will made no special request in reference to what disposition the town should make of the donation, thus making it incumbent upon the town to determine how it should be appropriated. At a town-meeting held November 7, 1882, the town voted "that the money given the town by the will of the late Mrs. Lydia A. G. Farrar be appropriated for the purpose of erecting a Soldiers' Monument, in the centre of the town, on or near the spot where the guide-post now stands," and also chose Messrs. Thomas A. Green, Sidney A. Bull and Edward S. Hutchins as a committee to carry out the provisions of said vote.

At a subsequent town-meeting held March 19, 1883, the town voted to raise and appropriate the sum of \$300 for the purpose of putting in a foundation for the monument, and for fencing and grading around the same.

The committee chosen to erect the monument, believing the amount of money at their disposal too small for the purpose of furnishing a monument sufficiently ornamental, and that would prove acceptable to the town, suggested that an invitation be extended to Miss H. L. C. Green, a sister of the late Mrs. Farrar, to add enough to the amount of her sister's bequest to increase it to the sum of \$1000, which suggestion was favorably entertained by her, and the money in due time was paid over to the committee. Consequently they had at their disposal \$1000 to be used for the monument, and proceeded to correspond with various contractors, inviting designs and specifications for monuments that could be erected for that sum.

Several responded to the requests of the committee, allowing them a good variety of designs to select from. Their decision was, however, decidedly in favor of a design furnished by Andrews & Wheeler, of Lowell, which was a granite pedestal, surmounted by a marble statue, or, to describe more minutely, included a triple receding base of Concord granite five feet two inches square on the foundation, resting on which is a polished die of Rockport granite, on the east side of which is the inscription: "Died in their country's service," followed by names of soldiers from

the town who lost their lives during their term of enlistment, which list is completed on the north side.

The southerly side bears the following appropriate words :

"To the roll-call they make no response,
Carlisle honors their deeds of valor
And dedicates this monument
To perpetuate their names to posterity."

On the back or westerly side is inscribed :

"Presented to the town of Carlisle by Mrs. Lydia A. G. Farrar and Miss Hannah L. C. Green.

Dedicated August 29, 1885."

This die is surmounted by a fine statue of Italian marble, seven and one-half feet tall, weighing 3000 pounds and representing the "Goddess of Liberty," which was placed in position December 7, 1883, thus marking the completion of the monument as far as the contractors were liable.

On the base of the statue at the front side is the motto : "Let him who has won it bear the palm," and on the back or westerly side is inscribed "1861-1865." The entire height of the monument from foundation to top is fifteen and one-half feet.

The committee chosen by the town for the purpose, attended to grading and fencing the monument grounds, now known as Monument Square. Nearly 100 loads of loam were used to complete the grading, after which a fence of granite posts, connected by galvanized iron rails, was erected; a concrete walk was laid extending from the entrance on the north to the entrance on the south side of the grounds, passing in front of the monument, and the work of the committee was completed at an expense to the town of a few dollars more than the appropriation.

At a town-meeting held Monday, March 16, 1885, the town appropriated the sum of \$200 for the purpose of dedicating the soldiers' monument, and chose a committee of three, viz.: Daniel W. Robbins, Edward J. Carr and Sidney A. Bull, whom they authorized to attend to the duties of having the monument dedicated with appropriate ceremonies.

This committee attended to their duties, and, after due deliberation, decided on August 29th as an appropriate day for the dedication exercises, since that was the anniversary of the second Bull Run fight, in which one of those whose name appears on the monument lost his life in battle.

The committee spared no pains to make the affair the most elaborate of anything in the annals of the town, and were satisfied with the result.

The weather was complete,—a beautiful August day could not but add somewhat to the attraction of the occasion,—and it was estimated that a thousand or more people were in attendance.

The following were the officers and members of committees for dedication: President of the day, Daniel W. Robbins; Chief Marshal, Charles Forbush; Aids, E. A. Blanchard, T. M. Hammond, G. W. Page and B. F. Day; Decoration Committee,

Thomas A. Green, Frank Wilkins, George Nickles and Mrs. T. A. Green, J. E. Bull, D. W. Robbins and S. A. Bull; Reception Committee, Major B. F. Heald, Lieutenant H. W. Wilson and James E. Taylor. The residents of the village exerted themselves to improve its appearance in every way possible, and it looked on dedication day as though it had been thoroughly swept and dusted. The monument grounds were made to appear the best possible, and the monument was tastily decorated with flowers, evergreen, and the national colors. Nearly every house in the village located on the line of march was, by invitation previously extended by the dedication committee, prettily decorated with flags, streamers and bunting.

The dedication exercises began at one o'clock P. M. by a parade, of which the following is the order of procession :

Chief Marshal and Aids.
Dunstable Cornet Band.
Troop F, Cavalry (dismounted).
President of the day, chaplain, orators and invited guests in carriages.
Concord, Massachusetts, G. A. R. Post.
Veterans on foot.
Citizens on foot.
Citizens in carriages.

The procession formed on the Common, and immediately took up the following route of march: From the Common down Boston Road, on the right of the monument, to the house of George F. Duren; countermarch passing monument on the right and up Lowell Road, beyond the house of William Green; countermarched to the monument; thence on Westford Road beyond the house of Daniel W. Robbins; left-wheel through Short Street to Concord Road; on Concord Road beyond the house of George P. Nickles; countermarch, passing houses of G. W. Page and M. Lee, to the Common. During all the time the procession was moving, minute-guns were fired from a cannon on the Common, under the direction of Mr. Nathaniel Hutchinson. At the close of the parade the assembly gathered under a large canvas tent, which had been procured by the committee for the occasion, and erected on the Common. Here took place the following exercises on the platform :

1. Invocation, by Rev. George E. Piper
2. Solo and Chorus—"Tenting To-night."
3. Selection by band.
4. Presentation of Monument to the town by Sidney A. Bull.
5. Reception of Monument for the town by John Q. A. Green.
6. Selection by band.
7. Oration by Hon. Charles H. Allen.
8. Solo and Chorus—"Marching through Georgia." Veterans invited to join in the chorus.
9. Remarks by invited guests.
10. Dedication Ode by S. A. Bull. Tune America. All invited to join.

With grateful hearts we come,
And sing of brave deeds done,
By those who fell
Full twenty years ago,
In conflict with the foe,
They helped to deal the blow
That saved our land.

They heard the call to arms,
 Left home with all its charms—
 A noble band,—
 And marched to beat of drum
 With armor girded on
 To face, 'neath Southern sun,
 A martialled foe.

The camp, the march, the fray,
 The charge, the victory,
 The comrades slain!
 And scarce it seems a day,
 Time speeds so swift away,
 Since were the blue and gray
 In war engaged.

Their deeds of valor done,
 The victory fully won,
 The sword laid down,
 Yon marble statue shall
 To future ages tell
 Of those who nobly fell,—
 Our honored dead.

At the close of the exercises on the platform the assembly were invited to partake of a collation which had been prepared by a committee chosen for the purpose, and which, for variety of dishes and elegance of arrangements, is seldom excelled. Invited organizations and guests of the town were tendered the preference at the tables, after which the town's people were served. The committee, after paying the bills incident to the celebration, had left in the town treasury the sum of \$4.07 unexpended, the entire cost to the town of dedicating the monument being \$195.93.

MEETING-HOUSE.—The church and the town, in the early history of the country, were identical. Every town had a church, which it supported by a tax levied on the inhabitants in the same manner as for the support of schools, highways and other town charges.

In the case under consideration the church had existed for nearly twenty years previous to the incorporation of the district, in the year 1780.

As will be remembered, the old District of Carlisle ceased to exist after a short period because of the difficulty and final inability of the inhabitants to determine upon or "prefix" a place for a meeting-house.

The same difficulty was obviated under the second act of incorporation, for, during the interval between the existence of the old and new District of Carlisle a certain piece of land, nearly square in shape and including an acre and a half, or the larger part of what is now known as the Common, was conveyed to a number of the inhabitants of the locality, "and to their heirs, executors, administrators and assigns for ever, for the *concomancy* of building a meeting-house for the public worship of God and other public uses." The above-named instrument was dated July 1, 1758. The gift was a worthy one, and should be the means of perpetuating the name of the donor to all future time.

About two years later, or in the year 1760, a meeting-house was built on the land given for the purpose, in order for the better accommodation, for the purpose

of religious worship, of those persons who lived on the outskirts of the several towns which found a centre near said location, and who subsequently were included within the bounds of the District of Carlisle.

It cannot be doubted that the above-named gift was the nucleus for the establishment of the first church building, the erection of which, it is more than probable, finally determined the location for the centre of the present town of Carlisle.

The first church, which was erected by voluntary contributions, stood near the location of what is now known as the Unitarian Church, and was a rude wooden structure, without clapboards or paint, and having only benches for seats, in which condition it remained until the year 1780, when the district was incorporated, and at which time it virtually became the property of the district by the consent of a committee of the society, to which many of the first petitioners belonged, it being mutually understood and agreed that all persons who should be incorporated with them in the proposed district should share equally all church privileges with those at whose expense the meeting-house had been erected, without being in any way liable for any expense incurred previous to date of incorporation.

No pastor was settled during this interval of twenty years, neither was there any church organization, and yet the Gospel was preached from Sabbath to Sabbath and supported by the listeners, many of whom paid in addition their regular minister rates in the respective towns to which they belonged.

During the year 1781 money was expended upon the meeting-house, giving it a more inviting appearance, and twenty-four pews were put in on the lower floor, which were disposed of by auction for the sum of \$950.50. The highest price paid was \$66.50 for pew No. 18, by Deacon Ephraim Robbins, and the lowest price was \$15 for No. 11 pew, which was struck off to Mr. John Robbins. The amount received was used to pay the expense of the repairs.

The church was organized Feb. 28, 1781, and then consisted of ten male and twenty-four female members. On the 17th of the following May the church voted unanimously to invite Rev. Paul Litchfield to become their first pastor, and at a meeting held May 25th, the inhabitants of the district, by a vote of 43 to 3, agreed to concur with the vote of the church, and also voted to give Mr. Litchfield the sum of one hundred and fifty pounds as a settlement, one-half of which sum it was voted to pay him within one year from the date of his acceptance of the call, and the balance in two years. It was also voted to give him as a salary the sum of eighty pounds yearly, to be paid in quarterly instalments, so long as he shall supply the pulpit in said Carlisle and remain their Gospel minister—both of said amounts to be paid in silver money. At a subsequent meeting it was voted to give Mr. Litch-

field twenty cords of wood a year, and to keep two cows and a horse for him until such time as he shall call for the interest of his settlement.

The church decided upon the 7th day of Nov., 1781, as a date that would be agreeable to them to have the ordination of Mr. Litchfield take place upon. And at a meeting held Oct. 3d the inhabitants of the district voted to join with the church as to the date they had selected.

The first communion was held December 31, 1781, when it was voted to require a written or verbal relation by candidates, before the church and congregation, of the religious exercises of their minds, before admission into the church.

This embarrassing regulation was so modified, two years later, as to permit it to be made before a committee of the church.

The doctrines contained in the confession of faith, and preached by Mr. Litchfield, were strictly Calvinistic. He continued to hold the office of pastor of this church until his death, dying in the full belief of that Christian faith which he had inculcated, and trusting in the hope which the Christian religion inspires.

The funeral took place November 7, 1827, and on the forty-sixth anniversary of his ordination. The funeral sermon was preached by the Rev. John H. Church, D.D., of Pelham, N. H. The interment was made near the centre of the Central Burying-Ground. A slate slab five feet tall by two and a half feet wide, with pillars carved on either side and a weeping willow tree shading an urn for top decoration, marks the spot. The following inscription appears on the stone:

"Erected to the memory of Rev. Paul Litchfield, Pastor of the church in Carlisle for the space of forty-six years, and deceased Nov. 5, 1827.

Æt. 75.

With firm, discriminating mind, zealous for the distinguishing doctrines of revelation, he stood fast in one spirit, striving for the faith of the gospel."

A similar stone is erected to the memory of his first wife, "Mary," which stands close beside the former.

At the annual March meeting of the inhabitants of the district in the year 1789, the eighth article in the warrant read as follows:—"To See if the District will agree to provide any Seats in the Meeting-House for those who may be disposed to set together for the Singing." It was voted "that those who may be Disposed to Set together for the purpose of Singing Shall have the two hind seats below," which seats were probably used for the purpose until the year 1798, when they were otherwise appropriated, and in response to a similar article in the warrant for the annual April meeting, it was voted "that the Singers have the fore seat and the Second Seat in the front gallery."

Considerable money had been appropriated by the town at one time and another to repair the meeting-house up to the year 1810.

A gallery had been built which contained nineteen pews, which were sold for the sum of \$58.12; the building had been clap-boarded and painted, stone underpinning had been provided, a pulpit erected, porches built, and the advisability of erecting a belfry and procuring and suspending a bell was a question which had for some time agitated the minds of the people.

It was on the 26th day of May in the year last mentioned that the church was struck by lightning and entirely consumed.

Nine days later, viz.: on the 4th of June, 1810, the inhabitants of the town qualified by law to vote in town affairs were warned to meet on the Common, near where the meeting-house formerly stood. At this meeting the town voted to build a new meeting-house about the size of the old one, and to build on the Common belonging to the town, near where the former meeting-house stood.

At a subsequent meeting a building committee of three were chosen by ballot, viz.: Asa Parlin, Esq., Nathan Green, Jr., and Thomas Heald. Said committee contracted with Elijah Stearns to prepare and set the underpinning and door-steps for the sum of \$235, and with Messrs. Joseph Wyman and John Sawyer, Jr., for the sum of \$4230, to erect the building. When completed the total cost was \$4866.81, which amount included various incidental charges, such as paint and painting, numbering the pews, and also a bill of \$38.28 for liquor.

There were 44 pews on the lower floor, 43 of which were sold by auction for the sum of \$2301.75. Also, 16 pews in the gallery were sold at the same time for \$444.75, making a total of \$2746.50, which, added to the sum of \$2000, which was raised by taxation by the town, nearly paid the cost of the building. One pew, back of the door on the left-hand side of the gallery, was, by vote of the town, appropriated for the use of people of color.

In consideration of the great loss sustained by the town, the State tax, amounting to \$154.66, for the year 1810, was, by an act of the General Court, remitted.

At an adjourned town-meeting, held on the Common, Nov. 18, 1811, about the time of the completion of the new building, it was voted "that the Meeting-house be dedicated to Almighty God on the second Sabbath of December following," and also, "that the town give those persons who may go and work at the meeting-house, to clear away the chips and trash around the same, what drink they may need."

The religious services at the dedication were conducted by the pastor, Rev. Paul Litchfield.

The annual town-meeting called for Monday, March 2, 1812, was the first one held in the new building, and on the following month the town raised the sum of \$350 to procure a bell for the meeting-house.

After the death of Rev. Mr. Litchfield a spirit of discontent appears to have sprung up, and a number

of those who worshiped in the town under the pastorate of the late pastor had withdrawn their names from the parish, or, as it was usually called, "signed off," and joined some out-of-town society.

Those who "signed off" were, by their own request, considered as disconnected from the church, as well as released from all pecuniary obligation to support religious worship in the town.

The spirit of discord continued to increase until the former relations between town and church ceased to exist, and each was conducted as a separate institution.

The last money raised by the town in its corporate capacity, for the purpose of supporting the Gospel, was on Nov. 14, 1831, being \$300 in amount, which was appropriated for the purpose of paying Rev. Stephen Hull his salary and other parochial charges.

We have already referred to the immediate successor of the first minister of the town, who was also the last to receive support from the town. His successor was the Rev. George W. Stacy, who was settled over the society May 4, 1836. Subsequent to his pastorate other clergymen have been hired to fill the pulpit from time to time, among whom are the Rev. James T. Powers, who has been engaged at two different times; Rev. Mr. Hervey, Rev. J. S. Smith, Rev. Alexander Dight, Rev. James J. Twiss and Rev. George F. Piper, all of whom, since the first pastor, with the exception of Mr. Dight, have entertained the Unitarian belief.

During the year 1852 the church was remodeled within and thoroughly repaired without, at an expense of \$1200. A floor was laid across the auditorium at the height of the galleries, thus making two rooms of what formerly constituted but one. Pews, pulpit, etc., were placed in the upper division, which has since been used for church purposes, the lower part serving for a hall.

The old spire, which had stood for fifty-seven years, was substituted, in the year 1868, by the present one.

The Unitarian Society have a fund of \$2000, the income of which is used to support public worship, and was given in about equal proportions by the following-named persons, viz.: Simon Blood, Jr., Mr. Thomas Green, Mr. William Farrar and Mrs. Mary G. Scott.

NOON HOUSE.—A building the location of which was a little northwest of the Unitarian Church, came into existence soon after the incorporation of the district in the following manner. An article appeared in the warrant for the annual district meeting held March 3, 1788, which read as follows:

"To See if the District will give liberty to Capt. Issachar Andrews and Lt. Zebulun Spaulding to build a House on the meeting House Lott for their Convenience on Sabbath Days."

The request was granted and a small building was erected, the owners of which, it is said, provided a lib-

eral supply of wood, cider and apples, causing it to be heated on Sabbath days in cold weather, whither they, with such of their friends as they chose to invite, would repair and spend the noon hour, chatting and eating a luncheon which it was customary to carry. This was previous to the introduction of the modern custom of heating churches. This building was an adjunct of the church for perhaps forty years, and stood for upward of fifty years, when, having outlived the purpose for which it was erected, all of a sudden at midday it was razed to the ground by human strength. In the year 1837, at a town-meeting held November 13th, it was voted "that the selectmen be a committee to attend to the removal from the common of the ruins of the old Noon House, so called."

Thus ended the existence of an institution peculiar to those days and perhaps to this town.

UNION CALVINISTIC CHURCH.—The first regular church meeting after the death of Rev. Mr. Litchfield appears to have been called for November 26, 1827, at the house of Deacon John Jacobs. At this meeting it was voted that Deacon Jacobs take charge of the church records and the donation of books bequeathed to the church by their late pastor.

Another meeting of the church was held at the house of Deacon John Green, June 9, 1828, at which it was unanimously voted to give the Rev. Joseph W. Clary, who sympathized with the late Mr. Litchfield in his theological views, a call to settle with them in the Gospel ministry. At a town-meeting held the 19th inst. the town by vote non-concurred with the church, because of a prevailing sentiment in favor of Unitarianism, which at that time was attaining favor in the minds of the people.

Finally a committee was chosen by the town to supply the pulpit with preaching. Orthodox preachers were employed for a few weeks, after which those usually employed were of Unitarian sentiment. Various movements took place between the town and church, until at length the Rev. Ephraim Randall, something of a popular preacher, but Unitarian in belief, was employed, and a paper was put in circulation to obtain subscribers to give him a call to settle over the church and town. Those of the inhabitants who were orthodox in belief, finding the majority of the town were determined to settle a Unitarian minister, and would not hear to the proposals made to them by the church, took advantage of the then recent law, and twenty in number "signed off" to the Trinitarian society in Concord, under the care of the Rev. D. L. Southmayd, in order not to be holden to pay any part of the expense of settling or supporting a minister who entertained religious views not consistent with their own.

The church continued to hold religious meetings at private houses on Sabbath days, and always held their communion seasons in the town.

Efforts were put forth and proposals were made by the church to bring about some amicable arrangement with the town, in order that a union of feeling

between church and town, similar to what had existed in years past, might exist again; but all to no effect, and to crown the whole, the town, at their annual meeting, in March, 1830, chose a committee to take all the property belonging to the church into their possession, which was afterwards reluctantly handed over. Finding there was not the least prospect of effecting a union with the Unitarian element in the town, a sufficient number (twelve in all) of those who had previously formed themselves into a religious society known as the Union Calvinistic Society, and who were also legal voters in the town, applied to Jonathan Prescott, Esq., of Westford, to grant a warrant in due form of law to Deacon Jacobs, to notify all the male members of said society to meet at the house of Capt. Aaron Fletcher, on Saturday, November 20, 1830, at one o'clock P.M., for the purpose of organizing according to law, and choosing all necessary officers to manage the business of said society.

The meeting was called at the time and place above-mentioned, and was called to order by the justice of the peace who issued the warrant.

Mr. Samuel Boynton was chosen moderator, when the following officers, who were also the first officers of the society, were chosen: Clerk, John Jacobs; Treasurer and Collector, John Jacobs; Prudential Committee, Harris Bingham, John Jacobs and Reuben Foster. Twenty male members then signed the constitution of the society, and the above date, viz., November 20, 1830, will be remembered as the date when the Union Calvinistic Society was organized.

Money was raised by subscription for the purpose of building a church; and it was voted by the society, February 28, 1831, to build a house of worship thirty feet long, twenty-eight feet wide and fifteen feet high, which was completed early in the fall of 1832, at an expense of nearly \$800.

Arrangements were made and the house was dedicated to God and the purposes of religious worship October 4, 1832. Rev. Mr. Blanchard, of Lowell, preached the dedicatory sermon, and meetings continued to be held for a space of three days afterwards, with favorable results to the church and society.

The building was located on the south side of the Common, in the centre of the town, the same location as that occupied by the Orthodox church at the present date. The land surrounding it, and on which the church stands, in area a quarter of an acre, more or less, was leased by said society for a term of 999 years, of Mr. Isaac Duren, with the express understanding that said society would, within the space of two years, erect a building on said premises to be consecrated to the solemn worship of Almighty God, and that the doctrines supported shall be the same as were embodied and maintained by the first settlers of this country, and which are now called Orthodox, or

Evangelical, being the same as said society did at that time openly profess.

Said lease is dated April 6, 1831, the terms of which were that the sum of \$20 rent should be paid upon the delivery of the lease, and afterward the sum of one cent for each and every year during the existence of said lease.

The pulpit was supplied for a time by various clergymen who were hired, and it was on the 22d day of April, 1833, at a regular meeting of the church and society, that a unanimous vote was passed to call the Rev. Abel Patten to settle with them in the Gospel ministry, and the call concludes with the following terms and conditions, viz.: "And, that you may be in a good measure free from worldly cares and avocations, we, as a church and society, do hereby promise and oblige ourselves to furnish you with board, a room, fuel, lights, etc., the use of horse and chaise, when necessary, and to pay you annually, in addition to \$100 from the Domestic Missionary Society, the sum of \$200 in regular quarterly payments, during a period of two years."

The foregoing invitation was accepted, and an ecclesiastical council was convened just one month later, or on the 22d of the following May, and the Rev. Abel Patten was installed the first pastor of the new society.

The following is a list of those who have subsequently served the church and society as pastor, with the date of their engagement:

Rev. Preserved Smith	Installed August 31, 1836
Rev. George W. Thompson	Installed July 16, 1845
Rev. Seth W. Bamster	Installed April 27, 1848
Rev. John Lawrence	Installed May 5, 1853
Rev. Josiah Ballard	Installed September 15, 1859
Rev. William H. Dowden	Installed February 13, 1866
Rev. Moses Patten	Installed October 27, 1870
Rev. Asa Mann	Hired 1876
Rev. F. M. Sprague	Hired 1877-79
Rev. James Walker	Hired 1879-88
Rev. Joseph Hammond	Hired 1889

A parsonage was built by the society in the year 1848, at an expense of \$1700. Three bells have been owned by the society, the first of which was bought in the year 1851. The first two became cracked; the one in use at the present time was purchased in the year 1867. Repairs were made on the meeting-house in the year 1866 to the amount of \$907.08, and in 1882 extensive repairs were made, costing \$1700, after which the building was rededicated August 20, 1882; the dedicatory sermon was preached by Rev. Russell H. Conwell before a crowded house.

A fund of \$7000 was left the society by the will of the late Abel Taylor, the income of which is to be used for the support of preaching.

January 1, 1890, the church numbered fifty-seven members in good and regular standing—twelve males and forty-five females—eleven of whom were non-residents.

CHAPTER LV.

DUNSTABLE.

BY REV. HENRY M. PERKINS.

Present condition of the Town—Topography—Business Interests.

NOT many towns in our Commonwealth of the size of Dunstable can present a history richer in varied material.

Descendants of the early settlers have an interest in the remote history of the town. The general reader, however, shares with them in a desire to know its present condition.

Dunstable is located in the northerly part of Middlesex County, and is one of the border towns of the State. Nashua, N. H., joins it on the north; Tyngsborough on the east and southeast; Groton on the south, and Pepperell on the west.

The town is naturally healthful, and the climate promotive of vigor and hardihood, as a few examples will show.

Among recent deaths was that of *Mr. Benajah Parkhurst*, a much respected citizen. He died at the age of ninety-four. For several winters previous he was accustomed to saw most of the wood used in his family. He was a skillful carpenter, and in his prime was noted for coolness and self-possession when walking on lofty beams. *Mr. James Woodward*, another valued citizen, died at the age of eighty-eight. He was able to perform much of the work at his grist-mill till within a year of his death. Among other feats of his youthful days was a walk to Boston, the distance of thirty-three miles. After having attended to his business he returned to Dunstable the same day. He reached home after dark, but not too late for a good night's rest. Among living representatives is *Mr. Jonas Kendall*, the skillful and well-known civil engineer. Though now a resident of Framingham, he has evidently carried with him the vigor of his native air. At the age of eighty-five his services were in demand for the inspection of reservoirs and the supervision of new and important works in different parts of the State. *Mr. Andrew Spaulding*, about seventy years of age, is an active man in religious and business circles in Groton, Mass.

As a summer resort Dunstable possesses some rare attractions. From several localities of the town wide views are obtained. Though not a hilly town, as compared with some places in New Hampshire or Vermont, the surface is undulating, with now and then a hill of considerable height. From such points charming views open before the eye. In the distance is Mt. Wachusett, round and wooded. The intervening landscape presents many beautiful hills and dales, dotted with peaceful farms, pleasant homesteads and an occasional spire pointing heavenward. Many of the New Hampshire hills can be clearly seen,

and among them, on a bright day, noble Monadnock's lofty peak. In another direction is the smiling Merrimac, and Lowell with its teeming industries.

Dr. Walter Wesselhoft, of Cambridge, a man of wide observation, has recently purchased land with the intent of building. His family have boarded in the place for several summers. He has been accustomed to come during that season as often as the claims of professional duty would permit. The residents of the town, mostly occupied with farming interests, have not given thought to the subject of making this place a summer resort. Yet many are beginning to realize that the town possesses natural advantages in that respect. It is near several large centres, yet removed from their bustle and noise. An early train takes passengers to Boston, where nearly the whole day can be spent before returning on the evening train. The Dunstable station of the Nashua, Acton and Boston Railroad is within half a mile of the village. The station at Tyngsborough, on the Boston and Lowell Railroad, is three and a half miles distant.

Dunstable has several beautiful hills which diversify the beauty of its scenery.

FLAT ROCK HILL, in the northerly part of the town, commands a fine view of Salmon Brook. It is now sending forth its wealth of granite. Within about a year, Lemay & Tetro have been operating a quarry quite near the railroad track, by which there is direct transportation to their granite works in Nashua, N. H.

BLANCHARD'S HILL rises west of the former and is a favorite resort for berry parties in the summer. From its summit may be seen several distant church spires. A cool, clear trout-brook makes its way at the base of this hill.

On the opposite or eastern side of Salmon Brook rises a well-cultivated eminence, over which extends one of the roads to Nashua. The southerly part is called ROBY and the northerly part KENDALL HILL. On this elevation there are a number of thrifty farms.

Directly east of this is the wooded eminence called NUTTING'S HILL, which has the height of two hundred feet and affords a delightful prospect of the surrounding country.

FOREST HILL is in the southeast angle of the town. It is the highest point of land in Dunstable, and was made a station in the trigonometrical survey of the State. A splendid view is here obtained of the Tyngsborough forests, of the Merrimack River, and of Lowell in the east, while toward the west, distant towns and mountains in New Hampshire can be seen. A good road extends nearly to the summit.

HORSE HILL, partly in Groton, overlooks Massapoag Pond and the valley of Unquety Brook; and WALL HILL, near the preceding elevation, was divided for the railroad bed, when a fine specimen of blue clay was brought to light, which may prove serviceable.

BOUND MEADOW HILL, in the northwesterly part of the town, is said to have received its name from the circumstances that when Groton was assaulted by the Indians during Philip's War, a pack of hounds, used by the English, pursued some of the savages to this hill, on which two of them were slain.

SLATESTONE HILL is a picturesque height on the right bank of Nashua River, composed of slatestone, and covered largely with timber.

SPECTACLE HILL, so named from its resemblance to a pair of spectacles, rises in the northeast part of the town and extends into Nashua, N. H. A few other hills add to the beauty of the town and furnish a variety of soil.

WATER SUPPLY.—The town is well supplied with water. In addition to the saw-mills now operated, there are several places where good water-power might be utilized.

The chief tributary of Nashua River from Dunstable is *Unquety*, once called *Unquetynasset Brook*, a little mill-stream.

The central part of the town is well drained by the *Salmon Brook*, a valuable stream that, flowing from Massapoag Pond, pursues a northerly course through the Lower Massapoag Pond, and dividing the township nearly in the middle, empties into the Merrimac River at what is called the "Harbor," in Nashua. It receives two tributaries from the west, one of which, called *Barnes Brook*, furnishes motive-power for Mr. George Parkhurst's saw-mill. The ancestors of Mr. Parkhurst owned and occupied the same land dating from a remote period. Now there are those of the sixth generation living there. The other tributary, known as *Joint Grass Brook*, after receiving the water of Spring Brook, turns the grist and saw-mill of Mr. Daniel Swallow. This mill is operated both by water-power and steam. The gross receipts of the business in a year's time amount to \$10,000.

Black Brook flows into Salmon Brook from the east, and on being augmented by two or three small streams, forms motive-power for the grist and saw-mill now owned by the Woodward estate, near the centre of the town. Work is well done at all these mills and at the lowest current rates.

There is a fine mill privilege on the Salmon Brook, where it issues from Massapoag Pond at what is called "The Gulf." There is here a dam, ten feet in height, over which at present the water passes uselessly. Any company with manufacturing interest in view, but undecided as regards location, would do well to make inquiry about this mill privilege.

Massapoag Pond, having an area of more than one hundred acres, lies partly in Dunstable, Tyngsborough and Groton. It is formed by the waters of Cowpen Brook from Groton. A stone post on an island in the westerly part of the pond marks the boundary of these several towns.

The industrial interests of the town are, for the most part, agricultural, and in this respect the source

of greatest income is from milk-producing. A car stands ready at the railroad station and takes about 800 gallons to Boston every morning, leaving at seven o'clock. The business of the car is owned by Tower, Whitecomb & Co., of Boston, and is conducted by Mr. Charles H. Porter, of Dunstable.

The village is very pleasantly located, with diverging roads centering near the store and post-office.

The store is kept by Mr. Owen Parkhurst, who has an assortment of such goods as are usually kept in a country store. He aims to please his customers in regard to price and quality of goods, and thus gives general satisfaction. The postmaster is Mr. Libui Parker. He has held the office for several years. It is conceded to him by general consent, regardless of political preferences. Mr. Parker is well acquainted with the duties of his office. Nearly opposite the store is the Congregational Church, of which Rev. Henry M. Perkins has been pastor for nearly five years. This church is enjoying a fair degree of prosperity. The edifice has recently been much improved and beautified. Rooms have been added to the vestry for religious and social purposes. Public worship in this church is regularly observed every Sabbath.

The only other religious society in active operation is the Universalist. At present the members of this parish worship in Parker's Hall. Services are frequently held.

Miss Clara P. Jewett is librarian of the growing and well-kept town library, which now contains 1800 volumes.

There are five school districts in the town. In view of the small number of scholars in two of these, it has for some years been deemed best to hold the schools in three districts. The town affords transportation for scholars from the smaller districts to the schools of the adjoining larger ones. Good common school advantages are thus afforded; yet it is hoped by some that the town will, at a future day, concentrate its educational work in one central graded school which will accommodate all its scholars.

At present William P. Proctor is town clerk, Arthur N. Hall treasurer, Daniel Swallow, Dexter Butterfield and George W. Chaney are selectmen, and Henry J. Tolles, Jonas C. Kendall and Martha A. Davis are School Committee.

Mr. James M. Swallow was elected in the fall of 1889 Representative to the General Court from the Thirty-first District. He was born April 14, 1821, is one of the largest land-holders of the town, and is one of the trustees of the City Savings Bank in Nashua, N. H.

Mention should not be omitted of our beautiful granite drinking fountain, conveniently located at the centre of the village. It is an ornament of which any town might justly be proud. This was the gift of Mr. Jonas H. French, of Boston, and was esti-

mated to cost over \$1000. The ancestors of Mr. French were from Dunstable. The gift was granted on condition that the town should undertake the expense of bringing water. This condition was gladly accepted. The water is brought in iron pipes from Chaney's Hill, the distance of half a mile.

A general impression being thus gained of the town in its present condition, our thoughts may now be directed to such facts and circumstances as pertain to its early history and to the intervening years. Much of the information given in the following chapters is based upon the full and reliable "History of Dunstable," by Rev. Elias Nason, published in 1877.

CHAPTER LVI.

DUNSTABLE—(Continued).

ORIGIN AND EARLY SETTLEMENT—1643-1723.

SOME New England towns were founded immediately on the landing of the colonists, out of lands conferred on them by their charter. Others were made up by grants of land to an offshoot from the parent colony, whose enterprise prompted to the organization of a new town. Others owed their origin to grants of land which at different dates were made to individuals and corporations, for farms and other purposes, these grants being afterwards consolidated into townships. The town organization known as Dunstable affords an example of this last-mentioned class. It comprised some of the best portions of New England. The owners of these extensive farms were for the most part leading men in the Colony of Massachusetts Bay; and, having conferred together, they presented to the General Court a petition asking to be incorporated as a town, in order that as such they might be of greater service to the country. This petition was granted by the General Court on the 16th day of October, 1673.

Capt. Jonathan Danforth, of Billerica, a noted land surveyor, was appointed to make a plan of the new territory. He completed the survey in May, 1674, and thus described the boundaries:

"It lieth upon both sides of the Merrimack River, on the Nashaway River. It is bounded on the South by Chelmsford, by Groton line, partly by country land. The westerly line runs due north until you come to Souhegan River, to a hill called Dram Cup Hill, to a great pine near to ye said river at ye northwest corner of Charlestown School farm, bounded by Souhegan River on the North, and on the east side Merrimack it begins at a great stone which was supposed to be near the northeast corner of Mr. Brenton's land, and from thence it runs south-southeast six miles to a pine tree marked 'F,' standing within sight of Beaver Brook; thence it runs two degrees west of south four miles and a quarter, which reached to the south side of Henry Kimball's farm at Jeremie's Hill; thence from ye south-east angle of said farm, it runs two degrees and a quarter westward of the south, near to the head of Long Pond, which lieth at ye head of Edward Colburn's farm, and thus it is bounded by ye said pond and ye head of said Colburn's farm; taking in Capt. Scarlett's farm so as to close again, all which is sufficiently bounded and described.

"Dunstable, May, 1674."

This tract of land embraced about two hundred square miles, and included what are now the towns of Dunstable and Tyngsborough, and parts of the towns of Draeut, Groton, Pepperell and Townsend, Mass., together with the city of Nashua, the towns of Hollis, Hudson and sections of the towns of Brookline, Milford, Amherst, Merrimac, Londonderry, Litchfield and Pelham, N. H.

In no town of this Commonwealth were the lands taken up by more noted men, who, though not all actual settlers, still exercised a favorable influence on the new plantation. Among the grantees were the brave Gov. John Endecott, who held the highest military office in the colony; and William Brenton, a noted fur-trader, and subsequently Governor of Rhode Island.

The new town is said to have received its name in compliment to Mrs. Mary, wife of the Hon. Edward Tyng, who emigrated from Dunstable, England, about 1630, and whose son, Jonathan, became possessor of a large tract of land in what is now the town of Tyngsborough. The old English town is pleasantly situated at the base of the Chiltern Hills, in Bedfordshire, eighteen miles south-southwest of Bedford, and ten miles east-northeast of the Boxmore Station of the London and Northwestern Railway. The name "Dunstable" is supposed by some to be derived from Dun, a notorious robber, who lived in the reign of Henry I.; by others, and more plausibly, it is traced to the words "dun," a hilly place, and "staple," a mart. The English town is celebrated for the manufacture of straw plat bonnets and hats. A certain kind of straw braid in Massachusetts also long bore the name of "Dunstable."

In the old English town the Norman kings had a palace, and it was in the same town that Archbishop Crammer, in 1553, pronounced the sentence of divorce between Henry VIII. and Katharine of Aragon. The early parish register furnishes no record of the families which emigrated to America. The citizens of the younger Dunstable, however, fondly cherish the fact of their English ancestry; while the citizens of old Dunstable have expressed a kindly interest in its New England namesake.

In this early period dense forests covered nearly the whole of this region. The growth of timber consisted mostly of pine, oak, walnut, maple and birch. A few clearings had been made in which the Indians had planted maize, beans and squashes. The region was well watered by the Merrimac, the Nashua, the Souhegan and the Nissitisset Rivers, together with their numerous tributaries, and several large ponds frequented by fowl and abounding with fish. The beaver, otter, mink and muskrat were found. Sometimes bears and wolves ranged through the forests, and their peltries gave rich inducement to the adventures of the huntsman. In the fishing season the Indians were accustomed to meet near some waterfall, where they built their wigwams and performed their

savage rites. Occasionally a trading-post could be found, as that of Cromwell. The woodman's axe was sometimes heard resounding through the forest.

The name of the first white settler is not certainly known. Tradition claims that John Cromwell, from Boston, came to what is now Tyngsborough as early as 1665, for the purpose of trading with the Indians. These savages could not have been favorably impressed with the early white settlers, had their judgment rested wholly upon him as a representative. It is said, he used his foot as a pound-weight in buying peltries of the natives; but he was soon detected in the dishonest proceeding and came near forfeiting his life. A party of the Pennacook Indians whom he had thus defrauded came down the river to wreak their vengeance; hearing of their approach, he saved his life by flight.

It is probable some tracts of land were settled before this period; perhaps about the time the grant of land at Nanticook was made, in 1656, to William Brenton.

On the 1st day of July, 1657, Simon Willard, Thomas Hinchman, Ensign Thomas Wheeler and William Brenton bought the exclusive right of trading with the Indians. The sum paid for this right was £25. Settlements were doubtless made soon afterwards. Some of the farmers signed the petition for incorporation in 1673.

Previous to the division of their land the proprietors wisely entered into a written agreement, by which every actual settler was to have a house-lot of ten acres, with an additional acre for every £20 of personal estate he might possess. None were to have a house-lot of more than thirty-acres; while the remainder of the common land was to be divided in proportion to the value of the respective house-lots. A thirty-acre house-lot entitled the holder to six hundred acres of the common land.

The intent of this arrangement is thus given in the compact: "Y^e we may live in love and peace together, we do agree, y^e whatever fence we do make, either about corn-fields, orchards, or gardens, shall be a sufficient four rail fence, or y^e which is equivalent, whether hedge, ditch, or stone-wall, or of logs; and if any person sustain damage through the deficiency of their own fences not being according to order, he shall bear his own damage." This wise provision doubtless promoted good will among the early settlers.

Emigration set in rapidly to the new and hopeful town. Most of the settlements were begun along the pleasant margin of Salmon Brook, and near the right bank of the Merrimac River. The safety of the inhabitants was greatly promoted by the erection of a garrison-house.

The Indians had been greatly reduced by a plague which occurred several years before the arrival of the Pilgrims, and therefore found it for their advantage generally to avoid war with the early English settlers.

The Indians throughout this region were divided into four principal tribes.

These Indians dwelt in wigwams, wore the skins of animals, and subsisted on fish and game, of which there was a great abundance—Indian corn, beans and squashes were also leading articles of food, and were cultivated by the women, who used a clam shell for a hoe.

Their skin was copper-colored; their hair long, straight and black. Their feet were protected by *moccasin*, made of untanned deer-skin. Their currency consisted of shells called *wampum*. Their weapons were the tomahawk, the bow and arrow and the scalping-knife.

Their language was rough and guttural, a few words, such as "Nashua" and "Miantonimo," being excepted. They had some vague notion of a Supreme Power, and recognized the sacredness of a just agreement.

Such, in brief, was the condition and character of those untutored beings with whom the early white settlers were called to deal. The great chief Passaconaway figured among the Indians of that age. He is mentioned by Gov. John Winthrop as early as 1632. In 1644 he submitted himself with his people to the government of Massachusetts.

Rev. John Eliot, noted as a missionary, began labors among the Indians at Nonatum (now Newton) in 1646, and soon afterward went to Concord and Wamesit. On his second visit to the latter place, which occurred in 1648, he met a large company of the natives, who had come to fish at the falls in the Concord and Merrimac Rivers, and he improved the opportunity to make known some of the teachings of the Christian religion. For his text he took Malachi 1: 11, with slight modifications, as follows: "From the rising of the sun to the going down of the same, thy name shall be great among the Indians; and in every place prayers shall be made to thy name,—pure prayers; for thy name shall be great among the Indians." Passaconaway, who would not listen to Mr. Eliot on his first visit, now came forward and expressed his determination to pray to God and to persuade his sons to do the same.

This chief, who was a pow-wow or sorcerer, and was believed by the natives to be able to "make water burn, rocks move and trees dance," desired Mr. Eliot, the ensuing year, to come and reside with his people and be their teacher. Although the missionary could not accede to this request, he continued his annual visits to the Pawtuckets, and here established what was called his fifth "praying-town" of the Indians. Passaconaway lived to an advanced age, and continued to the last a faithful friend of the English. Some time previous to his death he said to his children and friends:

"I am now going the way of all flesh, or am ready to die, and I am not likely to see you meet together any more. I will now have this word of counsel with

you, that you may take heed how you quarrel with the English; for though you may do them much mischief, yet assuredly you will all be destroyed and rooted off the earth if you do; for I was as much an enemy to the English, at their first coming into these parts, as any one whatsoever, and did try all ways and means possible to have them destroyed, at least to have prevented them settling down here, but I could no way effect it; therefore I advise you never to contend with the English, nor make war with them."

Mr. Whitier thus writes of the black arts practiced by Passaconaway:

"For that chief had magic skill,
And a Panisee's dark will
Over powers of good and ill,—
Powers which bless and powers which ban.
Wizzard Lord of Pennacook!
Chiefs upon their war-paths shook
When they met the steady look
Of that wise, dark man."

These Indians were for the most part friendly to the whites, yet they were not much inclined to Christianity, and Mr. Eliot never succeeded in establishing a church among them. His labors resulted, however, in some civilizing influences, and among his converts were not only the chief, Passaconaway, but his son Wannalancet, who succeeded to the rule of the tribe on the death of his father.

In May, 1674, Mr. Eliot visited Wamesit, and preached on the parable of the virgin (Matt. 12: 1-14), in the house of Wannalancet, who soon after made this declaration:

"Sirs, you have been pleased for years past, in your abundant love, to apply yourselves particularly unto me and my people to exhort, press and persuade us to pray to God. I am very thankful to you for your pains. I must acknowledge I have all my days been used to pass in an old canoe, and now you exhort me to change and leave my old canoe and embark in a new one, to which I have hitherto been unwilling, but now I yield up myself to your advice and enter into a new canoe, and do engage to pray to God hereafter."

Wamesit at this time contained about 250 and fifty men, beside women and children. Only a few buildings had been erected when the little band of farmers received the startling intelligence that their colony was threatened by the savages.

Philip, of Pokanoket, in alliance with other sachems of New England, commenced hostilities in the spring of 1675. Town after town was laid in ruins by the savage foe. In view of the great number of Indians and their acquaintance with the territory, it seems remarkable that any town should have escaped destruction.

Dunstable, an outlying frontier, was peculiarly exposed. The feeling of insecurity became so great that the inhabitants, abandoning their little fort, the meeting-house they were then erecting and their dwelling-houses, sought protection in the towns of Chelmsford, Concord, Billerica and Boston.

There was one, however, who stood bravely at his post through the whole war, and therefore is justly entitled to the honor of being the first permanent set-

tler of the town of Dunstable. It was the Hon. Jonathan Tyng, who was born December 15, 1642. Mr. Tyng's house stood on the right bank of the Merrimac River, nearly opposite Wicasuck Island, and about one mile below the central village of Tyngsborough. Fortifying his abode as best he could, and sending to Boston for supplies, this brave pioneer stood alone as an outpost between the enemy and the settlements below.

After destroying as many as thirteen towns and six hundred colonists, the crafty Philip was shot at Mount Hope, R. I., Aug. 12, 1676, and the war was soon brought to a close.

The deserted homes and farms in the wilderness were soon reoccupied after the close of the war. And the various apartments of an organized community were made effective. The selectmen were invested with more power than at the present day. The work of selecting a minister at £50 per annum was intrusted to them, this salary to be paid in money, or if otherwise, one third more was to be added thereto. John Sollendine, a carpenter, was engaged to complete the unfinished meeting-house, which was probably a small building constructed of logs and supposed to have stood on the river road, a short distance from the present northern line of Tyngsborough, and not far from Salmon Brook. It was finished in 1678, but there is no account of any dedication. The Rev. Thomas Weld was the first minister. He graduated at Harvard College in 1671, and commenced preaching in Dunstable as early as May, 1679. He married a daughter of the Rev. John Wilsor, of Medfield, and built a house on the ministerial lot. This consisted of thirty acres, and entitled the occupant to the use of six hundred acres of the undivided territory.

The first birth mentioned on the town records, and this under the caption, "Lambs born in Dunstable," is that of William, son of Jonathan and Sarah Tyng, born April 22, 1679. The first marriage is that of John Sollendine, Aug. 2, 1680.

Previous to the formation of the church a road was laid out from the meeting-house to Groton Centre, probably on the old Indian trail, as far as Massapoag Pond, at least; and in 1687 the town was assessed £1 12s. 3d. to aid in building what was long called "the Great Bridge," over the Concord River, near "the Fordway," in Billerica, this being then on the main route of travel to Boston. At a town-meeting held on the 21st of May, of the following year, Samuel Gould was chosen "dog whipper" for the meeting-house—an office then very needful, since the country was infested with wild animals as well as Indians, and as a means of protection the settler used to take his dog and gun with him to church. The *Bay Psalm Book* was at this time the manual of song. The words of the Psalm as

"O, all ye servants of the Lord,
Behold the Lord bless you;

Yee who within Jehovah's house
 'T' the night time standing bee,"

were "lined out" by one of the deacons, and sung to some such tune as "Hackney" or "York tune," by the congregation standing.

The great English Revolution came on in 1688, the house of Stuart fell, a contest between France and England, known in history as "King William's War," resulted. The French Jesuits instigated many Indians to set out upon the war-path. Along the frontier many ravages were committed.

An attack on Dunstable was intended, but was averted through seasonable information given by two friendly Indians to Major Thomas Henchman, then commander of the little garrison at Pawtucket Falls. Two companies were promptly sent to scour the country from Lancaster to Dunstable. The danger to which the few settlers in this frontier plantation were then exposed, and the sufferings they experienced, may be inferred from the following petition in vol. evii., p. 230, of the "Massachusetts Archives":

"DUNSTABLE, 3^d July 23, 1689.

"To the Honorable Gouenor and Councill A Company of Representatives now assembled at Boston:—The petition of the Inhabitants of Dunstable humbly sheweth that wee are much obliged to your Honours for your last supply of Men, notwithstanding finding ourselves still weak and unable both to keep our Garrisons and to send men out to get hay for our Cattle, without doing which we cannot subsist; wee doe therefore humbly Intreat your Honours to send and Supply us with twenty footmen for the Space of a month to scout about the towne while we get our hay; and the towne being very bare of provisions, by reason of billeting soldiers all the last winter, we doe, therefore, intreat your Honours to send a supply of meat, for bread we can supply, and without this help we cannot subsist, but must be forced to draw off and leave the towne. Hoping your Honours will consider us in this request, wee Remaine your servants ever to pray for you. Subscribed by the select Men in the name of the towne.

"JOHN BLANCHARD,
 JOHN LOVEWELL,
 ROBT. PARRIS,
 CHRISTOPHER REED,
 SAMUEL WHITING."

Four Indian spies were seen lurking around one of the garrisons at Dunstable about the time of the massacre at Dover, yet, through the promptitude of Major Henchman, Jonathan Tyng, Sergeant Varnum and others, no attack was then made on the town.

The foe again appeared on the morning of the 28th of the same month, and murdered two more of the people, one of whom, Obadiah Perry, as we have said, had been allowed to hire a house in Billerica during King Philip's War.

Brave and hardy as the original settlers were, such was their exposed situation, and such the havoc of the Indians in other places, that by the year 1696 nearly two-thirds of them had abandoned the town, and on this account the State made an abatement of £50 to the town for such as had deserted it. The same reason led to a grant of £30 by the State to help the town support the minister.

In April, 1697, the noted heroine, Mrs. Hannah Duston, passed through the town in a canoe, and was kindly entertained by Col. Jonathan Tyng. She was

on her way to Boston from Contoocook, N. H., where she had, with Mary Neff and a boy, taken the scalps of ten Indians.

The first grist-mill in town was owned by Samuel Adams, and was established at "The Gulf," at Massapoag Pond, before July, 1689, as may be seen from the following petition for men to defend it:

"July y^e 31, 1689. The humble petission of the towne of Dunstable, To the honorable gouernor & Councill & Company of the Representatives now assembled; in behalf of Samuell Addams, owner of a Corn mill, without the use of which mill the Towne Cannot Subsist, And therefore we doe intreat your honers to allow such a number of men as may be able to secure it. And so we remain your humble devotes ever to pray. By the selectmen in the name of the towne, John blanchard, John Lovevell, Christopher Reed, Sammel Whiting, Robert Parris."

In point of population, Dunstable was at this time the smallest town in the Province. The persevering efforts of Major Jonathan Tyng, Lieut. Samuel French, John Lovewell, Samuel Whiting, and the Rev. Mr. Weld prevented it from being again abandoned.

In 1702 the town was called to deplore the loss of its honored pastor, the Rev. Thomas Weld, who died on the 9th day of June, and was buried in the old cemetery near his church.

King William's War, closed by the treaty of Ryswick in 1698, was followed by a brief interval of peace. What was called "Queen Anne's War" commenced in 1702, and continued ten years, involving the colonists in many conflicts with the Indians, who, as usual, took part with the French.

Various settlements along the northeastern frontier were assaulted by the French and Indians during the month of August, 1703. More than two hundred people were at that time either killed or led into captivity. To guard against these acts of violence, the government offered a reward of £10 for every Indian scalp brought in.

On the 3d of November, 1704, the General Court ordered the sum of £24 for building four block houses on the Merrimac River, "one in Billerica, two in Chelmsford, and one in Dunstable."

On the night of the 3d of July, 1706, a party of two hundred and seventy Mohawk Indians suddenly assaulted a garrison-house, in which Capt. Pearson and twenty of his "troopers" had been posted. The company was taken by surprise, for the door had been left open. Mr. Cummings and his wife, it is said, had gone out at the close of the day, for milking, when the Indians shot Mrs. Cummings, the wound proving fatal. Mr. Cummings was wounded, and taken captive. Rushing into the house, they found the armed men. The amazement of the Indians and soldiers was mutual. A bloody conflict ensued, during which several of Capt. Pearson's men were either killed or wounded. The Indians withdrawing, set fire to the

house of Daniel Gatusha, living on Salmon Brook. One woman was killed, and another escaped from the flames by loosening the stones around a small window. A party of these Indians, on the same fatal day, entered the garrison-house of Nathaniel Blanchard, and murdered himself, his wife Lydia, his daughter Susannah, and also Mrs. Hannah Blanchard.

The Rev. John Pike, of Dover, wrote in his journals: "The whole number said to have been slain in Dunstable at this time was nine persons."

The noted Joe English was shot by the enemy near Holden's Brook on the 27th of July, 1706. He and another soldier were acting as a guard to Capt. Butterfield and his wife, who were passing through what is now Tyngsborough. The Indians shot the horse on which these people were riding, and then taking Mrs. Butterfield captive, while her husband escaped, pursued Joe English, firing upon him until he fell, wounded and exhausted, into their merciless hands. He well knew the exquisite torture to which they would subject him, and so provoked them with some taunting words that they immediately dispatched him with their tomahawks. His widow and two children received a grant of money from the government because "he died in the service of his country." He was brave, intelligent, and always faithful to the English people. His grandfather was Masconomet, Sagamore of Agawam (now Ipswich).

In the year 1711 there were seven fortified houses in Dunstable, and they were named as follows:—Col. Jonathan Tyng's, Mr. Henry Farwell's, Mr. John Cummings', Col. Samuel Whiting's, Mr. Thomas Lund's, Queen's Garrison and Mr. John Sollendine's. Thirteen families, seven males, nineteen soldiers, total of eighty-six people.

The people, reduced to so small a number, lived in constant dread of the lurking foe. Their time was mostly spent in the garrisons, and but little improvement was made in the aspect of the town. They wore plain garments of their own making; their fare was very frugal, and their opportunities for mental cultivation very limited. As they ventured forth to labor in the fields they found the loaded musket a necessary accompaniment. Their crops were slender and they were very destitute of the common supplies of life. Had not fish, game and berries been abundant they would have been compelled to leave the lands which had been granted to them and to return into the older settlements.

Peace was at length secured by the treaty of Utrecht, April 11, 1713; the doors of the garrisons at Dunstable were opened, and the hope of returning prosperity began to cheer and animate the people. The town increased in numbers. Some of the large tracts of land, originally granted, were sold in sections for the accommodation of small farmers, and other inducements were held forth for an incoming population.

At the time of the death of Rev. Mr. Weld the

town was so reduced in respect to population as to be unable then to settle another minister. In a petition to the General Court March 8, 1703-4, it is said that the inhabitants "can never hear a sermon without traveling more than twelve miles from their principal post." In answer to this petition the Court granted £20 towards the support of the ministry.

The Rev. Samuel Hunt, the Rev. Samuel Parris, the Rev. Amos Cheever, the Rev. John Pierpont and the Rev. Enoch Collin preached successively. Thus one minister after another supplied the pulpit at Dunstable until Aug. 20, 1720, when the town gave a call to the Rev. Nathaniel Prentice (H. C., 1714) to settle in the ministry, with the same salary before offered to Mr. Collin, and a settlement of £100.

CHAPTER LVII.

DUNSTABLE—(Continued).

Continued Attacks from the Indians—Growth of the Town—Church and School Affairs—1723-1768.

THE frontier settlements of Maine and New Hampshire became subject to frequent depredations from the Indians, who were instigated by Sebastian Rale, the celebrated Jesuit. His headquarters were at Norridgewock. Lieut. Jabez Fairbanks, with a company having in it several men from Dunstable, spent the early part of the year 1724 in searching for the enemy on Nashua River and adjoining localities.

On the 4th of September some French and Mohawk Indians came to Dunstable and carried captive Nathan Cross and Thomas Blanchard. These men were getting turpentine in the pine forest along the northerly margin of the Nashua River. A party of ten men or more, commanded by Lieut. Ebenezer French, at once proceeded in their pursuit. One of the number, Josiah Farwell, warned the leader to beware of falling into an ambuscade; but he, too venturesome, replied, "I am going to take the direct path. If any of you are not afraid, follow me!"

They followed him, and on reaching what is now Thornton's Ferry, on the Merrimac River, they were waylaid, fired upon by the treacherous foe, and all the party, excepting Mr. Farwell, who had concealed himself in some bushes, were either at once killed or taken captives.

The bodies of eight of those killed were recovered, and buried in one grave. The names of seven are given in the *Boston News Letter* as follows:—"Lieut. Ebenezer French, Thomas Lund, Oliver Farwell and Ebenezer Cummings, of Dunstable; Daniel Baldwin and John Burbank, of Woburn; and Mr. Johnson, of Plainfield." The name of the other man was Benjamin Carter. Four rude headstones in the old ceme-

tery at Little's Station, not far north of the State line, commemorate the sad event.

Instigated by these acts of Indian barbarity, it was thought best to carry on the war more vigorously. Bounties for scalps were again offered by the government and volunteer companies were formed.

Favored by a grant from the Assembly, Lovewell raised a company of thirty men. When commissioned captain, he started with his followers on an expedition into the wilderness. On the 10th of November his lieutenant, Josiah Farwell, received at Haverhill "four hundred and eighty seven pounds and one half of good bread" for the use of soldiers, and on the 19th of December they fell upon an Indian trail about forty-four miles above "Winnepisockee Pond." Coming to a wigwam they killed and scalped an Indian and took a boy about fifteen years old captive. They returned to Boston with these trophies, and it is recorded by the *News Letter* of January 7, 1725, that "the lieutenant-governor and council were pleased to give them £50 over and above £150 allowed them by law."

The intrepid Lovewell, thus encouraged, soon raised another volunteer company of eighty-eight men, among whom were his brother, Zachens Lovewell, Thomas Colburn, Peter Powers, Josiah Cummings, Henry Farwell, William Ayers, Samuel Fletcher and others, of Dunstable, and on the 30th of January, 1724-25, set forth on a second expedition against the Indians.

In this journey he came up with the enemy near a pond at the head of one of the branches of Salmon Falls River, now in the town of Wakefield, N. H. He killed the whole party, ten in all, then returned to Boston with the scalps stretched on poles, and there claimed the bounty. Penhallow mentions this incident of the march: "Our men were well entertained with moose, bear and deer, together with salmon trout, some of which were three feet long and weighed twelve pounds apiece."

On the 15th day of April, 1725, Lovewell, with a band of forty-seven men, left Dunstable with the design of attacking the Pequakets, under the noted Sachem Panguis, whose headquarters were in a beautiful valley on the Saco River, in what is now the town of Fryeburg, Maine. The distance was more than two hundred miles, and the country to be traversed a dreary wilderness, with occasionally an Indian trail or the track of some wild beast.

Such an adventure demanded men accustomed to hardship, fearless of peril, and such were Lovewell and his comrades.

After marching some distance, Toby, a Mohawk Indian, becoming lame, was obliged to return to the plantation. On reaching Contoocook, William Cummings, of Dunstable, being disabled by a wound previously received from the Indians, was sent back in charge of one of his kinsmen.

When the company reached the westerly shore of

the Great Ossipee Lake, Benjamin Kidder, being unable to proceed farther, was left under the care of the surgeon, Dr. William Ayer, of Haverhill. Captain Lovewell here erected a stockade, and detailed eight soldiers to remain as a reserve.

Hastening forward with the rest of his company for about twenty miles, the heroic captain arrived, on the eve of the 7th of May, at the northwesterly margin of a beautiful sheet of water, about two miles long and half a mile wide, since known as Lovewell's Pond, and encamped for the night. The enemy had not yet been observed, and nothing but some confused noises in the distance, possibly the howling of wolves, caused any alarm; but while engaged in their devotions about eight o'clock on the following morning, they were startled by the report of a musket, which proceeded from the opposite shore of the pond. They then observed an Indian at the distance of about a mile, standing on a point of land extending into the lake, and supposing that he was acting as a decoy to draw them into danger, held a consultation as to the best course to be pursued.

The young chaplain, Jonathan Frye, of Andover, said, "We came out to meet the enemy, we have all along prayed God that we might find them, and we had rather trust Providence with our lives—yea, die for our country—than try to return without seeing them, if we may, and be called cowards for our pains."

Moved by this request, Capt. Lovewell ordered his men to go cautiously forward. Soon reaching a smooth plain, the men divested themselves of their packs, which they piled up together, under the impression that the main body of the enemy was in front of them. Having then gone through the forest, for about a mile, they came suddenly upon the Indian hunter whom they had before seen standing on the point of land across the lake. He was leisurely returning to his people with a couple of muskets and a brace of ducks upon his shoulder. Several guns were instantly fired at him, when, replying, he seriously wounded Capt. Lovewell and Mr. Samuel Whiting with beaver shot. Ensign Seth Wyman then firing, killed the Indian.

The company then turned back, and moved with their wounded leader towards the spot where they had left their packs. But in the mean time Panguis, at the head of about eighty warriors, on their return from an expedition down the Saco River, discovered the pile of packs, and judging from the number that the English force was much less than his own, determined to engage in battle. He, therefore, placed his men in ambush and awaited the arrival of his foe. When Lovewell's company came up for their packs the Indians rushed suddenly from their hiding-places, three or four deep, with their guns presented as if supposing their very numbers would move the English to surrender; but they were disappointed. Fearlessly did Lovewell's men advance upon the Indians

till within a short distance, when the combatants on both sides opened a deadly fire. The war-whoop mingled with the roar of musketry was appalling. Capt. Lovewell, with eight of his heroic company, was soon left dead upon the field. Three of his men were seriously wounded.

Having met with such a fearful loss and being almost defeated by the enemy, the English, commanded by Ensign Seth Wyman, withdrew to the pond, which served to protect them in the rear, while on their right an unfordable stream, and on their left a rocky point in part defended them. Their front was also covered with a deep morass. In this admirable position they bravely defended themselves against superior numbers for the remainder of the day. About three o'clock in the afternoon the gallant Chaplain Frye was seriously wounded. The Indians, by their yelling and horrid grimaces, rendered the fight more terrible. At one time they held up ropes, inviting the English to surrender. They, however, pointed to the muzzles of their muskets, signified their resolve to fight to the bitter end rather than be taken captive.

During the engagement Paugus, the long-dreaded chief of the Pequakets, fell, and probably, as the ancient ballad states, by a shot from Ensign Wyman, though there is a tradition that the exploit was due to John Chamberlain, of Groton.

Paugus and Wyman were standing near each other and loading their pieces on the margin of the lake, when it is said that Paugus, in the act of forcing down his ball, cried out to Wyman, "Me kill you quick!" To whom the latter answered, "Maybe not!" and his gun, priming itself, gave him the advantage of a little time, thus enabling him by a well-directed shot to lay the sachem prostrate and mortally wounded.

Either from the loss of men or want of ammunition, the Indians withdrew from the contest a little after sunset, removing most of their dead and all of their wounded from the field.

Soon afterwards the survivors in Lovewell's band, now destitute of powder and provisions, resolved to leave the fatal spot and return, if possible, to the stockade fort on Lake Ossipee. But some of them were suffering from loss of blood and could not proceed on the journey. Jacob Farrar was just expiring near the pond. Lieutenant Jonathan Robbins, unable to go, desired that his gun might be loaded and placed beside him. "For," said he, "the Indians will come in the morning to scalp me, and I'll kill one more of them, if I can!" Robert Usher, also of Dunstable, was too much exhausted to be removed. Regretfully leaving these three dying comrades, the rest of the men, of whom eleven had been wounded, started for the fort, a distance of more than twenty miles. Having traveled about a mile and a half, Chaplain Frye, Lieutenant Josiah Farwell, Eleazer Davis and Josiah Jones gave their free consent to be left on the way, hoping that aid might be sent back to them, but the

two former perished in the wilderness. Chaplain Frye, after traveling some distance, sank under his wounds, telling his companions that he was dying and at the same time "charging Davis," says Mr. Symmes, "if it should please God to bring him home, to go to his father, and tell him that he expected in a few hours to be in eternity, and that he was not afraid to die." Lieutenant Farwell died of exhaustion on the eleventh day after the fight. Davis, who was wounded in the body and had one thumb shot off, reached Berwick in a deplorable condition on the 27th of May; and Jones came in at Saco, after wandering, with a severe wound, fourteen days in the wilderness. On reaching the fort, faint and hungry, the little band under Lieutenant Wyman had the grief to find the place abandoned. At the beginning of the fight Benjamin Hasseli, thinking all to be lost, had fled, and on reaching the fort had so intimidated the occupants that they all deserted it and made their way back, arriving on the 11th of May at Dunstable. Ensign Wyman returned home with his men on the 15th of May. On the 17th of the same month Colonel Eleazer Tyng, with a company of eighty-seven men, went to the scene of conflict, and there found and buried the bodies of Captain John Lovewell, Ensign Jonathan Robbins, Ensign John Harwood, Robert Usher, Sergt. Jacob Fullam, Jacob Farrar, Josiah Davis, Thomas Woods, Daniel Woods, John Jeffs, Ichabod Johnson and Jonathan Kittridge. He also dug up and identified the body of the great warrior, Paugus.

Dr. Jeremy Belknap once visited the scene of the battle, and discovered the names of the fallen heroes, which Colonel Tyng had inscribed upon the trees.

For the defence of Dunstable during the absence of Col. Tyng, Col. Flagg was ordered to detach a number of men from his regiment.

Capt. Lovewell was the son of John Lovewell, and was born in Dunstable Oct. 14, 1691. His lands and meadows, in all about two hundred acres, and the buildings thereon, together with the half part of a saw-mill, were estimated at £120. In answer to a petition of Hannah Lovewell, to the General Court, June 8, 1726, "it was resolved that fifty pounds be paid to Capt. Henry Farwell and Col. E. Tyng, with which to discharge the claims against the estate of the late Capt. Lovewell." Fifteen hundred pounds were granted to the widows and children of the deceased soldiers, and in consideration of the services of Capt. Lovewell and his brave comrades, the General Court also granted to them and to the legal representatives of such as had deceased, "a township of six miles square, lying on both sides of Merrimack River." It is now the town of Pembroke, N. H.

The powder-horn which the hero of Pequawket used in the fight is still preserved by one of his descendants.

Capt. Lovewell was brave and adventurous. He

died with his gun loaded and pointed toward the foe. His life was not sacrificed in vain. The battle at Pequawket closed the war and insured safety. A treaty of peace was soon made with the different Indian tribes, and the Pequawkets, led by Adenwanda, removed to Canada.

The story of Lovewell's exploits was heard in every dwelling. The following ballad, said by John Farmer to have been written soon after the tragic event occurred, embodies the chief incidents of the battle. It is to be regretted that neither the name of the author nor the music to which the words were adapted, has been preserved. The ballad was for a long period the most popular song in the colonies.

THE BALLAD OF CAPT. JOHN LOVEWELL'S FIGHT AT PEQUAWKET.

I.

Of worthy Captain Lovewell I purpose now to sing,
How valiantly he served his country and his king;
He and his valiant soldiers did range the woods full wide,
And hardships they endured to quell the Indian's pride.

II.

'Twas nigh unto Pigwacket, on the eighth day of May,
They spied a rebel Indian, soon after break of day
He on a bank was walking, upon a neck of land
Which leads into a pond, as we're made to understand.

III.

Our men resolved to have him, and travelled two miles round,
Until they met the Indian, who boldly stood his ground
Then speaks up Capt. Lovewell, "Take you good heed," says he,
"This rogue is to decoy us, I very plainly see."

IV.

"The Indians lie in ambush, in some place nigh at hand,
In order to surround us upon this neck of land;
Therefore we'll march in order, and each man leave his pack,
That we may briskly fight them, when they shall us attack."

V.

They come unto the Indian who did them thus defy;
As soon as they come nigh him, two guns he did let fly,
Which wounded Capt. Lovewell and likewise one man more,
But when this rogue was running, they laid him in his gore.

VI.

Then, having scalped the Indian, they went back to the spot
Where they had laid their packs down, but there they found them not;
For the Indians, having spied them when they then down did lay,
Did seize them for their plunder, and carry them away.

VII.

These rebels lay in ambush, thus very place near by,
So that an English soldier did one of them espy,
And cried out, "Here's an Indian!" With that they started out
As fiercely as old lions, and hideously did shout.

VIII.

With that our valiant English all gave a loud hurra,
To show the rebel Indians they feared them not a straw
So now the fight began as fiercely as could be,
The Indians ran up to them, but soon were forced to flee.

IX.

Then spake up Captain Lovewell, when first the fight began,
"Fight on, my valiant heroes, you see they fall like rain!"
For, as we are informed, the Indians were so thick,
A man could scarcely fire a gun, and not some of them hit.

X.

Then did the rebels try their best our soldiers to surround,
But they could not accomplish it, because there was a pond,

To which our men retreated and covered all the rear
The rogues were forced to flee them, although they skulked for fear.

XI.

Two logs that were behind them so close together lay,
Without being discovered they could not get away;
Therefore, our valiant English, they travelled in a row,
And at a hand-some distance, as they were wont to go.

XII.

'Twas ten o'clock in the morning when first the fight begun,
And fiercely did continue till the setting of the sun,
Excepting that the Indians, some hours before 'twas night,
Drew off into the bushes and ceased awhile to fight.

XIII.

But soon again returned, in fierce and furious mood,
Shouting as in the morning, but yet not half so loud,
For, as we are informed, so thick and fast they fell,
Scarcely twenty of their number at night did get home well.

XIV.

And that our valiant English till midnight there did stay,
To see whether the rebels would have another tray;
But they no more returning, they made off to their home,
And brought away their wounded as far as they could come.

XV.

Of all our valiant English there were but thirty-four,
And of the rebel Indians there were about four-score,
And sixteen of our English did safely home return;
The rest were killed and wounded, for which we all must mourn.

XVI.

Our worthy Captain Lovewell among them then did die;
They killed Lieutenant Robbins and wounded good young Frye,
Who was our English Chaplain; he many Indians slew,
And some of them he scalped, when bullets round him flew.

XVII.

Young Fullam, too, I'll mention, because he fought so well,
Endeavoring to save a man, a sacrifice he fell
And yet our valiant Englishmen in fight were ne'er dismayed,
But still they kept their motion, and Wyman captain made, —

XVIII.

Who shot the old chief Pangus, which did the foe defeat,
Then set his men in order and brought off the retreat;
And, leaving many dangers and hardships by the way,
They safe arrived at Dunstable the thirteenth day of May.

On the return of peace many families came to secure homesteads in a region so well stored with timber and so rich in pasturage. Roads were laid out to the distant settlements, fences were constructed and orchards planted. The church was the leading institution. The meeting-house afforded the people a rallying-point; but it was soon found inconvenient for those living in the remote parts of the town to assemble at the appointed place, and for this reason efforts were early made for a division of the territory. An area of two hundred square miles was too great for the practical purposes of a church, and so there was but little opposition against setting off "certain sections for the better accommodation of certain people."

On the 4th of January, 1732-33, certain families, bearing the names of Blodgett, Cummings, Cross, Colburn, Greeley, Hill, Lovewell, Marsh, Merrill, Pollard and Winn, who had commenced a settlement on the easterly side of the Merrimac River as early

as 1712, finding it inconvenient to attend church across the river, were incorporated into a town by the name of Nottingham. This town came into New Hampshire by the divisional line in 1741, and the name is now changed to Hudson.

In 1733 it was voted that the new meeting-house should be erected four rods west of where the old church was standing, but against this vote a number, living in the southerly part of the town, protested. A committee of three was chosen to determine a site for the new meeting-house.

The town derived considerable revenue from the preparation of pitch and turpentine, of which the primeval forests of pine furnished large quantities.

The excision of a part of the town of Dunstable to form Nottingham was followed by a still greater one in 1734, when the wide tract called *Nanticook* was incorporated under the name of Litchfield. Subsequently the section of the town west of the Merrimac River was incorporated under the name of Rumford; this was changed to Merrimac, the present name.

The number of families in Dunstable in 1730 was about fifty. The sum of £90 was raised for the salary of Mr. Prentice. A small sum was also raised for the support of a "writing school." Mr. Prentice, who was a good preacher, died February 27, 1737. He was much beloved by his people.

The Rev. Josiah Swan was ordained over the church December 27, 1738, and about this time a new church edifice was dedicated. Mr. Swan continued to preach in the new church until some time in 1746, when he resigned his pastorate. He afterwards became a noted school-teacher in Lancaster.

The westerly part of Dunstable, called by the Indians *Nissitisset*, was incorporated with the title of "The West Parish of Dunstable," which afterwards became the town of Hollis. The town of Dunstable was thus gradually reduced in size until 1741, when, by the running of the divisional line between the States of New Hampshire and Massachusetts, the above-mentioned towns, together with the territory which has since become the city of Nashua, were set off to the former State, leaving Dunstable proper, which then included Tyngsborough, in the State of Massachusetts.

During the month of February, 1741, Richard Hazen surveyed and established the line between the Provinces of New Hampshire and Massachusetts. About two-thirds of the inhabitants of the old parish were thus brought into this State. It is probable that town officers were that year elected in Dunstable, Mass.; but the first few pages of the earliest book of records are unfortunately gone, and it is not possible to know who were the public officers of that and the following year.

On the 8th of February, 1743, Eleazer Tyng, Joseph Eaton and Jonathan Taylor petitioned the General Court for permission to choose town officers,

since the preceding selectmen had neglected to issue a warrant for that purpose. The petition was granted, and the first recorded town-meeting was held in the house of Ebenezer Kendall, March 5, 1743.

At another meeting held about this time at the house of Simon Thompson, it was voted that three men be appointed to assist the town clerk in recording the town votes. Some specimens of spelling on the archives of the town indicate there was ample need of such aid. When, however, the work and exposure of those early settlers is considered, it can be easily seen how small a margin of time could be left for consulting the dictionary. The church was then the principal school, the minister the instructor, and these were steadily supported, as the next record in the old stained folio testifies:

"March y^e 28, 1744, voted y^e Twenty Pounds in Lawful money shall be Raised & assessed to Supporte y^e gospel among us." Eleazer Tyng, Esq., John French, and Ebenezer Kendall were then chosen "to treat with the Reverend Mr. Swan, & to see if any Thing was due to him from y^e Town of Dunstabell before y^e Line was Run between y^e said Province."

In November, 1746, the town "voted to raise 8 pounds lawful money to pay for preach the current year;" but who was the recipient of such a salary for proclaiming the gospel in "Decon Taylor's Hous" the records do not indicate.

About this time the "vexed question" of erecting a meeting-house arose, and continued for several years to agitate the people. The town extended from Draut on the east, some ten miles to Groton on the west. The families, numbering fifty-four, were pretty evenly settled over the whole surface. A new church had been erected in 1738, on the New Hampshire side of the line, and was partly owned by the people on this side of it. Some preferred to worship there. Others were in favor of buying the edifice and removing it to their own town. Among this class again there were differences of opinion. Some desired to locate it in the geographical centre, while others preferred the centre of population; still another party thought it best to erect a new building and choose a committee from some neighboring town, who should select the location. The Rev. Joseph Emerson, in his sermon at the dedication of the second meeting-house in Pepperell, doubtless had reference to the state of things in Dunstable when he said, "It hath been observed that some of the hottest contentions in this land hath been about settling of ministers and building meeting-houses, and what is the reason? The Devil is a great enemy to settling ministers and building meeting-houses; wherefore he sets on his own children to work and make difficulties, and to the utmost of his power stirs up the corruptions of the children of God in some way to oppose or obstruct so good a work."

A map of the town made by Joseph Blanchard, and dated Oct. 17, 1748, was brought before the General

Court, in order to show the centre of land, and also of population to that body, and the fitting place for the location of the church. On this plan the farms of Col. Tyng and Mr. John Tyng embrace an area six miles and fifty-six rods in length, and one mile wide. Mr. Jeremia Colburn's house is designated as in the northeast, and Mr. Robbins' house in the northwest angle of the town.

For the purpose of building the meeting-house, the town voted to raise £100, lawful money, and also, Nov. 15th, "to build y^e said house 46 feet long, 36 feet wide, and 21 feet studes."

On the 27th of December, 1748, the town voted "to Raise thirty Pounds, old Tenor, for the Supporte of a school." This is the first mention of any action regarding a school on the records.

This was probably what was called a moving-school, that is, a school taught by the same person successively in various houses. The reading-books then used were the "New England Primer," with its plain cuts of Adam and Eve, Jonah and the whale, and simple rhymes, such as

"The idle fool
Is whipt at school,"

the Psalter and the New Testament. The birchen twig was freely applied to offenders, and the Assembly's Catechism often repeated. The spiritual good of such mental exercise was, perhaps, in some cases, lessened by frequent association with the aforesaid twig.

The Court declared, June 26th, that the people of Nottingham and Joint Grass had forfeited the benefit of being incorporated with Dunstable, and that "the meeting-house should be erected on the east side of the road from Capt. Cummings' to Simon Thompson's house, where the timber lies for it." The Joint Grass families at this time were those of John Swallow, Joseph Spaulding, Jr., Timothy Read, Joseph Fletcher, Benjamin Robbins, John Spaulding and Samuel Cummings. In July following, the Nottingham and Joint Grass people, being dissatisfied with the place fixed upon for the church, petitioned the Court that they might be annexed to Dunstable, that they might thus vote on the question.

People at this time were very much troubled by wolves. Occasionally bears and catamounts were seen. It is related that one evening, while Deacon Joseph Fletcher, who owned a tract of six hundred acres in the Joint Grass District, was absent at the mill, his wife, Elizabeth, hearing something like the screaming of a child, went to the door, and saw the eyes of a catamount glaring at her from a tree. She fastened the door upon her visitor; yet thinking he might gain an entrance through a window, she crept into a barrel, and in that constrained position spent the night.

The town voted, in 1749, to pay 12s. 6d. to any person from Dunstable, Groton, Littleton, Westford, Lunenburg, Harvard or Hollis, on condition that

these towns should do the same, "that shall kill any Grone Wolf within one year, within the bounds of any of these Respective towns, or shall tak the tracte in any of these townes & folow it till thay kill it where they will if ye hed be produced by way of evidence & ye Ears cut off as the Law directs."

March 5, 1749-50, it was voted "to allow a town way from David Taylor's to Nathaniel Parker's;" and in July, following, £20 were to be raised for "ye supporte of the gospel."

On the 20th of May, 1752, it was voted that the meeting-house be erected "on a knowl by the Road that leads from David Taylor's to Simon Tomson's, about five or six rods north where the road was lying;" and at the next meeting, July 6th, it was "voted that Dea. Stickney, of Billerica, Capt. Nickols, of Reading, & Deacon Stone, of Groton, be a committee to fix a place for a meeting-house."

Thus it appears that some positive action was finally taken regarding the proposed meeting-house. The decision of the aforesaid committee satisfied the majority of the town in respect to the long-contested point; for, on the 2d of September, it was voted "to erect a meeting-house on the East corner of David Taylor's land," as the committee had determined. At the next meeting, Oct. 26th, it was voted to raise £33 6s. 8d. to pay for that part of the New Hampshire church which the committee, consisting of Col. Tyng, Samuel Taylor and Joseph Pike, had purchased, and for "taking down, removing & rebuilding s^d meting house." On the 18th of December, following, a committee was chosen to petition the General Court that "those living in the Northeast part of Groton, at a place called Joynt grass, be annexed to this town of Dunstable, as they formerly were."

From the records it appears that these people were willing, if the meeting-house were built upon a spot that suited them, to become again citizens of Dunstable.

This proposition found favor. "The General Court ordered that Joseph Fletcher, Joseph Spaulding, Samuel Cummings, Benjamin Robins, Timothy Read, John Swallow, Joseph Parkhurst, & Ebenezer Parkhurst, Jr., with their families & Estates, etc., be annexed to the town of Dunstable, agreeable to the vote of the Town of Groton on the 18th day of May, 1747." Thus these families added to the population of Dunstable, and became a constituent part of the town. It was finally resolved to erect a meeting house forty-two feet long, thirty-two feet wide and with posts twenty-one feet high "by y^e Highway Side which Leads from y^e house of Mr. Temple Kendall to Mr. Robert Blood's house."

The spot selected is a rocky knoll on the left-hand side of the road leading from the village of Dunstable to that of Tyngsborough, and about one mile distant from the former place. There is here a fine view of the west, with the summit of Wachusett Mountain in the distance. The land is now covered

with more or less timber, and no trace whatever of the old church remains. The graveyard on the western slope of the hill alone indicates the place where the people for many years gathered for the transaction of civil and political affairs, as well as for the service of public worship.

The committee appointed to build the meeting-house consisted of Ebenezer Sherwin, Ebenezer Kendall and Samuel Cummins, and they reported to the town, December 24, 1753, as follows: "We have built said house, and have erected it on y^e north side of the road that leads from Ebenezer Butterfield's to Robert Blood's, about thirty-four poles from said centre and have finished it all saving the doors."

The raising of the edifice took place on the 18th of July, 1753. Most of the inhabitants of that region doubtless gathered together to assist in laying the massive sills, in erecting with long spike poles the heavy posts of oak, and in putting the rafters into place. Probably, in accordance with the custom of those days, they passed the flowing bowl freely from lip to lip—a custom fortunately less approved in these days. The bountiful dinner was an important feature of such festivals. But a sad accident occurred before the "raising" was completed, which filled every heart with anguish. When the frame was nearly up, two men suddenly fell from a spar, and one of them, Mr. Abiel Richardson, of Groton, striking upon a rock, died immediately; the other man, more fortunate, escaped with very severe bruises and contusions.

The frame was soon covered and a floor laid, so that the house could be used for public services, but the seats were furnished gradually and the structure was not completed for several years.

The church soon became a central point. Several highways or bridle-paths, converging towards it, were made by permission of the town. At a town-meeting in May, 1754, it was voted "to build ye two bodys of seats and to Provide Boards for the Pulpit."

Jonathan Tyng, John Alford Tyng and Willard Hall, Jr., petitioned the General Court, this year, that three hundred acres of land in Chelmsford should be annexed to Dunstable, and although strongly opposed by that town, the petition was granted.

A meeting was held at Oliver Colburn's house March 21, 1755, when Benjamin Farwell, Timothy Bancroft, Joseph Danforth and John Steel were chosen selectmen, and Ebenezer Sherwin was elected "Culler of Staves."

This article afforded considerable income. Trade in hoop-poles, shingles, peltry and flax was also profitable. The potato had been introduced and was beginning to take the place of the turnip at the table; fish and wild fowl were abundant. The people spun and wove their own flax and wool into good, serviceable cloth, which they colored with vegetable dyes and made into garments. The women rode to church on horse-back, seated sometimes behind the men.

The tavern, the mill and the blacksmith-shop were the three several places where the men gathered to obtain the latest news or to discuss various questions. These subjects generally had reference to the building of roads, the state of the crops, the husking party, the last matrimonial engagement, the latest success in hunting or the singing or the sermon at the church.

The inhabitants of the eastern part of the town were not pleased with the location of the church on Meeting-House Hill, and therefore formed themselves into a precinct, called the First Parish of Dunstable. They erected a small meeting-house, with two porches and a tall steeple, near the spot now occupied by the Unitarian Church in Tyngsborough Centre. The steeple was blown down in the great gale of 1815. The Hon. John Pitts gave expression to his views of this church by the following lines:

"A very small meeting-house,
A very tall steeple;
A very proud minister,
A queer sort of people."

At a meeting of the members of this parish, Aug. 20, 1755, it was voted "that the place for a meeting-house in this precinct be on the west of Merrimack River, near Mr. James Gordon's Mills, where a fraim is erected for that purpose." It was also voted "to accept the fraim that is Now on the spot." It is also recorded "that John & Jonathan Tyng came into the Meeting & gave the Precinct-Glass for the Meeting-house." At a meeting of the precinct, held in 1756, Eleazer Tyng, Simon Thompson and Oliver Farwell were appointed a committee "to sett of the pew ground to those that have given & Pay^d most toward building Said house." In the ensuing year this parish raised £14 "to hire preaching."

The people of the westerly part of the town were also organized into a precinct or parish, about the time of the erection of the meeting-house. The act granting the authority for this precinct received the signature of Gov. William Shirley June 14, 1755. The first meeting of this Second Parish, or precinct, in Dunstable, was held at "y^e meeting house" on the 27th of October following, when Ebenezer Sherwin was chosen moderator, and John Steel parish clerk. John Cummings, John Steel and Joseph Fletcher were chosen as "committeemen and assessors of said parish." Joseph Danforth was chosen treasurer, and Benjamin Pike collector. These officers were then sworn "to y^e faithful Discharge of their Respective Trusts," and thus the Second or West Parish of Dunstable was fairly organized and started on its eventful way.

According to custom in those days, a few persons held slaves, and the following paper relating to the sale of one of them is still preserved:

"DUNSTABLE, September y^e 10th, 1756.

"Received of Mr. John Abbott, Junior, of Andover, Fourteen pounds, Thirteen shillings and Two pence. It being the full value of a Negrow Girl, named Dunal, about five years of Age, of a Healthy, Sound Con-

stitution, free of any disease of Body and I Do hereby Deliver the Same Card to the said Abbott and Promise to Defend him in the Improvement of hear, as his Servant forever.

"Witness my hand,

"ROBERT BLOOD,
"JOHN KENDALL,
"TEMPLE KENDALL."

Robert Blood lived on the place now occupied by Dexter Butterfield, and there are many stories of his peculiarities. He is said to have called an Indian doctor to prescribe for him when sick; but fearing lest the medicine might be poisonous, he gave it to his negro boy, who died from the effects. The place of his burial is still called "Negro Hill." A sheriff once came into church to arrest Mr. Blood, who, seeing his pursuer, placed his handkerchief to his nose, as if it were bleeding, and quietly left the meeting.

On being asked afterwards why he left the church so suddenly, he said: "The sons of God came to present themselves before the Lord, and Satan came also among them." (Job 1: 6.)

At a meeting of the Second Parish, held Nov. 20, 1755, it was voted that £20 be assessed "for y^e support of y^e Gospel for y^e present year;" also, that a committee, consisting of Ensign Ebenezer Parkhurst, John Steel and Joseph Fletcher, "search into y^e accounts of how much Preaching we have Had in said meeting-house;" and John Steel, Samuel Taylor and Adforth Jaquith were appointed a committee to take a deed of Lieut. John Kendall and Ebenezer Butterfield, "of y^e land y^e meeting-house stands on."

The account for building the church edifice was £74 4s. 11d., and the committee reported that "the preaching we have had in Said Meeting-house and ye Entertaining ye Ministers" amounts to £44 1s. Who these ministers were appears from various orders of the parish.

Of the several candidates, who received for their Sabbath services about £1, together with their "Entertainments," Mr. Josiah Goodhue was the favored one. It was voted to give him "a call to y^e Work of y^e Ministry with us in This Second Precinct of y^e town of Dunstable."

Mr. Goodhue presented his acceptance of the invitation under the following conditions:

"1. That you give me £100 for settlement, to be paid in y^e manner you voted the settlement.

"2. Fifty pounds as salary yearly, as long as I stand in y^e Relation of a pastor to this people.

"3. Twenty five cords of wood yearly Brought cool wood length to my Door.

"4. That if Providence should order it, that you should consist of Eighty Rateable Families, then y^e Salary to be Sixty Pounds.

"JOSEPH GOODHUE."

"March y^e 15, 1757."

The parish voted to comply with these conditions. On the 12th day of May, 1757, a church was organized, consisting of thirty-eight members, nineteen of whom were males and nineteen females.

The covenant was probably drawn up by the Rev. Daniel Emerson, of Hollis, N. H., and was formally accepted in his presence.

"A Chh Covenant, Dunstable, May y^e 12th, 1757.

"Then y^e underwritten Brethren Solemnly Covenanted before God, A one with another by owning this Covenant before me, & accordingly were declared a Chh of our Lord Jesus Christ, regularly incorporated p^r Mr. Daniel Emerson.

"We, whose Names are underwritten, do covenant with the Lord A one with another, A do Solemnly bind ourselves before the Lord A his People that we will, by the Strength of Christ, walk after the Lord In all his ways, as He hath revealed them to us in his Word.

"1. We avouch the Lord Jehovah to be our God, & give up ourselves with our Children after us, in then several Generations, to be his People, A that in the Sincerity A Truth of our Hearts.

"2. We give up ourselves to the Lord Jesus Christ, to be ruled A guided by Him in the matter of His Worship & in our whole Conversation a knowledge him not only our alone Saviour, but also our King, to rule over us, as well as our Prophet, to teach us by His Word and Spirit, accordingly we wholly disclaim our own Righteousness in Point of Justification, cleaving to Him for Righteousness, Life, Grace A Glory.

"3. We promise by the Help of Christ to walk with our Brethren A Sisters of the Chh in the Spirit of Love, watching over them & caring for them, avoiding all Jealousies, Suspensions, Backbitings, Censurings, Quarrellings A Secret Bittings of Heart against them, forgiving A forbearing, yet seasonably admonishing & restoring them with a Spirit of Meekness, who, through infirmities, have been overtaken in a Fault.

"4. We will not be forward in Chh Meetings to show our Gifts A Parts in Speaking, nor endeavor to disgrace our Brethren by discovering their failings, but attend an orderly Call before we Speak, doing nothing to the offence of the Chh, but in all things endeavouring our own A our Brethren's Edification.

"5. We further promise to Study how we may advance the Gospel A Kingdom of Christ, so as that we may gain them who are without, Settle Peace among ourselves A Seek the Peace of all the Chhs not putting a Stumbling Block before any, but Shunning the Appearance of Evil.

"6. We promise to demean ourselves obediently in all lawful things towards those God has or shall place over us in Chh or Common Wealth.

"7. We resolve in the same Strength to approve ourselves in our particular Callings, shunning idleness, nor will we oppress any we deal with.

"8. We also promise, as God shall enable us, to teach our Children & Servants the good knowledge of the Lord, and to fulfill all relative Duties prescribed in God's Word, that all ours may learn to fear A Serve the Lord ourselves, to this end we promise to keep up y^e Worship of God in our Families, that our Houses shall be Bethels, wherein y^e morning A Evening Sacrifice shall ascend.

"9. We do profess ourselves to be Congregational in our Judgments, A do hereby promise mutually one unto another that we will practice our Congregational Principles, which, according to our understandings, are most agreeable to the Directions of God's Word, A will take the Platform of Discipline to be our Rule to go by in all matters of Chh Discipline among us, which we look on as gathered out of the Word of God, A agreeing therewithall.

"Josiah Goodhue, pastor, Joseph Pike, John Kendall, Ebenezer Sherwin, Ebenezer Butterfield, Samuel Taylor, Josiah Blodgett, Ebenezer Kendall, Adford Jaquith, Timothy Reed, Stephen Adams, Joseph Taylor, Samuel Cummings, Benjamin Robbins, John Swallow, Susannah Kendall, Alice Butterfield, Susannah Taylor, Jemima Blodgett, Hannah Kendall, Olive Taylor, Sarah Cummings, Elizabeth Robbins, Elizabeth Goodhue, Joseph Fletcher, Abraham Kendall, Ruth Cummings, Robert Blood, Sarah Swallow, Elizabeth Fletcher, John Kendall, Elizabeth Cummings, Sarah Blood, Sarah Parkhurst, Mary Cummings, Hannah Taylor, Susannah Haywood, Abigail Blood."

The ordination of Mr. Goodhue occurred June 8, 1757. The people of the West Parish were doubtless full of life in making preparations for the great occasion. New garments had to be bought, or the old ones repaired; houses had to be put in good order, stores replenished, the tunes in the Bay Psalm Book had to be rehearsed, and the church to be put in good array for the joyous services.

The first baptism of an infant performed by Mr. Goodhue was that of "Jonathan, y^e son of John &

Sarah Swallow; the first marriage, that of "Oliver Farnsworth, of Townshend, & Jemima Haywood, of Dunstable," which occurred Nov. 2, 1757. The Half-way Covenant was then in vogue, admitting persons acknowledging the "Confession of Faith" as their belief to some of the privileges of the church, and hence the record of an admission to the church is made in accordance with the views of the member received in respect to this point.

The bounds between Dunstable and Groton were reviewed in April, 1756, and the line then commencing at Tyng's corner, passed on the easterly side of the old saw-mill, which stood where Cowpen Brook enters Massapoag Pond, "on the southerly side of the road that goes by Ebenezer Proctor's, in Dunstable, and terminates at a heap of stones on Flat Rock Hill." Feb. 15, 1757, a highway was laid out from the Province line by Joseph Danforth's barn, and thence onward to David Taylor's house.

March 5, 1759, the town voted that £16 should be assessed for "y^e suport of a school, or schools," and that it should be a "Writing School as well as a Reading School;" also, that "it should be a Moving School."

The town was well represented in the old French War, which commenced in 1755, and was closed by the Treaty of Paris in 1763.

Ensign John Cheney and William Blodgett were at the surrender of Louisbourg to the English, July 26, 1758. Their powder-horns are still preserved. That of Ensign John Cheney is elaborately ornamented with birds, fishes, deer, and the letters "F. C. W.;" it has also the inscription, "John Cheney his Horn, Cape Breton. Taken May 26, 1758." The horn of William Blodgett bears this inscription: "William Blodgett his horn, June y^e 7, 1760." Both these horns are still preserved.

It was the custom in those days for the men to occupy the seats on one side of the church, and the women those on the other. The elders sat upon an elevated seat in front of the pulpit, and the children and servants occupied the galleries. A tithingman, with a long pole, kept them all in order.

In August, 1760, a part of a family of the Acadians, or French Neutrals, whose sad fate is so touchingly told in the "Evangeline" of H. W. Longfellow, was brought to this town for support.

In Mr. Goodlime's records of the church it is found, under the date of December 11, 1763, that "The Man Servant & Maid Servant of Benjamin Farwell were propounded in order to their owning the Covenant (Nov. y^e 27), and admitted to y^e Privilege, Decem. y^e 11th." Their names were Thomas and Margaret, and they were probably held as slaves.

On the 15th of June of this year a thunder-storm passed over the town, when hail-stones fell nearly as large as a hen's egg, by which the early grain was beaten down and the glass of several windows broken.

Joseph Fletcher was chosen a deacon of the church, February 23, 1764, and at the same meeting it was voted that "Brother Abraham Kendall, Brother Josiah Blodgett and Brother Sam^l Cummings be Queresters in y^e Congregation." These men were expected "to set the tunes," for assistance in which a sort of a wooden instrument, called a pitch-pipe, was used, and also to lead the voices of the congregation in singing. The "lining out of the psalm" was generally done by the pastor or one of the deacons.

Robert Blood and Josiah Blodgett were chosen by the town, May 27, 1765, "to inspect the Salmon & Fishery according to law." No dams had then been constructed on the Merrimac or Nashua Rivers, to prevent the ascent of fish. There was a great abundance of shad, salmon and other fish in Salmon Brook and Massapoag Pond, and these were of great value.

The first general census of the population of the Province was taken this year, and by it Dunstable appears to have had in all ninety dwelling-houses, ninety-eight families, 138 males above sixteen, 143 females above sixteen, and a total of 559 inhabitants, of whom sixteen were colored people, and probably held as slaves. Of the thirty-six towns in the county, Bedford, Dracont, Natick, Shirley and Stoneham only had a smaller population.

The town voted, on the 25th of May of this year, "to Raise & assest £36 2s. for the use of a school, Repairing the pound, Building one pair of Stocks & other Town Charges." The pound stood and still stands beside the road from Dunstable Centre to Tyngsborough Centre, a short distance from the home-stand of Dexter Butterfield. The stocks, sometimes called the "cage," stood in the vicinity of the respective churches. The whipping-post was near them; but as there is no record of it on the books of the town or parish, it may be presumed that the mere presence of such an instrument caused a wholesome restraint.

In accordance with the custom of that period, the Second Parish chose, April 21, 1768, Deacon Samuel Taylor, Benjamin Woodward and Robert Blood a committee "to seat this meeting-house, and that the Highest Payers in the Last year's Tax on the Real and Personal Estate to be the Rule to Seat S^d house By and farther that they have No Regard to the Proprietors of the Pews in S^d house in seating the meeting-house." It was also voted to have regard to age in seating the meeting-house, also "to Petition to the Great and General Court to Be Maid a Destrect."

Robert Blood, Benjamin Pike, Josiah Blodgett and Lemuel Perham each presented a protest to the action of this meeting in respect to one article. Among the reasons assigned by the latter, one is, "Because thay voted that Mr. Joseph Pike should sett in the fore seat when thire was Nothing in the Warrant thire."

The desire of having the chief seats in the synagogue seems to have been as strong as that of the Scribes and Pharisees of olden time. That spirit, however, is not wholly unknown in the present day.

CHAPTER LVIII.

DUNSTABLE—(Continued).

The Town as Represented in the American Revolution—Educational, Religious and Other Affairs—1768-1820.

MASSACHUSETTS issued a circular on the 28th of February, 1768, asking the co-operation of the Assemblies in opposing the restrictive measures of Parliament. The principles of civil liberty had been growing, and naturally these were destined to come in collision with arbitrary measures.

General Thomas Gage, with seven hundred soldiers, entered Boston on the 28th day of September. Armed oppression was not long after met by armed resistance.

Some of the best blood of Dunstable was freely shed in the cause of liberty. The first recorded act of the town in the impending conflict was to choose the Hon. John Tyng to represent them in a convention held in Boston on the 22d day of September, 1768.

The Boston massacre, March 5, 1770, taxation without representation, pledges against the use of tea and foreign manufactures, formed the leading topics of conversation in the tavern, shops and houses of Dunstable, and the old firelocks used in the French War, a few of which still remain, were promptly put into effective order.

In 1772 the town voted £84 for educational and other purposes. In 1773 £20 were appropriated for a school. A "town-way two rods wide" was laid out from "the Provence line," commencing north of John Kendall's house and running by Temple Kendall's house "to the road that was laid out by said Kendall's, and Samuel Taylor's house."

By a mutual council, consisting of seven churches, convened September 28, 1774, the pastoral relation between Mr. Goodhue and the church was dissolved. The council aver that they "can heartily recommend him as a person of conspicuous seriousness and piety, and as one whom they judge qualified to do service in the ministry."

During his pastorate of seventeen years sixty-five persons were admitted to the church, and he seems to have left for the simple reason that the people were at the time somewhat divided in sentiment. The arrearages in Mr. Goodhue's salary were all paid. He was afterwards settled and died in Putney, Vt. Rev. William Wells, in the sermon preached at his funeral, November 16, 1797, said of him:

"I believe you will all join with me in asserting piety to God and benevolence to man were leading features of his character. The great object of his life was to be useful in his station as a minister of the gospel of Christ, and exemplify in his own conduct and temper those virtues and graces which, with the greatest sincerity, he recommended to others. His

end, like that of the godly man's, was peace, being not only resigned at the prospect of his dissolution, but desirous to depart and be with Christ."

Mr. Goodhue was married to Elizabeth, eldest daughter of Deacon Joseph and Elizabeth Fletcher, July 28, 1757. They had five sons and one daughter. Some of the sons became eminent in professional life.

In 1774 there was an article in the warrant for town-meeting to build a school-house, but the town voted not to do it. This is the first reference to such a building on the records. The prospect of a war with the mother country probably prevented the town from undertaking the expense.

The first Provincial Congress in October, 1774, appointed a Committee of Safety, and provided that a fourth part of the enrolled militia should, as minute-men," be held in readiness for immediate service. This gave evidence that a collision between the American and British forces was impending. Dunstable, with patriotic haste, prepared to assist in the common cause of national liberty. The following pledge evinces that spirit in the very beginning of the great struggle:

"We the subscribers taking into our consideration the present difficulty, do hereby voluntarily engage with each other in defence of our country, Privileges and Liberties for the space of six months from this date; that we will submit ourselves to the Laws equally the same as if they were in full force respecting our officers that now are, or hereafter may be chosen in all Military Duty

"DUNSTABLE, March 1st, 1775.

"Edward Butterfield, Nathaniel Holden, Lemuel Perham, George Bishop, Ebenezer French, Jonathan Bancroft, John Chaney, Samuel Roby, Eleazer French, Philip Butterfield, Jeraduel Colburn, Wm. French, Jonathan Sherwin, John Manning, Reuben Lewis, John Cummings, John French, Zebadiah Kendall, Joseph Farrar, John Marsh, John Cockley, Jacob Davis, Jesse Butterfield, Hezekiah Kendall, Henry Sheppard, William Glenn, Jonathan Woodward, Thomas Trowbridge, Total, 28."

The above valuable paper is owned by Dexter Butterfield.

The town voted, on the 4th of April, 1775, "to have minute-men agreeable to the desire of the Provincial Congress," and on the 12th of the same month it voted to assess £20 for "y^e encouragement & use of y^e minute men;" and they were "required to hold themselves in readiness to march at the first notice." The notice soon came, nor did it find the Dunstable soldiers unprepared, since many of them had seen hard service in the old French War, and a weekly drill had long been held. Late on the 19th of April the startling news came that blood had been shed at Lexington and Concord; but the engagement was over before the men from Dunstable had time to reach the scene of the battle. It is said that while the battle of Bunker Hill was raging a stranger called at the house of Mrs. Jonathan Woodward, near "The Gulf," and asked for something to eat. While partaking of her hospitality he began to berate Americans, and, boasting of the success of the British, declared that all would be subjects of King George, to whom they owed allegiance. Incensed at his inso-

lence, she opened the door and commanded him to leave the house, which he refused to do, saying he would go when he was ready. She then seized a chair, knocked him down and dragged him out of the house, giving him undoubted evidence of one woman's courage and devotion to the country. Eight days after the battle the town assembled and "voted to accept of y^e powder James Tyng, Esq., bought for this town."

Abel Spaulding, Lemuel Perham, Elijah Fletcher and Asa Kendall were chosen to join the Committee of Correspondence on the 12th of June, and at the same meeting Joel Parkhurst was chosen to represent the town in the Continental Congress at Watertown instead of John Tyng, whose health was poor, and James Tyng, who "had a multiplicity of business." These were trying times. Five days afterwards the Dunstable company, composed of fifty men, forming a part of the Massachusetts regiment, under the command of Col. Ebenezer Bridge, commissioned at Billerica, May 27th, was present and participated in the memorable action of Bunker Hill. During that sanguinary battle the company from Dunstable showed the bravery of veteran soldiers, as many of them indeed were, and it was only after their ammunition was gone that they left the field. Capt. Bancroft fought nobly in the redoubt and was wounded. Eleazer French had an arm shot off during the action, and picking it up, bore it as a trophy from the bloody field. His brother, Samuel French, had a ball shot through his right ear. Jonathan French, another brother, was in the battle. William French, and Jonas French, two brothers of another family, did good service on that day. The former discharged his gun with deliberate aim sixteen times. He was a shoemaker by trade, served through the war, and died in Dunstable at an advanced age. From his sobriety and uprightness he was called "Deacon William."

At the close of the battle these two brothers left the hill together. When crossing "the Neck" under the fire of the "Glasgow" man-of-war, they saw an officer severely wounded, and offered him their assistance. "I cannot live," he said; "take care of yourselves." They, however, raised him to their shoulders and bore him through the confusion to a place of safety. The suffering officer proved to be Capt. Henry Farwell, of Groton.

Mr. Ebenezer French was also at the battle of Bunker Hill. He was the grandfather of Benjamin French, Esq., who has now in his possession the bullet-moulds (which are of brass and will form twenty-four bullets of different sizes at one casting) the camp-kettle and musket of this brave soldier. He died April 14, 1808, in the seventy-seventh year of his age. A few of the Dunstable men were in Capt. John Ford's company, of Chelmsford. They reached the field a short time before the action began and fought bravely. While Isaac Wright was sitting

exhausted on a bank near a house in Charlestown, a cannon-ball came rolling rapidly, and so near him that he could have touched it with his foot. Being asked why he did not stop it, he said, "I then should have returned home with only one leg." He was one of the first who enlisted.

During the siege of Boston many of its inhabitants went to the other towns in the State in order to avoid the ill treatment of the hostile troops. From the following vote it appears that several came to Dunstable, where they were kindly entertained:

Nov. 20, 1775, voted that "y^e Poor & Indigent inhabitants of the town of Boston which are now in this town be supported with y^e provisions of this town so long as it could be procured in S^d town therefor."

Jan. 4, 1776, the General Court gave order that four thousand blankets should be provided by the respective towns for the soldiers in the army, and paid for out of the public treasury. Dunstable furnished about one dozen of them.

On the 31st of May, 1776, Oliver Cummings was commissioned captain of the Dunstable company in the regiment of militia of which Simeon Spaulding was the colonel.

Each soldier was provided with a fire-arm, bayonet, cutting sword or hatchet, cartridge-box, from fifteen to one hundred pounds of balls, six flints, a knapsack, blanket and canteen. The muskets were long and heavy, and very inferior instruments as compared with the needle-guns of the present day. The ammunition was stored in the loft of the meeting-house, and the place of rendezvous for the minutemen was at the house of Asa Kendall, which was, subsequently owned by Dr. A. W. Howe.

At a meeting of citizens of the town, June 8, 1776, Major Ebenezer Bancroft, Capt. Reuben Butterfield and Mr. Timothy Reed were chosen "a committee to prepare y^e Draft of a vote," which contained many patriotic sentiments.

It was the reception of such spirited resolutions from the various towns of the Province that gave the leaders of the Revolution courage to make the celebrated Declaration of Independence, which followed in a few weeks.

The following letter evinces the feelings of the soldiers at the post of duty, and also reminds the reader that the town, as yet, had enjoyed only the advantages of a "moving school," and that continuous toil had been the lot of most of the inhabitants:

"TICONDEROGA, Oct. 15, 1776.

"Honored Father & Mother, after my Duty To you & Love to my Brothers and Sister, I have Taken this opportunity to Let you now that I am Well at present and Blessed be god for it, & I hope these Linds will find you the Same. I shant Write much at present only the Ragbirs have drove Our flut Back here, we have sustained Loss of Men & Vessels, & the Ennys army is at Crown point or near their, & we expect them hear Quick. Philip Butterfield is got Better. Jeass Butterfield is pooley yet. Rember me to all Dquirin friends. So I Remain your Dutiful Son.

"JAMES CUMMINGS."

The town was always ready to respond to the repeated calls for men and money, and meetings were often held either at the "alarm post," or at the tavern, or at the church, to take measures for doing its part in carrying on the war. Several of the Dunstable soldiers served in companies of other towns, and some from other places joined the Dunstable companies.

In Dunstable, as well as in other towns, there were some persons holding Tory principles. The town promptly brought them to an account for their opposition to the common cause. At a public meeting held Sept. 11, 1777, Lieut. Nathaniel Holden was chosen "to procure and lay before y^e court y^e evidence y^e might be had of y^e Enimical disposition of any of this town that may be complained of that they may be proceeded with agreeable to an act of this State."

Some of the British soldiers were quartered on Dunstable. Three were drowned while attempting to cross the river at Wicassuck Island, and their remains were buried near that spot.

On the 9th of February, 1778, the town approved of the Articles of Confederation between the thirteen States. At another meeting held April 23d, the town chose John Tyng, Esq., Joseph Danforth and Joel Parkhurst to examine the new Constitution of the State, proposed by the General Court. After hearing the report of this committee, June 2d, the town "voted to reject y^e Constitution for y^e following reasons, viz.: Because it invests y^e governor with too unlimited a power. 2dly, because there is not an Equal Representation. 3dly, Because y^e Governor ought not to have y^e Title of Excellency. J. Blodgett, Town clerk."

This Constitution was prepared by a committee of four members of the Council and twice that number of the House of Representatives. It was submitted to the people of the State in March, 1778, and by them rejected. The vote stood 19,000 against 2000, as many as 120 towns not voting. The general objections to it were that it did not contain a declaration of rights, that it made representation unequal, and that the duties of State officers were not accurately defined.

Paper-money had at this time greatly depreciated in value, taxes were high, many of the able-bodied men were absent in the army, and the American cause seemed, in the minds of many, to be sinking; yet the citizens of Dunstable still went resolutely forward to meet the demands made upon them.

The term of service of many of the Continental soldiers had closed, and two thousand men were now called for to fill up the sixteen depleted regiments of the State. Fifteen hundred more were to be raised as ordered by vote of Congress. Dunstable resolutely bore her share of this draft, and nobly responded to the call. Shirts, shoes and stockings were also required of the town; and since the women as well as men were patriotic, those articles were promptly furnished.

On the 15th of February, 1779, the parish voted £100 "for the support of families of those Persons this Parish have hired to Engag into Continental Army."

The town this year appropriated £130 for public schools and other expenses, which included the providing of clothing for the soldiers.

Notwithstanding the expenses of the war, it appears from records of that date that the institutions of the gospel were supported. For about six years the pulpit had been supplied by such ministers as they were able to find and had the means to pay, and now, in hope of having a pastor of their own, they considered the question of uniting with the other parish in building a church and settling a minister.

On the 23d of March the Second Parish agreed to "Raise five Hundred Pounds for the support of such minister or ministers of the gospel as may be cauld to Preach to this People." At an adjourned meeting the above-named sum was increased by £500.

The 19th of May, 1780, is celebrated as the Dark Day. The obscurity was so great that birds sought their perches at mid-day, and the people had to light candles in order to distinguish objects in their houses. The superstitious were inclined to think the day of doom was approaching. "About ten o'clock," wrote Mr. Phineas Sprague, of Malden, in his journal, "it began to Rain and grew vere dark, and at 12 it was almost as dark as Nite, so that wee was obliged to lite our candels and Eate our dinner by candel lite at Noonday." The darkness of the evening of that day was very remarkable. "A sheet of white paper," says Dr. Tenney, "held within a few inches of the eyes, was equally invisible with the blackest velvet."

This darkness might possibly have been caused by the burning of extensive forests in Northern New Hampshire, the smoke of which might have floated over a section of New England and obscured the sun. Alarm at the coming of the darkness was naturally increased when the spirits of the people were depressed in consequence of the war. It was common to attribute unusual phenomena to supernatural agency, for there was at that time less scientific knowledge than at present. The belief of the people in ghosts and haunted houses was then very prevalent. It was generally considered ominous to see, for the first time, the new moon over the left shoulder, to spill salt, or to sit thirteen at the table. A horse-shoe was nailed to the posts of the door to keep off witches, and the sight of a white spider gliding down its thread foreboded evil. The Bible, interpreted literally, was the guide-book of our fathers, and science, which sheds light upon the meaning of many a perplexing passage in the Scriptures, was a word almost unknown to them. The spirit of God's teaching they, however, usually understood.

Another State Constitution was framed this year by delegates chosen by the towns of the Commonwealth, and submitted, in March, to the people for their examination.

It appears that in Dunstable there was a strong opposition to the instrument. It was chiefly against granting protection to all religions, against the liberty of the press, against so great a number of Councilors and Senators, against the power of the Governor to march the militia to any part of the State, against the appointment of all judicial officers by the Governor, against the Governor and other officers declaring themselves of the Christian religion, against the form of the oath,—they being desirous that the words "living God" should be included,—against the Quakers being excused from taking an oath, and against the time appointed for the revision of the Constitution.

That instrument was, however, ratified as the organic law by more than two-thirds of the votes of the State. Hon. John Hancock was the first Governor chosen under it. The election was held on the 4th of September, and Dunstable gave sixteen votes for Hancock. The small vote thrown may have indicated the disaffection of the people in respect to the new Constitution, and may have been owing partly to the absence of many voters in the army.

The town this year furnished 7500 pounds of beef which the General Court called for to supply the army, and voted to raise £2500 for school and other purposes. In the exigencies of war, paper-money was issued to such an extent that one dollar in silver came to be equal to forty dollars in what was called the "Continental currency." The one-dollar bill had on its face the Latin words, "*Depressa resurgit*," which is in English, "The down-trodden rises," and which had, at that time, much meaning; but so great was the depression in its value, that a blanket bought by a soldier cost £100, and the salary of the Rev. Ebenezer Bridge, of Chelmsford, for eight months, "was set" at £3500. Ebenezer French was heard to say that he once paid \$40 of it for a breakfast in New York. This paper-money, becoming worthless, went out of use the following year and was never redeemed.

At this time the country was passing through one of its darkest periods. The life-blood of the nation had been freely given; there were many desolate homes; family ties had been sundered; many had grown gray in military service; the young had come to a premature manhood; cities and dwellings were falling into decay, and many of the farms were half-tilled.

Dunstable, however, continued to furnish and to pay its quotas of soldiers, to support public worship, and to make appropriation, as ability allowed, for the education of its children. All classes cheerfully denied themselves, foregoing common luxuries and devoting themselves to labor. No sound was more frequent than that of the loom and spinning-wheel, and the wives and daughters, during the absence of their husbands and their brothers at the seat of war, were always ready to help the aged man on the farms.

The defeat and capture of the British forces under Lord Cornwallis at Yorktown, Va., virtually terminated the war. In furnishing men and money, Massachusetts bore about one-quarter of the burden, and of this the town of Dunstable its full share.

The news of the victory of the allied French and American forces under Washington was received throughout the country with demonstrations of joy. "From every family altar," says Mr. B. J. Loring, "where a love of freedom dwelt, from pulpits, legislative halls, the army and from Congress (October 24), went up a shout of thanksgiving and praise to the Lord God Omnipotent, for the success of the allied troops, and these were mingled with universal eulogies of the great leader and his companion in arms. The clouds which had lowered for seven long years, appeared to be breaking, and the splendors of the dawn of peace burst forth, like the light of a clear morning after a dismal night of tempest."

The Second Parish of Dunstable had no bell at this time to ring in expression of its joy over the great victory; still, every citizen exulted in the success of Washington and Lafayette. The drooping spirits of the people were revived by the return of the soldiers from their long campaigns.

The following notices of some men from Dunstable actively engaged in the War of the Revolution are still preserved:

Oliver Cummings, Jr., was a private in the battle of White Plains, October 28, 1776. He returned to Dunstable and subsequently removed to the town of Sumner, Me., where he died.

James Cummings was at the taking of Ticonderoga, July 12, 1777, and in engagements during the war.

Joshiah Cummings entered the army when a mere boy, and served as a guard over the soldiers of General Burgoyne, subsequent to their capture in October, 1777. He also performed duty with the army in New Jersey. After the Revolution he was commissioned as captain of the Dunstable militia company.

William French was a private at the battle of Bunker Hill. On the expiration of his term of service at Cambridge, he re-enlisted and well performed his duty through the war.

Jonas French, born August 7, 1757, and youngest brother of the above, was with him, as already stated, at the battle of Bunker Hill. He also served as a faithful soldier through the war. He was often employed as a school-teacher. Both he and his brother William received pensions for services in the war.

Ebenezer French, to whom reference has already been made, served through the war, and died in Dunstable April 14, 1808, in his seventy-seventh year.

Samuel French had a ball shot through his right ear at the battle of Bunker Hill. He died in Dunstable, and is buried on Meeting-House Hill.

Elihu French, wounded in the same battle; died of consumption soon after his return home.

Jonathan French, brother of the two last named, was with them in the first great battle of the Revolution, and was subsequently, together with his two sons, in the service on Lake Champlain.

William Bledgett served as a private during the war. He had learned to face danger in the old French War. He was four times cast away at sea.

John Cheney had acquired great experience as a soldier in the old French War, and served his country faithfully during the Revolution. He was at the capture of Quebec. He was a very useful citizen, and held many town offices.

Temple Kendall was a lieutenant under Captain John Ford at the battle of Bunker Hill.

John Proctor came home from the war and died of consumption.

Colonel Ebenezer Bowne, as already stated, fought bravely at Bunker Hill and in other battles during the war. He purchased and enlarged the house once owned by Henry Farwell and now occupied by his grandson. He went into the French War at the age of sixteen years. He was commissioned lieutenant-colonel April 21, 1780, and justice of the peace in 1798.

Jonathan Woodward served as a private through the war. He lived to be a centenarian, and a sermon was preached on his one hundredth birthday. He retained the use of his faculties until near the close of life, and was an excellent man.

Ensign *Leonard Butterfield* was a private in the war. He lived near Meeting-House Hill. Leonard Butterfield, the father, lived on the south side of the road on Meeting-House Hill; his son, Philip Butterfield, lived on the same side of the road, a little towards the west. The cellar-holes of both houses still remain. Leonard Butterfield, Jr., built the house now owned by Dexter Butterfield, east of Meeting-House Hill.

Jesse Butterfield served as a private in the war, and removed to Farmington, Me., where he died.

Philip Butterfield, brother of the above, was also a private in the war.

Paul Woods went into the naval service, and was killed by falling from the mast of a ship.

Joel Parkhurst, father of Leonard Parkhurst, was a private in the war, and died at Dunstable. His house stood about twenty rods north of that of Mr. John A. Parkhurst.

His son, *Leonard Parkhurst*, also served in the war.

Ephraim and Nathan Taylor, brothers, living in the easterly part of the town, went into the army, and were never heard from afterwards.

David Jaques, died September 2, 1835, aged seventy-eight years. He is buried in Tyngsborough, and on the headstone is written, "To die is to go home;" and also, "A soldier of the Revolution."

March 3, 1783, the town appropriated £30 for education. On the 7th of April the town cast sixteen votes for John Hancock as Governor, and eleven votes for Thomas Cushing as Lieutenant-Governor. At the same time a committee, consisting of Jonathan Fletcher, Nathaniel Holden, Jonathan Emerson and Temple Kendall, reported that it was advisable that the town should be divided into five districts for school purposes, as follows:

1. All to the east of the Merrimack River.
2. All the First Parish on the westerly side of the Merrimack River, excepting Lieutenant Perham and Mr. John Bridge.
3. All the Second Parish on the great road from Mr. Ezra Thompson's to Hollis up to Salmon Brook, living on and to the north of said road.
4. All to the west of Salmon Brook, excepting Mr. Bridge's.
5. All the remainder of the town.

In May this report was accepted, and the districts were established. The Hon. John Tyng was chosen representative, and it was voted that the selectmen should build a pound.

On the 3rd day of September, a definitive treaty of peace between Great Britain and the United States was signed at Paris. Dunstable shared in the general rejoicing over the welcome tidings of peace once more. The oft-used musket was now hung above the oaken mantel-piece.

The westerly part of the town had now become generally settled, and the centre of population had advanced somewhat in that direction. It was thus thought advisable that the place of public worship should be changed, and at the meeting held Nov. 8, 1784, it was "voted to move the meeting-house from the place it now stands on to some other convenient place in said Parish;" it was also voted that the place "be

between the Dwelling-house of Mr. Jonathan Proctors and the house that Mr. Jonathan Woodward now lives in, on the north side of the road that goes from one house to the other a little to the west of north from said Procter's new Barn."

In 1785 the town raised £40 for schools, gave twelve votes for James Bowdoin as Governor, and chose the Hon. John Pitts to represent it in the General Court.

The snow on the 22d of April was two feet deep and the surface so much incrustated with ice as to bear up an ox-sled.

Jan. 25, 1786, the Second Parish "voted & chose Mr. John Chaney, Junr, to Lead in Singing in Publick Worship."

There is no other reference to music on the records of the Second Parish; but it would seem from those of the church that the practice of "lining out" the hymns had not yet been abandoned. About this time church choirs were formed in the State, and the "deaconing out of the hymns," to which our worthy ancestors were accustomed, was practiced no longer. The psalms and hymns of Dr. Watts also took the place of "the Bay Psalm Book," and some of the fugue tunes of William Billings were now occasionally sung.

The town this year, for the first time, elected overseers of the poor. The poor were kindly treated, sometimes receiving a small sum of money from the town to help them in their efforts to maintain themselves, and sometimes living in the family of a relative or friend, who received some compensation for their expense and trouble. The number of paupers probably did not exceed the number of the committee appointed to take care of them.

In 1787 and for some time previous efforts were made to unite the two religious bodies known as the First and Second Parishes. This union was at one time nearly consummated, but was prevented by the donation of Mrs. Sarah Tyng Winslow. Ecclesiastical affairs being now under control of the town, it voted in 1787 to raise £60 for preaching, and also that services should be held alternately at the east and west meeting-houses.

On the 21st of February, 1788, the church held a solemn fast "to look up by Prayer to the Supreme Head of the Church for his Direction in Choice of a Minister," but it appears that no minister was found to suit all the congregation.

On the 22d of June, 1789, what is now the town of Tyngsborough was incorporated into a district and received for its own use the donation of Mrs. Winslow, which, as a town, it still enjoys.

The church edifice on Meeting-house Hill was removed to Dunstable Centre in 1794 and finished in approved style.

The land for the site of the building, consisting of one acre and one hundred and thirty rods, was well chosen, and was conveyed by Jonathan Proctor to the town in a deed bearing date August 25, 1790, and it is

described as "the land on which the school-house now stands, and bounded beginning at the southerly corner of said land at a heap of stones by the road, thence running northerly about twenty-nine rods to a heap of stones by a black oak tree, thence south forty-four degrees west twenty rods to a heap of stones, thence south six and a half degrees west eleven rods and a half to a heap of stones by the great road, thence east eleven degrees south by the north side of the said road fourteen rods and a half to a heap of stones first mentioned." This condition is mentioned in the deed—"that the inhabitants of the said Dunstable shall, within the term of three years from the date hereof, have caused to be erected upon the said land a Meeting-house for publick worship and a School-House, and shall never suffer said land to be destitute of said buildings for more than three years at any time, and that no other building shall ever be erected on said land than such as shall be necessary to accommodate the inhabitants when attending on Publick Worship."

David Fletcher, joiner, gave bonds to Zebulon Blodgett, town treasurer, to finish the meeting-house at or before the 1st day of July, 1794. He was to build thirty-three pews and a pulpit, "and the breast-work in the gallery not inferior to that in the meeting-house in Tyngsborough."

The edifice was dedicated to the service of God, "agreeable to ancient example and more modern practices," on the 2d day of October, 1793.

The ordination of Mr. Heywood took place on the 5th day of June, 1799, several ministers taking part in the services. The expense to the town for the ordination was twenty-three dollars.

At the incoming of the present century Dunstable was in a prosperous condition. Its population had increased to 485 persons.

In April, 1800, the church chose Deacon Zebedee Kendall, Captain J. Fletcher and Captain S. Stevens a committee to attend the meetings of the singing-school, for the purpose of choosing leaders, and it also invited all "who are skilled in sacred harmony to come forward and assist the church in that part of public worship."

Efforts had been made to introduce the bass-viol into the church service, but serious objections were urged against it. One called it "the Lord's fiddle," and another said he should get up and dance if it came into the church. At one meeting it was "voted to suspend the introduction of the Bass-Viol for the present on account of an objection made by Lieutenant Simcon Cummings:" but on the 20th of March, 1804, the innocent instrument triumphed over all opposition, the church voting that the bass-viol be introduced into the meeting-house on days of public worship, and that those who have skill to use it, bring it and perform on Sabbath-days.

The Middlesex Canal, extending from Boston to a point near Pawtucket Falls, in the Merrimac River,

was opened this year. The transportation of lumber, cattle and grain from Dunstable to the metropolis was thus facilitated. The canal was about twenty-seven miles long, thirty feet wide and three feet deep, and served for conveying merchandise from the Merrimac River to Boston until the opening of the Boston and Lowell Railroad, in 1836, when the canal gradually became useless.

The town in 1805 provided a book containing the Constitution of the United States for each of its schools, and the next year voted \$700 for building five school-houses.

The district of Tyngsborough was incorporated as a town February 28, 1809, and the population of Dunstable was thereby greatly diminished.

A few soldiers from Dunstable engaged in what was called Mr. Madison's War of 1812. The decisive victory of General Andrew Jackson over the British forces, at New Orleans, on the 8th of January, 1815, terminated the war, and on the 18th day of February following, President James Madison issued a proclamation of peace. This was hailed with joy by the people of Dunstable. A day was set apart for the celebration of the event. The people assembled in their best attire, and when the soldiers had gone through with their evolutions, all partook of a bountiful collation, and then, proceeding to the church, they listened to a patriotic address from the Rev. John Perkins, a Baptist minister of Chelmsford. Dunstable shared in the general prosperity which followed the long and exhausting war. The people increased in wealth, numbers and intelligence. A more generous style of living soon became manifest. Newspapers were taken, and the chaise and Jersey wagon were brought into use.

On the 2d day of September occurred what was long known as "the great gale." The wind blew with such violence from the southeast and south as to overturn fences and forest trees, and, in some instances, barns and dwelling-houses.

This was the severest storm that had occurred in New England since Aug. 15, 1635, when, according to the historian William Hubbard, "many houses were blown down, many more uncovered. The Indian corn was beat down to the ground so as not to rise again. The tide at Narragansett rose twenty feet perpendicularly. The Indians were obliged to betake themselves to the trees, and yet many of them were drowned by the return of the tide before the usual hour."

The year 1816 was exceptional for the severity of the cold. Frosts appeared during each of the summer months, and the crop of Indian corn was nearly destroyed.

In the year 1817 the town raised \$300 for schools, and the same amount for preaching.

The church in 1817-18 was favored with an extensive revival, and as many as seventy-three persons, many of whom were heads of families, made a profession of religion.

A Universalist Society was formed by citizens of Dunstable and the towns adjacent, and a constitution adopted Jan. 21, 1818.

The society used the old meeting-house as a place of worship, and the pulpit was supplied by such preachers as could be from time to time obtained.

The number of inhabitants in 1820 was 584.

CHAPTER LIX.

DUNSTABLE—(Continued).

Church Erected—Soldiers in the War of the Rebellion—Dunstable Council Bazel Formed—Nashua, Acton and Boston Railroad Opened—Bi-Centennial Celebration—1821-90.

THE church, though somewhat strengthened by a revival, was still unable to support a minister, and therefore applied, Feb. 7, 1822, to the Massachusetts Society for Promoting Christian Knowledge for some assistance, representing that "about one-half the property of this town stands on sectarian grounds;" that "the church had been destitute of a settled minister for seven years;" that "the church now consists of about one hundred and five members;" that "it is decidedly orthodox;" and that "for nearly three years past the Rev. Samuel Howe Tolman has labored among us a part of the time;" and that they had given him a call to settle over the church for the term of five years. In reply to this petition the society agreed to pay, conditionally, \$100 per annum towards the support of Mr. Tolman. He was, therefore, installed over the church and society.

Dec. 24th it was voted "to adopt into our church the use of the Select Hymns selected by Dr. Samuel Worcester, of Salem, Mass." This book took the place of the Psalms and Hymns of Dr. Watts. Musical instruments, as the bass-viol, violin and clarionet, had been introduced into the choir, and it does not appear that any one now objected to their use in the services of the church.

A post-office was established in the town on the 13th of February, 1829, and Josiah Cummings, Jr., was appointed postmaster. Before the establishment of this office mail matter was received at the office in Tyngsborough.

It was this year decided by the evangelical part of the religious society to withdraw from the old meeting-house, and to build a new one. An advisory council was therefore called, which unanimously recommended the proposed undertaking. Subscriptions were at once taken, a site was purchased of Jasper P. Proctor for the sum of \$100, and the present substantial edifice, under a contract with William Rowe, of Groton, was soon erected. As already seen in the opening chapter, this building has been much improved within recent years. The dedicatory sermon

was preached by Rev. Amos Blanchard, D.D., Dec. 21, 1831.

The Orthodox Church voted, July 9, 1831, that "for the future we meet in the new meeting-house for divine worship on condition that the pews be rented and the rents be appropriated to the support of the gospel in the new house."

October 10th of the same year a call to the pastorate of the church was given to the Rev. Eldad W. Goodman, which he accepted.

The town, in 1834, voted to appropriate \$100 for a singing-school, and chose Henry Parkhurst, Captain George Wright and Cyrus Taylor a committee to superintend the same.

On the 25th of August the Rev. Mr. Goodman, at his own desire, was dismissed from the pastorate of the church. He was regarded a faithful minister.

The Rev. Dana Goodsell supplied the church for a few months, declining, however, a call to settle as pastor. On March 15, 1837, the Rev. Levi Brigham was ordained pastor of the Evangelical Church.

In 1845 the town appropriated \$400 for the use of public schools. Mr. John Hayward, in his "Gazetteer of Massachusetts," published in 1846, makes some errors in statements regarding Dunstable. "The soil," he said, "is sandy, and generally unproductive of other crops than hops and rye." This is plainly incorrect, the land being well adapted to the growth of all the cereals, and as good as that of any other town in this part of Middlesex County.

In 1848 the amount appropriated for public schools was raised to \$500.

The Worcester and Nashua Railroad, which enters the town from Pepperell, and passes along its western border near the Nashua River, into Nashua, was opened on the 18th of December; but as it is remote from the centre, and leads to Boston by a circuitous route, it has been of little value to the place. It has no station in the town.

The town voted, at one of its meetings, "to sell the old town standard at auction," and also to receive Ira Hall and Webb and Bowker, with their estates, from Groton. The Rev. Levi Brigham was dismissed, at his own request, March 21st, from the pastorate of the Evangelical Church. He was an able pastor, and rendered the town much service from an educational point of view. He was succeeded by Rev. Darwin Adams, son of the celebrated school-book maker, Daniel Adams, M.D. About this time the meeting-house was enlarged and repaired. Miss Lucy Fletcher gave the church a pulpit, Dr. Daniel Adams presented to it a clock, and Mrs. Spaulding a set of chairs for the communion table. And here it will be fitting to mention that in later years the church has been remembered with valuable gifts. Mr. Jonas Kendall, of Framingham, has presented a beautiful communion service, and \$3000 for a permanent fund. Mrs. Zilpha Woodward gave \$500 and Miss Mary Wilson \$200 as permanent funds.

The Rev. William C. Jackson, of Lincoln, was installed over the church November 2, 1859.

The number of inhabitants in 1860 was 487, of whom 243 were males and 244 females; 11 were over eighty, and 1 was over ninety years old.

The Dunstable Cornet Band was organized September 15th, with Hiram Spaulding as leader, treasurer and collector. It has attained a good reputation for skill in its musical performances, as well as for the gentlemanly bearing of its members. Its services are in good demand for processions and other public occasions in neighboring cities and towns.

On the breaking out of the War of the Rebellion the town manifested great activity in the enlistment and support of the soldiers. In this patriotic effort the ladies bore a conspicuous part. Volunteers promptly entered into the service of their country, and as many as sixty-four soldiers from Dunstable shared in the privations and battles of the war.

Notwithstanding the demand upon resources, then made by the war, the town raised, in 1862, \$400 for the support of public schools. July 26th it was voted to borrow, if needed, \$500 for the volunteers.

In 1863 it was voted to put up guide-posts throughout the town, for which it paid about \$50. And here may be given an example of the public spirit of the young people of the town. The Dunstable Temperance Union, holding regular meetings once a month, purchased, in 1889, six lamp-posts, with accompanying lamps and fixtures, and caused them to be set out in different parts of the village. By not only thus furnishing, but arranging for the lighting of these lamps, the said organization takes a very practical method of letting its light shine. The money expended for these lamps was raised by dramatic entertainments given by the young people in Parker's Hall.

On the 8th of October, 1863, the old church in the Centre was destroyed by fire. It was never supplied either with an organ or with a bell. In front of the pulpit, on the gallery, was the inscription, "Finished in 1793." The old line of sheds for the horses on the side of the Common are the only memorials that remain of this ancient church building. After the division of the society the Revs. Hiram Beckwith, Russell Streeter, Josiah Gilman and William Hooper preached in it permanently. The pulpit was occasionally supplied by the Rev. Hosea Ballou, the Rev. Adin Ballou, the Rev. Thomas Whittemore, and other clergymen.

The names of the soldiers sent from Dunstable into the late war are as follows :

Anderson, Henry, private, three years, Thirty-second Regiment.
Barber, Esau, served one year in the navy.
Barnes, James, served one year in the navy.
Bean, Francis, enlisted for three years, December 19, 1863; mustered in January 5, 1864, private, Company B, Fifty-ninth Regiment.
Boddy, Frederick, private, three years, Twenty-second Regiment.
Brown, Charles, volunteer, three years, private, Company K, Fourteenth Regiment.

Butterfield, Dexter, enlisted and mustered in October 14, 1861, three years, private, Company A, Second Regiment; made a sergeant June 1, 1864; discharged October 14, 1864.

Carlin, Harrison, volunteer, private, Company C, Fourteenth Regiment, U. S. A.

Cheever, Alvin, enlisted and mustered in August 31, 1862, for nine months, Company A, Sixth Regiment.

Conway, Michael, private, mustered in August 14, 1862, three years, Company G, Forty-first Regiment.

Currier, Warren (2d), enlisted and mustered in July 11, 1865, three years, Fifth Battery.

Daglish, John J., enlisted and mustered in for one year, February 21, 1865, Company F, Thirty-eighth Regiment.

Dalga, Simon, private for three years, mustered in August 14, 1862, Company G, Forty-first Regiment.

Davis, Asa, private, nine months; enlisted October 12, and mustered in October 17, 1862, Company G, Fifty-third Regiment; died of chronic dysentery at Baton Rouge, July 1, 1863.

Davis, James A., enlisted and mustered in as a private for three years October 11, 1864, Company A, Second Regiment; wounded at the battle of Antietam and discharged; re-enlisted for one year, December 30, 1864, Company E, Cavalry, Frontier Service.

Donahue, Patrick, enlisted and mustered in July 14, 1865, for three years, Fourteenth Battery.

Douley, Joseph, enlisted and mustered in August 31, 1861, nine months, Company B, Sixth Regiment; discharged November 2, 1862, for disability.

Dyble, James, private, three years, Fifteenth Battery.

Eldredge, Frank W., private, three years, Twenty-sixth Regiment.

Farrar, Edward, private, three years, Fifteenth Battery.

Foley, Michael, three years, mustered in August 14, 1862, Company G, Forty-first Regiment.

Fletcher, Albert W., private, enlisted September 2, 1862, for nine months, Company D, Fifty-third Regiment. On the night previous to the battle of Port Hudson he gave his knapsack and money to a wounded comrade, to be conveyed to his mother in the event of his being killed in battle. He was last seen amongst his company bravely making the charge in the sanguinary contest of June 14, 1863. What more noble record could be made of him?

Foss, Charles T., private, three years, Company B, Fifty-ninth Regiment; enlisted December 19, 1863; mustered in January 5, 1864.

Gibson, James H., volunteer, private, mustered in August 6, 1864, for three years, Company K, Thirty-third Regiment; farmer.

Harbick, Alonzo, private, three years, Company B, Fifty-ninth Regiment; enlisted December 19, 1863.

Harbick, Warren, private, three years, Company B, Fifty-ninth Regiment; enlisted December 19, 1863.

Hickey, James, enlisted August 13, 1864, private, three years, Second Massachusetts Cavalry.

Hicks, Hiram H., enlisted August 8, 1864, Reserve Veteran Corps.

Hobbs, George, three years, Fifteenth Battery.

Hunter, George, volunteer, private, three years, Company K, Fourteenth Regiment.

Ingalls, James S., volunteer, three years, Company C, Twenty-sixth Regiment; discharged and died at New Orleans.

Jackson, Edward P., private, nine months, enlisted September 26, 1862, Company D, Forty-fifth Regiment; he was promoted to a corporal.

Jacques, Josiah S., Company K, Thirty-third Regiment, three years; mustered in August 6, 1862.

Jones, Cornely R., three years, enlisted and mustered in August 8, 1864, Reserve Veteran Corps.

Kahoe, Michael, private, three years, Eleventh Regiment; enlisted August 16, 1864.

Kelleky, James, three years, Twenty-eighth Regiment.

Keyes, Paulody, volunteer, three years, Twenty-sixth Regiment.

Keyes, Samuel P., volunteer, private, mustered for three years, December 20, 1864, New Hampshire Eighth Regiment.

Knight, Isaac S., private, enlisted for three years, January 2, 1864, Fifty-ninth Regiment.

Lyons, Thomas, private, nine months, enlisted August 31, 1862, Company K, Sixth Regiment.

Marshall, George E., volunteer, private, three years, Company H, New Hampshire Seventh Regiment; enlisted and was mustered in October, 14, 1861. He died at Charleston, S. C., July 24, 1863, of wounds received at the storming of Fort Wagner six days previous. He was a prisoner at the time of his death.

Mago, Wilbur M., enlisted as a private and volunteer, October 11, 1861, in Company H, New Hampshire Seventh Regiment, and was killed July 18, 1863, at the storming of Fort Wagner, in Charleston Harbor.

Murray, Michael, enlisted and was mustered in August 19, 1864, Company G, Seventeenth Regiment.

Osborne, Prescott E., private, three years, Twenty-sixth Regiment.

Pige, David H., private, volunteer, three years, Company C, Twenty-sixth Regiment. Died at New Orleans, August 30, 1863, of dysentery.

Parker, Luther S., private, volunteer, three years, Company C, Twenty-sixth Regiment.

Pearl, Gilman A., Company B, Fifty-ninth Regiment; enlisted as a private for three years, December 19, 1863; mustered in January 5, 1864.

Pevey, Lyman E., enlisted March 4, 1865, for three years, Detachment of Ordnance, Arsenal, Watertown.

Pool, Leonard H., enlisted August 8, 1864, for three years, Reserve Veteran Corps.

Raupack, Harold A., three years, navy.

Rich, Everett, was mustered in March 11, 1862, three years, navy.

Robertson, William, private, three years, Fifteenth Battery.

Robinson, John, two years, navy.

Rasmussen, Christian, two years, navy.

Short, William, Company B, Sixth Regiment, nine months, enlisted August 31, 1862, and was discharged at the expiration of his service, June 3, 1863.

Sterens, Kimball A., private, Company B, Sixth Regiment; enlisted for nine months, August 31, 1862.

Stikney, Henry, private, Company G, Thirty-third Regiment, mustered in August 11, 1862, and died at Falmouth, Va., January 29, 1863.

Styles, John, enlisted August 8, 1864, for three years, Third Regiment of Infantry.

Taylor, George E., private, three years, Company A, Second Regiment, he enlisted October 14, 1861, and died at Frederick, Md., February 8, 1862.

Teagrecan, John N., enlisted for three years in the Sixty-second Regiment.

Welch, Patrick, volunteer, three years, Company G, Forty-first Regiment.

White, Lucius, volunteer, private, three years, Company D, Eleventh Regiment Regular Infantry; wounded at the battle of Gettysburg, July 2, 1863, and died on the following day.

Wilkins, Luther, private, Company D, Fifty-third Regiment, nine months; enlisted October 12, 1862; returned home with his regiment, and was discharged September 2, 1863.

Wilkins, Luther E., enlisted for nine months as a private, Company D, Fifty-third Regiment, October 12, 1862. He was in the battle of Fort Hudson, returned home with his regiment, and was discharged September 2, 1863.—Total, 64.

The following from this town enlisted in other places:

William W. Cummings, First Minnesota Regiment.

Hiram R. Kendall.

Alfred G. Parkhurst, Sixth Massachusetts Regiment.

Charles R. Swallow.

Richard H. Knights.

The town, under two calls, paid \$3100 for bounties.

The Rev. William C. Jackson, at his own request, was dismissed from the pastorate of the church November 13, 1867. One or more revivals of religion occurred under Mr. Jackson's ministry. He was long a faithful missionary in Asiatic Turkey, and, previous to his coming to Dunstable, was settled over the church in Lincoln, Mass.

The Rev. Edward P. Kingsbury, of Newton, was ordained, but not installed over the church, on the 28th of November, 1869, the Rev. Eben B. Foster, D.D., of Lowell, preaching the sermon. Mr. Kingsbury continued to supply the pulpit acceptably until March 12, 1871, when failing health compelled him to retire. He

died two weeks after returning to his home in Newton Centre, beloved by all who knew him.

The Rev. Charles Rockwell supplied the church for two years, beginning May 1, 1871.

The valuation of the town in 1872 was \$326,185.22.

July 1, 1873, the church engaged the services of Rev. Franklin D. Austin as stated supply.

This year the town voted \$2000 to defray the annual expenses, \$900 of which were for the public schools, and \$500 for the repairing of highways and bridges.

The Nashua, Acton and Boston Railroad, running near Flat Rock Hill, along the valley of Salmon Brook, centrally through the town, was opened for travel in June, 1873. The ceremony of breaking the ground for this road took place at Wall Hill in December, 1871, when speeches were made by the Hon. Levi Wallace, then of Pepperell, and now of Ayer, James T. Burnap, first superintendent of the road, and others, after which the company partook of a collation provided by the ladies of Dunstable. The occasion was enlivened by salutes from a cannon and by music from the Dunstable Cornet Band.

In 1873 the two hundredth anniversary of the original incorporation of the town was reached. At a legal meeting of the citizens, held in March, it was voted to appropriate \$500 for a bi-centennial celebration, to be observed on Wednesday, the 17th day of September following. Josiah C. Proctor, Dexter Butterfield, James M. Swallow, Jonas Spaulding and John A. Parkhurst were chosen a committee to make arrangements. To this committee were added William N. Kemp, Washington E. Blood, Ira B. Hall, Benjamin French and George W. Fletcher. This committee received the following presents, unsolicited: \$50 from Dexter Roby, of Boston, \$50 from A. N. Swallow, of Charlestown and \$20 from Hiram Kemp, of Boston, all sons of Dunstable, to aid in defraying the expenses of the celebration. Benjamin French was appointed chairman of the committee of arrangements.

Printed letters of invitation were sent out to those specially interested in the welfare of the town. Great preparations were made for the festivities of the occasion as the time for the anniversary drew near. Josiah C. Proctor was appointed president of the day; Isaac O. Taylor and Jonas C. Kendall were vice-presidents; Benjamin French, chairman of the committee of arrangements; Dexter Butterfield, chief marshal, together with James A. Davis and Andrew J. Woodward, assistants. Dr. George B. Loring was invited to deliver the oration. Ample accommodation was afforded by Yale's mammoth tent, and a good variety of refreshments were provided by C. E. Reed, a caterer from Boston.

The morning of the 17th of September dawned propitiously. At ten o'clock a procession was formed at the railroad station, which proceeded to the centre of the town in the following order:

Dexter Butterfield, marshal of the day, and aids, with the Dunstable Cornet Band; two four-horse barouches, one containing Gov. William B. Washburn, the Hon. George S. Boutwell, the Hon. George B. Loring, with Josiah C. Proctor, Esq., president of the day; the other barouche containing the Hon. E. Rockwood Hoar, of Concord, Gen. Israel Hunt, of Nashua, together with Messrs. Isaac O. Taylor and Jonas C. Kendall, vice-presidents of the day. Then came in order, Capt. Christopher Roby's company of cavalry with seventy sabres, followed by the Pepperell Engine Company, No. 1, thirty-three men, with the Pepperell Cornet Band, and citizens in carriages and on foot.

An appropriate stand for the speakers had been erected on the south side of the Common, and a large number of seats were provided. "Welcome Home," and other beautiful mottoes adorned the platform. The dates 1673-1873, in wreaths of flowers, ornamenting the speaker's desk, could be clearly seen by the audience. Salutes from a piece of artillery announced the arrival of the long procession, and many flags were waving. Never before had Dunstable Common been so richly decorated or visited by so large a throng. As many as 3000 people were present.

The exercises were opened by the reading of selections from the Scriptures, and a prayer by the Rev. Franklin D. Austin. Animating music from the Dunstable Cornet Band then followed, and an original song of welcome, rendered with much expression, by the Clark family, of New Ipswich. Josiah C. Proctor, Esq., then, in a few appropriate words, extended a cordial welcome to the vast assemblage, and read the resolution of the town in respect to the celebration. He then introduced the Hon. George B. Loring as the orator of the occasion. This gentleman, rising, then gave an historical address, speaking effectively for an hour and a half to an attentive audience. At the conclusion of the oration the Clark family sang "The Star-Spangled Banner." This was followed by an original song, composed by Mrs. Maria A. Whitcomb, and by music from the Dunstable and Pepperell Cornet Bands.

SONG BY MRS. M. A. WHITCOMB.

SENG BY THE DUNSTABLE CORNET BAND.

(Tune, "Yankee Doodle.")

This town was all a forest deep,
Two hundred years ago, sir;
The vales were low, the hills were steep,
And streamlets wandered through, sir.

CHORUS.

Yankee doodle, this the place,
Yankee doodle dandy;
We like the good, old-fashioned days,
The people were so handy.

A few brave men, a pilgrim band,
Sought this far-off location;
They saw it was a goodly land,
And here they fixed their station.—CHORUS

From time to time the settlers came,
And built as they were able;
At length the town must have a name,
And so 'twas called *Dunstable*.—CHORUS.

No draught from China's sultry land
Was seen at men or 'e'en, sir;
The "black cow" gave a beverage bland.
Few drank black tea or green, sir.—CHORUS.

In homespun were the people dressed,
Of woollen, tow or linen,
Their Sunday suits which were their best,
Were nicely made by women.—CHORUS.

The girls could wash and brew and bake,
And also were good spinners;
The hands could ply the hoe and rake,
While matrons cooked the dinners.

CHORUS.

Yankee doodle, this the place,
Yankee doodle dandy;
We like the good, old-fashioned days,
The people were so handy.

After the exercises were closed at the speakers' stand, the people spent some time in exchanging congratulations and reminiscences of former days, and then proceeded to the immense tent south of the Common to partake of the banquet prepared by Mr. Reed. The Rev. Mr. M. Smith, of Tyngsborough, invoked the divine blessing, and about an hour was spent in partaking of the bountiful repast. When this was concluded the Pepperell Band gave music, and the president of the day felicitously introduced Mr. O. C. Moore, as the toast-master of the anniversary. Having spoken for a few moments, he announced as the first toast: "Old Dunstable! she divided her estate among ten sons, and to-day she calls them home and bids them welcome." The response was in the form of the following original poem, contributed from the pen of Mrs. Mary Rockwell, and read by Mr. James T. Burnap:

DUNSTABLE.

My childhood's home! what music in the sound,
Dear to each heart, wherever man is found!
By every nation, every clime and tongue,
In sweetest praise their dwelling-place is sung.
Go to the Indian in the Western wild,
Ask him where Nature has most kindly smiled;
He'll point you to his dark, old forest home,
And to his cheerless wigwam bid you come.
Go to the regions of the frozen zone,
Where naught but stunted shrubs and moss are grown,
Ask the poor native what delights his eye;
He'll point you to his hut of snow hard by
Enlightened man no pleasure here can find,
And blesses God that he has not designed
To cast his lot in regions odd and drear,
Removed from all he holds on earth so dear.
Across the ocean, in the Eastern world,
Where freedom's banner ne'er has been unfurled,
Where superstition rules with tyrant sway,
And man, degraded, wears his life away,
Yet even here the heart clings to one place,—
Here is his home, here dwells his kindred race.
To nations proud in wealth and culture turn,
From their attachments, too, we plainly learn
How strong, how deep, the feeling of the heart
For one dear spot of this great earth, small part,
And yet within that little space, close curled,
Lies love's rich treasure, making it a world.

And thus, fair Dunstable, thy children come
To celebrate the birthday of their home,
Two hundred years ! We'll bridge across time's space,
And turn thought backward on its swiftest race;
Call back the forms and faces that were here,
In mental vision they will reappear,
Show us the regions that around them lay,
Rude and untilled, two centuries to-day
Then brute creation, tenants of the wood,
Untamed and fierce, were prowling for their food,
And savage man, more to be feared than they,
Would lie in ambush to make man his prey,
Lurk round the dwellings, slyly watch and wait
Till on the pale-face he could wreak his hate;
With torch to burn and tomahawk to destroy,
Rending the air with wild, mad whoops of joy
On scenes like these we will but briefly dwell,
Truths, stern and sad, the historic page must tell
We use the past to contrast shade with light,
And make the present look more clearly bright

Fair Dunstable ! sometimes they call thee old,
Thy youthful days are not yet fully told,
The peaceful tenor of thy even way
Has left no furrows time and age display.
Thy fields are fair, thy woods are bright and green,
Thy lakes and streams are dressed in silvery sheen,
On thy smooth brow is written early life,
Untrodden yet the paths of vice and strife.
But changes soon will come thy peace to mar,
E'en now is heard the rattling railroad car
Along thy wood where quiet reigned around,
And the lone night-bird's song the loneliest sound,
Till the last year of two long centuries past
Proclaimed, by engine, "Men were going fast."
Business and hurry bring on middle age,
They're foes of youth, a war they quickly wage,
Turn peaceful streams from their calm, gentle course,
Restrain their waters for propelling force.
The hills are brought on level with the plain,
And plains made hills to answer hope of gain.
If such of sister towns has been the fate,
Thy turn may come, though it be rather late,
When on the morning breeze the factory bell
Shall to the sleeper hours of labor tell,
When whizzing cars on every side shall go,
And prove this place is neither slack nor slow,
We'll not attempt to use prophetic ken,
We know what has been and may be again !

Fair Dunstable ! a tribute we would pay
Thy worthy children, long since passed away !
Of the first century history contains
A warlike record, full of griefs and pains.
Hearts brave and noble were compelled to yield,
And for a season leave the foe the field
No doubt that race were men of sterling worth,
Beloved, respected, while they dwelt on earth.
But of the century now just passed away,
More of thy children we can know and say
Some have been worthy tillers of the soil,
Substantial men, rewarded by their toil,
Some in mechanic arts have spent their days,
Their works declare them men deserving praise,
And some have sought a livelihood by trade,
Have bought and sold, and thus their fortunes made,
Others preferred in learning's paths to go,
In three professions Dunstable can show
Men who have made their mark and won renown
In other places than their native town,
But time forbids to pass each in review,—
One name we'll mention of the noted few,
A name this place may well be proud to own,
Virtues like Amos Kneadall's wife are known !
Called by his country to high posts of trust,
Honored and honest, numbered with the just,
His friends and relatives are with us here,

And all who knew him hold his memory dear,
An aged woman lives, still pleased to tell,
She made him coats and pants, he liked them well
In politics this town has borne its part,
Both parties know the tricks of party art;
And to the statesmen who are here to-day,
We pay due honor, better than "back pay !"

Fair Dunstable ! thy sons have had their praise,
And shall thy daughters share not in these lays ?
To "Woman's Rights" they ne'er have had their claim,
To be right women is their highest aim,
Act well each part within their sphere of life,
A faithful mother and devoted wife.

And now, fair Dunstable, our work is done !
Another century has for thee begun !
Throughout thy realm, may peace and temperance reign,
Increase each virtue and each vice restrain !
And when life's changes all with us are o'er,
Safe may we meet upon that heavenly shore
Where centuries are uncounted and unknown,
And joys are endless round the Eternal throne.

The second toast was, "The President of the United States." In response the Dunstable Band played "America." The third toast was "Massachusetts,—the earliest and foremost in the cause of civil and religious liberty. The lapse of two hundred years has added lustre to her renown, force to her example and prominence to her high place in history. All honor to the Governor ! and the governed of the old Commonwealth !"

Governor Washburn rose and responded happily, and among other remarks said, "The influence of old Dunstable upon those that were born here has caused them joyfully to return, and in the celebration demonstrate their full appreciation of the benefits received by them from the place of their birth."

The fourth toast was, "Our Representative in Congress,—the eminent jurist, the practical statesman, the honest politician : old Dunstable can trust him, and he will honor her." Hon. E. Rockwood Hoar, M.C., pleasantly responded. The following sentiment affords a sample of his remarks :

"The ideas of free education were always cherished in Dunstable, and will always be cherished as long as the great and undying principles of justice and truth shall continue."

The fifth toast, "New Hampshire—bleak are her hills in winter, and warm are the hearts of her sons all the year round," was responded to briefly by the Rev. Mr. Philbrook. The Hon. Levi Wallace responded to the sixth toast, "Our railroad,—the tie that binds two cities that act on as one."

The seventh toast, "New England—her townships were the nurseries of Republican institutions; to-day they are the model democracies of the World," received a response from the Hon. George S. Boutwell, who said :

"There were three points in the history of New England which he never liked to pass, when New England is concerned—namely, the municipal system, the public-school system, and the religious tolerance of the forefathers. It may be said of the Puritans

that they recognized the right of government to set up a church, in which all should worship and should pay toward its support; but they were willing to have any church established not interfering with that church, and thus they should be excused from intolerance. The public-school system is due entirely to the Puritan Protestantism which prevailed in Massachusetts long ago. Its first object was to train up youth to be able to examine and judge of the Scriptures for themselves. He deemed it a loss to the municipal system that the towns, as towns, are not represented in the General Court.

"The larger cities and municipalities are absorbing and corrupt. They are to be saved, if at all, by large legislative bodies. The civil government should be in the hands of those who are well paid. The assembly should be large, and the cost would, of course, be great; but we must pay for government. He desired to see the municipalities strengthened and their pride encouraged. One means of connecting these celebrations will be by a celebration every half-century."

The eighth toast, "The City of Nashua," brought remarks from General Israel Hunt.

The ninth and last toast was "The Orator of the Day"—by the ability, research, and eloquence which he has displayed to-day, he has proved himself worthy to be a son of old Dunstable, and we adopt him."

Mr. Loring responded with a few fitting words. The Clark family then sang an original parting song, composed by Mrs. Mary Rockwell.

A salute was fired at the conclusion of the singing, and the people having mutually enjoyed their meeting together, and with many felicitations on all that was connected with the occasion bade each other good by, and withdrew to their several homes.

The Rev. F. D. Austin closed his services as pastor of the Congregational Church in 1879. As the result of a revival which occurred during that period, nineteen were added to the church. Mr. Austin was succeeded by the Rev. Bernard Copping, now of Groveland, Mass. Mr. Copping continued with the church in Dunstable five years. His labors were prospered and many improvements were made upon the parsonage, promoting the comfort and convenience of the building.

In August, 1885, the Rev. Henry M. Perkins was called by the people to be their pastor, and continues with them at the present date, 1890. During this time several special expenditures have been made for needed improvements on the church edifice. A new bell costing \$300 has replaced the old one, which, through age and long usage, had begun to give an "uncertain sound." The beautiful hymn-book "Laudes Domini," is now used instead of the old "Sabbath Hymn and Tune Book." Extensive repairs and improvements have been made at an expense of about \$1500, by which two rooms have been added to

the vestry for social and religious uses, and the whole building rendered more beautiful and convenient. A "Young People's Society of Christian Endeavor" has been organized and has proved itself a very valuable adjunct of church work. Within the past few months the church has been spiritually quickened, and several have been added to the membership.

The members of the Universalist Society continue to worship in Parker's Hall, though they contemplate the erection of a building when pending questions respecting a location have been settled.

CHAPTER LX.

DUNSTABLE.—(Continued).

BIOGRAPHICAL.

DR. NATHAN CUTLER practiced in town before the Revolution, and was a surgeon in the war. He lived on the river road near Cutler's Brook, a little north of the State line.

DR. EBENEZER STARR came to Dunstable from Dedham soon after the Revolution and lived on a Kendall place in the northerly part of the town. He was highly esteemed both as a physician and a citizen. His death occurred September 7, 1798.

DR. MICAH ELDREDGE practiced long in Dunstable, living near Salmon Brook. He married Sally Buttrick, of Concord, and had a family of twelve children, several of whom received a liberal education. He held various offices in the town. He was a deacon of the church and was twice elected representative to the General Court. The degree of M.D. was conferred upon him from Dartmouth College. He died in Nashua, N. H., in 1849. His son, HEZEKIAH ELDREDGE, succeeded him in the practice of medicine at Dunstable.

DR. ADONIAH W. HOWE practiced in town several years. He married Miss Martha D. Butterfield. His death occurred in 1886.

SAMUEL MARK FLETCHER graduated at Amherst College in 1846. He was a son of Capt. Mark, grandson of Phineas and great-grandson of Deacon Joseph Fletcher, the first settler of the name in Dunstable. He studied medicine in Philadelphia and practiced two years in Westerly, R. I. He was assistant surgeon in the War of the Rebellion; he then practiced medicine in Denver City and Chicago, where he died, October 3, 1875.

THE HON. ISAAC FLETCHER, grandson of Deacon Joseph Fletcher, was born in Joint Grass, in the northwesterly part of Dunstable, November 22, 1784; was graduated with honor at Dartmouth College, in the class of 1808, and taught for some time in the academy at Chesterfield, N. H. He afterwards stud-

ied law with Messrs. Prescott & Dunbar, at Keene, N. H. In 1811 he removed to Lyndon, Vt., where he enjoyed an extensive practice. He was for some time State attorney for Caledonia County, was also a Representative of Lyndon in the State Legislature, and was twice elected Representative to Congress, serving in that office from 1837 to 1841. He was a prompt and energetic man, and possessed many other admirable traits of character. His death occurred October 19, 1842.

The Hon. Isaac Fletcher once wrote to his son, Charles B. Fletcher, as follows:

"From my earliest recollection, my constitution and health have been feeble, and have continued so to the present time, but yet able to endure much application, labor and fatigue. One rule of my father's economy was that all the money spent by the children must be earned by themselves. By the greatest industry in raising potatoes and tobacco, I possessed myself of money enough to buy Pike's Large Arithmetic, and commenced the study of it during the leisure evenings I could spare. By dint of perseverance, I mastered every rule, and could solve any problem in the whole book. This laid the foundation for mathematical studies, which have been of use to me through life. I have ever devoted myself, when opportunity would allow, with more pleasure to the study of that science than any other." He also said: "In 1803 my father came to a resolution to suffer me to acquire a liberal education. He informed me that all he could do for me was to give me my time, and if I thought, by industry and economy, I could succeed in the attempt, I might make the experiment, but should I fail, there would be always a seat at his table and food enough and work enough for me to do on his farm. Thus encouraged and supported by my father, I collected all my movable effects, consisting of clothes and a few books, and left home with a fixed and determined resolution to tax my genius and industry to the utmost to acquire an education. With budget in hand I took my departure for Groton to prepare for college. At this time I was possessed of a yoke of oxen, a few sheep, and other property, in all to the amount of about \$150, which I converted into cash and funded in order to draw upon as necessity might require. I did not feel myself able to take board near the academy, but at the distance of a mile and a half, where I could get it cheaper than in the village. I commenced fitting for college in September, 1803, and entered the Freshman class in Dartmouth College in 1804. I may as well say, once for all, my feelings suffered much, for my means were scanty and my dress and style humble."

In addition to the other offices, already mentioned, which Mr. Fletcher held, was that of adjutant and inspector-general of the militia of the State. Gen. Fletcher continued his classical studies through life, and to them added the study of the French language and literature. Of him his biographer says: "He was an indulgent parent, a kind-hearted friend, charitable to all, unwilling to offend or pain any one, hospitable and generous, and accomplished more for good and less for evil, I think, than most others."

AMOS KENDALL, son of Deacon Zebedee and Molly Kendall, was born in the northerly part of Dunstable, near Salmon Brook, on Sunday, August 16, 1787. His boyhood was spent in hard work on his father's farm, and in attending school during the winter season. He had a fondness for books, and employed many of his leisure hours in reading. His general demeanor gained for him the title of deacon. He was fitted for college, partly at the academy in New Ipswich, N. H., and partly in that of Groton. In graduating at Dartmouth College, in 1811, he took the highest honor of his class. William M. Richardson, Esq., of Groton, taught him the profession of

law, in his office. In the spring of 1814 Mr. Kendall removed to Kentucky, where he was for some time employed as a tutor in the family of Henry Clay at Ashland. His acquaintance with this great statesman resulted in the formation of political views and aspirations. On leaving the family of Mr. Clay he commenced the practice of law, and soon afterwards became the editor of a Democratic journal, called the *Argus*, published at Frankfort, Ky. He exerted his influence and effort for the election of Gen. Andrew Jackson to the Presidency, and in 1829 received from him the appointment of fourth auditor of the treasury. He held the office of Postmaster-General from 1835 to 1840. He introduced many reforms into this department, and removed the burden of debt. In 1845 he assumed the entire management of the interest of Prof. Samuel F. Morse in the magnetic telegraph, and was the founder and first president of the Deaf and Dumb Asylum at Washington. He married for his first wife Miss Mary B. Woolfolk, by whom he had four children; and for his second wife Miss Jane Kyle, by whom he had ten children. Dartmouth College conferred on him the degree of LL.D., in 1849. He strongly advocated the common-school system, and was a liberal benefactor of good causes. He was led to join the Calvary Baptist Church at Washington, from hearing a sermon by the Rev. A. B. Earle on, "Almost thou persuadest me to be a Christian," delivered March 23, 1865. He was an active member of this church, and gave to it in all \$115,000. He also contributed about \$20,000 to the Deaf and Dumb Asylum, \$6000 to found a scholarship in Columbia College, and about \$25,000 in aid of two mission schools, one of which is called Kendall's Chapel. In the autumn of 1862 he went to live at Kendali Green, in Taunton, N. J., and in 1866 visited Europe and the Holy Land. He died at Washington, on the 12th day of November, 1869, leaving in manuscript an Autobiography, which has been published in a handsome volume of seven hundred pages.

Mr. Kendall faithfully served the Cabinet of which he was a member, and was so influential as to be called the President's "right-hand" man. He was a leading figure in American politics for nearly a third of a century. He was a public-spirited man, and an earnest Christian. As he looked at the rising sun on a beautiful morning his last words were, "How beautiful, how beautiful!" He soon closed his eyes in peaceful death.

The Rev. Dr. Sunderland said at his funeral, "He was a man of great modesty of disposition. He sought no display, and if he had a fault it was that he was altogether too retiring and dilident. He was an honest man, purely and exactly a faithful man. Honest and faithful to his fellow-men, he was no less so to his God." Rev. Dr. Samson also said of him, "From his youthful editorials up to his elaborate papers there were a clearness and force and a fascina-

tion of which many still speak as having riveted their attention whenever they took up anything coming from his pen. . . . As age and the refining influence of growing religious faith and hope mel- lowed the ripening fruit of his last years, a sweetness and serenity of temper came over him, which made his family and every circle where his hoary locks were seen moving take on a new delight because of his presence."

Mr. Kendall thus vividly describes the discipline of his father's family: "Grace before and thanks after meat, and morning and evening prayers, with the reading of a chapter in the Bible and the singing of a hymn of Sunday, accompanied by the bass-viol, played by their eldest son while he was at home, con- stituted the regular religious exercises of the family. The father and mother never failed to attend church on Sunday, except in case of sickness or when absent from home; and the entire family, one member only excepted, were required to maintain a like regularity in Sabbath observances. Except in special cases, all labor beyond the simplest preparation of food for man and beast, and all recreation, were strictly pro- hibited on Sunday. The evening was spent in learn- ing and reciting the Westminster Catechism, in read- ing religious books, and in practicing sacred music. The whole family could sing, and, when all were present, could carry all the four parts of ordinary tunes."

A change seems to have come over the good Dea. Zebedee Kendall, in respect to the use of an innocent instrument, as indicated by the following:

"When Amos was a little boy, a fiddle was an abomination to his father and mother. His eldest brother, who had quite a taste for music, having constructed a bass-viol or two, determined to try his hand upon a fiddle, and produced a very good instrument. Not daring to bring it to the house, he kept it in a cooper's shop not far distant. His father, hunting there for something one day, mounted a bench so that his head was raised above the beams of the shop, when his eyes fell upon the un- lucky fiddle. He took it by the neck, and apostrophizing it, '*This is the first time I ever saw you!*' dashed it into the fireplace."

"Being on a visit to his parents about thirty years afterwards, Amos Kendall went to meeting in Dunstable on a Sunday, and there sat his father in the deacon's seat, beneath the pulpit, as in former times, and *there was a fiddle in the choir!*"

Mr. Kendall sometimes wrote poetry. The follow- ing graceful lines were sent to his wife in 1829:—

TO A WILD FLOWER.

BY AMOS KENDALL.

On the white cliffs of Elkhorn, with cedars o'erspread,
Where beauty and wildness in silence repose,
A gay little wild flower raised up its head,
By Zephyrs caressed as in sweetness it rose.

Its beauties no culture could ever impart,
No garden or meadow can boast such a gem;
All native it blossomed, for never had art
Transplanted its root or enameled its stem.

I saw it and loved it, and now on my breast
It breathes out its fragrance, its beauty displays;
My heart leaps to meet it, in ecstasy drest,
The dream of my nights and the charm of my days.
And oh, thought of rapture! not like other flower
Does it droop on the air, life and loveliness flinging;

But its charms and its fragrance increase every hour,
And sweet little buds all around it are springing.

—*Autobiography*, p. 288.

THE REV. SAMUEL HOWE TOLMAN was born here Aug. 12, 1826. He graduated at Dartmouth College in 1848, and at Andover Theological Seminary in 1852. He was, for a few years, city missionary in Bath, Me., and was ordained as pastor of the church at Wilming- ton, Mass., Aug. 14, 1856. He was dismissed in 1870, and became pastor of the church in Lenox, Mass. His mind became shattered, and he committed suicide at Nelson, N. H., Oct. 6, 1873. He was faithful and highly esteemed in his work as a minister of the gospel.

THE REV. JOHN SPAULDING, D.D., was born in Mason, N. H., Nov. 30, 1800. He went to Middle- bury College in 1821, from Dunstable, where he had been for some time employed in working on a farm. Having studied theology at Andover, he was ordained as an evangelist at Newburyport Sept. 25, 1828. He was married on the same day to Miss Olive C. B. Kendall, daughter of Capt. Jonas Kendall, of Dun- stable. She died March 14, 1852, and her remains were brought to her native town for burial. Dr. Spaulding's early labors were in the West. In 1841 he became secretary of the American Seamen's Society in New York City. He delivered a very able histori- cal discourse in the church at Dunstable Nov. 19, 1865. He also published an autobiography entitled "*From the Plow to the Pulpit*," which is full of in- terest.

Aside from its college graduates, Dunstable has sent forth into the world many sons and daughters who have been useful and honored in the several stations in life which they occupied.

THE FRENCH FAMILY.—The family of French claims its origin in France, from Rollo, Duke of Nor- mandy, who married Gisle or Giselle, daughter of Charles the Simple, King of France. Rollo is said to have been so "mighty of stature that no horse had the size to carry him;" consequently, he was always obliged to go on foot, and received the appellation of Rollo, the Marcher. In 912 A.D., at the time of his marriage, his father-in-law, Charles the Simple, gave him a tract of land, now known as modern Normandy, in return for which Rollo received Christian baptism by the Archbishop of Rouen, and was called Robert from his godfather, Robert, Count of Paris.

From Harlovan, the third son of Rollo, in direct line, is said to have descended Sir Maximilian de French, whose son, Sir Theophilus French (Freyn), went with William the Conqueror to England, and took part in the Battle of Hastings. Thus was the first branch of the French family planted in English soil, where it became firmly rooted and extended its branches into various sections of that country.

I may state here that the name of French was not, as one might suppose, taken from the name of the people where the family originated, for, in searching

James H. French

its etymology, it is found that the name was originally Fraxinus or Freyne, or, with the French prefix, De la Freyne, having two significations, ash tree and ashen spear. The handle of the latter was made from the wood of the ash, on account of its lightness and durability, and from that received its name. The ash-tree indicates the name of an estate, while the spear suggests warfare or military life. The following list, taken from a "History of the French Family," by one of its members, shows the various orthographic changes the name passed through before it became really anglicized:

Frane.	Freynsce.	Frensche.
Frene.	Freynsh.	Frenshe.
Frein.	Freyussh.	Frensch.
Freyne.	Frainche.	Ffrench.
Freyne.	Freinche.	French.
Freigne.		
Freygne.		

It is stated that as early as the eleventh century the name of Frene is found in various parts of England.

Within less than 140 years from the baptism of Rollo, says Lingard, the Normans were ranked among the most polished, as well as the most warlike nations of Europe, and from such men was Al-Frin, the founder of this sept, and from whom his descendants, says Lodge, derive the name of De Freyne.

"In the establishment of Norman power in England, De la Freigne acquired a tract of land, by grant, in Herefordshire" (as it does not appear in the Domesday Book, it must have been after the year 1086), "where he established his line, which was continued for centuries." "It is believed that this line may be considered common to all the branches that subsequently diverged from it."

"In 1337 took place the celebrated tournament of Dunstable, where, on the roll of Knights who tilted there, appears the name of Monsieur Hugh De Freigne.

"About the year 1348 a Robert Frensh was seized of other lands in Herefordshire, on whose decease, in 1370, the custody of his estate was committed in wardship *durante minoritate heredis*. This record is one of many that, even at this early date, evinces the transition from Freyne to French."

Individuals of the name of Freyne or French are traceable by territorial and historic notices in Norfolk from 1200, in Kent from 1270, in Sussex from 1278, in Buckingham from 1279, in Northamptonshire from 1313, in Essex from 1323, where they gave the name to the Manor of Frenches.

In Halsted, Essex Co., England, was born March 13, 1603, Lieut. William French, who came to America in the ship "Defence," from London, in the year 1635, and settled in Dunster Street, Cambridge. His lot was numbered twenty-four and contained one hundred and fifty acres. He resided on the westerly side of Dunster Street, about midway between

Harvard Square and Mt. Auburn Street. This estate was sold June 10, 1656. From him, in direct line, is descended the subject of this biography, Col. Jonas Harrod French.

The following quaint list of passengers in the "Defence" has been preserved:

July, 1635. In the Defence de Lond. Mr. Thomas Bostocks vs. New England p. cent from Minstr. Justice of his conformity of ye Gov't of Engl^d. No subsidy m^{ch}. Roger Harlakenden, aged 23, took the othe of allegiance and supremacy. Then follow the names of those in charge of Harlakenden, among whom are those of William French, aged 30, and his wife, Elizabeth, aged 32. (See John C. Hotten's list of emigrants, p. 100.)

William French was made a freeman at Cambridge 1636, and removed to Billerica about 1652; was its first deputy in the Colonial Assembly, one of its first selectmen and a man of prominence in its early history; he died 1681.

First Generation.—William French, of England, married Elizabeth —, and had, *inter alias*, Samuel, born in Cambridge Dec. 3, 1645 [Savage says later], and died in Billerica Nov. 20, 1681. He was one of the selectmen of Billerica in 1660, and here he married Mrs. Mary, widow of John Stearns, by whom he had four daughters—Mary, Sarah, Abigail and Hannah. He had in Billerica the authority to solemnize marriages.

Second Generation.—Samuel², the youngest son of Lieut. William French, was born in Cambridge Dec. 3, 1645 or 1648, and settled in Dunstable on the easterly side of Nutting's Hill.

He married, December 24, 1682, Sarah, daughter of John Cummings, Sr., who had taken up lands in that vicinity, and had:

1. Sarah³, born in February, 1684.
2. Samuel³, born September 10, 1685.
3. Joseph, born March 10, 1687; grandfather of Colonel Joseph French, who died March 21, 1776, aged sixty-three, and is buried in the old cemetery at Lattles, in Nashua, N. H.
4. John⁴, born May 6, 1691.
5. Ebenezer, born April 7, 1693; killed by the Indians at Naticook, September 5, 1724. He was buried, with his comrades, in the above-mentioned cemetery, and the head-stone that marks his grave bears this quaint inscription:

"Here lyes ye Body of Thomas Lund, who departed this life Sept. ye 28, 1720 in ye 12th year of his age. This man, with seven more that lies in this grave, was slew in a day by the Indians."

6. Jonathan⁵, born February 1, 1694.
7. Richard⁵, born April 8, 1695.
8. Alice⁵, born November 20, 1699.

Samuel French² was one of the first founders of the first church in Dunstable, organized December 16, 1685, the Rev. Thomas Weld being pastor and also one of twelve to defend a garrison established in Dunstable in 1702. He was one of the selectmen of the town in 1725, and that year signed a petition to the Governor and Council for assistance in defending the town against the incursions of the Indians. He took

up a large tract of land in Dunstable—perhaps 180 acres—some of which remains to this day in the hands of his descendants. He probably lived on the site of the house immediately on the east of Nutting's Hill. (*Town Records.*)

Third Generation (III).—JOHN FRENCH³, born May 6, 1691; married and had issue:

1. John, born March 1, 1719.
2. William, born October 18, 1721.
3. Hannah.
4. Eleanor.
5. Elizabeth.

6. Ebenezer, born in 1732; married Sarah Proctor, of Acton, May 10, 1765, and died April 14, 1808. He was a soldier in the Revolutionary War, and had, *inter alius*, John, the father of the present Benjamin French, Esq., of Dunstable.

John French³ was by trade a wheelwright, and his house stood near that of Benjamin French, Esq. A part of it still remains. It was used at one time as a school-house. He bought land of his father, Samuel French, and the deed, dated July 4, 1714, is now in possession of Benjamin French. He bought the millstone meadow of Henry Farwell in 1721, and twelve acres of land in Mr. Thomas Brattle's farm, of Jonathan Taylor in 1732. His rate in 1744 was: poll, 8s. 4d.; real estate, 3s. 10d.; personal estate, 2s. 10d. (*Town Records.*)

"He was one of a committee chosen March ye 28, 1744, with the Rev. Mr. Swan, to see if anything was due him from ye town of Dunstable before ye line was run betweene ye said Province." (*Town Records.*)¹

He was a highway surveyor in 1752, and held several other town offices. The date of his death is not known.

Fourth Generation.—John French⁴, born March 1, 1719; married Mary —, and had issue:

1. William, born July 13, 1752, was a shoemaker by trade, and lived and died at the old homestead at the base of Nutting's Hill. He was at the battle of Bunker Hill, and was at one time during the action stationed at the rail fence, where he loaded his gun and with deliberate aim discharged it sixteen times in succession at the enemy. He became a member of Captain Oliver Cumming's company in 1776, and was at the battle of Trenton and in several other engagements. In his latter days he received a pension. He was never married.

2. Mary⁵, born March 21, 1754, and married Isaac Pike October 30, 1772.

3. John, born October 25, 1775.

4. JONAS⁵, born August 17, 1757, was baptized by the Rev. Josiah Goodhue the same year. (*Church Records.*)

John French⁴ held a lieutenant's commission as early as 1752. On the 26th of October, of the same

year, he was appointed, with John Woodward and Adford Jaquith, as a committee "to purchase a suitable quantity of land to set the Meeting House for the town of Dunstable." The meeting house, after long contention, was finally erected on a rocky eminence now covered a growth of pine, about one mile easterly from Dunstable Centre. Lieutenant John French, Jr., as he was designated, served the town as constable in 1754 and 1755. He was a farmer, and occupied a good substantial two-story house fronting the south, and having on the east a beautiful meadow, through which flows How's Weld Brook, with the pine-wooded eminence on the west called Nutting's Hill. He died March 15, 1761, aged forty-two years. (*Town Records.*)

Fifth Generation.—Jonas French⁵, born August 17, 1757; married first Betty Marshall; and had issue:

1. Mary⁶, born March 14, 1781.
2. Jonas⁶, Jr., born August 12, 1782.
3. William, born June 5, 1789.
4. John Marshall, born March 9, 1795.

Betty [Marshall] French died October 8, 1799. Jonas French then married Mrs. Anna Mitchell, a lady of much personal worth and beauty, who was then a member of Deacon Zebedee Kendall's family, in Dunstable. She was the widow of a Mr. Mitchell, by whom she had two children, Nancy and Bela; the former of whom died of typhoid fever in Dunstable; the latter settled in Athol, Mass.

A sister of Mrs. Anna Mitchell married Mr. Timothy Thompson, of Charlestown, Mass. Mr. Jonas French died in 1840, at the advanced age of eighty-three years. He was well educated, and took an active part in the public affairs of the town. At the early age of seventeen he, with his brother William, shouldered their muskets and joined the Continental Army and saw much active service.

On crossing the neck after the battle of Bunker Hill, they found an officer badly wounded, and though exposed to the galling fire from the "Glasgow," a man-of-war, they tendered to him their services. He declined their aid, thinking himself past recovery, and at the same time urged them to flee from the imminent peril to which they were exposed. The humane brothers raised, however, the wounded officer tenderly and bore him through the carnage to a place of safety. The wounded officer proved to be Captain Henry Farwell, of Groton.

A musket-ball was extracted from his spine, and he survived the operation many years [See Butler's "History of Groton," p. 268]. Jonas and William served through the war, rendering efficient aid to the country and leaving an honored name to their posterity. Jonas French was sometimes employed by the town of Dunstable as a teacher; and this entry appears upon the records: "Allowed out of the town treasury in 1778 £3 4s. to Jonas French for keeping school." He bought, Aug. 30, 1792, for £12 18s. pew No. 12 in the meeting-house recently removed to the

¹ The line between New Hampshire and Massachusetts was run February, 1714.

James M. Swadlow

centre. He was town clerk in 1796. The present buildings of the old French homestead, on the east side of Nutting's Hill and a little south of the New Hampshire line, were erected by his hands. Two twin oaks in front of the house are noble representatives of the solid sterling qualities of himself and brother.

Sixth Generation—Children of Jonas and Betty [Marshall] French:

1. Mary, born March 14, 1781, lived and died July 3, 1846, in Dunstable. She was never married.

2. Jonas, Jr.⁵, born August 12, 1782, and married first, Martha Jewett, of Hollis, N. H., April 3, 1809, by whom he had several children. Martha [Jewett] French died July 25, 1821, aged thirty-nine, and was buried in the Central Cemetery in Dunstable. Jonas French, Jr.⁶, then married, second, Mary Pike, Nov. 20, 1824, by whom he also had several children. He died August 13, 1860, aged seventy-eight.

3. William French⁶, born June 5, 1789, lived with his father in Dunstable until the age of twenty-one, when he came to Boston and commenced business as a distiller in Distil House Square. He married Sarah, daughter of Reuben and Sarah [Farmer] Baldwin, of Billerica.

Issue:

1. William Edward, born in Boston, April 24, 1820.

2. Sarah, born in Boston, Jan. 28, 1822.

3. Harriet, born in Boston, Jan. 9, 1824.

4. Emeline, born May 5, 1826, in Boston.

5. JONAS HARROD FRENCH, born in Boston, Nov. 4, 1829.

William French⁶ died of consumption July 1, 1846, and his widow, Sarah [Baldwin] French, died Oct. 24, 1866. They are buried side by side in Linden Avenue, Forest Hills Cemetery.

John Marshall French, youngest son of Jonas⁵ and Betty [Marshall] French, born March 9, 1795.

From the above genealogical record it appears that Col. Jonas Harrod French is of the seventh generation from the original settler of his family in America. His mother, Sarah French, *nee* Baldwin, born August 6, 1790, was a lineal descendant, on the paternal side, from John Baldwin, who had a grant of land in Billerica in 1657, and on the maternal side from John Farmer, who emigrated to this country from Auncely, Warwickshire County, England, prior to 1673. He was a man of distinction and a large land-holder in Billerica. He died 1723.

The motto upon the coat of arms of the French family is: "Malo mori quam foedari"—"I would rather die than be debased."

JONAS HARROD FRENCH, son of William and Sarah Baldwin French, was born in Boston, November 4, 1829. He was educated in the Boston public schools, graduating from the English High School in 1845. He began his business career as a grocer. He afterwards became largely interested in distilling; to an otherwise varied and extensive business he has

added the granite industry, managing a large interest as president of the Cape Ann Granite Company.

Mr. French was married in Boston, in 1857, to Fanny E., daughter of Newall A. and Susan (Wyman) Thompson. Of this union are two children—Fanny T. and Henry G. French. In 1883 he married Nella J., daughter of William and Lucinda Pearson, of Boston. Mr. French, in 1869, organized the Cape Ann Granite Company, the quarries of which are located in Gloucester. He has furnished the granite for numerous public buildings and monuments—notably the Boston post office and sub-treasury building, Baltimore post-office, the bases of the Scott monument, Washington, D. C., the spandrel-walls of the great Brooklyn Bridge and the new court-house in Boston. He was scarcely of age when he enrolled himself in the City Guards, the favorite Boston company of those days. He was elected captain of the company, holding the position three years. He served two years on the staff of Governor Gardner. In 1861 he was commander of the Ancient and Honorable Artillery of Boston, and is to-day one of the oldest living commanders of that time-honored corps. In 1853, 1855 and 1856 he was a member of the Common Council of the city of Boston. In November, 1861, at Camp Chase, Lowell, he raised the regiment known as "the Eastern Bay State," afterwards designated as the Thirtieth Massachusetts. In January following he sailed in command of that regiment for Ship Island, attached to General Benj. F. Butler's expedition against New Orleans. He was provost-marshal-general of Louisiana and subsequently served under General N. P. Banks.

Colonel French was a delegate to the National Democratic Convention at Cincinnati in 1880, and at St. Louis in 1888, and was a member of the State Senate 1879 and '80, doing brilliant work on leading committees, and was chairman of the Democratic State Central Committee for three years.

He was three years president of the Louisville, Evansville and St. Louis Railroad and ten years a director in the New York and New England Railroad. He has been a director in the West End Land Company since 1887, and has been since 1873 a director of the Maverick National Bank, Boston. He is a prominent Mason and one of the founders of St. Bernard Encampment and Revere Lodge.

JAMES M. SWALLOW is a native of Dunstable; was born April 11, 1824, and is the only son of James and Sibbel (Parkhurst) Swallow. James Swallow was for several years a director of the Worcester & Nashua Railroad, was a man of benevolence and left by his will a legacy of \$1000 to the Congregational Church of which he was a member.

Mr. James M. Swallow was married, in 1844, to Lucinda Chapman, youngest daughter of Davis and Rhoda Chapman. A surviving sister of Mr. Swallow, Mrs. Dr. O. A. Woodbury, resides in Nashua, N. H.

Mr. Swallow is one of the oldest living members of

the Congregational Church in Dunstable, and has held different offices in connection therewith. As a townsman he holds an influential place. He was elected when a young man to membership in the Board of Assessors, which at that time was separate from the board of remaining officers. During the first two years of the late Civil War he was connected with the board of town officers. At different times, when serving the town as selectman, he has given satisfaction by faithful and prudent management of affairs. In the fall of 1889 Mr. Swallow was elected to the General Court from the Thirty-first District of Middlesex County.

By occupation Mr. Swallow is a farmer. He inherited a portion of his farm, and has made additions thereto during his life. He is also one of the trustees of the City Savings Bank, of Nashua, N. H.

At the bi-centennial celebration of the town of Dunstable, a very interesting occasion which occurred in 1873, Mr. Swallow was one of the committee of arrangements. He has been a member of the Republican party since its organization, and fills a useful place in the Legislature, where he is a member of the Committee on "Fisheries and Game."

JONAS KENDALL is the third of a family of eight children. He is the son of Jonas and Olive (Butterfield) Kendall, and was born February, 1804, at the homestead of the Kendalls—the English name being Kentdale—in Dunstable, Mass.

At an early age he evinced a decided taste for mechanics, and was not content with a farmer's life. With his parent's consent, he left school and went to Lowell, Mass., where he learned the trade of a blacksmith. From his parents he inherited the qualities of integrity, energy and perseverance. During these years of service manly traits of character were developed. The filial spirit was shown by occasional visits to his parents, and the feeling of attachment to home grew with his years.

When Mr. Kendall's time of service was over he went to Saco, Me., where he remained a short time. He there became acquainted with Miss Caroline Partridge, of Paris, Me., to whom he was afterward married. In 1855 she died, leaving him with two daughters,—Cynthia A. and Elmira C. The former is unmarried; the latter married Edmund E. Stiles; now living in Newtonville, Mass. Mr. and Mrs. Stiles have two sons, named Herbert Kendall and Percy Goldthwait. The first is now in Amherst College, and the second is a member of the High School in Newtonville.

In 1857 Mr. Kendall married Miss Lucy Fletcher, of Amherst, N. H., who died in 1875, leaving no children. Reference has already been made to the fact that Mr. Kendall was one of a family of eight children. His only brother, Chiles, resided in Dunstable, was a deacon of the Congregational Church, and lived to an advanced age. One of his sisters, Olive C. B., married Dr. John Spaulding, who was

secretary of the American Seamen's Society in New York City.

Jonas Kendall's business education was acquired by the study of mechanical works, this study being often protracted into the hours of night. He was aided by a keen observation and contact with mechanical artists. All his efforts were characterized by patient application.

Early in Mr. Kendall's business career he had an urgent invitation to become superintendent of the shops belonging to the Ames Manufacturing Company at Chicopee Falls. That company then manufactured breech-loading carbines, together with various other articles. This position he successfully held until the winter of 1847-48. He was then called to Holyoke by the South Hadley Falls Company to superintend the arranging and building of the large machine-shop of that company, and to fill the same with tools suitable for building cotton machinery. This position he retained till the close of the affairs of the company and the final sale of the property. Immediately he was invited to the superintendency of the Ames Company's shops in Chicopee; accepting, he remained until April, 1862. Then, from excessive labor, his health became so impaired that he was compelled to relinquish business and seek rest. In July of the same year he purchased an estate in South Framingham, to which he at once moved, and where he continues to reside.

At a later period, by relaxation from all care and business, with good medical advice, he so far regained his strength as to act in the capacity of advising engineer in converting the large machine-shop in Holyoke to the well-known Hadley Thread-Mill. Since that time he has been largely engaged in arranging and superintending the building of various dams and mills, in the performance of which he has traveled nearly 60,000 miles.

While at Holyoke he was strongly urged by prominent citizens of that place to accept the position of representative, but felt compelled, much against their wishes, to decline, as business demanded his time.

A few statements from ex-Lieutenant-Governor Weston, of Dalton, Mass., give a good general impression of Mr. Kendall's character and efficiency: "Since a boy I have heard the name of Jonas Kendall used in connection with the names of other wise men, great mechanical and hydraulic engineers, such as John Chase, of Chicopee, and Horatio Tower, of Dalton. He was the man people relied upon to build safe dams and to examine them. To him was left the settlement of disputed questions. He was appointed arbitrator and his decision was law. No one appealed from Jonas Kendall's opinion or judgment. At times he was seemingly cold and stern, but away from business was very entertaining and agreeable. He was a man of temperate habits and wonderful physical endurance. Honesty was a distinguishing trait, and his loyalty to truth was a well-known char-

Jonas Kendall

acteristic. For many years Jonas Kendall was consulted by county commissioners and town and city officials."

The following reminiscences are from Mr. C. W. Ranlet, president of the Hadley Falls National Bank of Holyoke, Mass. These words are well suited to help young men by showing that faithfulness and integrity are foundation stones in successful character building.

"I first became acquainted with Mr. Kendall some time in 1848. He came to Holyoke from the Ames Company, at that time of Chicopee Falls, as assistant in chief of General Agent John Chase—'Uncle John,' as he was generally called, who was the founder and builder of factories and canals in Holyoke. Mr. Kendall occupied the position of master mechanic and superintendent of the machine-shops. The heavy and complicated machinery of the guard-gates, locks and reservoir pumps was designed and built under his oversight and from plans of his own drawing. The water connections from the canals to the several mills were all constructed under his own eye. All these stand complete to-day without a break or serious accident. Mr. Kendall was a man of few words, but when he did speak, those who heard him knew *precisely* what he *meant*. No one ever suspected him of receiving a bribe in the too prevalent form of a 'commission' or *percentage* in purchases or sales, and no one acquainted with him would risk a good trade by such a proposition. If any stranger ever approached Mr. Kendall with an offer of this kind he never did it a second time. For integrity, fair dealing and every quality that constitutes a good citizen, no one in Holyoke stood higher than Jonas Kendall, and no one ever went away with more hearty good wishes from a wide circle of friends and acquaintances."

After making South Framingham his place of residence he was often recalled to Holyoke by the various corporations and mill-owners for consultation, advice and supervision of matters pertaining to hydraulic engineering. A few years after his retirement the great dam showed signs of weakness, and a serious depression appeared near the middle of the dam. Mr. Kendall was summoned by the *new Water Power Co.* for examination and advice. No satisfactory examination could be made without a thorough inspection of the dam itself; and with eighteen inches of water pouring over the crest this was no easy job. But Mr. Kendall was equal to the emergency, and with that determination so characteristic of the man, he proposed to go *through* the dam behind the falling sheet of water. In order to do this, one must crawl the whole length of the dam through open spaces between the timbers, 12 by 24 inches for 1013 feet. The timbers were wet and slimy, the rock-bottom was uneven and slippery, and the confined air both damp and murky. The undertaking was therefore a perilous one for a man of Mr. Kendall's years. Friends tried to dissuade him, and

pointed out the dangers to be encountered, advising the employment of some younger and more robust man. But he could rely upon the reports of no one not familiar with this kind of work. Having provided himself with a rubber suit and a strong staff Mr. Kendall started one morning to go under the dam through an opening in the abutment. Three strong men were employed to follow and render aid in case of accident. Mr. Kendall being rather spare in flesh, but wiry in muscle, went through the open spaces without much difficulty, and soon distanced his followers. He waited, but they did not come up. He called aloud, but no response came. The thirty feet of falling water in front drowned the strongest voice. So Mr. Kendall pushed forward alone, probing the timbers as he went along, to see if they were sound. In the mean time the "*helpers*," who had penetrated about ninety feet, returned much fatigued and badly scared. They reported the entire impracticability of going *through the dam*, and the great dangers attending such an undertaking. People gathered on the river-banks and bulkheads watching for any sign of the explorer. Some scrutinized the rapids to see if any dead body appeared. Along in the afternoon efforts were made to organize an exploring force for the discovery and rescue of the lost engineer; but after the dire accounts of those who returned no one could be found willing to take the risk. About three o'clock in the afternoon Mr. Kendall himself emerged from the opposite abutment amid the shouts of the assembled people. As he ascended the ladder he appeared somewhat fatigued, and, covered as he was with mud and slime, he was not an attractive object to look upon. After a short rest in the sunshine and fresh air he revived, and seemed as "good as new," and jocosely remarked to a friend: "I guess I have broken the record for walking on *at-fours* under trying circumstances." Mr. Kendall made a full report of his investigation to the Water Power Co., and this led to the needed reconstruction of the dam.

In the building of several works there have been those who supposed that Mr. Kendall bestowed too much care and expense. Those works have, however, proved to be of permanent value.

Mr. Kendall has always given freely for the support of the Gospel, has been ever ready to help the needy and has been a generous contributor to benevolent, charitable and all other objects having in view the good of society.

Mr. Kendall, as one of the prominent citizens of South Framingham, was elected to the Legislature in 1872. He has been connected with banks and other places of trust. Several offices tendered to him have been declined. He has not been one to seek office, but office has sought him. Unassuming in manner and averse to notoriety, Mr. Kendall has always possessed the entire confidence of the different communities in which he has resided.
